Background: Part of Romania during the interwar period, Moldova was incorporated into the Soviet Union at the close of World War II. Although the country has been independent from the USSR since 1991, Russian forces have remained on Moldovan territory east of the Nistru River supporting the breakaway region of Transnistria, composed of a Slavic majority population (mostly Ukrainians and Russians), but with a sizable ethnic Moldovan minority. Europe's poorest economy, Moldova became the first former Soviet state to elect a communist, Vladimir VORONIN, as its president in 2001. VORONIN served as Moldova's president until he resigned in September 2009. Four Moldovan opposition parties then formed a new coalition, the Alliance for European Integration (AEI), iterations of which acted as Moldova's governing coalitions over the next several years. In May 2013, two of the original AEI parties and a splinter group from a third re-formed a ruling coalition called the Pro-European Coalition. The Moldovan Government in summer 2014 signed and ratified an Association Agreement with the EU, advancing the Coalition's policy priority of EU integration. Following the country's most recent legislative election in November 2014, the three pro-European parties that entered Parliament won a total of 55 of the body's 101 seats. Infighting among coalition members led to prolonged legislative gridlock and political instability, as well as the collapse of two governments, all ruled by pro-European coalitions centered around the Liberal Democratic Party (PLDM) and the Democratic Party (PDM). A political impasse ended in January 2016 when a new parliamentary majority led by PDM, joined by defectors from the Communists and PLDM, supported Pavel FILIP as prime minister.

Economy—overview: Despite recent progress, Moldova remains one of the poorest countries in Europe. With a moderate climate and productive farmland, Moldova’s economy relies heavily on its agriculture sector, featuring fruits, vegetables, wine, and tobacco. Moldova also depends on annual remittances of about \$1.12 billion from the roughly one million Moldovans working in Europe, Russia, and other former Soviet Bloc countries. With few natural energy resources, Moldova imports almost all of its energy supplies from Russia and Ukraine. Moldova’s dependence on Russian energy is underscored by a more than \$5 billion debt to Russian natural gas supplier Gazprom, largely the result of unreimbursed natural gas consumption in the breakaway region of Transnistria. Moldova and Romania inaugurated the Ungheni-Iasi natural gas interconnector project in August 2014. The 43-kilometer pipeline between Moldova and Romania, allows for both the import and export of natural gas. Several technical and regulatory delays kept gas from flowing into Moldova until March 2015. Romanian gas exports to Moldova are largely symbolic. Moldova hopes to build a pipeline connecting Ungheni to Chisinau, bringing the gas to Moldovan population centers. The government’s stated goal of EU integration has resulted in some market-oriented progress. Moldova experienced better than expected economic growth in 2014 due to increased agriculture production, to economic policies adopted by the Moldovan government since 2009, and to the receipt of EU trade preferences. Moldova signed an Association Agreement and a Deep and Comprehensive Free Trade Agreement with the EU during fall 2014, connecting Moldovan products to the world’s largest market. Still, a \$1 billion asset-stripping heist of Moldovan banks in late 2014 delivered a significant shock to the economy in 2015; a subsequent bank bailout increased inflationary pressures and contributed to the depreciation of the leu. Moldova’s growth has also been hampered by endemic corruption and a Russian import ban on Moldova’s agricultural products.

Over the longer term, Moldova’s economy remains vulnerable to corruption, political uncertainty, weak administrative capacity, vested bureaucratic interests, higher fuel prices, Russian political and economic pressure, and unresolved separatism in Moldova’s

Transnistria region.

Background: The Genoese built a fortress on the site of present day Monaco in 1215. The current ruling GRIMALDI family first seized temporary control in 1297, and again in 1331, but was not able to permanently secure its holding until 1419. Economic development was spurred in the late 19th century with a railroad linkup to France and the opening of a casino. Since then, the principality's mild climate, splendid scenery, and gambling facilities have made Monaco world famous as a tourist and recreation center.

Economy—overview: Monaco, bordering France on the Mediterranean coast, is a popular resort, attracting tourists to its casino and pleasant climate. The principality also is a banking center and has successfully sought to diversify into services and small, high-value-added, nonpolluting industries. The state retains monopolies in a number of sectors, including tobacco, the telephone network, and the postal service. Living standards are high, roughly comparable to those in prosperous French metropolitan areas.

The state has no income tax and low business taxes and thrives as a tax haven both for individuals who have established residence and for foreign companies that have set up businesses and offices. Monaco, however, is not a tax-free shelter; it charges nearly 20% value-added

tax, collects stamp duties, and companies face a 33% tax on profits unless they can show that three-quarters of profits are generated within the principality. Monaco was formally removed from the OECD's "grey list" of uncooperative tax jurisdictions in late 2009, but continues to face international pressure to abandon its banking secrecy laws and help combat tax evasion. In October 2014, Monaco officially became the 84th jurisdiction participating in the OECD's Multilateral Convention on Mutual Administrative Assistance in Tax Matters, an effort to combat offshore tax avoidance and evasion.

Monaco's reliance on tourism and banking for its economic growth has left it vulnerable to a downturn in France and other European economies which are the principality's main trade partners. In 2009, Monaco's GDP fell by 11.5% as the euro-zone crisis precipitated a sharp drop in tourism and retail activity and home sales. A modest recovery ensued in 2010 and intensified in 2013, with GDP growth of more than 9%, but Monaco's economic prospects remain uncertain, and tied to future euro-zone growth.

Background: The Mongols gained fame in the 13th century when under Chinggis KHAAN they established a huge Eurasian empire through conquest. After his death the empire was divided into several powerful Mongol states, but these broke apart in the 14th century. The Mongols eventually retired to their original steppe homelands and in the late 17th century came under Chinese rule. Mongolia won its independence in 1921 with Soviet backing and a communist regime was installed in 1924. The modern country of Mongolia, however, represents only part of the Mongols' historical homeland; today, more ethnic Mongolians live in the Inner Mongolia Autonomous Region in the People's Republic of China than in Mongolia. Following a peaceful democratic revolution in 1990, the ex-communist Mongolian People's Revolutionary Party (MPRP) won most parliamentary elections and stayed in power either governing alone or in coalition. In 2009, current President ELBEGDORJ of the Democratic Party (DP) was elected to office and was re-elected for a second and final term in June 2013. In 2010, the MPRP voted to retake the name of the Mongolian People's Party (MPP), a name it used in the early 1920s. Shortly thereafter, a new party was formed by former President ENKHBAYAR, which confusingly adopted for itself the MPRP name. Following the 2012 parliamentary elections, a coalition of four political parties was

formed but then dissolved in November 2014 when Prime Minister ALTANKHUYAG was voted out of office. A new five-party grand coalition was formed in December 2014 under the leadership of Prime Minister SAIKHANBILEG. The coalition had been expected to last until the next parliamentary elections in the summer of 2016. However, in August 2015, the grand coalition also dissolved, and Prime Minister SAI KHANBILEG took charge of a new governing coalition comprising three parties. Parliamentary elections are scheduled for 29 June 2016.

Economy—overview: Foreign direct investment in Mongolia's extractive industries—which are based on extensive deposits of copper, gold, coal, molybdenum, fluorspar, uranium, tin, and tungsten—has transformed Mongolia's landlocked economy from its traditional dependence on herding and agriculture. Exports now account for more than half of GDP. Mongolia depends on China for more than 60% of its external trade—China receives some 90% of Mongolia's exports and supplies Mongolia with more than one-third of its imports. Mongolia also relies on Russia for 90% of its energy supplies, leaving it vulnerable to price increases. Remittances from Mongolians working abroad, particularly in South Korea, are significant. Soviet assistance, at its height one-third of GDP, disappeared almost overnight in 1990 and 1991 at the time of the dismantlement of the USSR. The following decade saw Mongolia endure both deep recession, because of political inaction, and natural disasters, as well as strong economic growth, because of market reforms and extensive privatization of the formerly state-run economy. The country opened a fledgling stock exchange in 1991. Mongolia joined the WTO in 1997 and seeks to expand its participation in regional economic and trade regimes.

Growth averaged nearly 9% per year in 2004–08 largely because of high copper prices globally and new gold production. By late 2008, Mongolia was hit by the global financial crisis and Mongolia's real economy contracted 1.3% in 2009. In early 2009, the IMF reached a \$236 million Stand-by Arrangement with Mongolia and it emerged from the crisis with a stronger banking sector and better fiscal management. In October 2009, Mongolia passed long-awaited legislation on an investment agreement to develop the Oyu Tolgoi (OT) mine, among the world's largest untapped copper-gold deposits. However, a dispute with foreign investors developing OT called into question the attractiveness of Mongolia as a destination for foreign investment. This caused a severe drop in FDI, and a slowing economy, leading to the dismissal of Prime Minister ALTANKHUYAG in November 2014. The economy had grown more than 10% per year between 2011 and 2013—largely on the strength of commodity exports and high government spending—before slowing to 7.8% in 2014 and 2.3% in 2015.

The current government has made restoring investor trust and reviving the economy its top priority, but has failed to invigorate the economy in the face of the large drop off in foreign direct investment. Mongolia's economy faces near-term economic risks from the government's loose fiscal and monetary policies, from uncertainties in foreign demand for Mongolian exports, and on Mongolia's ability to

access financing. The May 2015 agreement with Rio Tinto to restart the OT mine and the subsequent \$4.4 billion finance package signing in December 2015 have served to increase investor confidence but are unlikely to overcome the downward economic pressures in the shortterm.

Background: The use of the name Crna Gora or Black Mountain (Montenegro) began in the 13th century in reference to a highland region in the Serbian province of Zeta. The later medieval state of Zeta maintained its existence until 1496 when Montenegro finally fell under Ottoman rule. Over subsequent centuries, Montenegro managed to maintain a level of autonomy within the Ottoman Empire. From the 16th to 19th centuries, Montenegro was a theocracy ruled by a series of bishop princes; in 1852, it transformed into a secular principality. Montenegro was recognized as an independent sovereign principality at the Congress of Berlin in 1878. After World War I, during which Montenegro fought on the side of the Allies, Montenegro was absorbed by the Kingdom of Serbs, Croats, and Slovenes, which became the Kingdom of Yugoslavia in 1929; at the conclusion of World War II, it became a constituent republic of the Socialist Federal Republic of Yugoslavia. When the latter dissolved in 1992, Montenegro federated with Serbia, creating the Federal Republic of Yugoslavia and, after 2003, shifting to a looser State Union of Serbia

and Montenegro. In May 2006, Montenegro invoked its right under the Constitutional Charter of Serbia and Montenegro to hold a referendum on independence from the state union. The vote for severing ties with Serbia barely exceeded 55%—the threshold set by the EU—allowing Montenegro to formally restore its independence on 3 June 2006.

Flag description: a red field bordered by a narrow golden-yellow stripe with the Montenegrin coat of arms centered; the arms consist of a double-headed golden eagle—symbolizing the unity of church and state—surmounted by a crown; the eagle holds a golden scepter in its right claw and a blue orb in its left; the breast shield over the eagle shows a golden lion passant on a green field in front of a blue sky; the lion is symbol of episcopal authority and harkens back to the three and a half centuries that Montenegro was ruled as a theocracy

National symbol(s): double-headed eagle; national colors: red, gold

National anthem: *name:* “Oj, svijetla majska zoro” (Oh, Bright Dawn of May)

lyrics/music: Sekula DRLJEVIC/unknown, arranged by Zarko MIKOVIC

note: adopted 2004; music based on a Montenegrin folk song

Economy—overview: Montenegro’s economy is transitioning to a market system. From the beginning of the privatization process in 1999 through 2015, around 85% of Montenegrin state-owned companies have been privatized, including 100% of banking, telecommunications, and oil distribution. Tourism brings in twice as many visitors as Montenegro’s total population every year. Several new luxury tourism complexes are in various stages of development along the coast, and a number are being offered in connection with nearby boating and yachting facilities.

Montenegro uses the euro as its domestic currency, though it is not an official member of the eurozone. In January 2007, Montenegro joined the World Bank and IMF, and in December 2011, the WTO. Montenegro began negotiations to join the EC in June, 2012, having met the conditions set down by the European Council, which called on Montenegro to take steps to fight corruption and organized crime. The government recognizes the need to remove impediments in order to remain competitive and open the economy to foreign investors. The

biggest foreign investors in Montenegro are Italy, Norway, Austria, Russia, Hungary and the UK. Net foreign direct investment in 2014 reached \$483 million and investment per capita is one of the highest in Europe.

Montenegro is currently planning major overhauls of its road and rail networks, and possible expansions of its air transportation system. In 2014, the Government of Montenegro selected two Chinese companies to construct a 41 km-long section of the country's highway system. Construction will cost around \$1.1 billion. Montenegro first instituted a value added tax (VAT) in April 2003, and introduced differentiated VAT rates of 17% and 7% (for tourism) in January 2006. In May 2013, the Montenegrin Government raised the higher level VAT rate to 19%.

Background: English and Irish colonists from St. Kitts first settled on Montserrat in 1632; the first African slaves arrived three decades later. The British and French fought for possession of the island for most of the 18th century, but it finally was confirmed as a British

possession in 1783. The island's sugar plantation economy was converted to small farm landholdings in the mid-19th century. Much of this island was devastated and two-thirds of the population fled abroad because of the eruption of the Soufriere Hills Volcano that began on 18 July 1995. Montserrat has endured volcanic activity since, with the last eruption occurring in July 2003.

Economy—overview: Severe volcanic activity, which began in July 1995, has put a damper on this small, open economy. A catastrophic eruption in June 1997 closed the airport and seaports, causing further economic and social dislocation. Two-thirds of the 12,000 inhabitants fled the island. Some began to return in 1998 but lack of housing limited the number. The agriculture sector continued to be affected by the lack of suitable land for farming and the destruction of crops.

Prospects for the economy depend largely on developments in relation to the volcanic activity and on public sector construction activity. Half of the island remains uninhabitable. In January 2013, the EU announced the disbursement of a \$55.2 million aid package to Montserrat in order to boost the country's economic recovery, with a

specific focus on public finance management, public sector reform, and prudent economic management.

Background: In 788, about a century after the Arab conquest of North Africa, a series of Moroccan Muslim dynasties began to rule in

Morocco. In the 16th century, the Sa'adi monarchy, particularly under Ahmad al-MANSUR (1578–1603), repelled foreign invaders and inaugurated a golden age. The Alaouite Dynasty, to which the current Moroccan royal family belongs, dates from the 17th century. In 1860, Spain occupied northern Morocco and ushered in a half century of trade rivalry among European powers that saw Morocco's sovereignty steadily erode; in 1912, the French imposed a protectorate over the country. A protracted independence struggle with France ended successfully in 1956. The internationalized city of Tangier and most Spanish possessions were turned over to the new country that same year. Sultan MOHAMMEDV, the current monarch's grandfather, organized the new state as a constitutional monarchy and in 1957 assumed the title of king. Since Spain's 1976 withdrawal from what is today called Western Sahara, Morocco has extended its de facto administrative control to roughly 80% of this territory; however, the UN does not recognize Morocco as the administering power for Western Sahara. The UN since 1991 has monitored a cease-fire between Morocco and the Polisario Front—Western Sahara's liberation movement -and leads ongoing negotiations over the status of the territory.

King MOHAMMED VI in early 2011 responded to the spread of pro-democracy protests in the region by implementing a reform program that included a new constitution, passed by popular referendum in July 2011, under which some new powers were extended to parliament and the prime minister but ultimate authority remains in the hands of the monarch. In November 2011, the Justice and Development Party—a moderate Islamist party—won the largest number of seats in parliamentary elections, becoming the first Islamist party to lead the Moroccan Government. In September 2015, Morocco held its first ever direct elections for regional councils, one of the reforms included in the 2011 constitution. Nationwide parliamentary elections are scheduled for October 2016.

Economy—overview: Morocco has capitalized on its proximity to Europe and relatively low labor costs to work towards building a diverse, open, market-oriented economy. Key sectors of the economy include agriculture, tourism, aerospace, automotive, phosphates, textiles, apparel, and subcomponents. Morocco has increased investment in its port, transportation, and industrial infrastructure to position itself as a center and broker for business throughout Africa. Industrial development strategies and infrastructure improvements—

most visibly illustrated by a new port and free trade zone near Tangier —are improving Morocco's competitiveness.

In the 1980s, Morocco was a heavily indebted country before pursuing austerity measures and pro-market reforms, overseen by the IMF. Since taking the throne in 1999, King MOHAMMED VI has presided over a stable economy marked by steady growth, low inflation, and gradually falling unemployment, although poor harvests and economic difficulties in Europe contributed to an economic slowdown. To boost exports, Morocco entered into a bilateral Free Trade Agreement with the US in 2006 and an Advanced Status agreement with the EU in 2008. In late 2014, Morocco eliminated subsidies for gasoline, diesel, and fuel oil, dramatically reducing outlays that weighted on the country's budget and current account. Subsidies on butane gas and certain food products remain in place. Morocco also seeks to expand its renewable energy capacity with a goal of making renewable more than 50% of installed electricity generation capacity by 2030.

Despite Morocco's economic progress, the country suffers from high unemployment, poverty, and illiteracy, particularly in rural areas. Key economic challenges for Morocco include reforming the education system and the judiciary.

Disputes—international: claims and administers Western Sahara whose sovereignty remains unresolved; Morocco protests Spain's control over the coastal enclaves of Ceuta, Melilla, and Penon de Velez de la Gomera, the islands of Penon de Alhucemas and Islas Chafarinas, and surrounding waters; both countries claim Isla Perejil (Leila Island); discussions have not progressed on a comprehensive maritime delimitation, setting limits on resource exploration and refugee interdiction, since Morocco's 2002 rejection of Spain's unilateral designation of a median line from the Canary Islands; Morocco serves as one of the primary launching areas of illegal migration into Spain from North Africa; Algeria's border with Morocco remains an irritant to bilateral relations, each nation accusing the other of harboring militants and arms smuggling; the National Liberation Front's assertions of a claim to Chirac Pastures in southeastern Morocco is a dormant dispute

Illicit drugs: one of the world's largest producers of illicit hashish; shipments of hashish mostly directed to Western Europe; transit point for cocaine from South America destined for Western Europe; significant consumer of cannabis

Background: Almost five centuries as a Portuguese colony came to a close with independence in 1975. Large-scale emigration, economic dependence on South Africa, a severe drought, and a prolonged civil war hindered the country's development until the mid-1990s. The ruling Front for the Liberation of Mozambique (FRELIMO) party formally abandoned Marxism in 1989, and a new constitution the following year provided for multiparty elections and a free market economy. A UN-negotiated peace agreement between FRELIMO and rebel Mozambique National Resistance (RENAMO) forces ended the fighting in 1992. In December 2004, Mozambique underwent a delicate transition as Joaquim CHISSANO stepped down after 18 years in office. His elected successor, Armando GUEBUZA, served two terms and then passed executive power to Philipe NYUSI in October 2014. RENAMO's residual armed forces engaged in a low-level insurgency from 2012 to 2014.

Economy—overview: At independence in 1975, Mozambique was one of the world's poorest countries. Socialist policies, economic mismanagement, and a brutal civil war from 1977 to 1992 further impoverished the country. In 1987, the government embarked on a series of macroeconomic reforms designed to stabilize the economy. These steps, combined with donor assistance and with political stability since the multi-party elections in 1994, propelled the country's GDP from \$4 billion in 1993, following the war, to about \$34 billion in 2015. Fiscal reforms, including the introduction of a value-added tax and reform of the customs service, have improved the government's revenue collection abilities.

In spite of these gains, more than half the population remains below the poverty line. Subsistence agriculture continues to employ the vast majority of the country's work force. Citizens rioted in September 2010 after fuel, water, electricity, and bread price increases were announced. In an attempt to lessen the negative impact on the population, the government implemented subsidies, decreased taxes and tariffs, and instituted other fiscal measures.

A substantial trade imbalance persists, although aluminum production from the Mozal Aluminum Smelter has significantly boosted export earnings in recent years. In 2012, The Mozambican Government took over Portugal's last remaining share in the Cahora Bassa Hydroelectricity Company, a significant contributor to the Southern African Power Pool. The government has plans to expand the Cahora Bassa Dam and build additional dams to increase its electricity exports and fulfill the needs of its burgeoning domestic industries.

Mozambique's once substantial foreign debt was reduced through forgiveness and rescheduling under the IMF's Heavily Indebted Poor Countries (HIPC) and Enhanced HIPC initiatives. However, in 2013, the Mozambique Tuna Company (EMATUM) issued an \$850 million bond fully guaranteed by the Mozambican government primarily for

the purpose of purchasing tuna boats. The government is attempting to reschedule this debt, in the expectation that a pending deal with a consortium led by a US company will provide enough revenue to pay off this debt. The pending deal has the potential to transform Mozambique's economy and dramatically increase GDP.

Mozambique grew at an average annual rate of 6%-8% in the decade up to 2015, one of Africa's strongest performances. Mozambique's ability to attract large investment projects in natural resources is expected to sustain high growth rates in coming years although weaker global demand for commodities is likely to weaken expected revenues from these vast resources, including natural gas, coal, titanium, and hydroelectric capacity.

Illicit drugs: southern African transit point for South Asian hashish and heroin, and South American cocaine probably destined for the European and South African markets; producer of cannabis (for local consumption) and methaqualone (for export to South Africa); corruption and poor regulatory capability make the banking system vulnerable to money laundering, but the lack of a well-developed financial infrastructure limits the country's utility as a money-laundering center

Background: South Africa occupied the German colony of South-West Africa during World War I and administered it as a mandate until after World War II, when it annexed the territory. In 1966, the Marxist South-West Africa People's Organization (SWAPO) guerrilla group launched a war of independence for the area that became Namibia, but it was not until 1988 that South Africa agreed to end its administration in accordance with a UN peace plan for the entire region. Namibia has been governed by SWAPO since the country won independence in 1990, though the party has dropped much of its Marxist ideology. Prime Minister Hage GEINGOB was elected president in November 2014 in a landslide victory, replacing Hifikepunye POHAMBA who stepped down after serving two terms.

SWAPO retained its parliamentary super majority in the November 2014 elections and established a system of gender parity in parliamentary positions.

Economy—overview: The economy is heavily dependent on the extraction and processing of minerals for export. Mining accounts for 11.5% of GDP, but provides more than 50% of foreign exchange earnings. Rich alluvial diamond deposits make Namibia a primary source for gem-quality diamonds. Marine diamond mining is increasingly important as the terrestrial diamond supply has dwindled. The rising cost of mining diamonds, increasingly from the sea, combined with increased diamond production in Russia and China, has reduced profit margins. Namibian authorities have emphasized the need to add value to raw materials, do more in-country manufacturing, and exploit the services market, especially in the logistics and transportation sectors.

Namibia is the world's fifth-largest producer of uranium. The Chinese owned Husab uranium mine is expected to start producing uranium ore in 2017. Once the Husab mine reaches full production, Namibia is expected to become the world's second-largest producer of uranium. Namibia also produces large quantities of zinc and is a smaller producer of gold and copper. The mining and quarrying sectors employ 2% of the population. Namibia's economy remains vulnerable to world commodity price fluctuations, and drought.

Namibia normally imports about 50% of its cereal requirements; in drought years food shortages can be a problem in rural areas. A high per capita GDP, relative to the region, hides one of the world's most unequal income distributions. A priority of the current government is poverty eradication.

A five-year, Millennium Challenge Corporation compact ended in September 2014. As an upper middle income country, Namibia is ineligible for a second compact. The Namibian economy is closely

linked to South Africa with the Namibian dollar pegged one-to-one to the South African rand. Namibia receives 30%–40% of its revenues from the Southern African Customs Union (SACU). Volatility in the size of Namibia's annual SACU allotment complicates budget planning.

Disputes—international: concerns from international experts and local populations over the Okavango Delta ecology in Botswana

and human displacement scuttled Namibian plans to construct a hydroelectric dam on Popa Falls along the Angola-Namibia border; the governments of South Africa and Namibia have not signed or ratified the text of the 1994 Surveyor's General agreement placing the boundary in the middle of the Orange River; Namibia has supported, and in 2004 Zimbabwe dropped objections to, plans between Botswana and Zambia to build a bridge over the Zambezi River, thereby de facto recognizing a short, but not clearly delimited, Botswana-Zambia boundary in the river

Trafficking in persons: *current situation:* Namibia is a country of origin and destination for children and, to a lesser extent, women subjected to forced labor and sex trafficking; victims, lured by promises of legitimate jobs, are forced to work in urban centers and on commercial farms; traffickers exploit Namibian children, as well as children from Angola, Zambia, and Zimbabwe, for forced labor in agriculture, cattle herding, domestic service, fishing, and street vending; children are also forced into prostitution, often catering to tourists from southern Africa and Europe; San and Zemba children are particularly vulnerable; foreign adults and Namibian adults and children are reportedly subjected to forced labor in Chinese-owned retail, construction, and fishing operations

tier rating: Tier 2 Watch List—Namibia does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; Namibia was granted a waiver from an otherwise required downgrade to Tier 3 because its government has a written plan that, if implemented would constitute making significant efforts to bring itself into compliance with the minimum standards for the elimination of trafficking; in 2015, the Child Care and Protection Bill passed, criminalizing child trafficking; the government's first sex trafficking prosecution remained pending; no new prosecutions were initiated and no trafficking offenders have ever been convicted; accusations of forced labor at Chinese construction and mining companies continue to go uninvestigated; authorities failed to fully implement victim identification and referral processes, which led to the deportation of possible victims (2015)

Background: The exact origins of the Nauruans are unclear since their language does not resemble any other in the Pacific region. Germany annexed the island in 1888. A German-British consortium began mining the island's phosphate deposits early in the 20th century. Australian forces occupied Nauru in World War I; it subsequently became a League of Nations mandate. After the Second World War—and a brutal occupation by Japan—Nauru became a UN trust territory. It achieved independence in 1968 and joined the UN in 1999 as the world's smallest independent republic.

Economy—overview: Revenues of this tiny island—a coral atoll with a land area of 21 square kilometers—traditionally have come from exports of phosphates. Few other resources exist, with most necessities being imported, mainly from Australia, its former occupier and later major source of support. Primary reserves of phosphates were exhausted and mining ceased in 2006, but mining of a deeper layer of "secondary phosphate" in the interior of the island began the following year. The secondary phosphate deposits may last another 30 years. Earnings from Nauru's export of phosphate remains an important source of income. Few comprehensive statistics on the Nauru economy exist; estimates of Nauru's GDP vary widely. The rehabilitation of mined land and the replacement of income from phosphates are serious long-term problems. In anticipation of the exhaustion of Nauru's phosphate deposits, substantial amounts of

phosphate income were invested in trust funds to help cushion the transition and provide for Nauru's economic future.

Although revenue sources for government are limited, the opening of the Australian Regional Processing Center for asylum seekers since 2012 has sparked growth in the economy. Revenue derived from fishing licenses under the "vessel day scheme" has also boosted government income. Housing, hospitals, and other capital plant are deteriorating. The cost to Australia of keeping the government and economy afloat continues to climb.

Background: This uninhabited island was claimed by the US in 1857 for its guano. Mining took place between 1865 and 1898. The lighthouse, built in 1917, was shut down in 1996 and administration of Navassa Island transferred from the US Coast Guard to the Department of the Interior, Office of Insular Affairs. A 1998 scientific expedition to the island described it as a “unique preserve of Caribbean biodiversity. “The following year it became a National Wildlife Refuge and annual scientific expeditions have continued.

Background: In 1951, the Nepali monarch ended the century-old system of rule by hereditary premiers and instituted a cabinet system that brought political parties into the government. That arrangement lasted until 1960, when political parties were again banned, but was reinstated in 1990 with the establishment of a multiparty democracy within the framework of a constitutional monarchy. An insurgency led by Maoists broke out in 1996. The ensuing 10-year civil war between Maoist and government forces witnessed the dissolution of the cabinet and parliament and the re-assumption of absolute power by the king in 2002. Several weeks of mass protests in April 2006 were followed by several months of peace negotiations between the Maoists and government officials, and culminated in a late 2006 peace accord and the 2007 promulgation of an interim constitution. Following a nationwide Constituent Assembly (CA) election in 2008, the newly formed CA declared Nepal a federal democratic republic, abolished the monarchy, and elected the country's first president. After the CA failed to draft a constitution by a May 2012 deadline set by the Supreme Court, then-Prime Minister Baburam BHATTARAI dissolved the CA. Months of negotiations ensued until March 2013 when the major political parties agreed to create an interim government headed by then-Chief Justice Khil Raj REGMI with a mandate to hold elections for a new CA. Elections were held in November 2013, in which the Nepali Congress won the largest share of seats in the CA and in February 2014 formed a coalition government with the second place Communist Party of Nepal-Unified Marxist-Leninist and with Nepali Congress President Sushil KOIRALA as prime minister. Nepal's new constitution came into effect in September 2015.

Flag description: red with a blue border around the unique shape of two overlapping right triangles; the smaller, upper triangle bears a white stylized moon and the larger, lower triangle displays a white 12-pointed sun; the color red represents the rhododendron (Nepal's national flower) and is a sign of victory and bravery, the blue border signifies peace and harmony; the two right triangles are a combination of two single pennons (pennants) that originally symbolized the Himalaya Mountains while their charges represented the families of the king (upper) and the prime minister, but today they are understood to denote Hinduism and Buddhism, the country's two main religions; the moon represents the serenity of the Nepalese people and the shade and cool weather in the Himalayas, while the sun depicts the heat and higher temperatures of the lower parts of Nepal; the moon and the sun are also said to express the hope that the nation will endure as long as these heavenly bodies

note: Nepal is the only country in the world whose flag is not rectangular or square

National symbol(s): rhododendron blossom; national color: red

National anthem: *name:* "Sayaun Thunga Phool Ka" (Hundreds of Flowers)

lyrics/music: Pradeep Kumar RAI/Ambar GURUNG

note: adopted 2007; after the abolition of the monarchy in 2006, a new anthem was required because of the previous anthem's praise for the king

Economy—overview: Nepal is among the poorest and least developed countries in the world, with about one-quarter of its population living below the poverty line. Nepal is heavily dependent on remittances, which amount to as much as 29% of GDP. Agriculture is the mainstay of the economy, providing a livelihood for almost 70% of the population and accounting for about one-third of GDP.

Industrial activity mainly involves the processing of agricultural products, including pulses, jute, sugarcane, tobacco, and grain. Nepal has considerable scope for exploiting its potential in hydropower, with an estimated 42,000 MW of commercially feasible capacity. Nepal and India signed trade and investment agreements in 2014 that increase Nepal's hydropower potential, but political uncertainty and a difficult business climate have hampered foreign investment.

Nepal was hit by massive earthquakes in early 2015, which damaged or destroyed infrastructure and homes and set back economic development. Political gridlock in the past several years and recent public protests, predominantly in the southern Tarai region, have hindered post-earthquake recovery and prevented much-needed economic reform. Additional challenges to Nepal's growth include its landlocked geographic location, persistent power shortages, and underdeveloped transportation infrastructure.

Illicit drugs: illicit producer of cannabis and hashish for the domestic and international drug markets; transit point for opiates from Southeast Asia to the West

Background: The Dutch United Provinces declared their independence from Spain in 1579; during the 17th century, they became a leading seafaring and commercial power, with settlements and colonies around the world. After a 20-year French occupation, a

Kingdom of the Netherlands was formed in 1815. In 1830, Belgium seceded and formed a separate kingdom. The Netherlands remained neutral in World War I, but suffered German invasion and occupation in World War II. A modern, industrialized nation, the Netherlands is also a large exporter of agricultural products. The country was a founding member of NATO and the EEC (now the EU) and participated in the introduction of the euro in 1999. In October 2010, the former Netherlands Antilles was dissolved and the three smallest islands—Bonaire, Sint Eustatius, and Saba—became special municipalities in the Netherlands administrative structure. The larger islands of Sint Maarten and Curacao joined the Netherlands and Aruba as constituent countries forming the Kingdom of the Netherlands.

Country name: *conventional long form*: Kingdom of the Netherlands

conventional short form: Netherlands

local long form: Koninkrijk der Nederlanden

local short form: Nederland

etymology: the country name literally means “the lowlands” and refers to the geographic features of the land being both flat and down river from higher areas (i.e., at the estuaries of the Scheldt, Meuse, and Rhine Rivers; only about half of the Netherlands is more than 1 meter above sea level)

Government type: parliamentary constitutional monarchy; part of the Kingdom of the Netherlands

Capital: *name:* Amsterdam; *note*—The Hague is the seat of government

Geographic coordinates: 52 21 N, 4 55 E

time difference: UTC + 1 (6 hours ahead of Washington, DC, during Standard Time)

daylight saving time: +1hr, begins last Sunday in March; ends last Sunday in October

note: time descriptions apply to the continental Netherlands only, not to the Caribbean components

Administrative divisions: 12 provinces (provincies, singular —provincie); Drenthe, Flevoland, Fryslan (Friesland), Gelderland, Groningen, Limburg, Noord-Brabant (North Brabant), Noord-Holland (North Holland), Overijssel, Utrecht, Zeeland (Zealand), Zuid-Holland (South Holland)

note 1: the Netherlands is one of four constituent parts (countries) of the Kingdom of the Netherlands; the other three parts, Aruba, Curacao, and Sint Maarten, are all islands in the Caribbean; while all four parts are considered equal partners, in practice, most of the Kingdom's affairs are administered by the Netherlands, which makes up about 98% of the Kingdom's total land area and population

note 2: three other Caribbean islands, Bonaire, Saint Eustatius, and Saba, are considered to be special municipalities of the Netherlands proper

Dependent areas: Aruba, Curacao, Sint Maarten

Independence: 23 January 1579 (the northern provinces of the Low Countries conclude the Union of Utrecht breaking with Spain; on 26 July 1581 they formally declared their independence with an Act of Abjuration; however, it was not until 30 January 1648 and the Peace of Westphalia that Spain recognized this independence)

National holiday: King's Day (the King's birthday of 27 April (1967); celebrated on 26 April if 27 April is a Sunday)

Constitution: previous 1597, 1798; latest adopted 24 August

1815 (substantially revised in 1848); amended many times, last in 2010 (2016)

Legal system: civil law system based on the French system; constitution does not permit judicial review of acts of the States General

International law organization participation: accepts compulsory ICJ jurisdiction with reservations; accepts ICCT jurisdiction

Citizenship: *citizenship by birth:* no

citizenship by descent only: at least one parent must be a citizen of the Netherlands

dual citizenship recognized: no

residency requirement for naturalization: 5 years

Suffrage: 18 years of age; universal

Executive branch: *chief of state:* King WILLEM-ALEXANDER (since 30 April 2013); Heir Apparent Princess Catharina-Amalia (since 30 April 2013)

head of government: Prime Minister Mark RUTTE (since 14 October 2010); Deputy Prime Minister Lodewijk ASSCHER (since 5 November 2012); note—Mark RUTTE heads his second cabinet since 5 November 2012

cabinet: Council of Ministers appointed by the monarch; note—there is also a Council of State composed of the monarch, heir apparent, and councilors that provides advice to the cabinet on legislative and administrative policy

elections/appointments: the monarchy is hereditary; following Second Chamber elections, the leader of the majority party or majority coalition usually appointed prime minister by the monarch; deputy prime ministers appointed by the monarch

Legislative branch: *description:* bicameral States General or Staten Generaal consists of the First Chamber or Eerste Kamer (75 seats; members indirectly elected by the country's 12 provincial council members by proportional representation vote; members serve 4-year terms) and the Second Chamber or Tweede Kamer (150 seats; members directly elected in multi-seat constituencies by proportional representation vote to serve up to 4-year terms)

elections: First Chamber—last held on 26 May 2015 (next to be held in May 2019); Second Chamber -last held on 12 September 2012 (next to be held no later than 15 March 2017)

election results: First Chamber—percent of vote by party—NA; seats by

party—VVD 13, CDA 12, D66 10, PVV 9, SP 9, PvdA 8, GL 4, CU 3, other 7; Second Chamber—percent of vote by party—VVD 26.6%, PvdA 24.8%, PVV, 10.1%, SP 9.7%, CDA 8.5%, D66 8.0%, CU 3.1%, GL 2.3%, other 6.9%; seats by party—VVD 41, PvdA 38, PVV 15, SP 15, CDA 13, D66 12, CU 5, GL 4, other 7

Judicial branch: *highest court(s):* Supreme Court or Hoge Raad (consists of 41 judges: the president, 6 vice-presidents, 31 justices or raadsheren, and 3 justices in exceptional service, referred to as buitengewone dienst); the court is divided into criminal, civil, tax, and ombuds chambers

Flag description: three equal horizontal bands of red (top), white, and blue; similar to the flag of Luxembourg, which uses a lighter blue and is longer; the colors were those of WILLIAM I, Prince of Orange, who led the Dutch Revolt against Spanish sovereignty in the latter half of the 16th century; originally the upper band was orange, but because it tended to fade to red over time, the red shade was eventually made the permanent color; the banner is perhaps the oldest tricolor in continuous use

National symbol(s): lion, tulip; national color: orange

National anthem: *name:* "Het Wilhelmus" (The William)

lyrics/music: Philips VAN MARNIX van Sint Aldegonde (presumed)/unknown

note: adopted 1932, in use since the 17th century, making it the oldest national anthem in the world; also known as "Wilhelmus van Nassouwe" (William of Nassau), it is in the form of an acrostic, where

the first letter of each stanza spells the name of the leader of the Dutch Revolt

Economy—overview: The Netherlands, the sixth-largest economy in the European Union, plays an important role as a European transportation hub, with a persistently high trade surplus, stable industrial relations, and moderate unemployment. Industry focuses on food processing, chemicals, petroleum refining, and electrical machinery. A highly mechanized agricultural sector employs only 2% of the labor force but provides large surpluses for food-processing and underpins the country's status as the world's second largest agricultural exporter.

The Netherlands is part of the eurozone, and as such, its monetary policy is controlled by the European Central Bank. The Dutch financial sector is highly concentrated, with four commercial banks possessing over 90% of banking assets. The sector suffered as a result of the global financial crisis and required billions of dollars of government support, but the European Banking Authority completed stringent reviews in 2014 and deemed Dutch banks to be well-capitalized. To address the 2009 and 2010 economic downturns, the government sought to stimulate the domestic economy by accelerating infrastructure programs, offering corporate tax breaks for employers to retain workers, and expanding export credits. The stimulus programs and bank bailouts, however, resulted in a government budget deficit of 5.3% of GDP in 2010 that contrasted sharply with a surplus of 0.7% in 2008.

The government of Prime Minister Mark RUTTE has since implemented significant austerity measures to improve public finances and has instituted broad structural reforms in key policy areas, including the labor market, the housing sector, the energy market, and the pension system. As a result, the government budget deficit at the end of 2015 dropped to 2% of GDP. Following a protracted recession during which unemployment doubled to 7.4% and household consumption contracted for nearly three consecutive years, 2014 saw fragile GDP growth of 1% and a rise in most economic indicators. Growth picked up in 2015 as households boosted purchases through reduced saving. Drivers of growth included increased exports and business investments, as well as newly invigorated household consumption.

Illicit drugs: major European producer of synthetic drugs, including ecstasy, and cannabis cultivator; important gateway for cocaine, heroin, and hashish entering Europe; major source of US-bound ecstasy; large financial sector vulnerable to money laundering; significant consumer of ecstasy

Background: Settled by both Britain and France during the first half of the 19th century, the island became a French possession in 1853. It served as a penal colony for four decades after 1864. Agitation for independence during the 1980s and early 1990s ended in the 1998 Noumea Accord, which over a period of 15 to 20 years will transfer an increasing amount of governing responsibility from France to New Caledonia. The agreement also commits France to conduct a referendum between 2014 and 2018 to decide whether New Caledonia should assume full sovereignty and independence.

Flag description: New Caledonia has two official flags; alongside the flag of France, the Kanak (indigenous Melanesian) flag has equal status; the latter consists of three equal horizontal bands of blue (top), red, and green; a large yellow disk—diameter two-thirds the height of the flag—shifted slightly to the hoist side is edged in black and displays a black fleche faitiere symbol, a native rooftop adornment

National symbol(s): fleche faitiere (native rooftop adornment), kagu bird; national colors: blue, red, green, yellow, black

National anthem: *name:* “Soyons unis, devenons freres” (Let Us Be United, Let Us Become Brothers)

lyrics/music: Chorale Melodia (a local choir)

note: adopted 2008; contains a mixture of lyrics in both French and Nengone (an indigenous language); as a self-governing territory of France, in addition to the local anthem, “La Marseillaise” is official (see France)

Economy—overview: New Caledonia has about 25% of the world’s known nickel reserves. Only a small amount of the land is suitable for cultivation, and food accounts for about 20% of imports. In addition to nickel, substantial financial support from France—equal to more than 15% of GDP—and tourism are keys to the health of the economy.

During 2009–10, France sent more development assistance to New Caledonia than to any of its other overseas territories. In October 2014, French Prime Minister Manuel VALLS confirmed financial support to New Caledonia totaling \$500 million for the period 2016–20. The new government, which inherited a \$112 million deficit in 2013, is expected to focus on bringing the territory’s budget back into balance. Substantial new investment in the nickel industry—including two major new plants—combined with the recovery of global nickel prices, has brightened the economic outlook for the next several years. In 2015, New Caledonia helped fill China’s shortfall in nickel supplies left by an Indonesian ban on nickel ore exports.

Disputes—international: Matthew and Hunter Islands east of New Caledonia claimed by France and Vanuatu

Background: The Polynesian Maori reached New Zealand in about A.D.800. In 1840, their chieftains entered into a compact with Britain, the Treaty of Waitangi, in which they ceded sovereignty to Queen Victoria while retaining territorial rights. That same year, the British began the first organized colonial settlement. A series of land wars between 1843 and 1872 ended with the defeat of the native peoples. The British colony of New Zealand became an independent dominion in 1907 and supported the UK militarily in both world wars. New Zealand's full participation in a number of defense alliances lapsed by the 1980s. In recent years, the government has sought to address longstanding Maori grievances. New Zealand assumed a nonpermanent seat on the UN Security Council for the 2015–16 term.

note: adopted 1940 as national song, adopted 1977 as co-national anthem; New Zealand has two national anthems with equal status; as a commonwealth realm, in addition to “God Defend New Zealand,” “God Save the Queen” serves as a national anthem (see United Kingdom); “God Save the Queen” normally played only when a member of the royal family or the governor-general is present; in all other cases, “God Defend New Zealand” is played

Economy—overview: Over the past 30 years, the government has transformed New Zealand from an agrarian economy, dependent on concessionary British market access, to a more industrialized, free market economy that can compete globally. This dynamic growth has boosted real incomes—but left behind some at the bottom of the ladder—and broadened and deepened the technological capabilities of the industrial sector. Per capita income rose for ten consecutive years until 2007 in purchasing power parity terms, but fell in 2008–09. Debt-driven consumer spending drove robust growth in the first half of the decade, fueling a large balance of payments deficit that posed a challenge for policymakers. Inflationary pressures caused the central bank to raise its key rate steadily from January 2004 until it was among the highest in the OECD in 2007–08. The higher rate attracted international capital inflows, which strengthened the currency and housing market while aggravating the current account deficit.

The economy fell into recession before the start of the global financial crisis and contracted for five consecutive quarters in 2008–09. In line with global peers, the central bank cut interest rates aggressively and the government developed fiscal stimulus measures. The economy pulled out of recession in 2009, and achieved 2%-3% growth from 2011 to 2015. Nevertheless, key trade sectors remain vulnerable to weak external demand and lower commodity prices. In the aftermath of the 2010 Canterbury earthquakes, the government has continued programs to expand export markets, develop capital markets, invest in innovation, raise productivity growth, and develop infrastructure, while easing its fiscal austerity.

Background: The Pacific coast of Nicaragua was settled as a Spanish colony from Panama in the early 16th century. Independence from Spain was declared in 1821 and the country became an independent republic in 1838. Britain occupied the Caribbean Coast in the first half of the 19th century, but gradually ceded control of the region in subsequent decades. Violent opposition to governmental manipulation and corruption spread to all classes by 1978 and resulted in a short-lived civil war that brought the Marxist Sandinista guerrillas to power in 1979. Nicaraguan aid to leftist rebels in El Salvador prompted the US to sponsor anti-Sandinista contra guerrillas through much of the 1980s. After losing free and fair elections in 1990, 1996, and 2001, former Sandinista President Daniel ORTEGA Saavedra was elected president in 2006 and reelected in 2011. The 2008 municipal elections, 2010 regional elections, 2011 presidential election, 2012 municipal elections, and 2013 regional elections were marred by widespread irregularities. Nicaragua's infrastructure and economy—hard hit by the earlier civil war and by Hurricane Mitch in

1998—are slowly being rebuilt, but democratic institutions have been weakened under the ORTEGA administration.

Demographic profile: Despite being one of the poorest countries in Latin America, Nicaragua has improved its access to potable water and sanitation and has ameliorated its life expectancy, infant and child mortality, and immunization rates. However, income

distribution is very uneven, and the poor, agriculturalists, and indigenous people continue to have less access to healthcare services. Nicaragua's total fertility rate has fallen from around 6 children per woman in 1980 to just above replacement level today, but the high birth rate among adolescents perpetuates a cycle of poverty and low educational attainment.

Nicaraguans emigrate primarily to Costa Rica and to a lesser extent the United States. Nicaraguan men have been migrating seasonally to Costa Rica to harvest bananas and coffee since the early 20th century. Political turmoil, civil war, and natural disasters from the 1970s through the 1990s dramatically increased the flow of refugees and permanent migrants seeking jobs, higher wages, and better social and healthcare benefits. Since 2000, Nicaraguan emigration to Costa Rica has slowed and stabilized. Today roughly 300,000 Nicaraguans are permanent residents of Costa Rica—about 75% of the foreign population—and thousands more migrate seasonally for work, many illegally.

Flag description: three equal horizontal bands of blue (top), white, and blue with the national coat of arms centered in the white band; the coat of arms features a triangle encircled by the words REPUBLICA DE NICARAGUA on the top and AMERICA CENTRAL on the bottom; the banner is based on the former blue-white-blue flag of the Federal Republic of Central America; the blue bands symbolize the Pacific Ocean and the Caribbean Sea, while the white band represents the land between the two bodies of water

note: similar to the flag of El Salvador, which features a round emblem encircled by the words REPUBLICA DE EL SALVADOR EN LA AMERICA CENTRAL centered in the white band; also similar to the flag of Honduras, which has five blue stars arranged in an X pattern centered in the white band

National symbol(s): turquoise-browed motmot (bird); national colors: blue, white

National anthem: *name:* “Salve a ti, Nicaragua” (Hail to Thee, Nicaragua)

lyrics/music: Salomon Ibarra MAYORGA/traditional, arranged by Luis Abraham DELGADILLO

note: although only officially adopted in 1971, the music was approved in 1918 and the lyrics in 1939; the tune, originally from Spain, was used as an anthem for Nicaragua from the 1830s until 1876

Economy—overview: Nicaragua, the poorest country in Central America and the second poorest in the Western Hemisphere, has widespread underemployment and poverty. Textiles and agriculture combined account for nearly 50% of Nicaragua’s exports.

The Dominican Republic-Central America-United States Free Trade Agreement (CAFTA-DR) has been in effect since April 2006 and has expanded export opportunities for many Nicaraguan agricultural and manufactured goods.

In 2013, the government granted a 50-year concession to a newly formed Chinese-run company to finance and build an inter-oceanic

canal and related projects, at an estimated cost of \$50 billion. The canal construction has not started.

Disputes—international: the 1992 ICJ ruling for El Salvador and Honduras advised a tripartite resolution to establish a maritime boundary in the Gulf of Fonseca, which considers Honduran access to the Pacific; Nicaragua and Costa Rica regularly file border dispute cases over the delimitations of the San Juan River and the northern tip of Calero Island to the ICJ; in 2009, the ICJ ruled that Costa Rican vessels carrying out police activities could not use the river, but official Costa Rican vessels providing essential services to riverside inhabitants and Costa Rican tourists could travel freely on the river; in 2011, the ICJ provisionally ruled that both countries must remove personnel from the disputed area; in 2013, the ICJ rejected Nicaragua's 2012 suit to halt Costa Rica's construction of a highway paralleling the river on the grounds of irreparable environmental damage; in 2013, the ICJ, regarding the disputed territory, ordered that Nicaragua should refrain from dredging or canal construction and refill and repair damage caused by trenches connecting the river to the Caribbean and upheld its 2010 ruling that Nicaragua must remove all personnel; in early 2014, Costa Rica brought Nicaragua to the ICJ over offshore oil concessions in the disputed region

Background: Niger became independent from France in 1960 and experienced single-party and military rule until 1991, when Gen. Ali SAIBOU was forced by public pressure to allow multiparty elections, which resulted in a democratic government in 1993. Political infighting brought the government to a standstill and in 1996 led to a coup by Col. Ibrahim BARE. In 1999, BARE was killed in a counter coup by military officers who restored democratic rule and held elections that brought Mamadou TANDJA to power in December of that year. TANDJA was reelected in 2004 and in 2009 spearheaded a constitutional amendment allowing him to extend his term as president. In February 2010, military officers led a coup that deposed TANDJA and suspended the constitution. ISSO UFOU Mahamadou was elected in April 2011 following the coup and reelected to a second term in early 2016. Niger is one of the poorest countries in the world with minimal government services and insufficient funds to develop its resource base. The largely agrarian and subsistence-based economy is frequently disrupted by extended droughts common to the Sahel

region of Africa. A Tuareg rebellion emerged in 2007 and ended in 2009. Niger is facing increased security concerns on its borders from various external threats including insecurity in Libya, spillover from the conflict in Mali, and violent extremism in northeastern Nigeria.

Economy—overview: Niger is a landlocked, sub-Saharan nation, whose economy centers on subsistence crops, livestock, and some of the world’s largest uranium deposits. Agriculture contributes nearly 40% of GDP and provides livelihood for most of the population. The UN ranked Niger as the least developed country in the world in 2015 due to multiple factors such as food insecurity, lack of industry, high population growth, a weak educational sector, and few prospects for work outside of subsistence farming and herding.

Since 2011 public debt has increased due to efforts to scale-up public investment, particularly that related to infrastructure. The government relies on foreign donor resources for a large portion of its fiscal budget. The economy in recent years has been hurt by terrorist activity and kidnappings near its uranium mines and by instability in Mali and in the Diffa region of the country; concerns about security have resulted in increased support from regional and international partners on defense. Low uranium prices, demographics, and security expenditures may continue to put pressure on the government’s finances.

Future growth may be sustained by exploitation of oil, gold, coal, and other mineral resources. Although Niger has sizable reserves of oil, the profitability of these commodities has been called in to question due to the prolonged drop in oil prices. Food insecurity and drought remain perennial problems for Niger, and the government plans to invest a little more in the agriculture sector, most notably irrigation. Niger’s three-year \$131 million IMF Extended Credit Facility agreement for years 2012–15 was extended until the end of 2016, although formal private sector investment needed for economic diversification and growth remains a challenge, given the country’s limited domestic markets, access to credit, and competitiveness.

Background: British influence and control over what would become Nigeria and Africa's most populous country grew through the 19th century. A series of constitutions after World War II granted Nigeria greater autonomy. After independence in 1960, politics were marked by coups and mostly military rule, until the death of a military head of state in 1998 allowed for a political transition. In 1999, a new constitution was adopted and a peaceful transition to civilian government was completed. The government continues to face the daunting task of institutionalizing democracy and reforming a petroleum-based economy, whose revenues have been squandered through corruption and mismanagement. In addition, Nigeria continues to experience longstanding ethnic and religious tensions. Although both the 2003 and 2007 presidential elections were marred by significant irregularities and violence, Nigeria is currently experiencing its longest period of civilian rule since independence. The general elections of April 2007 marked the first civilian-to-civilian transfer of power in the country's history and the elections of 2011

were generally regarded as credible. The 2015 election is considered the most well run in Nigeria since the return to civilian rule, with the umbrella opposition party, the All Progressives Congress, defeating the long-ruling Peoples Democratic Party that had governed since 1999.

Economy—overview: Following an April 2014 statistical “rebasings” exercise, Nigeria has emerged as Africa’s largest economy, with 2015 GDP estimated at \$1.1 trillion. Oil has been a dominant source of income and government revenues since the 1970s. Following the 2008–9 global financial crises, the banking sector was effectively recapitalized and regulation enhanced. Nigeria’s economic growth over the last five years has been driven by growth in agriculture, telecommunications, and services. Economic diversification and strong growth have not translated into a significant decline in poverty levels, however—over 62% of Nigeria’s 170 million people still live in extreme poverty.

Despite its strong fundamentals, oil-rich Nigeria has been hobbled by inadequate power supply, lack of infrastructure, delays in the passage of legislative reforms, an inefficient property registration system, restrictive trade policies, an inconsistent regulatory environment, a slow and ineffective judicial system, unreliable dispute resolution mechanisms, insecurity, and pervasive corruption. Regulatory constraints and security risks have limited new investment in oil and natural gas, and Nigeria’s oil production has contracted every year since 2012.

Because of lower oil prices, GDP growth in 2015 fell to around 3%, and government revenues declined, while the nonoil sector also contracted due to economic policy uncertainty. President BU HARI, elected in March 2015, has established a cabinet of economic ministers that includes several technocrats, and he has announced plans to increase transparency, diversify the economy away from oil, and improve fiscal management. The government is working to develop stronger public-private partnerships for roads, agriculture, and power. The medium-term outlook for Nigeria is positive, assuming oil output stabilizes and oil prices recover

Background: Niue's remoteness, as well as cultural and linguistic differences between its Polynesian inhabitants and those of the adjacent Cook Islands, has caused it to be separately administered by New Zealand. The population of the island continues to drop (from a peak of 5,200 in 1966 to an estimated 1,190 in 2014) with substantial emigration to New Zealand 2,400 km to the southwest.

Economy—overview: The economy suffers from the typical Pacific island problems of geographic isolation, few resources, and a small population. The agricultural sector consists mainly of subsistence gardening, although some cash crops are grown for export. Industry consists primarily of small factories for processing passion fruit, lime oil, honey, and coconut cream. The sale of postage stamps to foreign collectors is an important source of revenue.

Government expenditures regularly exceed revenues, and the shortfall is made up by critically needed grants from New Zealand that are used to pay wages to public employees. Economic aid allocation from New Zealand in FY13/14 was US\$10.1 million. Niue has cut government expenditures by reducing the public service by almost half.

The island in recent years has suffered a serious loss of population because of emigration to New Zealand. Efforts to increase GDP include the promotion of tourism and financial services, although the International Banking Repeal Act of 2002 resulted in the termination of all offshore banking licenses.

Flag description: three vertical bands of green (hoist side), white, and green with a large green Norfolk Island pine tree centered in the slightly wider white band; green stands for the rich vegetation on the island, and the pine tree—endemic to the island—is a symbol of Norfolk Island

note: somewhat reminiscent of the flag of Canada with its use of only two colors and depiction of a prominent local floral symbol in the central white band; also resembles the green and white triband of Nigeria

National symbol(s): Norfolk Island Pine

National anthem: *name:* “Come Ye Blessed”

lyrics/music: New Testament/John Prindle SCOTT

note: the local anthem, whose lyrics consist of the words from Matthew 25: 34–36, 40, is also known as “The Pitcairn Anthem;” as a territory of Australia, “God Save the Queen” is official (see Australia); however, the island does not recognize “Advance Australia Fair”

Economy—overview: Norfolk Island is suffering from a severe economic downturn. Tourism, the primary economic activity, is the main driver of economic growth. The agricultural sector has become self-sufficient in the production of beef, poultry, and eggs.

Background: Under US administration as part of the UN Trust Territory of the Pacific, the people of the Northern Mariana Islands decided in the 1970s not to seek independence but instead to forge closer links with the US. Negotiations for territorial status began in 1972. A covenant to establish a commonwealth in political union with the US was approved in 1975, and came into force on 24 March 1976. A new government and constitution went into effect in 1978.

lyrics/music: Jose S. PANGELINAN [Chamoru], David PETER [Carolinian]/Wilhelm GANZHORN

note: adopted 1996; the Carolinian version of the song is known as “Satil Matawal Pacifico;” as a commonwealth of the US, in addition to the local anthem, “The Star-Spangled Banner” is official (see United States)

Economy—overview: The Northern Mariana Islands’ economy benefits substantially from financial assistance from the US. In fiscal year 2013, federal grants accounted for 35.4% of the Commonwealth’s total revenues. A small agriculture sector is made up of cattle ranches and small farms producing coconuts, breadfruit, tomatoes, and melons.

The Commonwealth’s economy continued to recover in 2013. Real GDP increased 4.4%, following a 2.1% gain in 2012. Economic growth in 2013 reflected increases in consumer spending and exports of services, mainly spending by foreign tourists.

Tourism continued to grow in 2013, after posting double-digit growth in 2012. The tourist industry employs approximately a quarter of the work force and accounts for roughly one-fourth of GDP. The Commonwealth is making a concerted effort to broaden its tourism by extending casino gambling from the small Islands of Tinian and Rota to the main Island of Saipan, its political and commercial center.

Background: Two centuries of Viking raids into Europe tapered off following the adoption of Christianity by King Olav TRYGGVASON in 994; conversion of the Norwegian kingdom occurred over the next several decades. In 1397, Norway was absorbed into a union with Denmark that lasted more than four centuries. In 1814, Norwegians resisted the cession of their country to Sweden and adopted a new constitution. Sweden then invaded Norway but agreed to let Norway keep its constitution in return for accepting the union under a Swedish king. Rising nationalism throughout the 19th century led to a 1905 referendum granting Norway independence. Although Norway remained neutral in World War I, it suffered heavy losses to its shipping. Norway proclaimed its neutrality at the outset of World War II, but was nonetheless occupied for five years by Nazi Germany (1940–45). In 1949, Norway abandoned neutrality and became a member of NATO. Discovery of oil and gas in adjacent waters in the late 1960s boosted Norway's economic fortunes. In referenda held in 1972 and 1994, Norway rejected joining the EU. Key domestic issues include immigration and integration of ethnic minorities, maintaining the country's extensive social safety net with an aging population, and preserving economic competitiveness.

Economy—overview: Norway's has a stable economy with a vibrant private sector, a large state sector, and an extensive social safety net. Norway opted out of the EU during a referendum in November 1994; nonetheless, as a member of the European Economic Area, it contributes sizably to the EU budget.

The country is richly endowed with natural resources in addition to oil and gas, including hydropower, fish, forests, and minerals. The government manages the country's petroleum resources through extensive regulation. The petroleum sector provides about 9% of jobs, 15% of GDP, and 39% of exports, according to official national estimates. Norway is one of the world's leading petroleum exporters, though oil production in 2015 was close to 50% below its peak in 2000; annual gas production, conversely, more than doubled over the same time period.

In anticipation of eventual declines in oil and gas production, Norway saves state revenue from petroleum sector activities in the world's largest sovereign wealth fund, valued at over \$800 billion as of early 2016. The government allows itself to use up to 4% of the fund's value, its annual expected real rate of return, to help balance the federal budget each year. After solid GDP growth in 2004–07, the economy slowed in 2008, and contracted in 2009, before returning to modest, positive growth from 2010 to 2015. Lower oil prices in 2015 caused growth to slow, increased unemployment, and weakened the Norwegian krone. The latter trend has mitigated the negative impact of lower oil and gas prices by making Norwegian exports cheaper for foreign buyers. The government has expressed willingness to increase public spending from the sovereign wealth fund to help prevent a recession.

Background: The inhabitants of the area of Oman have long prospered on Indian Ocean trade. In the late 18th century, the nascent sultanate in Muscat signed the first in a series of friendship treaties with Britain. Over time, Oman's dependence on British political and military advisors increased, but it never became a British colony. In 1970, QABOOS bin Said Al-Said overthrew his father, and has since ruled as sultan, but he has never designated a successor. His extensive modernization program has opened the country to the outside world while preserving the longstanding close ties with the UK and US. Oman's moderate, independent foreign policy has sought to maintain good relations with its neighbors and to avoid external entanglements. Inspired by the popular uprisings that swept the Middle East and

North Africa beginning in January 2011, some Omanis staged demonstrations, calling for more jobs and economic benefits and an end to corruption. in response to those protester demands, QABOOS in 2011 pledged to implement economic and political reforms, such as granting legislative and regulatory powers to the Majlis al-Shura and increasing unemployment benefits. Additionally, in August 2012, the Sultan announced a royal directive mandating the speedy implementation of a national job creation plan for thousands of public and private sector jobs. As part of the government's efforts to decentralize authority and allow greater citizen participation in local governance, Oman successfully conducted its first municipal council elections in December 2012. Announced by the Sultan in 2011, the municipal councils will have the power to advise the Royal Court on the needs of local districts across Oman's 11 governorates. The Sultan returned to Oman in March 2015 after eight months in Germany, where he received medical treatment and has since appeared publicly on a few occasions.

Economy—overview: Oman is heavily dependent on its dwindling oil resources, which generate 84% of government revenue. In 2015, low global oil prices drove Oman’s budget deficit to \$6.5 billion, or nearly 11% of GDP. Oman has limited foreign assets and is issuing debt to cover its deficit.

Oman is using enhanced oil recovery techniques to boost production and has actively pursued a development plan that focuses on diversification, industrialization, and privatization, with the objective of reducing the oil sector’s contribution to GDP from 46% at present to 9% by 2020. Tourism and gas-based industries are key components of the government’s diversification strategy.

Muscat also is focused on creating more jobs to employ the rising number of Omanis entering the workforce. Increases in social welfare benefits, however, particularly since the Arab Spring, have challenged

the government's ability to effectively balance its budget, as oil prices decline. Omani officials intend to reduce social entitlements to cut the deficit, but have faced stiff public opposition to spending cuts, hindering their implementation.

Background: The Pacific Ocean is the largest of the world's five oceans (followed by the Atlantic Ocean, Indian Ocean, Southern Ocean, and Arctic Ocean) . Strategically important access waterways include the La Perouse, Tsugaru, Tsushima, Taiwan, Singapore, and Torres Straits. The decision by the International Hydrographic Organization in the spring of 2000 to delimit a fifth ocean, the Southern Ocean, removed the portion of the Pacific Ocean south of 60 degrees south.

Location: body of water between the Southern Ocean, Asia, Australia, and the Western Hemisphere

Geographic coordinates: 0 00 N, 160 00 W

Map references: Political Map of the World

Area: *total:* 155.557 million sq km

note: includes Bali Sea, Bering Sea, Bering Strait, Coral Sea, East China Sea, Gulf of Alaska, Gulf of Tonkin, Philippine Sea, Sea of Japan, Sea of Okhotsk, South China Sea, Tasman Sea, and other tributary water bodies

Area—comparative: about 15 times the size of the US; covers about 28% of the global surface; almost equal to the total land area of the world

Coastline: 135,663 km

Climate: planetary air pressure systems and resultant wind patterns exhibit remarkable uniformity in the south and east; trade winds and westerly winds are well-developed patterns, modified by seasonal fluctuations; tropical cyclones (hurricanes) may form south of Mexico from June to October and affect Mexico and Central America; continental influences cause climatic uniformity to be much less pronounced in the eastern and western regions at the same latitude in the North Pacific Ocean; the western Pacific is monsoonal—a rainy season occurs during the summer months, when moisture-laden winds blow from the ocean over the land, and a dry season during the winter months, when dry winds blow from the Asian landmass back to the ocean; tropical cyclones (typhoons) may strike southeast and east Asia from May to December

Terrain: surface currents in the northern Pacific are dominated by a clockwise, warm-water gyre (broad circular system of currents) and in the southern Pacific by a counterclockwise, cool-water gyre; in the northern Pacific, sea ice forms in the Bering Sea and Sea of Okhotsk in winter; in the southern Pacific, sea ice from Antarctica reaches its northernmost extent in October; the ocean floor in the eastern Pacific is dominated by the East Pacific Rise, while the western Pacific is dissected by deep trenches, including the Mariana Trench, which is the world's deepest

Elevation: *mean depth:* -3,970 m

elevation extremes: *lowest point:* Challenger Deep in the Mariana Trench -10,924 m

highest point: sea level 0 m

Natural resources: oil and gas fields, polymetallic nodules, sand and gravel aggregates, placer deposits, fish

Natural hazards: surrounded by a zone of violent volcanic and earthquake activity sometimes referred to as the “Pacific Ring of Fire”;

subject to tropical cyclones (typhoons) in southeast and east Asia from May to December (most frequent from July to October); tropical cyclones (hurricanes) may form south of Mexico and strike Central America and Mexico from June to October (most common in August and September); cyclical El Nino/La Nina phenomenon occurs in the equatorial Pacific, influencing weather in the Western Hemisphere and the western Pacific; ships subject to superstructure icing in extreme north from October to May; persistent fog in the northern Pacific can be a maritime hazard from June to December

Environment—current issues: endangered marine species include the dugong, sea lion, sea otter, seals, turtles, and whales; oil pollution in Philippine Sea and South China Sea

Geography—note: the major chokepoints are the Bering Strait, Panama Canal, Luzon Strait, and the Singapore Strait; the Equator divides the Pacific Ocean into the North Pacific Ocean and the South Pacific Ocean; dotted with low coral islands and rugged volcanic islands in the southwestern Pacific Ocean

Country name: *etymology:* named by Portuguese explorer Ferdinand MAGELLAN during the Spanish circumnavigation of the world in 1521; encountering favorable winds upon reaching the ocean, he called it “Mar Pacifico, ” which means “peaceful sea” in both Portuguese and Spanish

Economy—overview: The Pacific Ocean is a major contributor to the world economy and particularly to those nations its waters directly touch. It provides low-cost sea transportation between East and West, extensive fishing grounds, offshore oil and gas fields, minerals, and sand and gravel for the construction industry. In 1996, over 60% of the world’s fish catch came from the Pacific Ocean. Exploitation of offshore oil and gas reserves is playing an ever-increasing role in the energy supplies of the US, Australia, NZ, China, and Peru. The high cost of recovering offshore oil and gas, combined with the wide swings in world prices for oil since 1985, has led to fluctuations in new drillings.

Ports and terminals: *major seaport(s):* Bangkok (Thailand), Hong Kong (China), Kao-hsiung (Taiwan), Los Angeles (US), Manila (Philippines), Pusan (South Korea), San Francisco (US), Seattle (US),

Shanghai (China), Singapore, Sydney (Australia), Vladivostok (Russia), Wellington (NZ), Yokohama (Japan)

Transportation—note: the Inside Passage offers protected waters from southeast Alaska to Puget Sound (Washington state); the International Maritime Bureau reports the territorial waters of littoral states and offshore waters in the South China Sea as high risk for piracy and armed robbery against ships accounting for 55% of all attacks in 2014; numerous commercial vessels have been attacked and hijacked both at anchor and while underway; hijacked vessels are often disguised and cargoes stolen; crew and passengers are often held for ransom, murdered, or cast adrift

Disputes—international: some maritime disputes (see littoral states)

Background: The Indus Valley civilization, one of the oldest in the world and dating back at least 5,000 years, spread over much of what is presently Pakistan. During the second millennium B.C., remnants of this culture fused with the migrating Indo-Aryan peoples. The area underwent successive invasions in subsequent centuries from the Persians, Greeks, Scythians, Arabs (who brought Islam), Afghans, and Turks. The Mughal Empire flourished in the 16th and 17th centuries; the British came to dominate the region in the 18th century. The separation in 1947 of British India into the Muslim state of Pakistan (with West and East sections) and largely Hindu India was never satisfactorily resolved, and India and Pakistan fought two wars—in 1947–48 and 1965—over the disputed Kashmir territory. A third war between these countries in 1971—in which India capitalized on Islamabad’s marginalization of Bengalis in Pakistani politics—resulted in East Pakistan becoming the separate nation of Bangladesh. In response to Indian nuclear weapons testing, Pakistan conducted its own tests in 1998. India-Pakistan relations have been rocky since the

November 2008 Mumbai attacks, but both countries are taking steps to put relations back on track. Nawaz SHARIF took office as Prime Minister in 2013, marking the first time in Pakistani history that a democratically elected government completed a full term and transitioned to a successive democratically elected government.

Economy—overview: Decades of internal political disputes and low levels of foreign investment have led to slow growth and underdevelopment in Pakistan. Pakistan has a large English-speaking population. Nevertheless, a challenging security environment, electricity shortages, and a burdensome investment climate have deterred investors. Agriculture accounts for more than one-fourth of output and two-fifths of employment. Textiles and apparel account for most of Pakistan’s export earnings, and Pakistan’s failure to diversify its exports has left the country vulnerable to shifts in world demand.

Pakistan's GDP growth has gradually increased since 2012. Official unemployment was 6.5% in 2015, but this fails to capture the true picture, because much of the economy is informal and underemployment remains high. Human development continues to lag behind most of the region.

In coordination with the International Monetary Fund (IMF), Pakistan embarked on an economic reform program in 2013. While the reform process has been mixed, and issues like privatization of state-owned enterprises remain unresolved, Pakistan has restored macroeconomic stability, improved its credit rating, and boosted growth. The Pakistani rupee, after heavy depreciation, remained relatively stable against the US dollar in 2014–15. Remittances from overseas workers, averaging more than \$1.5 billion a month, are a key revenue source for Pakistan, partly compensating for a lack of foreign investment and a slowdown in portfolio investment. Falling global oil prices in 2015 contributed to a narrowing current account deficit and lower inflation, despite weak export performance. Pakistan's program with the IMF—a three-year, \$6.7 billion Extended Fund Facility focusing on reducing energy shortages, stabilizing public finances, expanding revenue, and improving the external balance—is slated to conclude in September 2016. While passing most quantitative targets, Pakistan has missed targets on structural reforms and performance criteria throughout the program.

Pakistan remains stuck in a low-income, low-growth trap, with growth averaging about 3.5% per year from 2008 to 2013. Pakistan must address long standing issues related to government revenues, with the tax base being narrow at 11% of GDP. Given demographic challenges, Pakistan's leadership will be pressed to implement economic reforms, promote further development of the energy sector, and attract foreign investment to support sufficient economic growth necessary to employ its growing and rapidly urbanizing population, much of which is under the age of 25. Other long-term challenges include expanding investment in education and healthcare, adapting to the effects of climate change and Natural disasters, improving the country's business climate, and reducing dependence on foreign donors. Pakistan and China are implementing the "China-Pakistan Economic Corridor", a \$46 billion investment program targeted towards the energy sector and other infrastructure project that Islamabad and Beijing had agreed on in early 2014.

Telephone system: *general assessment:* the telecommunications infrastructure is improving, with foreign and domestic investments in fixed-line and mobile-cellular networks; system consists of microwave radio relay, coaxial cable, fiber-optic cable, cellular, and satellite networks; 3G and 4G mobile services introduced

domestic: mobile-cellular subscribership has skyrocketed, exceeding 126 million by the end of 2015, up from only about 300,000 in 2000; more than 90 percent of Pakistanis live within areas that have cell phone coverage, and more than half of all Pakistanis have access to a cell phone; fiber optic networks are being constructed throughout the country to increase broadband access, though broadband penetration in Pakistan is still relatively low; fixed line availability has risen only marginally over the same period, and there are still difficulties getting fixed-line service to rural areas

international: country code—92; landing point for the SEA-ME-WE-3 and SEA-ME-WE-4 submarine cable systems that provide links to Asia, the Middle East, and Europe; satellite earth stations—3 Intelsat (1 Atlantic Ocean and 2 Indian Ocean); 3 operational international gateway exchanges (1 at Karachi and 2 at Islamabad); microwave

radio relay to neighboring countries (2011)

Broadcast media: media is government regulated; 1 dominant state-owned TV broadcaster, Pakistan Television Corporation (PTV), operates a network consisting of 8 channels; private TV broadcasters are permitted; to date 69 foreign satellite channels are operational; the state-owned radio network operates more than 40 stations; nearly 100 commercially licensed, privately owned radio stations provide programming mostly limited to music and talk shows (2015)

Disputes—international: various talks and confidence-building measures cautiously have begun to defuse tensions over Kashmir, particularly since the October 2005 earthquake in the region; Kashmir nevertheless remains the site of the world's largest and most militarized territorial dispute with portions under the de facto administration of China (Aksai Chin), India (Jammu and Kashmir), and Pakistan (Azad Kashmir and Northern Areas); UN Military Observer Group in India and Pakistan has maintained a small

group of peacekeepers since 1949; India does not recognize Pakistan's ceding historic Kashmir lands to China in 1964; India and Pakistan have maintained their 2004 cease-fire in Kashmir and initiated discussions on defusing the armed standoff in the Siachen glacier region; Pakistan protests India's fencing the highly militarized Line of Control and construction of the Baglihar Dam on the Chenab River in Jammu and Kashmir, which is part of the larger dispute on water sharing of the Indus River and its tributaries; to defuse tensions and prepare for discussions on a maritime boundary, India and Pakistan seek technical resolution of the disputed boundary in Sir Creek estuary at the mouth of the Rann of Kutch in the Arabian Sea; Pakistani maps continue to show the Junagadh claim in India's Gujarat State; since 2002, with UN assistance, Pakistan has repatriated 3.8 million Afghan refugees, leaving about 2.6 million; Pakistan has sent troops across and built fences along some remote tribal areas of its treaty-defined Durand Line border with Afghanistan, which serve as bases for foreign terrorists and other illegal activities; Afghan, Coalition, and Pakistan military meet periodically to clarify the alignment of the boundary on the ground and on maps

Refugees and internally displaced persons: *refugees (country of origin):* 2.6 million (1.6 million registered, 1.0 million undocumented) (Afghanistan) (2015)

IDPs: 1.459 million (primarily those who remain displaced by counter-terrorism and counter-insurgency operations and violent conflict between armed non-state groups in the Federally Administered Tribal Areas and Khyber-Paktunkwa Province; more than 1 million displaced in Northern Waziristan in 2014; individuals also have been displaced by repeated monsoon floods) (2015)

Trafficking in persons: *current situation:* Pakistan is a source, transit, and destination country for men, women, and children subjected to forced labor and sex trafficking; the largest human trafficking problem is bonded labor in agriculture, brickmaking and, to a lesser extent, fishing, mining and carpet-making; children are bought, sold, rented, and placed in forced begging rings, domestic service, small shops, brick kilns, or prostitution; militant groups also force children to spy, fight, or die as suicide bombers, kidnapping the children or getting them from poor parents through sale or coercion; women and girls are forced into prostitution or marriages; Pakistani adults migrate to the Gulf States and African and European states for low-skilled jobs and sometimes become victims of forced labor, debt bondage, or prostitution; foreign adults and children, particularly from Afghanistan, Bangladesh, and Sri Lanka, may be subject to forced labor, and foreign women may be sex trafficked in Pakistan, with

refugees and ethnic minorities being most vulnerable

tier rating: Tier 2 Watch List—Pakistan does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; the government lacks political will and capacity to fully address human trafficking, as evidenced by ineffective law enforcement efforts, official complicity, penalization of victims, and the continued conflation of migrant smuggling and human trafficking by many officials; not all forms of trafficking are prohibited; an anti-trafficking bill drafted in 2013 to address gaps in existing legislation remains pending, and a National action plan drafted in 2014 is not finalized; feudal landlords and brick kiln owners use their political influence to protect their involvement in bonded labor, while some police personnel have taken bribes to ignore prostitution that may have included sex trafficking; authorities began to use standard procedures for the identification and referral of trafficking victims, but it is not clear how widely these methods were practiced; in other instances, police were reluctant to assist NGOs with rescues and even punished victims for crimes committed as a direct result of being trafficked (2015)

Illicit drugs: significant transit area for Afghan drugs, including heroin, opium, morphine, and hashish, bound for Iran, Western markets, the Gulf States, Africa, and Asia; financial crimes related to drug trafficking, terrorism, corruption, and smuggling remain problems; opium poppy cultivation estimated to be 2,300 hectares in 2007 with 600 of those hectares eradicated; federal and provincial authorities continue to conduct anti-poppy campaigns that utilizes forced eradication, fines, and arrests

Background: After three decades as part of the UN Trust Territory of the Pacific under US administration, this westernmost cluster of the Caroline Islands opted for independence in 1978 rather than join the Federated States of Micronesia. A Compact of Free Association with the US was approved in 1986 but not ratified until 1993. It entered into force the following year when the islands gained independence.

Economy—overview: The economy consists of tourism and other services such as trade, subsistence agriculture, and fishing. Government is a major employer of the work force relying on financial assistance from the US under the Compact of Free Association (Compact) with the US that took effect after the end of the UN trusteeship on 1 October 1994. The US provided Palau with roughly \$700 million in aid for the first 15 years following commencement of the Compact in 1994 in return for unrestricted access to its land and waterways for strategic purposes. The population enjoys a per capita income roughly double that of the Philippines and much of Micronesia.

Business and leisure tourist arrivals numbered over 125,000 in fiscal year 2014, a 13.4% increase over the previous year. Long-run prospects for tourism have been bolstered by the expansion of air travel in the Pacific, the rising prosperity of industrial East Asia, and the willingness of foreigners to finance infrastructure development. Proximity to Guam, the region’s major destination for tourists from East Asia, and a regionally competitive tourist infrastructure enhance Palau’s advantage as a destination.

Disputes—international: maritime delineation negotiations continue with Philippines, Indonesia

Background: Explored and settled by the Spanish in the 16th century, Panama broke with Spain in 1821 and joined a union of Colombia, Ecuador, and Venezuela—named the Republic of Gran Colombia. When the latter dissolved in 1830, Panama remained part of Colombia. With US backing, Panama seceded from Colombia in 1903 and promptly signed a treaty with the US allowing for the construction of a canal and US sovereignty over a strip of land on either side of the structure (the Panama Canal Zone) . The Panama Canal was built by the US Army Corps of Engineers between 1904 and 1914. In 1977, an agreement was signed for the complete transfer of the Canal from the US to Panama by the end of the century. Certain portions of the Zone and increasing responsibility over the Canal were turned over in the subsequent decades. With US help, dictator Manuel NORIEG A was deposed in 1989. The entire Panama Canal, the area supporting the Canal, and remaining US military bases were transferred to Panama by the end of 1999. An ambitious expansion project to more than double the Canal’s capacity—by allowing for more Canal transits and larger ships—was carried out between 2007 and 2016.

Demographic profile: Panama is a country of demographic and economic contrasts. It is in the midst of a demographic transition, characterized by steadily declining rates of fertility, mortality, and population growth, but disparities persist based on wealth, geography, and ethnicity. Panama has one of the fastest growing economies in Latin America and dedicates substantial funding to social programs, yet poverty and inequality remain prevalent. The indigenous population accounts for a growing share of Panama's poor and extreme poor, while the non-indigenous rural poor have been more successful at rising out of poverty through rural-to-urban labor migration. The government's large expenditures on untargeted, indirect subsidies for water, electricity, and fuel have been ineffective, but its conditional cash transfer program has shown some promise in

helping to decrease extreme poverty among the indigenous population. Panama has expanded access to education and clean water, but the availability of sanitation and, to a lesser extent, electricity remains poor. The increase in secondary schooling—led by female enrollment—is spreading to rural and indigenous areas, which probably will help to alleviate poverty if educational quality and the availability of skilled jobs improve. Inadequate access to sanitation contributes to a high incidence of diarrhea in Panama's children, which is one of the main causes of Panama's elevated chronic malnutrition rate, especially among indigenous communities.

Economy—overview: Panama’s dollar-based economy rests primarily on a well-developed services sector that accounts for more than three-quarters of GDP. Services include operating the Panama Canal, logistics, banking, the Colon Free Trade Zone, insurance, container ports, flagship registry, and tourism. Panama’s transportation and logistics services sectors, along with infrastructure development projects, have boosted economic growth; however, public debt surpassed \$32 billion in 2015 because of excessive government spending and public works projects. The US-Panama Trade Promotion Agreement was approved by Congress and signed into law in October 2011, and entered into force in October 2012. Growth will be bolstered by the Panama Canal expansion project that began in 2007 and is estimated to be completed by 2016 at a cost of \$5.3 billion—about 10–15% of current GDP. The expansion project will more than double the Canal’s capacity, enabling it to accommodate ships that are too large to traverse the existing canal. The US and China are the top users of the Canal. In 2014, Panama completed a metro system in Panama City, valued at \$1.2 billion.

Strong economic performance has not translated into broadly shared prosperity, as Panama has the second worst income distribution in Latin America. About one-fourth of the population lives in poverty; however, from 2006 to 2012 poverty was reduced by 10 percentage points.

Background: The eastern half of the island of New Guinea—second largest in the world—was divided between Germany (north) and the UK (south) in 1885. The latter area was transferred to Australia in 1902, which occupied the northern portion during World War I and continued to administer the combined areas until independence in 1975. A nine-year secessionist revolt on the island of Bougainville ended in 1997 after claiming some 20,000 lives. Since 2001, Bougainville has experienced autonomy. Under the terms of a peace accord, 2015 is the year that a five-year window opens for a referendum on the question of independence.

Economy—overview: Papua New Guinea (PNG) is richly endowed with Natural resources, but exploitation has been hampered by rugged terrain, land tenure issues, and the high cost of developing infrastructure. The economy has a small formal sector, focused mainly on the export of those Natural resources, and an informal sector, employing the majority of the population. Agriculture provides a subsistence livelihood for 85% of the people. The global financial crisis had little impact because of continued foreign demand for PNG's commodities.

Mineral deposits, including copper, gold, and oil, account for nearly two-thirds of export earnings. natural gas reserves amount to an estimated 155 billion cubic meters. A consortium led by a major American oil company is constructing a liquefied natural gas (LNG) production facility that began exporting in April 2014. As the largest investment project in the country's history, it has the potential to double GDP in the near-term and triple Papua New Guinea's export revenue. An American-owned firm also opened PNG's first oil refinery in 2004 and is building a second LNG production facility. The government faces the challenge of ensuring transparency and accountability for revenues flowing from this and other large LNG projects. In 2011 and 2012, the National Parliament passed legislation that created an offshore Sovereign Wealth Fund to manage government surpluses from mineral, oil, and natural gas projects. In recent years, the government has opened up markets in telecommunications and air transport, making both more affordable to the people.

Numerous challenges still face the government of Peter O'NEILL, including providing physical security for foreign investors, regaining investor confidence, restoring integrity to state institutions, promoting economic efficiency by privatizing moribund state institutions, and maintaining good relations with Australia, its former colonial ruler. Other socio-cultural challenges could upend the economy including chronic law and order and land tenure issues.

Trafficking in persons: *current situation:* Papua New Guinea is a source and destination country for men, women, and children subjected to sex trafficking and forced labor; foreign and Papua New Guinean women and children are subjected to sex trafficking, domestic servitude, forced begging, and street vending; parents may sell girls into forced marriages to settle debts or as peace offerings or trade them to another tribe to forge a political alliance, leaving them vulnerable to forced domestic service, or, in urban areas, they may prostitute their children for income or to pay school fees; Chinese, Malaysian, and local men are forced to labor in logging and mining camps through debt bondage schemes; migrant women from Indonesia, Malaysia, Thailand, China, and the Philippines are subjected to sex trafficking and domestic servitude at logging and mining camps, fisheries, and entertainment sites

tier rating: Tier 2 Watch List—Papua New Guinea does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; the Criminal Code Amendment of 2013, which prohibits all forms of trafficking was brought into force in 2014; the government also formed an anti-trafficking committee, which drafted a National action plan; despite corruption problems, trafficking-related crimes were prosecuted in village courts rather than criminal courts, resulting in restitution to the victim but no prison time for offenders; the government did not investigate, prosecute, or convict any officials or law enforcement personnel complicit in trafficking offenses; the government made no efforts to proactively identify trafficking victims, has no formal victim identification and referral mechanism, and does not provide care facilities to victims or funding to shelters run by NGOs or

international organizations (2015)

Illicit drugs: major consumer of cannabis

Background: The Paracel Islands are surrounded by productive fishing grounds and by potential oil and gas reserves. In 1932, French Indochina annexed the islands and set up a weather station on Pattle Island; maintenance was continued by its successor, Vietnam. China has occupied all the Paracel Islands since 1974, when its troops seized a South Vietnamese garrison occupying the western islands. China built a military installation on Woody Island with an airfield and artificial harbor. The islands also are claimed by Taiwan and Vietnam.

Background: Paraguay achieved its independence from Spain in 1811. In the disastrous War of the Triple Alliance (1865–70)—between Paraguay and Argentina, Brazil, and Uruguay—Paraguay lost two-thirds of its adult males and much of its territory. The country stagnated economically for the next half century. Following the Chaco War of 1932–35 with Bolivia, Paraguay gained a large part of the Chaco lowland region. The 35-year military dictatorship of Alfredo STROESSNER ended in 1989, and, despite a marked increase in political infighting in recent years, Paraguay has held relatively free and regular presidential elections since the country's return to democracy.

Demographic profile: Paraguay falls below the Latin American average in several socioeconomic categories, including immunization rates, potable water, sanitation, and secondary school enrollment, and has greater rates of income inequality and child and maternal mortality. Paraguay's poverty rate has declined in recent years but remains high, especially in rural areas, with more than a third of the population below the poverty line. However, the well-being of the poor in many regions has improved in terms of housing quality and access to clean water, telephone service, and electricity. The fertility rate continues to drop, declining sharply from an average 4.3 births per woman in the late 1990s to about 2 in 2013, as a result of the greater educational attainment of women, increased use of contraception, and a desire for smaller families among young women.

Paraguay is a country of emigration; it has not attracted large numbers of immigrants because of political instability, civil wars, years of dictatorship, and the greater appeal of neighboring countries. Paraguay first tried to encourage immigration in 1870 in order to rebound from the heavy death toll it suffered during the War of the Triple Alliance, but it received few European and Middle Eastern immigrants. In the 20th century, limited numbers of immigrants

arrived from Lebanon, Japan, South Korea, and China, as well as Mennonites from Canada, Russia, and Mexico. Large flows of Brazilian immigrants have been arriving since the 1960s, mainly to work in agriculture. Paraguayans continue to emigrate to Argentina, Brazil, Uruguay, the United States, Italy, Spain, and France.

Economy—overview: Landlocked Paraguay has a market economy distinguished by a large informal sector, featuring re-export of imported consumer goods to neighboring countries, as well as the activities of thousands of microenterprises and urban street vendors. A large percentage of the population, especially in rural areas, derives its living from agricultural activity, often on a subsistence basis. Because of the importance of the informal sector, accurate economic measures are difficult to obtain.

On a per capita basis, real income has stagnated at 1980 levels. The

economy grew rapidly between 2003 and 2008 as growing world demand for commodities combined with high prices and favorable weather to support Paraguay's commodity-based export expansion. Paraguay is the sixth largest soy producer in the world. Drought hit in 2008, reducing agricultural exports and slowing the economy even before the onset of the global recession. The economy fell 3.8% in 2009, as lower world demand and commodity prices caused exports to contract. The government reacted by introducing fiscal and monetary stimulus packages. Growth resumed in 2010, and has been erratic, although positive, ever since. Severe drought and outbreaks of foot-and-mouth disease led to a drop in beef and other agricultural exports. in addition to the agricultural challenges, political uncertainty, corruption, limited progress on structural reform, and deficient infrastructure are the main obstacles to long-term growth.

Demographic profile: Peru's urban and coastal communities have benefited much more from recent economic growth than rural, Afro-Peruvian, indigenous, and poor populations of the Amazon and mountain regions. The poverty rate has dropped substantially during the last decade but remains stubbornly high at about 30% (more than 55% in rural areas). After remaining almost static for about a decade, Peru's malnutrition rate began falling in 2005, when the government introduced a coordinated strategy focusing on hygiene, sanitation, and clean water. School enrollment has improved, but achievement scores reflect ongoing problems with educational quality. Many poor children temporarily or permanently drop out of school to help support their families. About a quarter to a third of Peruvian children aged 6 to 14 work, often putting in long hours at hazardous mining or construction sites.

Peru was a country of immigration in the 19th and early 20th centuries, but has become a country of emigration in the last few decades. Beginning in the 19th century, Peru brought in Asian contract laborers mainly to work on coastal plantations. Populations of Chinese and Japanese descent—among the largest in Latin America—are economically and culturally influential in Peru today. Peruvian emigration began rising in the 1980s due to an economic crisis and a violent internal conflict, but outflows have stabilized in the last few years as economic conditions have improved. Nonetheless, more than 2 million Peruvians have emigrated in the last decade, principally to the US, Spain, and Argentina.

Economy—overview: Peru’s economy reflects its varied topography—an arid lowland coastal region, the central high sierra of the Andes, the dense forest of the Amazon, with tropical lands bordering Colombia and Brazil. A wide range of important mineral resources are found in the mountainous and coastal areas, and Peru’s coastal waters provide excellent fishing grounds. Peru is the world’s second largest producer of silver and third largest producer of copper.

The Peruvian economy grew by an average of 5.6% from 2009–13 with a stable exchange rate and low inflation, which in 2013 was just below the upper limit of the Central Bank target range of 1% to 3%. This growth was due partly to high international prices for Peru’s metals and minerals exports, which account for almost 60% of the country’s total exports. Growth slipped in 2014 and 2015, due to weaker world prices for these resources. Despite Peru’s strong macroeconomic performance, dependence on minerals and metals exports and imported foodstuffs makes the economy vulnerable to fluctuations in world prices.

Peru's rapid expansion coupled with cash transfers and other programs have helped to reduce the National poverty rate by 28 percentage points since 2002, but inequality persists and continues to pose a challenge for the Ollanta HUMALA administration, which has championed a policy of social inclusion and a more equitable distribution of income. Poor infrastructure hinders the spread of growth to Peru's non-coastal areas. The HUMALA administration passed several economic stimulus packages in 2014 to bolster growth, including reforms to environmental regulations in order to spur investment in Peru's lucrative mining sector, a move that was opposed by some environmental groups. However, in 2015, mining investment fell as global commodity prices remained low and social conflicts plagued the sector.

Peru's free trade policy has continued under the HUMALA administration; since 2006, Peru has signed trade deals with the US, Canada, Singapore, China, Korea, Mexico, Japan, the EU, the European Free Trade Association, Chile, Thailand, Costa Rica, Panama, Venezuela, concluded negotiations with Guatemala and the Trans-Pacific Partnership, and begun trade talks with Honduras, El Salvador, India, Indonesia, and Turkey. Peru also has signed a trade pact with Chile, Colombia, and Mexico, called the Pacific Alliance, that seeks integration of services, capital, investment and movement of people. Since the US-Peru Trade Promotion Agreement entered into force in February 2009, total trade between Peru and the US has doubled.

Illicit drugs: until 1996 the world's largest coca leaf producer, Peru is now the world's second largest producer of coca leaf, though it lags far behind Colombia; cultivation of coca in Peru was estimated at 40,000 hectares in 2009, a slight decrease over 2008; second largest producer of cocaine, estimated at 225 metric tons of potential pure cocaine in 2009; finished cocaine is shipped out from Pacific ports to the international drug market; increasing amounts of base and

finished cocaine, however, are being moved to Brazil, Chile, Argentina, and Bolivia for use in the Southern Cone or transshipment to Europe and Africa; increasing domestic drug consumption

Background: The Philippine Islands became a Spanish colony during the 16th century; they were ceded to the US in 1898 following the Spanish-American War. In 1935 the Philippines became a self-governing commonwealth. Manuel QUEZON was elected president and was tasked with preparing the country for independence after a 10-year transition. In 1942 the islands fell under Japanese occupation during World War II, and US forces and Filipinos fought together during 1944–45 to regain control. On 4 July 1946 the Republic of the Philippines attained its independence. A 20-year rule by Ferdinand MARCOS ended in 1986, when a “people power” movement in Manila (“EDSA 1”) forced him into exile and installed Corazon AQUINO as president. Her presidency was hampered by several coup attempts that prevented a return to full political stability and economic development. Fidel RAMOS was elected president in 1992. His administration was marked by increased stability and by progress on economic reforms. In 1992, the US closed its last military bases on the islands. Joseph ESTRADA was elected president in 1998. He was succeeded by his vice-president, Gloria MACAPAGAL-ARROYO, in January 2001 after ESTRADA’s stormy impeachment trial on corruption charges broke down and another “people power” movement (“EDSA 2”) demanded his resignation. MACAPAGAL-ARROYO was elected to a six-year term as president in May 2004. Her presidency was marred by several corruption allegations but the Philippine economy was one of the few to avoid contraction following the 2008 global financial crisis, expanding each year of her administration. Benigno AQUINO II was elected to a six-year term as president in May 2010.

The Philippine Government faces threats from several groups, some of which are on the US Government’s Foreign Terrorist Organization list. Manila has waged a decades-long struggle against ethnic Moro insurgencies in the southern Philippines, which has led to a peace accord with the Moro National Liberation Front and ongoing peace talks with the Moro Islamic Liberation Front. The decades-long Maoist-inspired New People’s Army insurgency also operates throughout much of the country. The Philippines faces increased tension with China over disputed territorial and maritime claims in the South China Sea.

lyrics/music: Jose PALMA (revised by Felipe PADILLA de Leon)/Julian FELIPE

note: music adopted 1898, original Spanish lyrics adopted 1899, Filipino (Tagalog) lyrics adopted 1956; although the original lyrics were written in Spanish, later English and Filipino versions were created; today, only the Filipino version is used

Economy—overview: The economy has been relatively resilient to global economic shocks due to less exposure to troubled

international securities, lower dependence on exports, relatively resilient domestic consumption, large remittances from about 10 million overseas Filipino workers and migrants, and a rapidly expanding outsourcing industry. The current account balance has recorded consecutive surpluses since 2003, international reserves remain at comfortable levels, and the banking system is stable.

Efforts to improve tax administration and expenditures management have helped ease the Philippines' debt burden and tight fiscal situation. The Philippines has received investment-grade credit ratings on its sovereign debt under the AQUINO administration and has had little difficulty financing its budget deficits. However, weak absorptive capacity and implementation bottlenecks have prevented the government from maximizing its expenditure plans, which the administration has been working to address. Although it has improved, the low tax-to-GDP ratio remains a constraint to supporting increasingly higher spending levels and sustaining strong growth over the longer term.

Economic growth has accelerated, averaging 6.0% per year from 2011 to 2015, compared with 4.5% under the MACAPAGAL-ARROYO government; and competitiveness rankings have improved. The Philippines has not sustained steady growth in foreign direct investment, which continues to lag regional peers. Although the economy has grown at a faster pace under the AQUINO government, challenges to achieving more inclusive growth remain. The unemployment rate has declined somewhat in recent years but remains high, hovering at around 6.5%; underemployment is also high, ranging from 18% to 19% of the employed. At least 40% of the employed work in the informal sector. Poverty afflicts about a quarter of the population. More than 60% of the poor reside in rural areas, a challenge to raising rural farm and non-farm incomes. The AQUINO administration has been working to boost expenditures for education, health, transfers to the poor, and other social spending programs. Infrastructure remains underfunded and the government is relying on the private sector to help with major projects under its Public-Private Partnership program. Continued efforts are needed to improve governance, the judicial system, the regulatory environment, and the overall ease of doing business.

Notable achievements over the past year include passage of laws that liberalized the entry of foreign banks into the country; partially relaxed the cabotage law by allowing foreign vessels to ply import and export cargo within the archipelago; and passage of anti-trust legislation. Substantial progress has also been made towards passage of a Customs Tariff and Modernization Act to meet international standards and commitments, with strong prospects of enactment into

law before President AQUINO steps down from office. However, the Philippine Constitution and other laws restrict foreign ownership in important activities/sectors—such as land ownership and public utilities.

Background: Pitcairn Island was discovered in 1767 by the British and settled in 1790 by the Bounty mutineers and their Tahitian companions. Pitcairn was the first Pacific island to become a British colony (in 1838) and today remains the last vestige of that empire in the South Pacific. Outmigration, primarily to New Zealand, has thinned the population from a peak of 233 in 1937 to less than 50 today.

Economy—overview: The inhabitants of this tiny isolated economy exist on fishing, subsistence farming, handicrafts, and postage stamps. The fertile soil of the valleys produces a wide variety of fruits and vegetables, including citrus, sugarcane, watermelons, bananas, yams, and beans. Bartering is an important part of the economy. The major sources of revenue are the sale of postage stamps to collectors and the sale of handicrafts to passing ships.

Background: Poland's history as a state began near the middle of the 10th century. By the mid-16th century, the Polish-Lithuanian Commonwealth ruled a vast tract of land in central and eastern

Europe. During the 18th century, internal disorders weakened the nation, and in a series of agreements between 1772 and 1795, Russia, Prussia, and Austria partitioned Poland among themselves. Poland regained its independence in 1918 only to be overrun by Germany and the Soviet Union in World War II. It became a Soviet satellite state following the war, but its government was comparatively tolerant and progressive. Labor turmoil in 1980 led to the formation of the independent trade union “Solidarity” that over time became a political force with over 10 million members. Free elections in 1989 and 1990 won Solidarity control of the parliament and the presidency, bringing the communist era to a close. A “shock therapy” program during the early 1990s enabled the country to transform its economy into one of the most robust in Central Europe. Poland joined NATO in 1999 and the EU in 2004. With its transformation to a democratic, market-oriented country largely completed and with large investments in defense, energy, and other infrastructure, Poland is an increasingly active member of Euro-Atlantic organizations.

Flag description: two equal horizontal bands of white (top) and red; colors derive from the Polish emblem—a white eagle on a red field

note: similar to the flags of Indonesia and Monaco which are red (top) and white

National symbol(s): white eagle; National colors: white, red

National anthem: *name:* “Mazurek Dabrowskiego” (Dabrowski’s Mazurka)

lyrics/music: Jozef WYBICKI/traditional

note: adopted 1927; the anthem, commonly known as “Jeszcze Polska nie zginela” (Poland Has Not Yet Perished), was written in 1797; the lyrics resonate strongly with Poles because they reflect the numerous occasions in which the nation’s lands have been occupied

Economy—overview: Poland has pursued a policy of economic liberalization since 1990 and Poland’s economy was the only EU country to avoid a recession through the 2008–09 economic downturn. Although EU membership and access to EU structural funds have provided a major boost to the economy since 2004, GDP per capita remains significantly below the EU average and the unemployment rate is now below the EU average. The government of Prime Minister Donald TUSK steered the Polish economy through the economic downturn by skillfully managing public finances and adopting controversial pension and tax reforms to further shore up public finances. While the Polish economy has performed well over the past five years, growth slowed in 2013 and picked back up in 2014–15. Poland’s new center-right Law and Justice government plans to introduce expansionary economic policies to spur long-term growth, but social spending programs are expected to lead to

increased deficit spending over the medium term.

Poland faces several challenges, which include addressing some of the remaining deficiencies in its road and rail infrastructure, business environment, rigid labor code, commercial court system, government red tape, and burdensome tax system, especially for entrepreneurs. Additional long-term challenges include diversifying Poland's energy mix and sources of supply, strengthening investments in innovation, research, and development, and as well as stemming the outflow of educated young Poles to other EU member states, especially in light of a coming demographic contraction due to emigration, persistently low fertility rates, and the aging of the Solidarity-era baby boom generation.

Illicit drugs: despite diligent counternarcotics measures and international information sharing on cross-border crimes, a major illicit producer of synthetic drugs for the international market; minor transshipment point for Southwest Asian heroin and Latin American cocaine to Western Europe

Background: Following its heyday as a global maritime power during the 15th and 16th centuries, Portugal lost much of its wealth and status with the destruction of Lisbon in a 1755 earthquake, occupation during the napoleonic Wars, and the independence of Brazil, its wealthiest colony, in 1822. A 1910 revolution deposed the monarchy; for most of the next six decades, repressive governments ran the country. In 1974, a left-wing military coup installed broad democratic reforms. The following year, Portugal granted independence to all of its African colonies. Portugal is a founding member of NATO and entered the EC (now the EU) in 1986.

National anthem: *name*: “A Portuguesa” (The Song of the Portuguese)

lyrics/music: Henrique LOPES DE MENDOÇA/Alfredo KEIL

note: adopted 1910; “A Portuguesa” was originally written to protest the Portuguese monarchy’s acquiescence to the 1890 British ultimatum forcing Portugal to give up areas of Africa; the lyrics refer to the “insult” that resulted from the event

Economy—overview: Portugal has become a diversified and increasingly service-based economy since joining the European Community—the EU’s predecessor—in 1986. Over the following two decades, successive governments privatized many state-controlled firms and liberalized key areas of the economy, including the financial and telecommunications sectors. The country joined the Economic and Monetary Union in 1999 and began circulating the euro on 1 January 2002 along with 11 other EU members.

The economy grew by more than the EU average for much of the 1990s, but the rate of growth slowed in 2001–08. The economy contracted in 2009, and fell again from 2011 to 2014, as the government implemented spending cuts and tax increases to comply with conditions of an EU-IMF financial rescue package, signed in May 2011. A modest recovery began in 2013 and gathered steam in 2014 due to strong export performance and a rebound in private consumption. Although austerity measures were instituted to reduce

the large budget deficit, they contributed to record unemployment and a wave of emigration not seen since the 1960s.

A continued reduction in private- and public-sector debt could weigh on consumption and investment in 2016, holding back a stronger recovery. The prior center-right government passed legislation aimed at reducing labor market rigidity, and, this, along with sustained fiscal discipline, could make Portugal more attractive to foreign direct investment. Under the center-right government, the budget deficit fell from 11.2% of GDP in 2010 to 3.5% in 2015, reaching the EU-IMF target of 4%, but still above its EU fiscal obligations, under the excessive deficit procedure. EU-IMF financing expired in May 2014. The new center-left Socialist government, however, has signaled that it will unwind spending cuts associated with austerity while remaining within EU fiscal targets.

Background: Populated for centuries by aboriginal peoples, the island was claimed by the Spanish Crown in 1493 following Christopher COLUMBUS' second voyage to the Americas. In 1898, after 400 years of colonial rule that saw the indigenous population nearly exterminated and African slave labor introduced, Puerto Rico was ceded to the US as a result of the Spanish-American War. Puerto Ricans were granted US citizenship in 1917. Popularly elected governors have served since 1948. In 1952, a constitution was enacted providing for internal self government. In plebiscites held in 1967, 1993, and 1998, voters chose not to alter the existing political status with the US, but the results of a 2012 vote left open the possibility of American statehood. Economic recession on the island has led to a net population loss since about 2005, as large numbers of residents moved to the US mainland. The trend has accelerated since 2010; in 2014, Puerto Rico experienced a net population loss to the mainland of 64,000, more than double the net loss of 26,000 in 2010.

Country name: *conventional long form:* Commonwealth of Puerto Rico

conventional short form: Puerto Rico

etymology: Christopher COLUMBUS named the island San Juan Bautista (Saint John the Baptist) and the capital city and main port Cuidad de Puerto Rico (Rich Port City); over time, however, the names were shortened and transposed and the island came to be called Puerto Rico and its capital San Juan

Dependency status: unincorporated, organized territory of the US with commonwealth status; policy relations between Puerto Rico and the US conducted under the jurisdiction of the Office of the President

Government type: presidential democracy; a self-governing commonwealth in political association with the US

Capital: *name:* San Juan

Geographic coordinates: 18 28 N, 66 07 W

time difference: UTC-4 (1 hour ahead of Washington, DC, during Standard Time)

Administrative divisions: none (territory of the US with commonwealth status); there are no first-order administrative divisions as defined by the US Government, but there are 78 municipalities (municipios, singular—municipio) at the second order;

Adjuntas, Aguada, Aguadilla, Aguas Buenas, Aibonito, Anasco, Arecibo, Arroyo, Barceloneta, Barranquitas, Bayamon, Cabo Rojo, Caguas, Camuy, Canovanas, Carolina, Catano, Cayey, Ceiba, Ciales, Cidra, Coamo, Comerio, Corozal, Culebra, Dorado, Fajardo, Florida, Guanica, Guayama, Guayanilla, Guaynabo, Gurabo, Hatillo, Hormigueros, Humacao, Isabela, Jayuya, Juana Diaz, Juncos, Lajas, Lares, Las Marias, Las Piedras, Loiza, Luquillo, Manati, Maricao, Maunabo, Mayaguez, Moca, Morovis, Naguabo, naranjito, Orocovis, Patillas, Penuelas, Ponce, Quebradillas, Rincon, Rio Grande, Sabana Grande, Salinas, San German, San Juan, San Lorenzo, San Sebastian, Santa Isabel, Toa Alta, Toa Baja, Trujillo Alto, Utuado, Vega Alta, Vega Baja, Vieques, Villalba, Yabucoa, Yauco

Independence: none (territory of the US with commonwealth status)

National holiday: US Independence Day, 4 July (1776); Puerto Rico Constitution Day, 25 July (1952)

Constitution: previous 1900 (Organic Act, or Foraker Act); latest ratified 3 March 1952, approved 3 July 1952, effective 25 July 1952 (2016)

Legal system: civil law system based on the Spanish civil code and within the framework of the US federal system

Citizenship: see United States

Suffrage: 18 years of age; universal; note—*island residents are US citizens but do not vote in US presidential elections*

Executive branch: *chief of state:* President Barack H. OBAMA (since 20 January 2009); Vice President Joseph R. BIDEN (since 20 January 2009)

head of government: Governor Alejandro GARCIA Padilla (since 2 January 2013)

cabinet: Cabinet appointed by governor with the consent of the Legislative Assembly

elections/appointments: president and vice president indirectly elected on the same ballot by an Electoral College of ‘electors’ chosen from each state; president and vice president serve a 4-year term (eligible for a second term); under the US Constitution, residents of Puerto Rico do not vote in elections for US president and vice president; however, they may vote in Democratic and Republican party presidential primary elections; governor directly elected by simple majority popular vote for a 4-year term (no term limits); election last held on 6 November 2012 (next to be held in November 2016)

election results: Alejandro GARCIA Padilla elected governor; percent of vote—Alejandro GARCIA Padilla (Democratic Party) 48.2%, Luis FORTUNO (PNP) 47.1%, other 4.7%

Legislative branch: *description:* bicameral Legislative Assembly or Asamblea Legislativa consists of the Senate or Senado (27 seats; 16 members directly elected in multi-seat constituencies by simple majority vote and 11 at-large members directly elected by simple majority vote to serve 4-year terms); the House of Representatives or Cámara de Representantes (51 seats; members directly elected in single-seat constituencies by simple majority vote to serve 4-year terms)

elections: Senate—last held on 6 November 2012 (next to be held on 8 November 2016); House of Representatives—last held on 6 November 2012 (next to be held on 8 November 2016)

election results: Senate—percent of vote by party—NA; seats by party—PPD 18, PNP 8, PIP 1; House of Representatives—percent of vote by party—NA; seats by party—PPD 28, PNP 23

note: Puerto Rico directly elects 1 member by simple majority vote to serve a 4-year term as a commissioner to the US House of Representatives; the commissioner can vote when serving on a committee and when the House meets as the Committee of the Whole House, but not when legislation is submitted for a “full floor” House vote; election of commissioner last held on 6 November 2012 (next to be held on 8 November 2016)

Judicial branch: *highest court(s):* Supreme Court (consists of the chief justice and 8 associate justices)

judge selection and term of office: justices appointed by the governor and confirmed by majority Senate vote; judges serve until compulsory retirement at age 70

subordinate courts: Court of Appeals; First Instance Court comprised of superior and municipal courts

note: the Commonwealth of Puerto Rico Judiciary Act of 2003 reformed the judicial system

Diplomatic representation in the US: none (territory of the US)

Diplomatic representation from the US: none (territory of the US with commonwealth status)

Flag description: five equal horizontal bands of red (top, center, and bottom) alternating with white; a blue isosceles triangle based on the hoist side bears a large, white, five-pointed star in the center; the white star symbolizes Puerto Rico; the three sides of the triangle signify the executive, legislative and judicial parts of the government; blue stands for the sky and the coastal waters; red symbolizes the blood shed by warriors, while white represents liberty, victory, and peace

note: design initially influenced by the US flag, but similar to the Cuban flag, with the colors of the bands and triangle reversed

National symbol(s): Puerto Rican spindalis (bird), coqui (frog); National colors: red, white, blue

National anthem: *name:* “La Borinquena” (The Puerto Rican)

lyrics/music: Manuel Fernandez JUNCOS/Felix Astol ARTES

note: music adopted 1952, lyrics adopted 1977; the local anthem’s name is a reference to the indigenous name of the island, Borinquen; the music was originally composed as a dance in 1867 and gained popularity in the early 20th century; there is some evidence that the music was written by Francisco RAMIREZ; as a commonwealth of the US, “The Star-Spangled Banner” is official (see United States)

Economy—overview: Puerto Rico had one of the most dynamic economies in the Caribbean region until 2006; however, growth has been negative for each of the last nine years. The downturn coincided with the phaseout of tax preferences that had led US firms to invest heavily in the Commonwealth since the 1950s, and a steep rise in the price of oil, which generates most of the island’s electricity.

Diminished job opportunities prompted a sharp rise in outmigration, as many Puerto Ricans sought jobs on the US mainland.

Unemployment reached 16% in 2011, but declined to 13.7% in December 2014. US minimum wage laws apply in Puerto Rico, hampering job expansion. Per capita income is about half that of the US mainland.

The industrial sector greatly exceeds agriculture as the locus of economic activity and in come. Tourism has traditionally been an important source of income with estimated arrivals of more than 3.6 million tourists in 2008. Puerto Rico's merchandise trade surplus is exceptionally strong, with exports nearly 50% greater than imports, and its current account surplus about 10% of GDP.

Closing the budget deficit while restoring economic growth and employment remain the central concerns of the government. The gap between revenues and expenditures narrowed to 0.2% of GDP in 2014, although analysts believe that not all expenditures have been accounted for in the budget and a better accounting of costs would yield an overall deficit of roughly 5% of GDP in 2014. Public debt rose to 105% of GDP in 2015, about \$17,000 per person, or nearly three times the per capita debt of the State of Connecticut, the highest in the US. Much of that debt was issued by state-run schools and public corporations, including water and electric utilities. In June 2015, Governor Alejandro GARCIA Padilla announced that the island could not pay back at least \$73 billion in debt and that it would seek a deal with its creditors.

Background: Ruled by the Al Thani family since the mid-1800s, Qatar transformed itself from a poor British protectorate noted mainly for pearling into an independent state with significant oil and natural gas revenues. During the late 1980s and early 1990s, the Qatari economy was crippled by a continuous siphoning off of petroleum revenues by the amir, who had ruled the country since 1972. His son, HAMAD bin Khalifa Al Thani, overthrew the father in a bloodless coup in 1995. In short order, HAMAD oversaw the creation of the pan-Arab satellite news network Al-Jazeera and Qatar's pursuit of a leadership role in mediating regional conflicts. In the 2000s, Qatar resolved its longstanding border disputes with both Bahrain and Saudi Arabia. As of 2007, oil and natural gas revenues had enabled Qatar to attain the highest per capita income in the world. Qatar has not experienced domestic unrest or violence like that seen in other Near Eastern and North African countries in 2010–11, due in part to its immense wealth. Since the outbreak of regional unrest, however, Doha has prided itself on its support for many of these popular revolutions, particularly in Libya and Syria. In mid-2013, HAMAD transferred power to his 33 year-old son, the current Amir TAMIM bin Hamad—a peaceful abdication rare in the history of Arab Gulf states. TAMIM has prioritized improving the domestic welfare of Qataris, including establishing advanced healthcare and education systems and expanding the country's infrastructure in anticipation of Doha's hosting of the 2022 World Cup.

Executive branch: *chief of state:* Amir TAMIM bin Hamad Al Thani (since 25 June 2013)

head of government: Prime Minister ABDALLAH bin Nasir bin Khalifa Al Thani (since 26 June 2013); Deputy Prime Minister Ahmad bin Abdallah al-MAHMUD (since 20 September 2011)

cabinet: Council of Ministers appointed by the amir

elections/appointments: the monarchy is hereditary; prime minister and deputy prime minister appointed by the amir

Legislative branch: *description:* unicameral Advisory Council or Majlis al-Shura (15 seats; members appointed by the monarch); note—the 2003 constitutional referendum called for the election of 30 members, however; the first elections scheduled for 2013 was

postponed and the current term was initially extended until 2016, but in June 2016, the Amir extended it until at least 2019

note: although the Advisory Council has limited legislative authority to draft and approve laws, the Amir has final vote on all legislation; Qatar's first legislative elections were expected to be held in 2013, but HAMAD postponed them in a final legislative act prior to handing over power to TAMIM; in principle, the public would elect 30 members and the Amir would appoint 15; the Advisory Council would have authority to approve the national budget, hold ministers accountable through no-confidence votes, and propose legislation; the 29-member Central Municipal Council—first elected in 1999—has limited consultative authority aimed at improving municipal services; members elected for a 4-year term; next elections scheduled for May 2019

Judicial branch: *highest court(s):* Supreme Court or Court of Cassation (consists of the court president and several judges); Supreme Constitutional Court (consists of the chief justice and 6 members); *note*—the Supreme Constitutional Court was established in 1999, but has not been fully implemented

judge selection and term of office: Supreme Court judges nominated by the Supreme Judiciary Council, a 9-member independent body consisting of judiciary heads appointed by the Amir; judges appointed for 3-year renewable terms; Supreme Constitutional Court members nominated by the Supreme Judicial Supreme Council and appointed by the monarch; term of appointment NA

subordinate courts: Courts of Appeal; Courts of First Instance; Sharia Courts; Courts of Justice; Qatar International Court and Dispute Resolution Center, established in 2009, provides dispute services for institutions and bodies in Qatar, as well as internationally

Flag description: maroon with a broad white serrated band (nine white points) on the hoist side; maroon represents the blood shed in Qatari wars, white stands for peace; the nine-pointed serrated edge signifies Qatar as the ninth member of the “reconciled emirates” in the wake of the Qatari-British treaty of 1916

note: the other eight emirates are the seven that compose the UAE and Bahrain; according to some sources, the dominant color was formerly red, but this darkened to maroon upon exposure to the sun and the new shade was eventually adopted

National symbol(s): a maroon field surmounted by a white serrated band with nine white points; national colors: maroon, white

National anthem: *name*: “Al-Salam Al-Amiri” (The Peace for the Anthem)

lyrics/music: Sheikh MUBARAK bin Saif al-Thani/Abdul Aziz Nasser OBAIDAN

note: adopted 1996; anthem first performed that year at a meeting of the Gulf Cooperative Council hosted by Qatar

Economy—overview: Qatar has prospered in the last several years with continued high real GDP growth, but low oil prices have dampened the outlook. Qatar was the only Gulf Cooperation Council member that avoided a budget deficit in 2015, but it projects a \$12.8 billion deficit, 6% of GDP in 2016.

GDP is driven largely by the oil and gas sector; however, growth in manufacturing, construction, and financial services have lifted the non-oil sectors to just over half of Qatar’s nominal GDP. Economic policy is focused on sustaining Qatar’s non-associated natural gas reserves and increasing private and foreign investment in non-energy sectors, but oil and gas still account for roughly 92% of export

earnings, and 56% of government revenues. Oil and gas have made Qatar the world's highest per-capita income country and the country with the lowest unemployment. Proved oil reserves in excess of 25 billion barrels should enable continued output at current levels for about 56 years. Qatar's proved reserves of natural gas exceed 25 trillion cubic meters, about 13% of the world total and third largest in the world.

Qatar's successful 2022 World Cup bid is accelerating large-scale infrastructure projects such as its metro system, light rail system, construction of a new port, roads, stadiums and related sporting infrastructure.

Refugees and internally displaced persons: *stateless persons*: 1,200 (2015)

Trafficking in persons: *current situation*: Qatar is a destination country for men, women, and children subjected to forced labor, and, to a much lesser extent, forced prostitution; the predominantly foreign workforce migrates to Qatar legally for low- and semi-skilled work but often experiences situations of forced labor, including debt bondage, delayed or nonpayment of salaries, confiscation of passports, abuse, hazardous working conditions, and squalid living arrangements; foreign female domestic workers are particularly vulnerable to trafficking because of their isolation in private homes and lack of protection under Qatari labor laws; some women who migrate for work are also forced into prostitution

tier rating: Tier 2 Watch List—Qatar does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; the government investigated 11 trafficking cases but did not prosecute or convict any offenders, including exploitative employers and recruitment agencies; the primary solution for resolving labor violations was to transfer a worker's sponsorship to a new employer with minimal effort to investigate whether a forced labor violation had occurred; authorities increased their efforts to protect some trafficking victims, although many victims of forced labor, particularly domestic workers, remained unidentified and unprotected and were sometimes punished for immigration violations or running away from an employer or sponsor; authorities visited worksites throughout the country to meet and educate workers and employers on trafficking regulations, but the government failed to abolish or reform the sponsorship system, perpetuating Qatar's forced labor problem (2015)

Background: The principalities of Wallachia and Moldavia—for centuries under the suzerainty of the Turkish Ottoman Empire—secured their autonomy in 1856; they were de facto linked in 1859 and formally united in 1862 under the new name of Romania. The country gained recognition of its independence in 1878. It joined the Allied Powers in World War I and acquired new territories—most notably Transylvania—following the conflict. In 1940, Romania allied with the Axis powers and participated in the 1941 German invasion of the USSR. Three years later, overrun by the Soviets, Romania signed an armistice. The post-war Soviet occupation led to the formation of a communist “people’s republic” in 1947 and the abdication of the king. The decades-long rule of dictator Nicolae CEAUSESCU, who took

power in 1965, and his Securitate police state became increasingly oppressive and draconian through the 1980s. CEAUSESCU was overthrown and executed in late 1989. Former communists dominated the government until 1996 when they were swept from power. Romania joined NATO in 2004 and the EU in 2007.

National anthem: *name:* “Desteapta-te romane!” (Wake up, Romanian!)

lyrics/music: Andrei MURESIANU/Anton PANN

note: adopted 1990; the anthem was written during the 1848 Revolution

Economy—overview: Romania, which joined the EU on 1 January 2007, began the transition from communism in 1989 with a largely obsolete industrial base and a pattern of output unsuited to the country’s needs. Romania’s macroeconomic gains have only recently started to spur creation of a middle class and to address Romania’s widespread poverty. Corruption and red tape continue to permeate the business environment. In the aftermath of the global financial crisis, Romania signed a \$26 billion emergency assistance package from the IMF, the EU, and other international lenders, but GDP contracted until 2011. In March 2011, Romania and the IMF/EU/World Bank signed a 24-month precautionary standby agreement, worth \$6.6 billion, to promote fiscal discipline, encourage progress on structural reforms, and strengthen financial sector stability; no funds were drawn. In September 2013, Romanian authorities and the IMF/EU agreed to a follow-on standby agreement, worth \$5.4 billion, to continue with

reforms. This agreement expired in September 2015, and no funds were drawn. Progress on structural reforms has been uneven, and the economy still is vulnerable to external shocks.

Economic growth rebounded in 2013–15, driven by strong industrial exports and excellent agricultural harvests, and the fiscal deficit was reduced substantially. Industry outperformed other sectors of the economy in 2015. Exports remained an engine of economic growth, led by trade with the EU, which accounts for roughly 70% of Romania trade. Domestic demand was a second driver, due to the mid-2015 cut, from 24% to 9%, of the VAT levied upon foodstuffs. In 2015, the government of Romania succeeded in meeting its annual target for the budget deficit, the external deficit remained low, even if it rose due to increasing imports. For the first time since 1989, inflation turned into deflation, allowing for a gradual loosening of monetary policy throughout the period.

An aging population, significant tax evasion, insufficient health care, and an aggressive loosening of the fiscal package jeopardize the low fiscal deficit and public debt and are the economy's top vulnerabilities.

Background: Founded in the 12th century, the Principality of Muscovy was able to emerge from over 200 years of Mongol domination (13th-15th centuries) and to gradually conquer and absorb surrounding principalities. In the early 17th century, a new ROMANOV Dynasty continued this policy of expansion across Siberia to the Pacific. Under PETER I (ruled 1682–1725), hegemony was extended to the Baltic Sea and the country was renamed the Russian Empire. During the 19th century, more territorial acquisitions were made in Europe and Asia. Defeat in the Russo-Japanese War of 1904–05 contributed to the Revolution of 1905, which resulted in the formation of a parliament and other reforms. Repeated devastating defeats of the Russian army in World War I led to widespread rioting in the major cities of the Russian Empire and to the overthrow in 1917 of the imperial household. The communists under Vladimir LENIN seized power soon after and formed the USSR. The brutal rule of Iosif STALIN (1928–53) strengthened communist rule and Russian dominance of the Soviet Union at a cost of tens of millions of lives. After defeating Germany in World War II as part of an alliance with the US (1939–1945), the USSR expanded its territory and influence in Eastern Europe and emerged as a global power. The USSR was the principal adversary of the US during the Cold War (1947–1991). The Soviet economy and society stagnated in the decades following Stalin's rule, until General Secretary Mikhail GORBACHEV (1985–91) introduced glasnost (openness) and perestroika (restructuring) in an attempt to modernize communism, but his initiatives inadvertently released forces that by December 1991 splintered the USSR into Russia and 14 other independent republics.

Following economic and political turmoil during President Boris YELTSIN's term (1991–99), Russia shifted toward a centralized authoritarian state under the leadership of President Vladimir PUTIN

(2000–2008, 2012–present) in which the regime seeks to legitimize its rule through managed elections, populist appeals, a foreign policy focused on enhancing the country's geopolitical influence, and commodity-based economic growth. Russia faces a largely subdued rebel movement in Chechnya and some other surrounding regions, although violence still occurs throughout the North Caucasus.

Flag description: three equal horizontal bands of white (top), blue, and red

note: the colors may have been based on those of the Dutch flag; despite many popular interpretations, there is no official meaning assigned to the colors of the Russian flag; this flag inspired several other Slav countries to adopt horizontal tricolors of the same colors but in different arrangements, and so red, blue, and white became the Pan-Slav colors

National symbol(s): bear, double-headed eagle; national colors: white, blue, red

National anthem: *name:* “Gimn Rossiyskoy Federatsii” (National Anthem of the Russian Federation)

lyrics/music: Sergey Vladimirovich MIKHALKOV/Aleksandr Vasilyevich ALEKSANDROV

note: in 2000, Russia adopted the tune of the anthem of the former Soviet Union (composed in 1939); the lyrics, also adopted in 2000, were written by the same person who authored the Soviet lyrics in 1943

Economy—overview: Russia has undergone significant ch

anges since the collapse of the Soviet Union, moving from a centrally planned economy towards a more market-based system. Both economic growth and reform have stalled in recent years, however, and Russia remains a predominantly statist economy with a high concentration of wealth in officials' hands. Economic reforms in the 1990s privatized most industry, with notable exceptions in the energy, transportation, banking, and defense-related sectors. The protection of property rights is still weak, and the state continues to interfere in the free operation of the private sector. Russia is one of the world's leading producers of oil and natural gas, and is also a top exporter of metals such as steel and primary aluminum. Russia's reliance on commodity exports makes it vulnerable to boom and bust cycles that follow the volatile swings in global prices.

The economy, which had averaged 7% growth during 1998–2008 as oil prices rose rapidly, has seen diminishing growth rates since then due to the exhaustion of Russia's commodity-based growth model. A combination of falling oil prices, international sanctions, and structural limitations pushed Russia into a deep recession in 2015, with the GDP falling by close to 4%. Most economists expect the downturn will continue through 2016. Government support for import substitution has increased recently in an effort to diversify the economy away from extractive industries. Although the Russian Ministry of Economic Development is forecasting a modest growth of 0.7% for 2016 as a whole, the Central Bank of Russia (CBR) is more pessimistic and expects the recovery to begin later in the year and a decline of 0.5% to 1.0% for the full year. Russia is heavily dependent on the movement of world commodity prices and the CBR estimates that if oil prices remain below \$40 per barrel beyond 2016, the resulting shock would cause GDP to fall by up to 5%.

Telephone system: *general assessment:* the telephone system is experiencing significant changes; more than 1,000 companies licensed to offer communication services; access to digital lines has improved, particularly in urban centers; progress made toward building the telecommunications infrastructure necessary for a market economy; the estimated number of mobile subscribers jumped from fewer than 1 million in 1998 to more than 235 million in 2011; fixed-line service has improved but a large demand remains

domestic: cross-country digital trunk lines run from Saint Petersburg to Khabarovsk, and from Moscow to Novorossiysk; the telephone systems in 60 regional capitals have modern digital infrastructures; cellular services, both analog and digital, are available in many areas; in rural areas, telephone services are still outdated, inadequate, and low-density

international: country code—7; connected internationally by undersea fiber optic cables; satellite earth stations provide access to Intelsat, Intersputnik, Eutelsat, Inmarsat, and Orbita systems (2011)

Broadcast media: 13 national TV stations with the federal government owning 1 and holding a controlling interest in a second; state-owned Gazprom maintains a controlling interest in 2 of the

national channels; government-affiliated Bank Rossiya owns controlling interest in a fourth and fifth, while a sixth national channel is owned by the Moscow city administration; the Russia Northodox Church and the Russian military, respectively, own 2 additional national channels; roughly 3,300 national, regional, and local TV stations with over two-thirds completely or partially controlled by the federal or local governments; satellite TV services are available; 2 state-run national radio networks with a third majority-owned by Gazprom; roughly 2,400 public and commercial radio stations (2016)

Disputes—international: Russia remains concerned about the smuggling of poppy derivatives from Afghanistan through Central Asian countries; China and Russia have demarcated the once disputed islands at the Amur and Ussuri confluence and in the Argun River in accordance with the 2004 Agreement, ending their centuries-long border disputes; the sovereignty dispute over the islands of Etorofu, Kunashiri, Shikotan, and the Habomai group, known in Japan as the “Northern Territories” and in Russia as the “Southern Kurils,” occupied by the Soviet Union in 1945, now administered by Russia, and claimed by Japan, remains the primary sticking point to signing a peace treaty formally ending World War II hostilities; Russia’s military support and subsequent recognition of Abkhazia and South Ossetia

independence in 2008 continue to sour relations with Georgia; Azerbaijan, Kazakhstan, and Russia ratified Caspian seabed delimitation treaties based on equidistance, while Iran continues to insist on a one-fifth slice of the sea; Norway and Russia signed a comprehensive maritime boundary agreement in 2010; various groups in Finland advocate restoration of Karelia (Kareliya) and other areas ceded to the Soviet Union following World War II but the Finnish Government asserts no territorial demands; Russia and Estonia signed a technical border agreement in May 2005, but Russia recalled its signature in June 2005 after the Estonian parliament added to its domestic ratification act a historical preamble referencing the Soviet occupation and Estonia's pre-war borders under the 1920 Treaty of Tartu; Russia contends that the preamble allows Estonia to make territorial claims on Russia in the future, while Estonian officials deny that the preamble has any legal impact on the treaty text; Russia demands better treatment of the Russian-speaking population in Estonia and Latvia

Lithuania and Russia committed to demarcating their boundary in 2006 in accordance with the land and maritime treaty ratified by Russia in May 2003 and by Lithuania in 1999; Lithuania operates a simplified transit regime for Russian nationals traveling from the Kaliningrad coastal exclave into Russia, while still conforming, as an EU member state with an EU external border, where strict Schengen border rules apply; preparations for the demarcation delimitation of land boundary with Ukraine have commenced; the dispute over the boundary between Russia and Ukraine through the Kerch Strait and Sea of Azov is suspended due to the occupation of Crimea by Russia; Kazakhstan and Russia boundary delimitation was ratified on November 2005 and field demarcation should commence in 2007; Russian Duma has not yet ratified 1990 Bering Sea Maritime Boundary Agreement with the US; Denmark (Greenland) and Norway have made submissions to the Commission on the Limits of the Continental Shelf (CLCS) and Russia is collecting additional data to augment its 2001 CLCS submission

Refugees and internally displaced persons: *refugees (country of origin):* 383,323 asylum seekers and 911,549 applicants for other forms of legal stay (Ukraine) (2015)

IDPs: 27,000 (armed conflict, human rights violations, generalized violence in North Caucasus, particularly Chechnya and North Ossetia) (2015)

stateless persons: 101,813 (2015); note—Russia's stateless population consists of Roma, Meskhetian Turks, and ex-Soviet citizens from the former republics; between 2003 and 2010 more than 600,000 stateless

people were naturalized; most Meskhetian Turks, followers of Islam with origins in Georgia, fled or were evacuated from Uzbekistan after a 1989 pogrom and have lived in Russia for more than the required five-year residency period; they continue to be denied registration for citizenship and basic rights by local Krasnodar Krai authorities on the grounds that they are temporary illegal migrants

Trafficking in persons: *current situation:* Russia is a source, transit, and destination country for men, women, and children who are subjected to forced labor and sex trafficking; with millions of foreign workers, forced labor is Russia's predominant human trafficking problem and sometimes involves organized crime syndicates; workers from Russia, other European countries, Central Asia, and East and Southeast Asia, including North Korea and Vietnam, are subjected to forced labor in the construction, manufacturing, agricultural, textile, grocery store, maritime, and domestic service industries, as well as in forced begging, waste sorting, and street sweeping; women and children from Europe, Southeast Asia, Africa, and Central Asia are subject to sex trafficking in Russia; Russian women and children are victims of sex trafficking domestically and in Northeast Asia, Europe, Central Asia, Africa, the US, and the Middle East

tier rating: Tier 3—Russia does not fully comply with the minimum standards for the elimination of trafficking and is not making a significant effort to do so; prosecutions of trafficking offenders remained low in comparison to the scope of Russia's trafficking problem; the government did not develop or employ a formal system for identifying trafficking victims or referring them to protective services, although authorities reportedly assisted a limited number of victims on an ad hoc basis; foreign victims, the largest group in Russia, were not entitled to state-provided rehabilitative services and were routinely detained and deported; the government has not reported investigating reports of slave-like conditions among North Korean workers in Russia; authorities have made no effort to reduce the demand for forced labor or to develop public awareness of forced labor or sex trafficking (2015)

Illicit drugs: limited cultivation of illicit cannabis and opium poppy and producer of methamphetamine, mostly for domestic consumption; government has active illicit crop eradication program; used as transshipment point for Asian opiates, cannabis, and Latin American cocaine bound for growing domestic markets, to a lesser extent Western and Central Europe, and occasionally to the US; major source of heroin precursor chemicals; corruption and organized crime are key concerns; major consumer of opiates

Background: In 1959, three years before independence from Belgium, the majority ethnic group, the Hutus, overthrew the ruling Tutsi king. Over the next several years, thousands of Tutsis were killed, and some 150,000 driven into exile in neighboring countries. The children of these exiles later formed a rebel group, the Rwandan Patriotic Front (RPF), and began a civil war in 1990. The war, along with several political and economic upheavals, exacerbated ethnic tensions, culminating in April 1994 in a state-orchestrated genocide, in which Rwandans killed up to a million of their fellow citizens, including approximately three-quarters of the Tutsi population. The genocide ended later that same year when the predominantly Tutsi RPF, operating out of Uganda and northern Rwanda, defeated the national army and Hutu militias, and established an RPF-led government of national unity. Approximately 2 million Hutu refugees

—many fearing Tutsi retribution—fled to neighboring Burundi, Tanzania, Uganda, and former Zaire. Since then, most of the refugees have returned to Rwanda, but several thousand remained in the neighboring Democratic Republic of the Congo (DRC, the former Zaire) and formed an extremist insurgency bent on retaking Rwanda, much as the RPF did in 1990. Rwanda held its first local elections in 1999 and its first post-genocide presidential and legislative elections in 2003. Rwanda in 2009 staged a joint military operation with the Congolese Army in DRC to rout out the Hutu extremist insurgency there, and Kigali and Kinshasa restored diplomatic relations. Rwanda also joined the Commonwealth in late 2009 and assumed a nonpermanent seat on the UN Security Council for the 2013–14 term.

Economy—overview: Rwanda is a rural country with about 90% of the population engaged in subsistence agriculture and some mineral and agro-processing. Tourism, minerals, coffee and tea are Rwanda's main sources of foreign exchange. Despite Rwanda's fertile ecosystem, food production often does not keep pace with demand, requiring food imports. Energy shortages, instability in neighboring states, and lack of adequate transportation linkages to other countries continue to handicap private sector growth. The 1994 genocide decimated Rwanda's fragile economic base, severely impoverished the population, particularly women, and temporarily stalled the country's ability to attract private and external investment. However, Rwanda has made substantial progress in stabilizing and rehabilitating its economy to pre-1994 levels. GDP has rebounded with an average annual growth of 7%-8% since 2003 and inflation has been reduced to single digits. Nonetheless, in 2015, 39% of the population lived below the poverty line, according to government statistics, compared to 57% in 2006.

Africa's most densely populated country is trying to overcome the limitations of its small, landlocked economy by leveraging regional trade; Rwanda joined the East African Community and is aligning its budget, trade, and immigration policies with its regional partners. The government has embraced an expansionary fiscal policy to reduce poverty by improving education, infrastructure, and foreign and domestic investment, and pursuing market-oriented reforms. In recognition of Rwanda's successful management of its macro economy, in 2010, the IMF graduated Rwanda to a Policy Support Instrument. The Rwandan Government is seeking to become a regional leader in information and communication technologies. In 2012, Rwanda completed the first modern Special Economic Zone (SEZ) in Kigali. The SEZ seeks to attract investment in all sectors, but specifically in agribusiness, information and communications, trade and logistics, mining, and construction.

Disputes—international: Burundi and Rwanda dispute two sq km (0.8 sq mi) of Sabanerwa, a farmed area in the Rukurazi Valley where the Akany aru/Kany aru River shifted its course southward after heavy rains in 1965; fighting among ethnic groups—loosely associated political rebels, armed gangs, and various government forces in Great Lakes region transcending the boundaries of Burundi, Democratic Republic of the Congo (DROC), Rwanda, and Uganda—abated substantially from a decade ago due largely to UN peacekeeping, international mediation, and efforts by local governments to create civil societies; nonetheless, 57,000 Rwandan refugees still reside in 21 African states, including Zambia, Gabon, and 20,000 who fled to Burundi in 2005 and 2006 to escape drought and

recriminations from traditional courts investigating the 1994 massacres; the 2005 DROC and Rwanda border verification mechanism to stem rebel actions on both sides of the border remains in place

Background: Discovered in 1493 by Christopher COLUMBUS who named it for his brother Bartolomeo, Saint Barthelemy was first settled by the French in 1648. In 1784, the French sold the island to Sweden, which renamed the largest town Gustavia, after the Swedish King GUSTAV III, and made it a free port; the island prospered as a trade and supply center during the colonial wars of the 18th century. France repurchased the island in 1877 and took control the following year. It was placed under the administration of Guadeloupe. Saint Barthelemy retained its free port status along with various Swedish appellations such as Swedish street and town names, and the three-crown symbol on the coat of arms. In 2003 the islanders voted to secede from Guadeloupe, and in 2007 the island became a French overseas

collectivity. In 2012, it became an overseas territory of the EU, allowing it to exert local control over the permanent and temporary immigration of foreign workers including non-French European citizens.

Background: Saint Helena is a British Overseas Territory consisting of Saint Helena and Ascension Islands, and the island group of Tristan da Cunha.

Saint Helena: Uninhabited when first discovered by the Portuguese in 1502, Saint Helena was garrisoned by the British during the 17th century. It acquired fame as the place of Napoleon BONAPARTE's exile from 1815 until his death in 1821, but its importance as a port of call declined after the opening of the Suez Canal in 1869. During the Anglo-Boer War in South Africa, several thousand Boer prisoners were confined on the island between 1900 and 1903.

Ascension Island: This barren and uninhabited island was discovered and named by the Portuguese in 1503. The British garrisoned the island in 1815 to prevent a rescue of Napoleon from Saint Helena. It served as a provisioning station for the Royal Navy's West Africa Squadron on anti-slavery patrol. The island remained under Admiralty control until 1922, when it became a dependency of Saint Helena. During World War II, the UK permitted the US to construct an airfield on Ascension in support of transatlantic flights to Africa and anti-submarine operations in the South Atlantic. In the 1960s the island became an important space tracking station for the US. In 1982, Ascension was an essential staging area for British forces during the Falklands War. It remains a critical refueling point in the air-bridge from the UK to the South Atlantic. The island hosts one of four dedicated ground antennas (the others are on Diego Garcia (British Indian Ocean Territory), Kwajalein (Marshall Islands), and at Cape Canaveral, Florida (US)) that assist in the operation of the Global Positioning System (GPS) navigation system. NASA and the US Air Force also operate a Meter-Class Autonomous Telescope (MCAT) on Ascension as part of the deep space surveillance system for tracking orbital debris, which can be a hazard to spacecraft and astronauts.

Tristan da Cunha: The island group consists of Tristan da Cunha, Nightingale, Inaccessible, and Gough Islands. Tristan da Cunha is named after its Portuguese discoverer (1506); it was garrisoned by the British in 1816 to prevent any attempt to rescue Napoleon from Saint Helena. Gough and Inaccessible Islands have been designated World Heritage Sites. South Africa leases a site for a meteorological station on Gough Island.

Background: Carib Indians occupied the islands of the West Indies for hundreds of years before the British began settlement in 1623. In 1967, the island territory of Saint Christopher-Nevis-Anguilla became an associated state of the UK with full internal autonomy. The island of Anguilla rebelled and was allowed to secede in 1971. The remaining islands achieved independence in 1983 as Saint Kitts and Nevis. In 1998, a referendum on Nevis to separate from Saint Kitts fell short of the two-thirds majority vote needed. Nevis continues in its efforts to separate from Saint Kitts.

Diplomatic representation from the US: the US does not have an embassy in Saint Kitts and Nevis; the US Ambassador to Barbados is accredited to Saint Kitts and Nevis

Flag description: divided diagonally from the lower hoist side by a broad black band bearing two white, five-pointed stars; the black band is edged in yellow; the upper triangle is green, the lower triangle is red; green signifies the island's fertility, red symbolizes the struggles of the people from slavery, yellow denotes year-round sunshine, and black represents the African heritage of the people; the white stars stand for the islands of Saint Kitts and Nevis, but can also express hope and liberty, or independence and optimism

National symbol(s): brown pelican, Royal Poinciana (Flamboyant) tree; National colors: green, yellow, red, black, white

National anthem: *name:* "Oh Land of Beauty!"

lyrics/music: Kenrick Anderson GEORGES

note: adopted 1983

Economy—overview: The economy of Saint Kitts and Nevis depends on tourism; since the 1970s, tourism has replaced sugar as the economy's traditional mainstay. Roughly 200,000 tourists visited the islands in 2009, but reduced tourism arrivals and foreign investment led to an economic contraction in 2009–2013, and the economy returned to growth only in 2014. Like other tourist destinations in the Caribbean, St. Kitts and Nevis is vulnerable to damage from Natural disasters and shifts in tourism demand.

Following the 2005 harvest, the government closed the sugar industry after several decades of losses. To compensate for lost jobs, the government has embarked on a program to diversify the agricultural sector and to stimulate other sectors of the economy, such as export-oriented manufacturing and offshore banking. The government has made notable progress in reducing its public debt, from 154% of GDP in 2011 to 83% in 2013, although it still faces one of the highest levels in the world, largely attributable to public enterprise losses.

Background: The island, with its fine Natural harbor at Castries, was contested between England and France throughout the 17th and early 18th centuries (changing possession 14 times); it was finally ceded to the UK in 1814. Even After the abolition of slavery on its plantations in 1834, Saint Lucia remained an agricultural island, dedicated to producing tropical commodity crops. Self-government was granted in 1967 and independence in 1979.

Economy—overview: The island nation has been able to attract foreign business and investment, especially in its offshore banking and tourism industries. Tourism is Saint Lucia's main source of jobs and income—accounting for 65% of GDP—and the island's main source of foreign exchange earnings. The manufacturing sector is the most diverse in the Eastern Caribbean Area. Crops such as bananas, mangos, and avocados continue to be grown for export, but St. Lucia's once solid banana industry has been devastated by strong competition.

Saint Lucia is vulnerable to a variety of external shocks, including volatile tourism receipts, Natural disasters, and dependence on foreign oil. Furthermore, high public debt—77% of GDP in 2012—and high debt servicing obligations constrain the ANTHONY administration's ability to respond to adverse external shocks.

St. Lucia has experienced anemic growth since the onset of the global financial crisis in 2008, largely because of a slowdown in tourism—airlines cut back on their routes to St. Lucia in 2012. Also, St. Lucia introduced a value added tax in 2012 of 15%, becoming the last country in the Eastern Caribbean to do so. In 2013, the government introduced a National Competitiveness and Productivity Council to address St. Lucia's high public wages and lack of productivity.

Disputes—International: joins other Caribbean states to counter Venezuela's claim that Aves Island sustains human habitation, a criterion under UN Convention on the Law of the Sea, which permits Venezuela to extend its EEZ/continental shelf over a large portion of the eastern Caribbean Sea

Illicit drugs: transit point for South American drugs destined for the US and Europe

Background: Although sighted by Christopher COLUMBUS in 1493 and claimed for Spain, it was the Dutch who occupied the island in 1631 and set about exploiting its salt deposits. The Spanish retook the island in 1633, but continued to be harassed by the Dutch. The Spanish finally relinquished Saint Martin to the French and Dutch, who divided it between themselves in 1648. Friction between the two sides caused the border to frequently fluctuate over the next two centuries, with the French eventually holding the greater portion of the island (about 57%). The cultivation of sugar cane introduced African slavery to the island in the late 18th century; the practice was not abolished until 1848. The island became a free port in 1939; the tourism industry was dramatically expanded during the 1970s and 1980s. In 2003, the populace of Saint Martin voted to secede from Guadeloupe and in 2007, the northern portion of the island became a French overseas collectivity. In 2010, the southern Dutch portion of the island became the independent nation of Sint Maarten within the Kingdom of the Netherlands.

Economy—overview: The economy of Saint Martin centers on tourism with 85% of the labor force engaged in this sector. Over one million visitors come to the island each year with most arriving through the Princess Juliana International Airport in Sint Maarten. No significant agriculture and limited local fishing means that almost all food must be imported. Energy resources and manufactured goods are also imported, primarily from Mexico and the US. Saint Martin is reported to have the highest per capita income in the Caribbean.

Flag description: a yellow three-masted sailing ship facing the hoist side rides on a blue background with scattered, white, wavy lines under the ship; a continuous black-over-white wavy line divides the ship from the white wavy lines; on the hoist side, a vertical band is divided into three parts: the top part (called ikkurina) is red with a green diagonal cross extending to the corners overlaid by a white cross dividing the rectangle into four sections; the middle part has a white background with an ermine pattern; the third part has a red background with two stylized yellow lions outlined in black, one above the other; these three heraldic arms represent settlement by colonists from the Basque Country (top), Brittany, and Normandy; the blue on the main portion of the flag symbolizes the Atlantic Ocean and the stylized ship represents the Grande Hermine in which Jacques Cartier “discovered” the islands in 1536

note: the flag of France used for official occasions

National symbol(s): 16th-century sailing ship

National anthem: *note:* as a collectivity of France, “La Marseillaise” is official (see France)

Economy—overview: The inhabitants have traditionally earned their livelihood by fishing and by servicing fishing fleets operating off the coast of Newfoundland. The economy has been declining, however, because of disputes with Canada over fishing quotas and a steady decline in the number of ships stopping at Saint Pierre. In 1992, an arbitration panel awarded the islands an exclusive economic zone of 12,348 sq km to settle a longstanding territorial dispute with Canada, although it represents only 25% of what France had sought. France heavily subsidizes the islands to the great betterment of living standards.

The government hopes an expansion of tourism will boost economic prospects. Fish farming, crab fishing, and agriculture are being developed to diversify the local economy. Recent test drilling for oil may pave the way for development of the energy sector.

Background: Resistance by native Caribs prevented colonization on Saint Vincent until 1719. Disputed between France and the UK for most of the 18th century, the island was ceded to the latter in 1783. Between 1960 and 1962, Saint Vincent and the Grenadines was a separate administrative unit of the Federation of the West Indies. Autonomy was granted in 1969 and independence in 1979.

Economy—overview: Success of the economy hinges upon seasonal variations in Agriculture, tourism, and construction activity as well as remittances. Much of the workforce is employed in banana production and tourism, but persistent high unemployment has prompted many to leave the islands. Saint Vincent is home to a small offshore banking sector and has moved to adopt International regulatory standards.

This lower-middle-income country is vulnerable to Natural disasters—tropical storms wiped out substantial portions of crops in 1994, 1995, and 2002. Floods and mudslides caused by unseasonable rainfall in 2013, caused substantial damage to infrastructure, homes, and crops, which the World Bank estimated at US\$112 million. The government’s ability to invest in social programs and respond to external shocks is constrained by its high public debt burden, which was 67% of GDP—one of the lowest levels in the Eastern Caribbean—at the end of 2013.

In 2013, the islands had more than 200,000 tourist arrivals, mostly to the Grenadines. Arrivals represented a marginal increase from 2012 but remain 26% below St. Vincent’s 2009 peak. Weak recovery in the tourism and construction sectors limited growth in 2015.

Disputes—International: joins other Caribbean states to counter Venezuela's claim that Aves Island sustains human habitation, a criterion under UN Convention on the Law of the Sea, which permits Venezuela to extend its EEZ/continental shelf over a large portion of the eastern Caribbean Sea

Trafficking in persons: *current situation:* Saint Vincent and the Grenadines is a source, transit, and destination country for men, women, and children subjected to forced labor and sex trafficking; some children under 18 are pressured to engage in sex acts in exchange for money or gifts; foreign workers may experience forced labor and are particularly vulnerable when employed by small, foreign-owned companies; adults and children are vulnerable to forced labor domestically, especially in the agriculture sector

tier rating: Tier 2 Watch List—Saint Vincent and the Grenadines does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; the government for the first time acknowledged a trafficking problem, launched an anti-trafficking public awareness campaign, and conducted anti-trafficking training for law enforcement, immigration, and labor officials; in 2014, authorities initiated three trafficking investigations, two of which were ultimately determined not to be trafficking cases, and did not prosecute or convict any trafficking offenders; the government did not identify or refer any potential trafficking victims to care (2015)

Illicit drugs: transshipment point for South American drugs destined for the US and Europe; small-scale cannabis cultivation

Background: New Zealand occupied the German protectorate of Western Samoa at the outbreak of World War I In 1914. It continued to administer the islands as a mandate and then as a trust territory until 1962, when the islands became the first Polynesian nation to reestablish independence in the 20th century. The country dropped the “Western” from its name in 1997.

Economy—overview: The economy of Samoa has traditionally been dependent on development aid, family remittances from overseas, tourism, agriculture, and fishing. It has a nominal GDP of \$780 million. Agriculture, including fishing, employs roughly two-thirds of the labor force and furnishes 90% of exports, featuring fish, coconut oil, nonu products, and taro. The manufacturing sector mainly processes agricultural products. One factory in the Foreign Trade Zone employs 1,000 people to make automobile electrical harnesses for an assembly plant in Australia, and accounts for 65% of total exports. Industry accounts for nearly 15% of GDP while employing less than 6% of the work force. The service sector accounts for nearly three-quarters of GDP and employs approximately 50% of the labor force. Tourism is an expanding sector accounting for 25% of GDP; 132,000 tourists visited the islands in 2013.

The country is vulnerable to devastating storms. In September 2009,

an earthquake and the resulting tsunami severely damaged Samoa and nearby American Samoa, disrupting transportation and power generation, and resulting in about 200 deaths. In December 2012, extensive flooding and wind damage from Tropical Cyclone Evan killed four people, displaced over 6,000, and damaged or destroyed an estimated 1,500 homes on Samoa's Upolu Island.

The Samoan Government has called for deregulation of the country's financial sector, encouragement of investment, and continued fiscal discipline, while at the same time protecting the environment. Foreign reserves are relatively healthy and inflation is low, but external debt is approximately 55% of GDP. Samoa became the 155th member of the WTO in May 2012, and graduated from least developed country (LDC) status in January 2014.

Background: Geographically the third smallest state in Europe (after the Holy See and Monaco), San Marino also claims to be the world's oldest republic. According to tradition, it was founded by a Christian stonemason named MARINUS in A.D. 301. San Marino's foreign policy is aligned with that of the EU, although it is not a member; social and political trends in the republic track closely with those of its larger neighbor, Italy.

Economy—overview: San Marino's economy relies heavily on tourism, banking, and the manufacture and export of ceramics, clothing, fabrics, furniture, paints, spirits, tiles, and wine. The manufacturing and financial sectors account for more than half of San Marino's GDP. The per capita level of output and standard of living are comparable to those of the most prosperous regions of Italy.

San Marino's economy has been contracting since 2008, largely due to weakened demand from Italy—which accounts for nearly 90% of its export market—and financial sector consolidation. Difficulties in the

banking sector, the recent global economic downturn, and the sizable decline in tax revenues have contributed to negative real GDP growth. The government has adopted measures to counter the downturn, including subsidized credit to businesses and is seeking to shift its growth model away from a reliance on bank and tax secrecy. San Marino does not issue public debt securities; when necessary, it finances deficits by drawing down central bank deposits.

The economy benefits from foreign investment due to its relatively low corporate taxes and low taxes on interest earnings. The income tax rate is also very low, about one-third the average EU level. San Marino continues to work towards harmonizing its fiscal laws with EU and International standards. In September 2009, the OECD removed San Marino from its list of tax havens that have yet to fully adopt global tax standards, and in 2010 San Marino signed Tax Information Exchange Agreements with most major countries. In 2013, the San Marino Government signed a Double Taxation agreement with Italy, but a referendum on EU membership failed to reach the quorum needed to bring it to a vote.

Background: Discovered and claimed by Portugal in the late 15th century, the islands' sugar-based economy gave way to coffee and cocoa in the 19th century—all grown with African plantation slave labor, a form of which lingered into the 20th century. While

independence was achieved in 1975, democratic reforms were not instituted until the late 1980s. The country held its first free elections in 1991, but frequent internal wrangling between the various political parties precipitated repeated changes in leadership and four failed, non-violent coup attempts in 1995, 1998, 2003, and 2009. In 2012, three opposition parties combined in a no confidence vote to bring down the majority government of former Prime Minister Patrice TROVOADA, but in 2014, legislative elections returned him to the office. Economy—overview: This small, poor island economy has become increasingly dependent on cocoa since independence in 1975. Cocoa production has substantially declined in recent years because of drought and mismanagement. Sao Tome and Principe has to import fuels, most manufactured goods, consumer goods, and food, making it vulnerable to fluctuations in global commodity prices. Maintaining control of inflation, fiscal discipline, and increasing flows of foreign direct investment into the oil sector are major economic problems facing the country. The government also has attempted to reduce price controls and subsidies. Over the years, Sao Tome and Principe has had difficulty servicing its external debt and has relied heavily on concessional aid and debt rescheduling. It benefited from \$200 million in debt relief in December 2000 under the Highly Indebted Poor Countries program, which helped bring down the country's \$300 million debt burden. In August 2005, the government signed on to a new 3-year IMF Poverty Reduction and Growth Facility program worth \$4.3 million. In April 2011, the country completed a Threshold Country Program with The Millennium Challenge Corporation to help increase tax revenues, reform customs, and improve the business environment.

Considerable potential exists for development of a tourist industry, and the government has taken steps to expand facilities in recent years. Potential also exists for the development of petroleum resources in Sao Tome and Principe's territorial waters in the oil-rich Gulf of Guinea, which are being jointly developed in a 60–40 split with Nigeria, but any actual production is at least several years off. The first production licenses were sold in 2004, though a dispute over

licensing with Nigeria delayed the country's receipt of more than \$20 million in signing bonuses for almost a year.

Background: Saudi Arabia is the birthplace of Islam and home to Islam's two holiest shrines in Mecca and Medina. The king's official title is the Custodian of the Two Holy Mosques. The modern Saudi state was founded in 1932 by ABDAL-AZIZ BIN Abdal-Rahman AL SAUD (Ibn Saud) after a 30-year campaign to unify most of the Arabian Peninsula. One of his male descendants rules the country today, as required by the country's 1992 Basic Law. Following Iraq's invasion of Kuwait in 1990, Saudi Arabia accepted the Kuwaiti royal family and 400,000 refugees while allowing Western and Arab troops to deploy on its soil for the liberation of Kuwait the following year. The continuing presence of foreign troops on Saudi soil after the liberation of Kuwait became a source of tension between the royal family and the public until all operation al US troops left the country in 2003. Major terrorist attacks in May and November 2003 spurred a strong ongoing campaign against domestic terrorism and extremism. From 2005 to 2015, King ABDALLAH incrementally modernized the Kingdom. Driven by person al ideology and political pragmatism, he

introduced a series of social and economic initiatives, including expanding employment and social opportunities for women, attracting foreign investment, increasing the role of the private sector in the economy, and discouraging businesses from hiring foreign workers. Saudi Arabia saw protests during the 2011 Arab Spring among Shia Muslims in the Eastern Province, who protested primarily against the detention of political prisoners, endemic discrimination, and Bahraini and Saudi Government actions in Bahrain. Riyadh took a cautious but firm approach by arresting some protesters but releasing most of them quickly and by using its state-sponsored clerics to counter political and Islamist activism. In addition, protests were met by a strong police presence, with some arrests, but not the level of bloodshed seen in protests elsewhere in the region.

The government held its first-ever elections in 2005 and 2011, when Saudis went to the polls to elect municipal councilors. In December 2015, women were allowed to vote and stand as candidates for the first time in municipal council elections, with 21 women winning seats. King SALMAN BIN Abd al-Aziz Al Saud ascended to the throne in 2015 and placed the first next-generation prince, MUHAMMAD BIN NAIF BIN Abd al-Aziz Al Saud, in the line of succession as Crown Prince. He designated his son, MUHAMMAD BIN SALMAN BIN Abd al-Aziz Al Saud, as the Deputy Crown Prince. In March 2015, Saudi Arabia led a coalition of 10 countries in a military campaign to restore the government of Yemen, which had been ousted by Huthi forces allied with former president ALI ABDULLAH al-Salih. The war in Yemen has led to civilian casualties and shortages of basic supplies, which has drawn considerable international criticism. In December 2015, Deputy Crown Prince MUHAMMAD BIN SALMAN announced Saudi Arabia would lead a 34-nation Islamic Coalition to fight terrorism. In January 2016, Saudi Arabia executed 47 people on charges of terrorism, including Shia Muslim cleric NIMR al-Nimr. Iranian protesters overran Saudi diplomatic facilities in Iran to protest al-NIMR's execution and the Saudi government responded by cutting off diplomatic ties with Iran.

Economy—overview: Saudi Arabia has an oil-based economy with strong government controls over major economic activities. It possesses about 16% of the world’s proven petroleum reserves, ranks as the largest exporter of petroleum, and plays a leading role in OPEC. The petroleum sector accounts for roughly 87% of budget revenues, 42% of GDP, and 90% of export earnings.

Saudi Arabia is encouraging the growth of the private sector in order to diversify its economy and to employ more Saudi Nationals. Over 6 million foreign workers play an important role in the Saudi economy, particularly in the oil and service sectors; at the same time, however, Riyadh is struggling to reduce unemployment among its own Nationals. Saudi officials are particularly focused on employing its large youth population, which generally lacks the education and technical skills the private sector needs. In 2015, the Kingdom incurred a budget deficit estimated at 13% of GDP, and it faces a deficit of \$87 billion in 2016, which will be financed by bond sales and drawing down reserves. Although the Kingdom can finance high deficits for several years by drawing down its considerable foreign assets or by borrowing, it has announced plans to cut capital spending in 2016. Some of these plans to cut deficits include introducing a value-added tax and reducing subsidies on electricity, water, and petroleum Products. In January 2016, Crown Prince and Deputy Prime Minister MUHAMMAD BIN SALMAN announced that Saudi Arabia intends to list shares of its state-owned petroleum company, ARAMCO

—another move to increase revenue and outside investment. The government has also looked at privatization and diversification of the economy more closely in the wake of a diminished oil market. Historically, Saudi Arabia has focused diversification efforts on power generation, telecommunications, Natural gas exploration, and petrochemical sectors. More recently, the government has approached investors about expanding the role of the private sector in the healthcare, education and tourism industries. While Saudi Arabia has emphasized their goals of diversification for some time, current low oil prices may force the government to make more drastic changes ahead of their long-run timeline.

Disputes—International: Saudi Arabia has reinforced its concrete-filled security barrier along sections of the now fully demarcated border with Yemen to stem illegal cross-border activities; Kuwait and Saudi Arabia continue discussions on a maritime boundary with Iran; Saudi Arabia claims Egyptian-administered islands of Tiran and Sanafir

Refugees and internally displaced persons: *refugees* (country of origin): 30,000 (Yemen) (2016)

stateless persons: 70,000 (2015); note—thousands of biduns (stateless Arabs) are descendants of nomadic tribes who were not officially registered when National borders were established, while others migrated to Saudi Arabia in search of jobs; some have temporary identification cards that must be renewed every five years, but their rights remain restricted; most Palestinians have only legal resident status; some Naturalized Yemenis were made stateless after being stripped of their passports when Yemen backed Iraq in its invasion of Kuwait in 1990; Saudi women cannot pass their citizenship on to their children, so if they marry a non-national, their children risk statelessness

Trafficking in persons: *current situation*: Saudi Arabia is a destination country for men and women subjected to forced labor and, to a lesser extent, forced prostitution; men and women from South and East Asia, the Middle East, and Africa who voluntarily travel to Saudi Arabia as domestic servants or low-skilled laborers subsequently face conditions of involuntary servitude, including nonpayment and withholding of passports; some migrant workers are forced to work indefinitely beyond the term of their contract because their employers will not grant them a required exit visa; female domestic workers are particularly vulnerable because of their isolation in private homes; women, primarily from Asian and African countries, are believed to be forced into prostitution in Saudi Arabia, while other foreign women were reportedly kidnapped and forced into prostitution after running away from abusive employers; children from South Asia, East Africa, and Yemen are subjected to forced labor as beggars and street vendors in Saudi Arabia, facilitated by criminal gangs

tier rating: Tier 2 Watch List—Saudi Arabia does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; government officials and high-level religious leaders demonstrated greater political will to combat trafficking and publically acknowledged the problem—specifically forced labor; the government reported increased numbers of prosecutions and convictions of trafficking offenders; however, it did not proactively investigate and prosecute employers for potential labor trafficking crimes following their withholding of workers' wages and passports, which are illegal; authorities did not systematically use formal criteria to proactively identify victims, resulting in some unidentified victims being arrested, detained, deported, and sometimes prosecuted; more victims were identified and referred to protective services in 2014 than the previous year, but victims of sex

trafficking and male trafficking victims were not provided with shelter and remained vulnerable to punishment (2015)

Illicit drugs: regularly enforces the death penalty for drug traffickers, with foreigners being convicted and executed disproportionately; improving anti-money-laundering legislation and enforcement

Background: The French colonies of Senegal and French Sudan were merged in 1959 and granted independence in 1960 as the Mali Federation. The union broke up after only a few months. Senegal joined with The Gambia to form the nominal confederation of Senegambia in 1982. The envisaged integration of the two countries

was never implemented, and the union was dissolved in 1989. The Movement of Democratic Forces in the Casamance has led a low-level separatist insurgency in southern Senegal since the 1980s, and several peace deals have failed to resolve the conflict. Nevertheless, Senegal remains one of the most stable democracies in Africa and has a long history of participating in International peacekeeping and Regional mediation. Senegal was ruled by a Socialist Party for 40 years until Abdoulaye WADE was elected president in 2000. He was reelected in 2007 and during his two terms amended Senegal's constitution over a dozen times to increase executive power and weaken the opposition. His decision to run for a third presidential termsparked a large public backlash that led to his defeat in a March 2012 runoff with Macky SALL, whose term runs until 2019. A 2016 constitutional referendum reduced the term to five years with a maximum of two consecutive terms for future presidents.

Economy—overview: Senegal’s economy is driven by mining, construction, tourism, fisheries and agriculture, which is the primary source of employment in rural areas. The country’s key export industries include phosphate mining, fertilizer production, agricultural products and commercial fishing and it is also working on oil

exploration projects. Senegal relies heavily on donor assistance, remittances and foreign direct investment. For the first time in the past twelve years, Senegal reached a growth rate of 6.5% in 2015 due in part to a buoyant performance in agriculture because of higher rainfall and productivity in the sector. President Macky SALL, who was elected in March 2012 under a reformist policy agenda, inherited an economy with high energy costs, a challenging business environment, and a culture of overspending. President SALL unveiled an ambitious economic plan, the Emerging Senegal Plan (ESP), which aims to implement priority economic reforms and investment projects to increase economic growth while preserving macroeconomic stability and debt sustainability. Bureaucratic bottlenecks and a challenging business climate are among the perennial challenges that may slow the implementation of this plan. Senegal is receiving technical support from the IMF from 2015–2017 under a Policy Support Instrument (PSI) to assist with implementation of the ESP. The PSI implementation continues to be satisfactory as concluded by the IMF's second review mission in March 2016. Investors have signaled confidence in the country through Senegal's successful Eurobond issuances in recent years, including in 2014. The government will focus on 19 projects under the ESP for the 2016 budget to continue the structural transformation of the economy. These 19 projects include the Thies-Touba Highway, including the new airport- Mbour-Thies Highway. Senegal will increase the National family allowances program and the community development emergency program in 2016. Electricity supply is a chief constraint for Senegal's development. Electricity prices in Senegal are among the highest in the world. Power Africa, a program led by USAID and OPIC, plans to increase the current 500 mW of generating capacity to over 1,000 mW in the next three to five years. Recent gas discoveries on the Senegal-Mauritanian border, as well as just south of Dakar, will help alleviate some of the energy shortages.

Background: The Kingdom of Serbs, Croats, and Slovenes was formed in 1918; its name was changed to Yugoslavia in 1929. Communist Partisans resisted the Axis occupation and division of Yugoslavia from 1941 to 1945 and fought Nationalist opponents and collaborators as well. The military and political movement headed by Josip Broz “TITO” (Partisans) took full control of Yugoslavia when their domestic rivals and the occupiers were defeated in 1945. Although communists, TITO and his successors (Tito died in 1980) managed to steer their own path between the Warsaw Pact nations and the West for the next four and a half decades. In 1989, Slobodan MILOSEVIC became president of the Republic of Serbia and his ultraNationalist calls for Serbian domination led to the violent breakup of Yugoslavia along ethnic lines. In 1991, Croatia, Slovenia, and Macedonia declared independence, followed by Bosnia in 1992. The remaining republics of Serbia and Montenegro declared a new Federal Republic of Yugoslavia (FRY) in April 1992 and under MILOSEVIC’s leadership, Serbia led various military campaigns to

unite ethnic Serbs in neighboring republics into a “Greater Serbia.” These actions ultimately failed and, after International intervention, led to the signing of the Dayton Peace Accords in 1995.

MILOSEVIC retained control over Serbia and eventually became president of the FRY in 1997. In 1998, an ethnic Albanian insurgency in the formerly autonomous Serbian province of Kosovo provoked a Serbian counterinsurgency campaign that resulted in massacres and massive expulsions of ethnic Albanians living in Kosovo. The MILOSEVIC government’s rejection of a proposed International settlement led to NATO’s bombing of Serbia in the spring of 1999. Serbian military and police forces withdrew from Kosovo in June 1999, and the UN Security Council authorized an interim UN Administration and a NATO-led security force in Kosovo. FRY elections in late 2000 led to the ouster of MILOSEVIC and the installation of democratic government. In 2003, the FRY became the State Union of Serbia and Montenegro, a loose federation of the two republics. Widespread violence predominantly targeting ethnic Serbs in Kosovo in March 2004 led to more intense calls to address Kosovo’s status, and the UN began facilitating status talks in 2006. In June 2006, Montenegro seceded from the federation and declared itself an independent nation. Serbia subsequently gave notice that it was the successor state to the union of Serbia and Montenegro. In February 2008, after nearly two years of inconclusive negotiations, Kosovo declared itself independent of Serbia—an action Serbia refuses to recognize. At Serbia’s request, the UN General Assembly (UNGA) in October 2008 sought an advisory opinion from the International Court of Justice (ICJ) on whether Kosovo’s unilateral declaration of independence was in accordance with International law. In a ruling considered unfavorable to Serbia, the ICJ issued an advisory opinion in July 2010 stating that International law did not prohibit declarations of independence. In late 2010, Serbia agreed to an EU-drafted UNGA Resolution acknowledging the ICJ’s decision and calling for a new round of talks between Serbia and Kosovo, this time on practical issues rather than Kosovo’s status. Serbia and Kosovo signed the first agreement of principles governing the normalization of relations between the two countries in April 2013 and are in the process of implementing its provisions. Prime Minister Aleksandar VUCIC, has promoted an ambitious goal of Serbia joining the EU by 2020. Under his leadership, in January 2014 Serbia opened formal negotiations for accession.

Flag description: three equal horizontal stripes of red (top), blue, and white—the Pan-Slav colors representing freedom and revolutionary ideals; charged with the coat of arms of Serbia shifted slightly to the hoist side; the principal field of the coat of arms represents the Serbian state and displays a white two-headed eagle on a red shield; a smaller red shield on the eagle represents the Serbian nation, and is divided into four quarters by a white cross; interpretations vary as to the meaning and origin of the white, curved symbols resembling firesteels or Cyrillic “C’s” in each quarter; a royal crown surmounts the coat of arms

note: the Pan-Slav colors were inspired by the 19th-century flag of Russia

National symbol(s): double-headed eagle; National colors: red, blue, white

National anthem: *name:* “Boze pravde” (God of Justice)

lyrics/music: Jovan DORDEVIC/Davorin JENKO

note: adopted 1904; song originally written as part of a play in 1872

and has been used as an anthem by the Serbian people throughout the 20th and 21 st centuries

Economy—overview: Serbia has a transitional economy largely dominated by market forces, but the state sector remains significant in certain Areas and many institutional reforms are needed. The economy relies on manufacturing and exports, driven largely by foreign investment. MILOSEVIC-era mismanagement of the economy, an extended period of International economic sanctions, civil war, and the damage to Yugoslavia's infrastructure and industry during the NATO airstrikes in 1999 left the economy only half the size it was in 1990.

After former Federal Yugoslav President MILOSEVIC was ousted in September 2000, the Democratic Opposition of Serbia (DOS) coalition Government implemented stabilization measures and embarked on a market reform program. Serbia renewed its membership in the IMF in December 2000 and rejoined the World Bank and the European Bank for Reconstruction and Development. Serbia has made progress in trade liberalization and enterprise restructuring and privatization, but many large enterprises—including the power utilities, telecommunications company, Natural gas company, and others—remain state-owned. Serbia has made some progress towards EU membership, signing a Stabilization and Association agreement with Brussels in May 2008, and with full implementation of the Interim Trade Agreement with the EU in February 2010, gained candidate status in March 2012. In January 2014, Serbia's EU accession talks officially opened. Serbia's negotiations with the WTO are advanced, with the country's complete ban on the trade and cultivation of agricultural biotechnology products representing the primary remaining obstacle to accession. Serbia's program with the IMF was frozen in early 2012 because the 2012 budget approved by parliament deviated from the program parameters; the arrangement is now void. In late 2014, Serbia and the IMF announced a tentative plan for a precautionary loan worth approximately \$1 billion, but the government will be challenged to implement IMF-mandated reforms that will target social spending and the large public sector.

High unemployment and stagnant household incomes are ongoing political and economic problems. Structural economic reforms needed to ensure the country's long-term prosperity have largely stalled since the onset of the global financial crisis. Growing budget deficits constrain the use of stimulus efforts to revive the economy and contribute to growing concern of a public debt crisis, given that Serbia's total public debt as a share of GDP more than doubled

between 2008 and 2014. Serbia's concerns about inflation and exchange-rate stability preclude the use of expansionary monetary policy. During 2014 the SNS party addressed issues with the fiscal deficit, state-owned enterprises, the labor market, construction permits, bankruptcy and privatization, and other areas.

Major challenges ahead include: high unemployment rates and the need for job creation; high government expenditures for salaries, pensions, healthcare, and unemployment benefits; a growing need for new government borrowing; rising public and private foreign debt; attracting new foreign direct investment; and getting the IMF program back on track. Other serious longer-term challenges include an inefficient judicial system, high levels of corruption, and an Aging population. Factors favorable to Serbia's economic growth include its strategic location, a relatively inexpensive and skilled labor force, and free trade agreements with the EU, Russia, Turkey, and countries that are members of the Central European Free Trade Agreement.

Background: A lengthy struggle between France and Great Britain for the islands ended in 1814, when they were ceded to the latter. Independence came in 1976. Single-party rule was brought to a close with a new constitution and free elections in 1993. President France-Albert RENE, who had served since 1977, was reelected in 2001, but stepped down in 2004. Vice President James Alix MICHEL took over the presidency and in July 2006 was elected to a new five-year term; he was reelected in May 2011 and again in December 2015.

Economy—overview: Since independence in 1976, per capita output in this Indian Ocean Archipelago has expanded to roughly seven times the pre-independence, near-subsistence level, moving the island into the upper-middle-income group of countries. Growth has been led by the tourist sector, which employs about 30% of the labor force and provides more than 70% of hard currency earnings, and by tuna fishing. In recent years, the government has encouraged foreign investment to upgrade hotels and other services. At the same time, the government has moved to reduce the dependence on tourism by promoting the development of farming, fishing, and small-scale manufacturing.

In 2008, having depleted its foreign exchange reserves, Seychelles defaulted on interest payments due on a \$230 million Eurobond, requested assistance from the IMF, and immediately enacted a number of significant structural reforms, including liberalization of the exchange rate, reform of the public sector to include layoffs, and the sale of some state assets. In December 2013, the IMF declared that

Seychelles had successfully transitioned to a market-based economy with full employment and a fiscal surplus. Seychelles grew at 4.3% in 2015 because of a strong tourist sector and expanding private sector credits; its fiscal surplus reached 4% of GDP.

Disputes—International: Mauritius and Seychelles claim the Chagos Islands (UK-administered British Indian Ocean Territory)

Background: The British set up a trading post near present-day Freetown in the 17th century. Originally the trade involved timber and ivory, but later it expanded into slaves. Following the American Revolution, a colony was established in 1787 and Sierra Leone became a destination for resettling black loyalists who had originally been resettled in Nova Scotia. After the abolition of the slave trade in 1807, British crews delivered thousands of Africans liberated from illegal slave ships to Sierra Leone, particularly Freetown. The colony gradually expanded inland during the course of the 19th century; independence was attained in 1961. Democracy is slowly being reestablished after the civil war (1991–2002) that resulted in tens of thousands of deaths and the displacement of more than 2 million people (about one third of the population). The military, which took over full responsibility for security following the departure of UN peacekeepers at the end of 2005, has developed as a guarantor of the country's stability; the armed forces remained on the sideline during the 2007 and 2012 National elections. In March 2014, the closure of

the UN Integrated Peacebuilding Office in Sierra Leone marked the end of more than 15 years of peacekeeping and political operations in Sierra Leone. The government's stated priorities include furthering development—including recovering from the Ebola epidemic—creating jobs, and stamping out endemic corruption.

Economy—overview: Sierra Leone is extremely poor and nearly half of the working-age population engages in subsistence agriculture. The country possesses substantial mineral, agricultural, and fishery resources, but it is still recovering from a civil war that destroyed most institutions before ending in the early 2000s. In recent years economic growth has been driven by mining—particularly iron ore. The country’s principal exports are iron ore, diamonds, and rutile, and the economy is vulnerable to fluctuations in International prices. Until 2014, the government had relied on external assistance to support its budget, but it was gradually becoming more independent. The Ebola outbreak of 2014 and 2015, combined with falling global commodities prices, caused a significant contraction of economic activity in all areas. While the World Health Organization declared an end to the Ebola outbreak in Sierra Leone in November 2015, economic recovery will depend on rising commodities prices and increased efforts to diversify the sources of growth. Pervasive corruption and undeveloped human capital will continue to deter foreign investors. Sustained International donor support in the near future will partially offset these fiscal constraints.

Disputes—International: Sierra Leone opposes Guinean troops' continued occupation of Yenga, a small village on the Makon a River that serves as a border with Guinea; Guinea's forces came to Yenga in the mid-1990s to help the Sierra Leonean military to suppress rebels and to secure their common border but have remained there even after both countries signed a 2005 agreement acknowledging that Yenga belonged to Sierra Leone; in 2012, the two sides signed a declaration to demilitarize the area

Background: Singapore was founded as a British trading colony in 1819. It joined the Malaysian Federation in 1963 but was ousted two years later and became independent. Singapore subsequently became one of the world's most prosperous countries with strong International trading links (its port is one of the world's busiest in terms of tonnage handled) and with per capita GDP equal to that of the leading nations of Western Europe.

Economy—overview: Singapore has a highly developed and successful free-market economy. It enjoys a remarkably open and corruption-free environment, stable prices, and a per capita GDP higher than that of most developed countries. Unemployment is very low. The economy depends heavily on exports, particularly of consumer electronics, information technology products, medical and optical devices, pharmaceuticals, and on its vibrant transportation, business, and financial services sectors.

The economy contracted 0.6% in 2009 as a result of the global financial crisis, but has continued to grow since 2010 on the strength of renewed exports. Growth in 2014–15 was slower at under 3%, largely a result of soft demand for exports amid a sluggish global economy and weak growth in Singapore's manufacturing sector.

The government is attempting to restructure Singapore's economy by weaning its dependence on foreign labor, addressing weak productivity, and increasing Singaporean wages. Singapore has attracted major investments in pharmaceuticals and medical technology production and will continue efforts to strengthen its position as Southeast Asia's leading financial and high-tech hub. Singapore is a member of the 12-nation Trans-Pacific Partnership free trade negotiations, as well as the Regional Comprehensive Economic Partnership negotiations with the nine other ASEAN members plus

Australia, China, India, Japan, South Korea, and New Zealand. in 2015, Singapore formed, with the other ASEAN members, the ASEAN Economic Community.

Transportation—note: the International Maritime Bureau reports the territorial and offshore waters in the South China Sea as high risk for piracy and armed robbery against ships; numerous commercial vessels have been attacked and hijacked both at anchor and while underway; hijacked vessels are often disguised and cargo diverted to ports in East Asia; crews have been murdered or cast adrift; in 2014, 8 commercial vessels were attacked in the Singapore Straits

Disputes—International: disputes persist with Malaysia over deliveries of fresh water to Singapore, Singapore's extensive land reclamation works, bridge construction, and maritime boundaries in the Johor and Singapore Straits; in 2008, ICJ awarded sovereignty of

Pedra Branca (Pulau Batu Puteh/Horsburgh Island) to Singapore, and Middle Rocks to Malaysia, but did not rule on maritime regimes, boundaries, or disposition of South Ledge; Indonesia and Singapore continue to work on finalization of their 1973 maritime boundary agreement by defining unresolved areas north of Indonesia's Batam Island; piracy remains a problem in the Malacca Strait

Illicit drugs: drug abuse limited because of aggressive law enforcement efforts, including carrying out death sentences; as a transportation and financial services hub, Singapore is vulnerable, despite strict laws and enforcement, as a venue for money laundering

Background: Although sighted by Christopher COLUMBUS in 1493 and claimed for Spain, it was the Dutch who occupied the island

in 1631 and began exploiting its salt deposits. The Spanish retook the island in 1633, but continued to be harassed by the Dutch. The Spanish finally relinquished the island of Saint Martin to the French and Dutch, who divided it amongst themselves in 1648. The establishment of cotton, tobacco, and sugar plantations dramatically expanded African slavery on the island in the 18th and 19th centuries; the practice was not abolished in the Dutch half until 1863. The island's economy declined until 1939 when it became a free port; the tourism industry was dramatically expanded beginning in the 1950s. In 1954, Sint Maarten And several other Dutch Caribbean possessions became part of the Kingdom of the Netherlands as the Netherlands Antilles. in a 2000 referendum, the citizens of Sint Maarten voted to become a self-governing country within the Kingdom of the Netherlands. The change in status became effective in October of 2010 with the dissolution of the Netherlands Antilles.

Diplomatic representation from the US: the US does not have an embassy in Sint Maarten; the Consul General to Curacao is accredited to Sint Maarten

Flag description: two equal horizontal bands of red (top) and blue with a white isosceles triangle based on the hoist side; the center of the triangle displays the Sint Maarten coat of arms; the arms consist of an orange-bordered blue shield prominently displaying the white court house in Philipsburg, as well as a bouquet of yellow sage (the National flower) in the upper left, and the silhouette of a Dutch-French friendship monument in the upper right; the shield is surmounted by a yellow rising sun in front of which is a brown pelican in flight; a yellow scroll below the shield bears the motto: SEMPER PROGREDIENS (Always Progressing); the three main colors are identical to those on the Dutch flag

note: the flag somewhat resembles that of the Philippines, but with the main red and blue bands reversed; the banner more closely evokes the

wartime Philippine flag

National symbol(s): brown pelican, yellow sage (flower);

National colors: red, white, blue

National anthem: *name:* “O Sweet Saint Martin’s Land”

lyrics/music: Gerard KEMPS

note: the song, written in 1958, is used as an unofficial anthem for the entire island (both French and Dutch sides); as a collectivity of France, in addition to the local anthem, “La Marseillaise” is official on the French side (see France); as a constituent part of the Kingdom of the Netherlands, in addition to the local anthem, “Het Wilhelmus” is official on the Dutch side (see Netherlands)

Economy—overview: The economy of Sint Maarten centers around tourism with nearly four-fifths of the labor force engaged in this sector. Nearly 1.8 million visitors came to the island by cruise ship and roughly 500,000 visitors arrived through Princess Juliana International Airport in 2013. Cruise ships and yachts also call on Sint Maarten’s numerous ports and harbors. Limited agriculture and local fishing means that almost all food must be imported. Energy resources and manufactured goods are also imported. Sint Maarten had the highest per capita income among the five islands that formerly comprised the Netherlands Antilles.

Background: Slovakia's roots can be traced to the 9th century state of Great Moravia. Subsequently, the Slovaks became part of the Hungarian Kingdom, where they remained for the next 1,000 years. Following the formation of the dual Austro-Hungarian monarchy in 1867, language and education policies favoring the use of Hungarian (Magyarization) resulted in a strengthening of Slovak Nationalism and a cultivation of cultural ties with the closely related Czechs, who were under Austrian rule. After the dissolution of the Austro-Hungarian Empire at the close of World War I, the Slovaks joined the Czechs to form Czechoslovakia. During the interwar period, Slovak Nationalist leaders pushed for autonomy within Czechoslovakia, and in 1939 Slovakia became an independent state allied with Nazi Germany. Following World War II, Czechoslovakia was reconstituted and came under communist rule within Soviet-dominated Eastern Europe. In 1968, an invasion by Warsaw Pact troops ended the efforts of the country's leaders to liberalize communist rule and create "socialism with a human face," ushering in a period of repression known as "normalization." The peaceful "Velvet Revolution" swept the Communist Party from power at the end of 1989 and inaugurated a return to democratic rule and a market economy. On 1 January 1993, the country underwent a nonviolent "velvet divorce" into its two National components, Slovakia and the Czech Republic. Slovakia joined both NATO and the EU in the spring of 2004 and the euro zone on 1 January 2009.

Flag description: three equal horizontal bands of white (top), blue, and red derive from the Pan-Slav colors; the Slovakian coat of arms (consisting of a red shield bordered in white and bearing a white double-barred cross of St. Cyril and St. Methodius surmounting three blue hills) is centered over the bands but offset slightly to the hoist side

note: the Pan-Slav colors were inspired by the 19th-century flag of Russia

National symbol(s): double-barred cross (Cross of St. Cyril and St. Methodius) surmounting three peaks; National colors: white, blue, red

National anthem: *name:* “Nad Tatrou sa blyska” (Lightning Over the Tatras)

lyrics/music: Janko MATUSKA/traditional

note: adopted 1993, in use since 1844; music based on the Slovak folk song “Kopala studienku”

Economy—overview: Slovakia has made significant economic reforms since its separation from the Czech Republic in 1993. With a population of 5.4 million, the Slovak Republic has a small, open economy, with exports, at about 93% of GDP, serving as the main driver of GDP growth. Slovakia joined the EU in 2004 and the eurozone in 2009. The country’s banking sector is sound.

Slovakia has led the region garnering FDI, because of its relatively low-cost, highly-skilled labor force, reasonable tax rates, and favorable geographic location in the heart of Central Europe. However, recent increases in corporate taxes, as well as changes to the Labor Code, slow dispute resolution, and ongoing corruption potentially threaten the attractiveness of the Slovak market. Moreover, the energy sector is characterized by high costs, unpredictable regulatory oversight, and growing government interference.

Background: The Slovene lands were part of the Austro-Hungarian Empire until the latter's dissolution at the end of World War I. In 1918, the Slovenes joined the Serbs and Croats in forming a new multi national state, which was named Yugoslavia in 1929. After World War II, Slovenia became a republic of the renewed Yugoslavia, which though communist, distanced itself from Moscow's rule. Dissatisfied with the exercise of power by the majority Serbs, the Slovenes succeeded in establishing their independence in 1991 after a short 10-day war. Historical ties to Western Europe, a strong economy, and a stable democracy have assisted in Slovenia's transformation to a modern state. Slovenia acceded to both NATO and the EU in the spring of 2004; it joined the euro zone and the Schengen zone in 2007.

Flag description: three equal horizontal bands of white (top), blue, and red, derive from the medieval coat of arms of the Duchy of Carniola; the Slovenian seal (a shield with the image of Triglav, Slovenia's highest peak, in white against a blue background at the center; beneath it are two wavy blue lines depicting seas and rivers, and above it are three six-pointed stars arranged in an inverted triangle, which are taken from the coat of arms of the Counts of Celje, the great Slovene dynastic house of the late 14th and early 15th centuries) appears in the upper hoist side of the flag centered on the white and blue bands

National symbol(s): Mount Triglav; National colors: white, blue, red

National anthem: *name:* "Zdravljica" (A Toast)

lyrics/music: France PRESEREN/Stanko PREMRL

note: adopted 1989; originally written in 1848; the full poem, whose seventh verse is used as the anthem, speaks of pan-Slavic Nationalism

Economy—overview: With excellent infrastructure, a well-educated work force, and a strategic location between the Balkans and Western Europe, Slovenia has one of the highest per capita GDPs in Central Europe, despite having suffered a protracted recession in 2008–2009 in the wake of the global financial crisis. Slovenia became the first 2004 EU entrant to adopt the euro (on 1 January 2007) and has experienced one of the most stable political transitions in Central and Southeastern Europe.

In March 2004, Slovenia became the first transition country to

graduate from borrower status to donor partner at the World Bank. in 2007, Slovenia was invited to begin the process for joining the OECD; it became a member in 2012. However, long-delayed privatizations, particularly within Slovenia's largely state-owned and increasingly indebted banking sector, have fueled investor concerns since 2012 that the country would need EU-IMF financial assistance. in 2013, the European Commission granted Slovenia permission to begin recapitalizing ailing lenders and transferring their nonperforming assets into a "bad bank" established to restore bank balance sheets. Export-led growth fueled by demand in larger European markets pushed GDP growth to 3.0% in 2014, while stubbornly-high unemployment fell slightly to 12%. Prime Minister CERAR's government took office in September 2014, pledging to press ahead with commitments to privatize a select group of state-run companies, rationalize public spending, and further stabilize the banking sector.

Disputes—International: since the breakup of Yugoslavia in the early 1990s, Croatia and Slovenia have each claimed sovereignty over Pirin Bay and four villages, and Slovenia has objected to Croatia's claim of an exclusive economic zone in the Adriatic Sea; in 2009, however Croatia and Slovenia signed a Binding International arbitration agreement to define their disputed land and maritime borders, which led to Slovenia lifting its objections to Croatia joining the EU; as a member state that forms part of the EU's external border, Slovenia has implemented the strict Schengen border rules to curb illegal migration and commerce through Southeastern Europe while

encouraging close cross-border ties with Croatia; Slovenia continues to impose a hard border Schengen regime with Croatia, which joined the EU in 2013 but has not yet fulfilled Schengen requirements

Background: The UK established a protectorate over the Solomon Islands in the 1890s. Some of the bitterest fighting of World War II occurred on this archipelago. Self-government was achieved in 1976 and independence two years later. Ethnic violence, government malfeasance, endemic crime, and a narrow economic base have undermined stability and civil society. In June 2003, then Prime Minister Sir Allan KEMAKEZA sought the assistance of Australia in reestablishing law and order; the following month, an Australian led multinational force arrived to restore peace and disarm ethnic militias. The Regional Assistance Mission to the Solomon Islands (RAMSI) has generally been effective in restoring law and order and rebuilding government institutions.

Economy—overview: The bulk of the population depends on agriculture, fishing, and forestry for at least part of its livelihood. Most manufactured goods and petroleum Products must be imported. The islands are rich in undeveloped mineral resources such as lead, zinc, nickel, and gold. Prior to the arrival of The Regional Assistance Mission to the Solomon Islands (RAMSI), severe ethnic violence, the closure of key businesses, and an empty government treasury culminated in economic collapse. RAMSI's efforts to restore law and order and economic stability have led to modest growth as the economy rebuilds.

Disputes—International: since 2003, the Regional Assistance

Mission to Solomon Islands, consisting of police, military, and civilian advisors drawn from 15 countries, has assisted in reestablishing and maintaining civil and political order while reinforcing regional stability and security

Trafficking in persons: *current situation:* the Solomon Islands is a source and destination country for local adults and children and Southeast Asian men and women subjected to forced labor and forced prostitution; women from China, Indonesia, Malaysia, and the Philippines are recruited for legitimate work and upon arrival are forced into prostitution; men from Indonesia and Malaysia recruited to work in the Solomon Islands' mining and logging industries may be subjected to forced labor; local children are forced into prostitution near foreign logging camps, on fishing vessels, at hotels, and entertainment venues; some local children are also sold by their parents for marriage to foreign workers or put up for "informal adoption" to pay off debts and then find themselves forced into domestic servitude or forced prostitution

tier rating: Tier 2 Watch List—the Solomon Islands does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; in 2014, the Solomon Islands was granted a waiver from an otherwise required downgrade to Tier 3 because its government has a written plan that, if implemented, would constitute making significant efforts to bring itself into compliance with the minimum standards for the elimination of trafficking; the government gazetted implementing regulations for the 2012 immigration act prohibiting Transnational trafficking, but the penalties are not sufficiently stringent because they allow the option of paying a fine; a new draft law to address these weaknesses awaits parliamentary review; no new trafficking investigations were conducted, even after labor inspections at logging and fishing companies, no existing cases led to prosecutions or convictions, and no funding was allocated for National anti-trafficking efforts; authorities did not identify or protect any victims and lack any procedures or shelters to do so; civil society and religious organizations provide most of the limited services available; a lack of understanding of the crime of trafficking remains a serious challenge (2015)

Background: Britain withdrew from British Somaliland in 1960 to allow its protectorate to join with Italian Somaliland and form the new nation of Somalia. In 1969, a coup headed by Mohamed SIAD Barre ushered in an authoritarian socialist rule characterized by the persecution, jailing, and torture of political opponents and dissidents. After the regime's collapse early in 1991, Somalia descended into turmoil, factional fighting, and anarchy. In May 1991, northern clans declared an independent Republic of Somaliland that now includes the administrative regions of Awdal, Woqooyi Galbeed, Togdheer, Sanaag, and Sool. Although not recognized by any government, this entity has maintained a stable existence and continues efforts to establish a constitutional democracy, including holding municipal, parliamentary, and presidential elections. The regions of Bari, Nugaal, and northern Mudug comprise a neighboring semi-autonomous state of Puntland, which has been self-governing since 1998 but does not aim at independence; it has also made strides toward reconstructing a legitimate, representative government but has suffered some civil

strife. Puntland disputes its border with Somaliland as it also claims the regions of Sool and Sanaag, and portions of Togdheer. Beginning in 1993, a two-year UN humanitarian effort (primarily in south-central Somalia) was able to alleviate famine conditions, but when the UN withdrew in 1995, having suffered significant casualties, order still had not been restored. In 2000, the Somalia National Peace Conference (SNPC) held in Djibouti resulted in the formation of an interim government, known as the Transitional National Government (TNG). When the TNG failed to establish adequate security or governing institutions, the Government of Kenya, under the auspices of the Intergovernmental Authority on Development (IGAD), led a subsequent peace process that concluded in October 2004 with the election of Abdullahi YUSUF Ahmed as President of a second interim government, known as the Transitional Federal Government (TFG) of the Somali Republic. The TFG included a 275-member parliamentary body, known as the Transitional Federal Parliament (TFP). President YUSUF resigned late in 2008 while United Nations-sponsored talks between the TFG and the opposition alliance for the Re-Liberation of Somalia (ARS) were underway in Djibouti. In January 2009, following the creation of a TFG-ARS unity government, Ethiopian military forces, which had entered Somalia in December 2006 to support the TFG in the face of advances by the opposition Islamic Courts Union (ICU), withdrew from the country. The TFP was doubled in size to 550 seats with the addition of 200 ARS and 75 civil society members of parliament. The expanded parliament elected Sheikh SHARIF Sheikh Ahmed, the former ICU and ARS chairman as president in January 2009. The creation of the TFG was based on the Transitional Federal Charter (TFC), which outlined a five-year mandate leading to the establishment of a new Somali constitution and a transition to a representative government following National elections. In 2009, the TFP amended the TFC to extend TFG's mandate until 2011 and in 2011 Somali principals agreed to institute political transition by August 2012. The transition process ended in September 2012 when clan elders replaced the TFP by appointing 275 members to a new parliament who subsequently elected a new president.

Government—*note:* regional and local governing bodies continue to exist and control various areas of the country, including the self-declared Republic of Somaliland in northwestern Somalia and the semi-autonomous state of Puntland in northeastern Somalia

Economy—overview: Despite the lack of effective National governance, Somalia maintains an informal economy largely based on livestock, remittance/money transfer companies, and telecommunications. Somalia’s government lacks the ability to collect domestic revenue and external debt—mostly in arrears—was estimated at 93% of GDP in 2014.

Agriculture is the most important sector, with livestock normally accounting for about 40% of GDP and more than 50% of export earnings. Nomads and semi-pastoralists, who are dependent upon livestock for their livelihood, make up a large portion of the population. Economic activity is estimated to have increased by 3.7% in 2014 because of growth in the agriculture, construction and telecommunications sector. Somalia’s small industrial sector, based on the processing of agricultural products, has largely been looted and the machinery sold as scrap metal.

In recent years, Somalia’s capital city, Mogadishu, has witnessed the development of the city’s first gas stations, supermarkets, and airline flights to Turkey since the collapse of central authority in 1991. Mogadishu’s main market offers a variety of goods from food to electronic gadgets. Hotels continue to operate and are supported with private-security militias. Economic growth has yet to expand outside of Mogadishu, and within the city, security concerns dominate business. Telecommunication firms provide wireless services in most major cities and offer the lowest International call rates on the continent in the absence of a formal banking sector, money transfer/remittance services have sprouted throughout the country, handling up to \$1.6 billion in remittances annually, although International concerns over the money transfers into Somalia continues to threaten these services.

Transportation—note:

despite a dramatic drop in the number of attacks in 2014, the International Maritime Bureau continues to report the territorial and offshore waters in the Gulf of Aden and Indian Ocean as a region of significant risk for piracy and armed robbery against ships accounting for 4% of all attacks in 2014; 11 vessels were attacked or hijacked in 2014 compared with 237 in 2011; the presence of several Naval task forces in the Gulf of Aden and additional anti-piracy measures on the part of ship operators, including the use of on board armed security teams, have reduced piracy incidents in that body of water; in response Somali-based pirates, using hijacked fishing trawlers as “mother ships” to extend their range, shifted operations as far south as the Mozambique Channel, eastward to the vicinity of the Maldives, and northeastward to the Strait of Hormuz

Military branches: National Security Force (NSF): Somali Army (2011)

Military service age and obligation: 18 is the legal minimum age for compulsory and voluntary military service (2012)

Disputes—International: Ethiopian forces invaded southern Somalia and routed Islamist Courts from Mogadishu in January 2007; “Somaliland” secessionists provide port facilities in Berbera to landlocked Ethiopia and have established commercial ties with other regional states; “Puntland” and “Somaliland” “governments” seek International support in their secessionist aspirations and overlapping border claims; the undemarcated former British administrative line has little meaning as a political separation to rival clans within Ethiopia’s Ogaden and southern Somalia’s Oromo region; Kenya works hard to prevent the clan and militia fighting in Somalia from spreading south across the border, which has long been open to nomadic pastoralists

Refugees and internally displaced persons:

refugees (country of origin): 3,268 (Yemen)(2015)

IDPs: 1.133 million (civil war since 1988, clan-based competition for resources; 2011 famine; insecurity because of fighting between Al-Shabaab and the Transitional Federal Government’s allied forces) (2015)

Background: Dutch traders landed at the southern tip of modern day South Africa in 1652 and established a stopover point on the spice route between the Netherlands and the Far East, founding the city of Cape Town. After the British seized the Cape of Good Hope area in 1806, many of the Dutch settlers (Afrikaners, called “Boers” (farmers) by the British) trekked north to found their own republics in lands taken from the indigenous black inhabitants. The discovery of diamonds (1867) and gold (1886) spurred wealth and immigration and intensified the subjugation of the native inhabitants. The Afrikaners resisted British encroachments but were defeated in the Second South African War (1899–1902); however, the British and the Afrikaners, ruled together beginning in 1910 under the Union of South Africa, which became a republic in 1961 after a whites-only referendum. In 1948, the Afrikaner-dominated National Party was voted into power and instituted a policy of apartheid—the separate development of the races—which favored the white minority at the expense of the black majority. The African National Congress (ANC)

led the opposition to apartheid and many top ANC leaders, such as Nelson MANDELA, spent decades in South Africa's prisons. Internal protests and insurgency, as well as boycotts by some Western nations and institutions, led to the regime's eventual willingness to negotiate a peaceful transition to majority rule. The first multi-racial elections in 1994 following the end of apartheid ushered in majority rule under an ANC-led government. South Africa has since struggled to address apartheid-era imbalances in decent housing, education, and health care. ANC infighting came to a head in 2008 when President Thabo MBEKI was recalled by Parliament, and Deputy President Kgalema MOTLANTHE, succeeded him as interim president. Jacob ZUMA became president after the ANC won general elections in 2009; he was reelected in 2014.

Flag description: two equal width horizontal bands of red (top) and blue separated by a central green band that splits into a horizontal Y, the arms of which end at the corners of the hoist side; the Y embraces a black isosceles triangle from which the arms are separated by narrow yellow bands; the red and blue bands are separated from the green band and its arms by narrow white stripes; the flag colors do not have any official symbolism, but the Y stands for the “convergence of diverse elements within South African society, taking the road ahead in unity”; black, yellow, and green are found on the flag of the African National Congress, while red, white, and blue are the colors in the flags of the Netherlands and the UK, whose settlers ruled South Africa during the colonial era

note: the South African flag is one of only two National flags to display six colors as part of its primary design, the other is South Sudan’s

National symbol(s): springbok (antelope), king protea flower;

National colors: red, green, blue, yellow, black, white

National anthem: *name:* “National Anthem of South Africa”

lyrics/music: Enoch SONTONGA and Cornelius Jacob LANGENHOVEN/Enoch SONTONGA and Marthinus LOU RENS de Villiers

note: adopted 1994; a combination of “N’kosi Sikelel’ iAfrica” (God Bless Africa) and “Die Stem van Suid Afrika” (The Call of South Africa), which were respectively the anthems of the non-white and white communities under apartheid; official lyrics contain a mixture of Xhosa, Zulu, Sesotho, Afrikaans, and English (i. e., the five most widely spoken of South Africa’s 11 official languages); music incorporates the melody used in the Tanzanian and zambian Anthems

Economy—overview: South Africa is a middle-income emerging market with an abundant supply of Natural resources; well-developed financial, legal, communications, energy, and transport sectors; and a stock exchange that is Africa’s largest and among the top 20 in the world.

Economic growth has decelerated in recent years, slowing to just 1.5% in 2014. Unemployment, poverty, and inequality—among the highest in the world—remain a challenge. Official unemployment is roughly 25% of the workforce, and runs significantly higher among black youth. Even though the country’s modern infrastructure supports a relatively efficient distribution of goods to major urban centers throughout the region, unstable electricity supplies retard growth. Eskom, the state-run power company, is building three new power stations and is installing new power demand management programs to improve power grid reliability. Load shedding and resulting rolling blackouts gripped many parts of South Africa in late 2014 and early 2015 because of electricity supply constraints due to technical problems at some generation units, unavoidable planned maintenance, and an Accident at a power station in Mpumalanga province. The rolling blackouts were the worst the country faced since 2008. Construction delays at two additional plants, however, mean South Africa will continue to operate on a razor thin margin; economists judge that growth cannot exceed 3% until electrical supply problems are resolved.

South Africa’s economic policy has focused on controlling inflation; however, the country faces structural constraints that also limit economic growth, such as skills shortages, declining global competitiveness, and frequent work stoppages due to strike action. The current government faces growing pressure from urban

constituencies to improve the delivery of basic services to low-income areas and to increase job growth.

Military—note: with the end of apartheid and the establishment of majority rule, former military, black homelands forces, and ex-opposition forces were integrated into the South African National Defense Force (SANDF)

Disputes—International: South Africa has placed military units to assist police operations along the border of Lesotho, Zimbabwe, and Mozambique to control smuggling, poaching, and illegal migration; the governments of South Africa and Namibia have not signed or ratified the text of the 1994 Surveyor's General agreement placing the boundary in the middle of the Orange River

Refugees and internally displaced persons: *refugees (country of origin):* 40,133 (Somalia); 30,125 (Democratic Republic of the Congo); 18,830 (Ethiopia); 6,217 (Zimbabwe); 6,035 (Republic of the Congo) (2014)

Illicit drugs: transshipment center for heroin, hashish, and cocaine, as well as a major cultivator of marijuana in its own right; cocaine and heroin consumption on the rise; world's largest market for illicit methaqualone, usually imported illegally from India through various east African countries, but increasingly producing its own synthetic drugs for domestic consumption; attractive venue for money launderers given the increasing level of organized criminal and narcotics activity in the region and the size of the South African economy

Background: The islands, with large bird and seal populations, lie approximately 1,000 km east of the Falkland Islands and have been under British administration since 1908—except for a brief period in 1982 when Argentina occupied them. Grytviken, on South Georgia, was a 19th and early 20th century whaling station. Famed explorer Ernest SHACKLETON stopped there in 1914 en route to his ill-fated attempt to cross Antarctica on foot. He returned some 20 months later with a few companions in a small boat and arranged a successful rescue for the rest of his crew, stranded off the Antarctic Peninsula. He died in 1922 on a subsequent expedition and is buried in Grytviken. Today, the station houses scientists from the British Antarctic Survey. Recognizing the importance of preserving the marine stocks in adjacent waters, the UK, in 1993, extended the exclusive fishing zone

from 12 nm to 200 nm around each island.

Natural hazards: the South Sandwich Islands have prevailing weather conditions that generally make them difficult to approach by ship; they are also subject to active volcanism

Environment—current issues: reindeer—introduced to the islands on several occasions in the 20th century—devastated the native flora and bird species; some reindeer were translocated to the Falkland Islands in 2001, the rest were exterminated (2013–14)

Geography—note: the north coast of South Georgia has several large bays, which provide good anchorage

Population: no indigenous inhabitants

note: the small military garrison on South Georgia withdrew in March 2001, replaced by a permanent group of scientists of the British Antarctic Survey, which also has a biological station on Bird Island; the South Sandwich Islands are uninhabited

Country name: *conventional long form:* South Georgia and the South Sandwich Islands

conventional short form: South Georgia and South Sandwich Islands

abbreviation: SGSSI

etymology: South Georgia was named “the Isle of Georgia” in 1775 by Captain James COOK in honor of British King GEORGE III; the explorer also discovered the Sandwich Islands Group that year, which he named “Sandwich Land” after John MONTAGU, the Earl of Sandwich and First Lord of the Admiralty; the word “South” was later added to distinguish these islands from the other Sandwich Islands, now known as the Hawaiian Islands

Dependency status: overseas territory of the UK, also claimed by Argentina; administered from the Falkland Islands by a commissioner, who is concurrently governor of the Falkland Islands, representing Queen ELIZABETH II

Legal system: the laws of the UK, where applicable, apply

Diplomatic representation in the US: none (overseas territory of the UK, also claimed by Argentina)

Diplomatic representation from the US: none (overseas territory of the UK, also claimed by Argentina)

Flag description: blue with the flag of the UK in the upper hoist-side quadrant and the South Georgia and South Sandwich Islands coat of arms centered on the outer half of the flag; the coat of arms features a shield with a golden lion rampant, holding a torch; the shield is supported by a fur seal on the left and a Macaroni penguin on the right; a reindeer appears above the crest, and below the shield on a scroll is the motto LEO TERRAM PROPRIAM PROTEGAT (Let the Lion Protect its Own Land)); the lion with the torch represents the UK and discovery; the background of the shield, blue and white estoiles, are found in the coat of arms of James Cook, discoverer of the islands; all the outer supporting animals represented are native to the islands

Economy—overview: Some fishing takes place in adjacent waters. Harvesting finfish and krill are potential sources of income. The islands receive income from postage stamps produced in the UK, the sale of fishing licenses, and harbor and landing fees from tourist vessels. Tourism from specialized cruise ships is increasing rapidly.

Military—note: defense is the responsibility of the UK

Disputes—International: Argentina, which claims the islands in its constitution and briefly occupied them by force in 1982, agreed in 1995 to no longer seek settlement by force

Background: Egypt attempted to colonize the region of southern Sudan by establishing the province of Equatoria in the 1870s. Islamic Mahdist revolutionaries overran the region in 1885, but in 1898 a British force was able to overthrow the Mahdist regime. An Anglo-Egyptian Sudan was established the following year with Equatoria being the southernmost of its eight provinces. The isolated region was largely left to itself over the following decades, but Christian missionaries converted much of the population and facilitated the spread of English. When Sudan gained its independence in 1956, it was with the understanding that the southerners would be able to participate fully in the political system. When the Arab Khartoum government reneged on its promises, a mutiny began that led to two prolonged periods of conflict (1955–1972 and 1983–2005) in which perhaps 2.5 million people died—mostly civilians—due to starvation and drought. Ongoing peace talks finally resulted in a Comprehensive Peace Agreement, signed in January 2005. As part of this agreement, the south was granted a six-year period of autonomy to be followed by a referendum on final status. The result of this referendum, held in January 2011, was a vote of 98% in favor of secession. Since

independence on 9 July 2011, South Sudan has struggled with good governance and nation building and has attempted to control rebel militia groups operating in its territory. Economic conditions have deteriorated since January 2012 when the government decided to shut down oil production following bilateral disagreements with Sudan. In December 2013, conflict between government and opposition forces led to a humanitarian crisis with millions of South Sudanese displaced and food insecure. The warring parties signed a peace agreement in August 2015, which calls for a transitional government of National unity, but its formation has been delayed as of early 2016.

Economy—overview: Following several decades of civil war with Sudan, industry and infrastructure in landlocked South Sudan are severely underdeveloped and poverty is widespread. Subsistence agriculture provides a living for the vast majority of the population. Property rights are insecure and price signals are weak, because markets are not well organized. After independence, South Sudan's central bank issued a new currency, the South Sudanese Pound, allowing a short grace period for turning in the old currency. South Sudan has little infrastructure—approximately 200 kilometers of paved roads. Electricity is produced mostly by costly diesel generators, and indoor plumbing and potable water are scarce. South Sudan depends largely on imports of goods, services, and capital—mainly from Uganda, Kenya and Sudan.

Nevertheless, South Sudan does have abundant Natural resources. At independence in 2011, South Sudan produced nearly three-fourths of former Sudan's total oil output of nearly a half million barrels per day. The government of South Sudan derives the vast majority of its budget revenues from oil. Oil is exported through two pipelines that run to refineries and shipping facilities at Port Sudan on the Red Sea. The economy of South Sudan will remain linked to Sudan for some time, given the long lead time and great expense required to build another pipeline, should the government decide to do so in January 2012, South Sudan suspended production of oil because of its dispute with Sudan over transshipment fees. This suspension lasted 15 months and had a devastating impact on GDP, which declined by 48% in 2012. With the resumption of oil flows the economy rebounded strongly during the second half of calendar year 2013. This occurred in spite of the fact that oil production, at an average level of 222,000 barrels per day, was 40% lower compared with 2011, prior to the shutdown. GDP grew by nearly 30% in 2013. However, the outbreak of conflict on 15 December 2013 combined with a further reduction of oil production and exports, meant that GDP growth fell significantly in 2014 and poverty and food insecurity rose. South Sudan holds one of the richest agricultural areas in Africa with fertile soils and abundant water supplies. Currently the region supports 10–20 million head of cattle.

South Sudan is currently burdened by considerable debt because of increased military spending and revenue shortfalls due to low oil prices and decreased production. South Sudan has received more than \$4 billion in foreign aid since 2005, largely from the UK, the US, Norway, and the Netherlands. Annual inflation peaked at 79.5% in May 2012 but declined rapidly thereafter, to 1.7% in 2014, before jumping back to 52.8% in 2015, following the December 2013 outbreak of violence. The decision in December 2015 by the central bank to abandon a fixed exchange rate and allow the South Sudanese Pound to float has not reduced inflation in the short term. Long-term challenges include diversifying the formal economy, alleviating poverty, maintaining macroeconomic stability, improving tax collection and financial management and improving the business environment.

Heliports: 1 (2013)

Railways: *total:* 248 km

note: a narrow gauge, single-track railroad between Babonosa (Sudan) and Wau, the only existing rail system, was repaired in 2010 with \$250 million in UN funds (2014)

country comparison to the world: 127

Roadways: *total:* 7,000 km

note: most of the road network is unpaved and much of it is in disrepair; a 192-km paved road between the capital, Juba, and Nimule on the Ugandan border was constructed with USAID funds in 2012 (2012)

country comparison to the world: 145

Waterways: see entry for Sudan

Military branches: Sudan People's Liberation army (SPLA)

Military service age and obligation: 18 is the legal minimum age for compulsory and voluntary military service; the Government of South Sudan signed a revised action plan with the UN in March 2012 to demobilize all child soldiers within the SPLA, but recruitment of child soldiers by the SPLA and the opposition increased

in 2014; as of the end of 2015, UNICEF estimates that 15,000 to 16,000 child soldiers had been used by the SPLA and rebel forces in the country's civil war since it began in December 2013 (2015)

Military expenditures: 10.32% of GDP (2012) 5.8% of GDP (2011) 10.32% of GDP (2010)

country comparison to the world: 1

Disputes—International: South Sudan-Sudan boundary represents 1 January 1956 alignment, final alignment pending negotiations and demarcation; final sovereignty status of Abyei Area pending negotiations between South Sudan and Sudan; periodic violent skirmishes with South Sudanese residents over water and grazing rights persist among related pastoral populations along the border with the Central African Republic; the boundary that separates Kenya and South Sudan's sovereignty is unclear in the "Ilemi Triangle," which Kenya has administered since colonial times

Refugees and internally displaced persons:

refugees (country of origin): 251,216 (Sudan); 14,799 (Democratic Republic of the Congo) (2016)

IDPs: 1,790,427 (alleged coup attempt and ethnic conflict beginning in December 2013; information is lacking on those displaced in earlier years by: fighting in Abyei between the Sudanese Armed Forces and the Sudan People's Liberation army (SPLA) in May 2011; clashes between the SPLA and dissident militia groups in South Sudan; inter-ethnic conflicts over resources and cattle; attacks from the Lord's Resistance Army; floods and drought) (2015)

Trafficking in persons: *current situation:* South Sudan is a source and destination country for men, women, and children subjected to forced labor and sex trafficking; South Sudanese women and girls, particularly those who are internally displaced, orphaned, refugees, or from rural areas, are vulnerable to forced labor and sexual exploitation, often in urban centers; children may be victims of forced labor in construction, market vending, shoe shining, car washing, rock breaking, brick making, delivery cart pulling, and begging; girls are also forced into marriages and subsequently subjected to sexual slavery or domestic servitude; women and girls migrate willingly from Uganda, Kenya, Ethiopia, Eritrea, and the Democratic Republic of the Congo to South Sudan with the promise of legitimate jobs and are forced into the sex trade; inter-ethnic abductions and abductions by criminal groups continue, with abductees subsequently forced into domestic servitude, herding, or sex trafficking; in 2014, the

recruitment and use of child soldiers increased significantly within government security forces and was also prevalent among opposition forces

tier rating: Tier 3—South Sudan does not fully comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so; despite the government's formal recommitment to an action plan to eliminate the recruitment and use of child soldiers by 2016, the practice expanded during 2014, and the government did not hold any officers criminally responsible; government officials reportedly are complicit in trafficking offenses but these activities continue to go uninvestigated; authorities reportedly identified five trafficking victims but did not transfer them to care facilities; law enforcement continued to arrest and imprison individuals for prostitution, including trafficking victims; no known steps were taken to address the exploitation of South Sudanese Nationals working abroad or foreign workers in South Sudan (2015)

Background: A large body of recent oceanographic research has shown that the Antarctic Circumpolar Current (ACC), an ocean current that flows from west to east around Antarctica, plays a crucial role in global ocean circulation. The region where the cold waters of the ACC meet and mingle with the warmer waters of the north defines a distinct border—the Antarctic Convergence—which fluctuates with the seasons, but which encompasses a discrete body of water and a unique ecologic region. The Convergence concentrates nutrients, which promotes marine plant life, and which, in turn, allows for a greater abundance of animal life. In 2000, the International Hydrographic Organization delimited the waters within the Convergence as a fifth world ocean—the Southern Ocean—by combining the southern portions of the Atlantic Ocean, Indian Ocean, and Pacific Ocean. The Southern Ocean extends from the coast of Antarctica north to 60 degrees south latitude, which coincides with the Antarctic Treaty region and which approximates the extent of the Antarctic Convergence. As such, the Southern Ocean is now the fourth largest of the world's five oceans (after the Pacific Ocean, Atlantic Ocean, and Indian Ocean, but larger than the Arctic Ocean). It should

be noted that inclusion of the Southern Ocean does not imply recognition of this feature as one of the world's primary oceans by the US Government.

Location: body of water between 60 degrees south latitude and Antarctica

Geographic coordinates: 60 00 S, 90 00 E (nominally), but the Southern Ocean has the unique distinction of being a large circumpolar body of water totally encircling the continent of Antarctica; this ring of water lies between 60 degrees south latitude and the coast of Antarctica and encompasses 360 degrees of longitude

Map references: Antarctic Region

Area: *total:* 20.327 million sq km

note: includes Amundsen Sea, Bellingshausen Sea, part of the Drake Passage, Ross Sea, a small part of the Scotia Sea, Weddell Sea, and other tributary water bodies

Area—comparative: slightly more than twice the size of the US

Coastline: 17,968 km

Climate: sea temperatures vary from about 10 degrees Celsius to -2 degrees Celsius; cyclonic storms travel eastward around the continent and frequently are intense because of the temperature contrast between ice and open ocean; the ocean area from about latitude 40 south to the Antarctic Circle has the strongest average winds found anywhere on Earth; in winter the ocean freezes outward to 65 degrees south latitude in the Pacific sector and 55 degrees south latitude in the Atlantic sector, lowering surface temperatures well below 0 degrees Celsius; at some coastal points intense persistent drainage winds from the interior keep the shoreline ice-free throughout the winter

Terrain: the Southern Ocean is 4,000 to 5,000-m deep over most of its extent with only limited areas of shallow water; the Antarctic continental shelf is generally narrow and unusually deep, its edge lying at depths of 400 to 800 m (the global mean is 133 m); the Antarctic icepack grows from an average minimum of 2.6 million sq km in March to about 18.8 million sq km in September, better than a sixfold increase in area; the Antarctic Circumpolar Current (21,000 km long) moves perpetually eastward, the world's largest ocean current, it transports 130 million cubic meters of water per second—100 times the flow of all the world's rivers

Elevation: mean depth: -3,270 m

elevation extremes: *lowest point:* southern end of the South Sandwich Trench -7,235 m

highest point: sea level 0 m

Natural resources: probable large oil and gas fields on the continental margin; manganese nodules, possible placer deposits, sand and gravel, fresh water as icebergs; squid, whales, and seals—none exploited; krill, fish

Natural hazards: huge icebergs with drafts up to several hundred meters; smaller bergs and iceberg fragments; sea ice (generally 0.5 to 1 m thick) with sometimes dynamic short-term variations and with large annual and interannual variations; deep continental shelf floored by glacial deposits varying widely over short distances; high winds and large waves much of the year; ship icing, especially May-October; most of region is remote from sources of search and rescue

Environment—current issues: increased solar ultraviolet radiation resulting from the Antarctic ozone hole in recent years, reducing marine primary productivity (phytoplankton), damaging the DNA of some fish, and causing sun damage to some mammals; large amount of mortality of seabirds resulting from long-line fishing for toothfish; ocean Acidification

note: the now-protected fur seal population is making a strong comeback after severe overexploitation in the 18th and 19th centuries

Environment—International agreements: the Southern Ocean is subject to all International agreements regarding the world's oceans; in addition, it is subject to these agreements specific to the Antarctic region: International Whaling Commission (prohibits commercial whaling south of 40 degrees south [south of 60 degrees south between 50 degrees and 130 degrees west]); Convention on the Conservation of Antarctic Seals (limits sealing); Convention on the Conservation of Antarctic Marine Living Resources (regulates fishing)

note: many nations (including the US) prohibit mineral resource exploration and exploitation south of the fluctuating Polar Front (Antarctic Convergence), which is in the middle of the Antarctic Circumpolar Current and serves as the dividing line between the cold polar surface waters to the south and the warmer waters to the north

Geography—note: the major chokepoint is the Drake Passage between South America and Antarctica; the Polar Front (Antarctic Convergence) is the best Natural definition of the northern extent of the Southern Ocean; it is a distinct region at the middle of the Antarctic Circumpolar Current that separates the cold polar surface

waters to the south from the warmer waters to the north; the Front and the Current extend entirely around Antarctica, reaching south of 60 degrees south near New Zealand and near 48 degrees south in the far South Atlantic coinciding with the path of the maximum westerly winds

Country name: etymology: the International Hydrographic Organization (IHO) included the Ocean and its definition as the waters south of 60 degrees south in its year 2000 revision, but this has not formally been adopted; the 2000 IHO definition, however, was circulated in a draft edition in 2002 and has acquired de facto usage by many nations and organizations, including the CIA

Economy—overview: Fisheries in 2013–14 landed 302,960 metric tons, of which 96% (291,370 tons-the highest reported catch since 1991) was krill and 4% (11,590 tons) Patagonian toothfish (also known as Chilean sea bass), compared to 15,330 tons in 2012–13 (estimated fishing from the area covered by the Convention of the Conservation of Antarctic Marine Living Resources, which extends slightly beyond the Southern OceanArea). International agreements were adopted in late 1999 to reduce illegal, unreported, and unregulated fishing, which in the 2000–01 season landed, by one estimate, 8,376 metric tons of Patagonian and Antarctic toothfish. In the 2014–15 Antarctic summer, 36,702 tourists visited the Southern Ocean, slightly lower than the 37,405 visitors in 2013–14 (estimates provided to the Antarctic Treaty by the International Association of Antarctica Tour Operators, and does not include passengers on overflights and those flying directly in and out of Antarctica).

Ports and terminals: *major seaport(s):* McMurdo, Palmer, and offshore anchorages in Antarctica

note: few ports or harbors exist on the southern side of the Southern Ocean; ice conditions limit use of most to short periods in midsummer; even then some cannot be entered without icebreaker escort; most Antarctic ports are operated by government research stations and, except in an emergency, are not open to commercial or private vessels

Transportation—note: Drake Passage offers alternative to transit through the Panama Canal

Disputes—International: Antarctic Treaty defers claims (see Antarctica entry), but Argentina, Australia, Chile, France, NZ, Norway, and UK assert claims (some overlapping), including the continental shelf in the Southern Ocean; several states have expressed an interest in extending those continental shelf claims under the UN Convention on the Law of the Sea to include undersea ridges; the US and most other states do not recognize the land or maritime claims of other states and have made no claims themselves (the US and Russia have reserved the right to do so); no formal claims exist in the waters in the sector between 90 degrees west and 150 degrees west

Background: Spain's powerful world empire of the 16th and 17th centuries ultimately yielded command of the seas to England. Subsequent failure to embrace the mercantile and industrial revolutions caused the country to fall behind Britain, France, and Germany in economic and political power. Spain remained neutral in World War I and II but suffered through a devastating civil war (1936–39). A peaceful transition to democracy following the death of dictator Francisco FRANCO in 1975, and rapid economic modernization (Spain joined the EU in 1986) gave Spain A dynamic and rapidly growing economy and made it a global champion of freedom and human rights. More recently the government has focused on measures to reverse a severe economic recession that began in mid-2008. Austerity measures implemented to reduce a large budget deficit and reassure foreign investors have led to one of the highest unemployment rates in Europe. Spain Assumed a nonpermanent seat on the UN Security Council for the 2015–16 term.

Location: Southwestern Europe, bordering the Mediterranean Sea, North Atlantic Ocean, Bay of Biscay, and Pyrenees Mountains; southwest of France

Country name: *conventional long form:* Kingdom of Spain

conventional short form: Spain

local long form: Reino de Espana

local short form: Espana

etymology: derivation of the name “Espana” is uncertain, but may come from the Phoenician term “span,” related to the word “spy,” meaning “to forge metals,” so, “i-spn-ya” would mean “place where metals are forged”; the ancient Phoenicians long exploited the Iberian Peninsula for its mineral wealth

Government type: parliamentary constitutional monarchy

Capital: *name:* Madrid

Geographic coordinates: 40 24 N, 3 41 W

time difference: UTC + 1 (6 hours ahead of Washington, DC, during Standard Time)

daylight saving time: +1 hr, begins last Sunday in March; ends last Sunday in October

note: Spain has two time zones including the Canary Islands

Administrative divisions: 17 semi-autonomous communities

(comunidades autonomas, singular—comunidad autonoma) and 2 autonomous cities* (ciudades autonomas, singular—ciudad autonoma); Andalusia; Aragon; Asturias; Canarias (Canary Islands); Cantabria; Castilla-La Mancha; Castilla-Leon; Catalonia (Castilian), Catalunya (Catalan), Catalonha (Aranese) [Catalonia]; Ceuta*; Comunidad Valenciana (Castilian), Comunitat Valenciana (Valencian) [Valencian Community]; Extremadura; Galicia; Illes Balears (Balearic Islands); La Rioja; Madrid; Melilla*; Murcia; Navarra (Castilian), Nafarroa (Basque) [Navarre]; Pais Vasco (Castilian), EUS kadi (Basque) [Basque Country]

note: the autonomous cities of Ceuta and Melilla plus three small islands of Islas Chafarinas, Penon de Alhucemas, and Penon de Velez de la Gomera, administered directly by the Spanish central government, are all along the coast of Morocco and are collectively referred to as Places of Sovereignty (Plazas de Soberania)

Independence: 1492; the Iberian peninsula was characterized by a variety of independent kingdoms prior to the Muslim occupation that began in the early 8th century A.D. and lasted nearly seven centuries; the small Christian redoubts of the north began the reconquest almost immediately, culminating in the seizure of Granada in 1492; this event completed the unification of several kingdoms and is traditionally considered the forging of present-day Spain

National holiday: National Day, 12 October (1492); year when Columbus first set foot in the Americas

Constitution: previous 1812; latest approved by the General Courts 31 October 1978, passed by referendum 6 December 1978, signed by the king 27 December 1978, effective 29 December 1978; amended 1992, 2007, 2011 (2016)

Legal system: civil law system with Regional variations

International law organization participation: accepts compulsory ICJ jurisdiction with reservations; accepts ICtCt jurisdiction

Citizenship: *citizenship by birth:* no

citizenship by descent only: at least one parent must be a citizen of Spain

dual citizenship recognized: only with select Latin American countries

residency requirement for naturalization: 10 years for persons with no ties to Spain

Suffrage: 18 years of age; universal

Executive branch: *chief of state:* King FELIPE VI (since 19 June

2014); Heir Apparent Princess LEONOR, Princess of Asturias, daughter of the monarch, born 31 October 2005

head of government: Acting President of the Government or Acting Prime Minister Mariano RAJOY (since 20 December 2011); Vice President (and Minister of the President's Office) Soraya SAENZ DE SANTAMARIA (since 22 December 2011)

cabinet: Council of Ministers designated by the president

elections/appointments: the monarchy is hereditary; following legislative elections, the monarch usually proposes the leader of the party or coalition with the largest majority of seats as president, who is then indirectly elected by the Congress of Deputies; election last held on 20 December 2015; vice president and Council of Ministers appointed by the president;

note—because no party received a majority of the votes in both houses, and because the leaders of the parties with the most votes were unable to form a coalition to form a majority, new elections will be most likely held on 26 June 2016

election results: percent of National Assembly vote—NA

note: there is also a Council of State that is the supreme consultative organ of the government, but its recommendations are non-Binding

Legislative branch: *description:* bicameral General Courts or Las Cortes Generales consists of the Senate or Senado (266 seats as of 2013; 208 members directly elected in multi-seat constituencies by simple majority vote and 58 appointed by the regional legislatures; members serve 4-year terms) and the Congress of Deputies or Congreso de los Diputados (350 seats; 348 members directly elected in 50 multi-seat constituencies by proportional representation vote and 2 directly elected from the North African Ceuta and Melilla enclaves by simple majority vote; members serve 4-year terms or until the government is dissolved)

elections: Senate—last held on 20 December 2015 (next to be held 26 June 2016); Congress of Deputies—last held on 20 December 2015 (next to be held on 26 June 2016); note—the four main parties were unable to form a government so a second election is being held six months later

election results: Senate—percent of vote by party—PP 54.5%, PSOE 24.8%, Podemos 8.6%, DiL 4.9%, ERC 2.6%, EAJ-PNV 2.6%, C's 0.8%, CC-PNC 0.8%, independent 0.4%, other 1.5%; seats by party—PP 145, PSOE 66, Podemos 23, DiL 9, ERC 7, EAJ/PNV 7, CC/PNC 2, C's 2, other 4, independent 1; Congress of Deputies—percent of vote by party—PP 28.7%, PSOE 22.0%, Podemos 20.7%, C's 13.9%, IU/UP 3.7%, ERC 2.4%, DiL 2.3%, EAJ/PNV 1.2%, other 5.1%; seats by party

Flag description: three horizontal bands of red (top), yellow (double width), and red with the National coat of arms on the hoist side of the yellow band; the coat of arms is quartered to display the emblems of the traditional kingdoms of Spain (clockwise from upper left, Castile, Leon, Navarre, and Aragon) while Granada is represented by the stylized pomegranate at the bottom of the shield; the arms are framed by two columns representing the Pillars of Hercules, which are the two promontories (Gibraltar and Ceuta) on either side of the eastern end of the Strait of Gibraltar; the red scroll across the two columns bears the imperial motto of “Plus Ultra” (further beyond) referring to Spanish lands beyond Europe; the triband arrangement with the center stripe twice the width of the outer dates to the 18th century

note: the red and yellow colors are related to those of the oldest Spanish kingdoms: Aragon, Castile, Leon, and Navarre

National symbol(s): Pillars of Hercules; National colors: red, yellow

National anthem: *name:* “Himno Nacion al Espanol” (National Anthem of Spain)

lyrics/music: no lyrics/unknown

note: officially in use between 1770 and 1931, restored in 1939; the Spanish anthem is the first anthem to be officially adopted, but it has no lyrics; in the years prior to 1931 it became known as “Marcha Real” (The Royal March); it first appeared in a 1761 military bugle call book and was replaced by “Himno de Riego” in the years between 1931 and 1939; the long version of the anthem is used for the king, while the short version is used for the prince, prime minister, and occasions such as sporting events

Economy—overview: After experiencing a prolonged recession in the wake of the global financial crisis that began in 2008, in 2014 Spain marked the first full year of positive economic growth in seven years, largely due to increased private consumption. At the onset of the financial crisis, Spain's GDP contracted by 3.7% in 2009, ending a 16-year growth trend, and continued contracting through most of 2013. In 2013, the government successfully shored up struggling banks—exposed to the collapse of Spain's depressed real estate and construction sectors—and in January 2014 completed an EU -funded restructuring and recapitalization program.

Until 2014, credit contraction in the private sector, fiscal austerity, and high unemployment weighed on domestic consumption and investment. The unemployment rate rose from a low of about 8% in 2007 to more than 26% in 2013, but labor reforms prompted a modest reduction to 22% in 2015. High unemployment strained Spain's public finances, as spending on social benefits increased while tax revenues fell. Spain's budget deficit peaked at 11.4% of GDP in 2010, but Spain gradually reduced the deficit to just under 7% of GDP in 2013–14, and 4.7% of GDP in 2015. Public debt has increased substantially—from 60.1% of GDP in 2010 to nearly 101% in 2015.

Exports were resilient throughout the economic downturn and helped to bring Spain's current account into surplus in 2013 for the first time since 1986, where it remained in 2014–15. Rising labor productivity and an internal devaluation resulting from moderating labor costs and lower inflation have helped to improve foreign investor interest in the economy and positive FDI flows have been restored.

The government's efforts to implement labor, pension, healthcare, tax, and education reforms—aimed at supporting investor sentiment—have become overshadowed by political activity in 2015 in anticipation of the National parliamentary elections in December. The European Commission criticized Spain's 2016 budget for its easing of austerity measures and its alleged overly optimistic growth and deficit projections. Spain's borrowing costs are dramatically lower since their peak in mid-2012, and despite the recent uptick in economic activity, inflation has dropped sharply, from 1.5% in 2013 to a negative 0.6% in 2015.

Disputes—International: in 2002, Gibraltar residents voted overwhelmingly by referendum to reject any “shared sovereignty” arrangement; the Government of Gibraltar insists on equal participation in talks between the UK and Spain; Spain disapproves of UK plans to grant Gibraltar greater autonomy; Morocco protests Spain’s control over the coastal enclaves of Ceuta, Melilla, and the islands of Penon de Velez de la Gomera, Penon de Alhucemas, and Islas Chafarinas, and surrounding waters; both countries claim Isla Perejil (Leila Island); Morocco serves as the primary launching site of illegal migration into Spain from North Africa; Portugal does not

Background: The Spratly Islands consist of more than 100 small islands or reefs surrounded by rich fishing grounds -and potentially by gas and oil deposits. They are claimed in their entirety by China, Taiwan, and Vietnam, while portions are claimed by Malaysia and the Philippines. About 45 islands are occupied by relatively small numbers of military forces from China, Malaysia, the Philippines, Taiwan, and Vietnam. Since 1985 Brunei has claimed a continental shelf that overlaps a southern reef but has not made any formal claim to the reef. Brunei claims an exclusive economic zone over this area.

conventional short form: Spratly Islands

etymology: named after a British whaling captain Richard SPRATLY, who sighted Spratly Island in 1843; the name of the island eventually passed to the entire archipelago

Economy—overview: Economic activity is limited to commercial fishing. The proximity to nearby oil- and gas-producing sedimentary basins indicate potential oil and gas deposits, but the region is largely unexplored. No reliable estimates of potential reserves are available. Commercial exploitation has yet to be developed.

Background: The first Sinhalese arrived in Sri Lanka late in the 6th century B.C., probably from northern India. Buddhism was introduced circa 250 B.C., and a great civilization developed at the cities of Anuradhapura (kingdom from circa 200 B.C. to circa A.D. 1000) and Polonnaruwa (from about 1070 to 1200). In the 14th century, a south Indian dynasty established a Tamil kingdom in northern Sri Lanka. The Portuguese controlled the coastal areas of the island in the 16th century and the Dutch in the 17th century. The island was ceded to the British in 1796, became a crown colony in 1802, and was formally united under British rule by 1815. As Ceylon, it became independent in 1948; its name was changed to Sri Lanka in 1972. Tensions between the Sinhalese majority and Tamil separatists erupted into war in 1983. After two decades of fighting, the government and Liberation Tigers of Tamil Eelam (LTTE) formalized a cease-fire in February 2002 with Norway brokering peace negotiations. Violence between the LTTE and government forces intensified in 2006, but the government regained control of the

Eastern Province in 2007 and by May 2009, the remnants of the LTTE had been defeated. Since the end of the conflict, the government has enacted an Ambitious program of economic development projects, many of which are financed by loans from the Government of China. In addition to efforts at reconstructing its economy, the government has resettled more than 95% of those civilians displaced during the final phase of the conflict and released the vast majority of former LTTE combatants captured by Government Security Forces. At the same time, there has been little progress on more contentious and politically difficult issues such as reaching a political settlement with Tamil elected representatives and holding accountable those alleged to have been involved in human rights violations and other abuses during the conflict.

Economy—overview: Sri Lanka continues to experience strong economic growth following the end of the government’s 26-year conflict with the Liberation Tigers of Tamil Eelam. The government has been pursuing large-scale reconstruction and development projects in its efforts to spur growth in war-torn and disadvantaged areas, develop small and medium enterprises, and increase agricultural productivity.

The government’s high debt payments and bloated civil service have contributed to historically high budget deficits and low tax revenues remain a concern. Government debt of about 72% of GDP remains among the highest in emerging markets.

The new government in 2015 drastically increased wages for public sector employees, which boosted demand for consumer goods but hurt the overall balance of payments and reduced foreign exchange reserves.

Trafficking in persons: *current situation:* Sri Lanka is primarily a source and, to a lesser extent, a destination country for men, women, and children subjected to forced labor and sex trafficking; some Sri Lankan adults and children who migrate willingly to the Middle East, Southeast Asia, and Afghanistan to work in the

construction, garment, and domestic service sectors are subsequently subjected to forced labor or debt bondage (incurred through high recruitment fees or money advances); some Sri Lankan women are forced into prostitution in Jordan, Maldives, Malaysia, Singapore, and other countries; within Sri Lanka, women and children are subjected to sex trafficking, and children are also forced to beg and work in the agriculture, fireworks, and fish-drying industries; a small number of women from Asia, Central Asia, Europe, and the Middle East have been forced into prostitution in Sri Lanka in recent years

tier rating: Tier 2 Watch List—Sri Lanka does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; in 2014, Sri Lanka was granted a waiver from an otherwise required downgrade to Tier 3 because its government has a written plan that, if implemented, would constitute making significant efforts to bring itself into compliance with the minimum standards for the elimination of trafficking; law enforcement continues to demonstrate a lack of understanding of trafficking crimes and inadequate investigations, relying on trafficking cases to be prosecuted under the procurement statute rather than the trafficking statute, which carries more stringent penalties; authorities convicted only one offender under the procurement statute, a decrease from 2013; the government approved guidelines for the identification of victims and their referral to protective services but failed to ensure that victims were not jailed and charged for crimes committed as a direct result of being trafficked; no government employees were investigated or prosecuted, despite allegations of complicity (2015)

Background: Military regimes favoring Islamic-oriented governments have dominated National politics since independence from Anglo-Egyptian co-rule in 1956. Sudan was embroiled in two prolonged civil wars during most of the remainder of the 20th century. These conflicts were rooted in northern economic, political, and social domination of largely non-Muslim, non-Arab southern Sudanese. The first civil war ended in 1972 but another broke out in 1983. Peace talks gained momentum in 2002–04 with the signing of several accords. The final North/South Comprehensive Peace Agreement (CPA), signed in January 2005, granted the southern rebels autonomy for six years followed by a referendum on independence for Southern Sudan. The referendum was held in January 2011 and indicated overwhelming support for independence. South Sudan became independent on 9 July 2011. Sudan and South Sudan have yet to fully implement security and economic agreements signed in September 2012 relating to the normalization of relations between the two countries. The final disposition of the contested

Abyei region has also to be decided.

Since South Sudan's independence, conflict has broken out between the government and the Sudan People's Liberation Movement-North in Southern Kordofan and Blue Nile states, which has resulted in 1.2 million internally displaced persons or severely affected persons needing humanitarian Assistance. A separate conflict, which broke out in the western region of Darfur in 2003, displaced nearly two million people and caused an estimated 200,000 to 400,000 deaths. Violence in Darfur in 2013 resulted in an Additional estimated 6,000 civilians killed and 500,000 displaced. The UN and the African Union have jointly commanded a Darfur peacekeeping operation known as the African Union-United Nations Hybrid Mission in Darfur (UNAMID) since 2007. Peacekeeping troops have struggled to stabilize the situation and have increasingly become targets for attacks by armed groups. Sudan also has faced refugee influxes from neighboring countries, primarily Ethiopia, Eritrea, Chad, Central African Republic, and South Sudan. Armed conflict, poor transport infrastructure, and government denial of access have impeded the provision of humanitarian Assistance to affected populations.

Economy—overview: Sudan has experienced protracted social conflict, civil war, and, in July 2011, the loss of three-quarters of its oil production due to the secession of South Sudan. The oil sector had driven much of Sudan’s GDP growth since 1999. For nearly a decade, the economy boomed on the back of rising oil production, high oil prices, and significant inflows of foreign direct investment. Since the economic shock of South Sudan’s secession, Sudan has struggled to stabilize its economy and make up for the loss of foreign exchange earnings. The interruption of oil production in South Sudan in 2012 for over a year and the consequent loss of oil transit fees further exacerbated the fragile state of Sudan’s economy. Ongoing conflicts in Southern Kordofan, Darfur, and the Blue Nile states, lack of basic infrastructure in large areas, and reliance by much of the population

on subsistence agriculture keep close to half of the population at or below the poverty line.

Sudan is also subject to comprehensive US sanctions. Sudan is attempting to develop non-oil sources of revenues, such as gold mining, while carrying out an Austerity program to reduce expenditures. The world's largest exporter of gum Arabic, Sudan produces 75–80% of the world's total output. Agriculture continues to employ 80% of the workforce.

Sudan introduced a new currency, still called the Sudanese pound, following South Sudan's secession, but the value of the currency has fallen since its introduction. Khartoum formally devalued the currency in June 2012, when it passed austerity measures that included gradually repealing fuel subsidies. Sudan also faces high inflation, which reached 47% on an annual basis in November 2012 but subsided to just under 18% in 2015.

Disputes—International: the effects of Sudan's almost constant ethnic and rebel militia fighting since the mid-20th century have penetrated all of the neighboring states; Chad wishes to be a helpful mediator in resolving the Darfur conflict, and in 2010 established a joint border monitoring force with Sudan, which has helped to reduce cross-border banditry and violence; as of mid-2013, Chad, Egypt, Ethiopia, Israel, the Central African Republic, and South Sudan provided shelter for more than 600,000 Sudanese refugees; during the same period, Sudan, in turn, hosted about 115,000 Eritreans, 32,000 Chadians, and smaller numbers of Ethiopians and Central Africans; Sudan accuses Eritrea of supporting Sudanese rebel groups; efforts to demarcate the porous boundary with Ethiopia proceed slowly due to civil and ethnic fighting in eastern Sudan; Sudan claims but Egypt de facto administers security and economic development of the Halaib region north of the 22nd parallel boundary; periodic violent skirmishes with Sudanese residents over water and grazing rights persist among related pastoral populations along the border with the Central African Republic; South Sudan-Sudan boundary represents 1 January 1956 alignment, final alignment

pending negotiations and demarcation; final sovereignty status of Abyei Area pending negotiations between South Sudan and Sudan

Refugees and internally displaced persons: *refugees (country of origin):* 109,196 (Eritrea); 42,334 (Chad); 5,495 (Ethiopia) (2014); 5,540 (Yemen) (2015); 231,581 (South Sudan) (2016)

IDPs: 3,218,234 (civil war 1983–2005; ongoing conflict in Darfur region; government and rebel fighting along South Sudan border; inter-tribal clashes) (2015)

Trafficking in persons: *current situation:* Sudan is a source, transit, and destination country for men, women, and children who are subjected to forced labor and sex trafficking; Sudanese women and girls, particularly those from rural areas or who are internally displaced, or refugees are vulnerable to domestic servitude in country, as well as domestic servitude and sex trafficking abroad; migrants from East and West Africa, South Sudan, Syria, and Nigeria smuggled into or through Sudan are vulnerable to exploitation; Ethiopian, Eritrean, and Filipina women are subjected to domestic servitude in Sudanese homes, and East African And possibly Thai women are forced into prostitution in Sudan; Sudanese children continue to be recruited and used as combatants by government forces and armed groups

tier rating: Tier 2 Watch List—Sudan does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; the government increased its efforts to publically address and prevent trafficking, established a National anti-trafficking council, and began drafting a National action plan against trafficking; the government acknowledges cross-border trafficking but still denies the existence of forced labor, sex trafficking, and the recruitment of child soldiers domestically; law enforcement and judicial officials struggled to apply the National anti-trafficking law, often relying on other statutes with lesser penalties; authorities did not use systematic procedure to identify victims or refer them to care and relied on International organizations and domestic groups to provide protective services; some foreign victims were penalized for unlawful acts committed as a direct result of being trafficked, such as immigration or prostitution violations (2015)

Background: First explored by the Spaniards in the 16th century and then settled by the English in the mid-17th century, Suriname became a Dutch colony in 1667. With the abolition of African slavery in 1863, workers were brought in from India and Java. The Netherlands granted the colony independence in 1975. Five years later the civilian Government was replaced by a military regime that soon declared a socialist republic. It continued to exert control through a succession of nominally civilian administrations until 1987, when International pressure finally forced a democratic election. In 1990, the military overthrew the civilian leadership, but a democratically elected government—a four-party coalition—returned to power in 1991. The coalition expanded to eight parties in 2005 and ruled until August 2010, when voters returned former military leader Desire BOUTERSE and his opposition coalition to power. President BOUTERSE was reelected unopposed in 2015.

Nationality: *noun:* Surinamer(s)

adjective: Surinamese

Ethnic groups: Hindustani (also known locally as “East Indians”; their ancestors emigrated from northern India in the latter part of the 19th century) 37%, Creole (mixed white and black) 31%, Javanese 15%, “Maroons” (their African Ancestors were brought to the country in the 17th and 18th centuries as slaves and escaped to the interior) 10%, Amerindian 2%, Chinese 2%, white 1%, other 2%

Languages: Dutch (official), English (widely spoken), Sranang Tongo (Surinamese, sometimes called Taki-Taki, is native language of Creoles and much of the younger population and is lingua franca among others), Caribbean Hindustani (adialect of Hindi), Javanese

Religions: Hindu 27.4%, Protestant 25.2% (predominantly Moravian), Roman Catholic 22.8%, Muslim 19.6%, indigenous beliefs 5%

Demographic profile: Suriname is a pluralistic society consisting primarily of Creoles (persons of mixed African and European heritage), the descendants of escaped African slaves known as Maroons, and the descendants of Indian and Javanese contract workers. The country overall is in full, post-industrial demographic transition, with a low fertility rate, a moderate mortality rate, and a rising life expectancy. However, the Maroon population of the rural interior lags behind because of lower educational attainment and contraceptive use, higher malnutrition, and significantly less access to

electricity, potable water, sanitation, infrastructure, and health care. Some 350,000 people of Surinamese descent live in the Netherlands, Suriname's former colonial ruler. In the 19th century, better-educated, largely Dutch-speaking Surinamese began emigrating to the Netherlands. World War II interrupted the outflow, but it resumed after the war when Dutch labor demands grew—emigrants included all segments of the Creole population. Suriname still is strongly influenced by the Netherlands because most Surinamese have relatives living there and it is the largest supplier of development aid. Other emigration destinations include French Guiana and the United States. Suriname's immigration rules are flexible, and the country is easy to enter illegally because rainforests obscure its borders. Since the mid-1980s, Brazilians have settled in Suriname's capital, Paramaribo, or eastern Suriname, where they mine gold. This immigration is likely to slowly re-orient Suriname toward its Latin American roots.

Economy—overview: The economy is dominated by the mining industry, with exports of oil, gold, and alumina accounting for about 85% of exports and 27% of government revenues, making the economy highly vulnerable to mineral price volatility.

Economic growth has declined annually from just under 5% in 2012 to 1.5% in 2015. In January 2011, the government devalued the currency by 20% and raised taxes to reduce the budget deficit. As a result of these measures, inflation receded to less than 4% in 2015.

Suriname's economic prospects for the medium term will depend on continued commitment to responsible monetary and fiscal policies and to the introduction of structural reforms to liberalize markets and promote competition. The government's reliance on revenue from extractive industries will temper Suriname's economic outlook, especially if gold prices continue their downward trend.

Disputes—International: area claimed by French Guiana between Riviere Litani and Riviere Marouini (both headwaters of the Lawa); Suriname claims a triangle of land between the New and Kutari/Koetari rivers in a historic dispute over the headwaters of the Courantyne; Guyana seeks UN Convention on the Law of the Sea arbitration to resolve the longstanding dispute with Suriname over the axis of the territorial sea boundary in potentially oil-rich waters

Trafficking in persons: *current situation:* Suriname is a source, transit, and destination country for women and children subjected to sex trafficking and men, women, and children subjected to forced labor; women and girls from Suriname, Guyana, Brazil, and the Dominican Republic are subjected to sex trafficking in the country, sometimes in interior mining camps; migrant workers in Agriculture and on fishing boats and children working in informal urban sectors and gold mines are vulnerable to forced labor; traffickers from Suriname exploit victims in the Netherlands

tier rating: Tier 2 Watch List—Suriname does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; in 2014, Suriname was granted a waiver from an otherwise required downgrade to Tier 3 because its government has a written plan that, if implemented, would

constitute making significant efforts to bring itself into compliance with the minimum standards for the elimination of trafficking; authorities increased the number of trafficking investigations, prosecutions, and convictions as compared to 2013, but resources were insufficient to conduct investigations in the country's interior; more trafficking victims were identified in 2014 than in 2013, but protective services for adults and children were inadequate, with a proposed government shelter for women and child trafficking victims remaining unopened (2015)

Illicit drugs: growing transshipment point for South American drugs destined for Europe via the Netherlands and Brazil; transshipment point for arms-for-drugs dealing

Background: The archipelago may have been first discovered by Norse explorers in the 12th century; the islands served as an International whaling base during the 17th and 18th centuries. Norway's sovereignty was Internationally recognized by treaty in 1920, and five years later it officially took over the territory. In the 20th century coal mining started and today a Norwegian and a Russian company are still functioning. Travel between the settlements is accomplished with snowmobiles, aircraft, and boats.

Economy—overview: Tourism and International research are Svalbard's major revenue sources. Coal mining has historically been the dominant economic activity, and a treaty of 9 February 1920 gave the 41 signatories equal rights to exploit mineral deposits, subject to Norwegian regulation. Although US, UK, Dutch, and Swedish coal companies have mined in the past, the only companies still engaging in this are Norwegian and Russian. Low coal prices have forced the Norwegian coal company, Store Norske Spitsbergen Kulkompani, to close one of its two mines and to considerably reduce the activity of the other. Since the 1990s, the tourism and hospitality industry has grown rapidly, and Svalbard now receives 60,000 visitors annually.

The settlements on Svalbard were established as company towns, and at their height in the 1950s, the Norwegian state-owned coal company supported around 1,000 jobs. Today, around 300 people work in the mining industry. Goods such as alcohol, tobacco, and vehicles, normally highly taxed on mainland Norway, are considerably cheaper in Svalbard in an effort by the Norwegian Government to entice more people to live on the Arctic archipelago. By law, Norway collects only enough taxes to pay for the needs of the local government; none of tax proceeds go to the central government.

Background: Autonomy for the Swazis of southern Africa was guaranteed by the British in the late 19th century; independence was granted in 1968. Student and labor unrest during the 1990s pressured King MSWATI III, Africa's last absolute monarch, to grudgingly allow political reform and greater democracy, although he has backslid on these promises in recent years. A constitution came into effect in 2006, but the legal status of political parties was not defined and their status remains unclear. Swaziland has surpassed Botswana as the country with the world's highest known HIV/AIDS prevalence rate.

Economy—overview: Surrounded by South Africa, except for a short border with Mozambique, Swaziland depends on South Africa for 60% of its exports and for more than 90% of its imports. Swaziland's currency is pegged to the South African rand, effectively relinquishing Swaziland's monetary policy to South Africa. The government is heavily dependent on customs duties from the Southern African Customs Union (SACU), and worker remittances from South Africa supplement domestically earned income. Swaziland's GDP per capita makes it a lower middle income country, but its income distribution is highly skewed, with an estimated 20% of the population controlling 80% of the nation's wealth. As of 2013, more than one-quarter of the adult population was infected by HIV/AIDS; Swaziland has the world's highest HIV prevalence rate.

Subsistence agriculture employs approximately 70% of the population. The manufacturing sector diversified in the 1980s and 1990s, but manufacturing has grown little in the last decade. Sugar and wood pulp had been major foreign exchange earners until the wood pulp producer closed in January 2010, and sugar is now the main export earner. Mining has declined in importance in recent years. Coal, gold, diamond, and quarry stone mines are smallscale, and the only iron ore mine closed in 2014. With an estimated 40% unemployment rate, Swaziland's need to increase the number and size of small and medium enterprises and to attract foreign direct investment is acute. Overgrazing, soil depletion, drought, and floods are persistent problems. On 1 January 2015, Swaziland lost its eligibility for benefits under the US African Growth and Opportunity Act, resulting in the loss of thousands of jobs.

The IMF forecasted that Swaziland's economy will grow at a slower pace in 2016/2017 because of a region-wide drought, which is likely to hurt Swaziland's revenue from sugar exports and other agricultural products, and a decline in the tourism and transport sectors. Swaziland's revenue from SACU receipts and remittances from Swazi citizens abroad will also decline in 2016/2017, making it harder to maintain fiscal balance.

Disputes—International: in 2006, Swazi king advocated resorting to ICJ to claim parts of Mpumalanga and KwaZulu-Natal from South Africa

Background: A military power during the 17th century, Sweden has not participated in any war for two centuries. An armed neutrality was preserved in both world wars. Sweden's long-successful economic formula of a capitalist system intermixed with substantial welfare elements was challenged in the 1990s by high unemployment and in 2000–02 and 2009 by the global economic downturns, but fiscal discipline over the past several years has allowed the country to weather economic vagaries. Sweden joined the EU in 1995, but the public rejected the introduction of the euro in a 2003 referendum.

Flag description: blue with a golden yellow cross extending to the edges of the flag; the vertical part of the cross is shifted to the hoist side in the style of the Dannebrog (Danish flag); the colors

reflect those of the Swedish coat of arms—three gold crowns on a blue field

National symbol(s): three crowns, lion; National colors: blue, yellow

National anthem: *name:* “Du Gamla, Du Fria” (Thou Ancient, Thou Free)

lyrics/music: Richard DYBECK/traditional

note: in use since 1844; also known as “Sang till Norden” (Song of the North), is based on a Swedish folk tune; it has never been officially adopted by the government; “Kungssangen” (The King’s Song) serves as the royal anthem and is played in the presence of the royal family and during certain state ceremonies

Economy—overview: Sweden has achieved an enviable standard of living with its combination of free-market capitalism and extensive welfare benefits. Sweden remains outside the euro zone largely out of concern that joining the European Economic and Monetary Union would diminish the country’s sovereignty over its welfare system. Timber, hydropower, and iron ore constitute the resource base of an economy heavily oriented toward foreign trade.

Economic growth slowed in 2013, as a result of continued economic weakness in Sweden’s European trading partners; Sweden’s economy experienced modest growth in 2014–15, with real GDP growth above 2%, but continues to struggle with deflationary pressure.

Background: The Swiss Confederation was founded in 1291 as a defensive alliance among three cantons. In succeeding years, other localities joined the original three. The Swiss Confederation secured its independence from the Holy Roman Empire in 1499. A constitution of 1848, subsequently modified in 1874, replaced the confederation with a centralized federal government. Switzerland's sovereignty and neutrality have long been honored by the major European powers, and the country was not involved in either of the two world wars. The political and economic integration of Europe over the past half century, as well as Switzerland's role in many UN and International organizations, has strengthened Switzerland's ties with its neighbors. However, the country did not officially become a UN member until 2002. Switzerland remains active in many UN And International organizations but retains a strong commitment to neutrality.

Flag description: red square with a bold, equilateral white cross in the center that does not extend to the edges of the flag; various medieval legends purport to describe the origin of the flag; a white cross used as identification for troops of the Swiss Confederation is

first attested at the Battle of Laupen (1339)

National symbol(s): Swiss cross (white cross on red field, arms equal length);

National colors: red, white

National anthem: the Swiss anthem has four names:
“Schweizerpsalm” [German]

“Cantique Suisse” [French]

“Salmo svizzero,” [Italian]

“Psalm svizzer” [Romansch] (Swiss Psalm)

lyrics/music: Leonhard WIDMER [German], Charles CHATELANAT [French], Camillo VALSANGIACOMO [Italian], and Flurin CAMATHIAS [Romansch]/Alberik ZWYSSIG

note: unofficially adopted 1961, officially 1981; the anthem has been popular in a number of Swiss cantons since its composition (in German) in 1841; translated into the other three official languages of the country (French, Italian, and Romansch), it is official in each of those languages

Economy—overview: Switzerland, a country that espouses neutrality, is a prosperous and modern market economy with low unemployment, a highly skilled labor force, and a per capita GDP among the highest in the world. Switzerland’s economy benefits from a highly developed service sector, led by financial services, and a manufacturing industry that specializes in high-technology, knowledge-based production. Its economic and political stability, transparent legal system, exceptional infrastructure, efficient capital markets, and low corporate tax rates also make Switzerland one of the world’s most competitive economies. The Swiss have brought their economic practices largely into conformity with the EU’s to enhance their International competitiveness, but some trade protectionism remains, particularly for its small agricultural sector. The fate of the Swiss economy is tightly linked to that of its neighbors in the euro zone, which purchases half of Swiss exports. The global financial crisis of 2008 and resulting economic downturn in 2009 stalled demand for Swiss exports and put Switzerland into a recession. During this period, the Swiss National Bank (SNB) implemented a zero-interest rate policy to boost the economy, as well as to prevent appreciation of the franc, and Switzerland’s economy began to recover in 2010.

The sovereign debt crises unfolding in neighboring eurozone countries, however, coupled with ongoing economic instability in Russia and other eastern European economies continue to pose a

significant risk to the Swiss economy, driving up demand for the Swiss franc by investors seeking a safe-haven currency. In January 2015, the SNB abandoned the Swiss franc's peg to the euro, roiling global currency markets and making active SNB intervention a necessary hallmark of present-day Swiss monetary policy. The independent SNB has upheld its zero interest rate policy and conducted major market interventions to prevent further appreciation of the Swiss franc, but parliamentarians have urged it to do more to weaken the currency. The franc's strength has made Swiss exports less competitive and weakened the country's growth outlook; GDP growth fell below 2% per year from 2011–15.

In recent years, Switzerland has responded to increasing pressure from neighboring countries and trading partners to reform its banking secrecy laws, by agreeing to conform to OECD regulations on administrative assistance in tax matters, including tax evasion. The Swiss government has also renegotiated its double taxation agreements with numerous countries, including the US, to incorporate OECD standards, and is openly considering the possibility of imposing taxes on bank deposits held by foreigners .

Background: Following World War I, France acquired a mandate over the northern portion of the former Ottoman Empire province of Syria. The French administered the area as Syria until granting it independence in 1946. The new country lacked political stability and experienced a series of military coups. Syria united with Egypt in February 1958 to form the United Arab Republic. In September 1961, the two entities separated, and the Syrian Arab Republic was reestablished. In the 1967 Arab-Israeli War, Syria lost the Golan Heights region to Israel. During the 1990s, Syria and Israel held occasional, albeit unsuccessful, peace talks over its return. In November 1970, Hafiz al-ASAD, a member of the socialist Ba'ath Party and the minority Alawi sect, seized power in a bloodless coup and brought political stability to the country. Following the death of President Hafiz al-ASAD, his son, Bashar al-ASAD, was approved as president by popular referendum in July 2000. Syrian troops—stationed in Lebanon since 1976 in an ostensible peacekeeping role—were withdrawn in April 2005. During the July-August 2006 conflict

between Israel and Hizballah, Syria placed its military forces on alert but did not intervene directly on behalf of its ally Hizballah. In May 2007, Basharal-ASAD's second term as president was approved by popular referendum.

Influenced by major uprisings that began elsewhere in the region, and compounded by additional social and economic factors, antigovernment protests broke out first in the southern province of Dar'a in March 2011 with protesters calling for the repeal of the restrictive Emergency Law allowing arrests without charge, the legalization of political parties, and the removal of corrupt local officials. Demonstrations and violent unrest spread across Syria with the size and intensity of protests fluctuating. The government responded to unrest with a mix of concessions—including the repeal of the Emergency Law, new laws permitting new political parties, and liberalizing local and National elections—and military force. However, the government's response has failed to meet opposition demands for ASAD's resignation, and the government's ongoing violence to quell unrest and widespread armed opposition activity has led to extended clashes between government forces and oppositionists. International pressure on the ASAD regime has intensified since late 2011, as the Arab League, EU, Turkey, and the US expanded economic sanctions against the regime. In December 2012, the Syrian National Coalition, was recognized by more than 130 countries as the sole legitimate representative of the Syrian people. Peace talks between the Coalition and Syrian regime at the UN-sponsored Geneva II conference in 2014 failed to produce a resolution of the conflict. Unrest continues in Syria, and according to a January 2015 UN estimate, the death toll among Syrian Government forces, opposition forces, and civilians had reached 220,000. As of January 2016, approximately 13.5 million people were in need of humanitarian Assistance in Syria, with 6.5 million people displaced internally, and an Additional 4.4 million Syrian refugees, making the Syrian situation the largest humanitarian crisis worldwide.

Flag description: three equal horizontal bands of red (top),
white, and black; two small, green, five-pointed stars in a horizontal
line centered in the white band; the band colors derive from the Arab
Liberation flag and represent oppression (black), overcome through
bloody struggle (red), to be replaced by a bright future (white);
identical to the former flag of the United Arab Republic (1958–1961)
where the two stars represented the constituent states of Syria and

Egypt; the current design dates to 1980

note: similar to the flag of Yemen, which has a plain white band, Iraq, which has an Arabic inscription centered in the white band, and that of Egypt, which has a gold Eagle of Saladin centered in the white band

National symbol(s): hawk; National colors: red, white, black, green

National anthem: *name:* “Humatad-Diyar” (Guardians of the Homeland)

lyrics/music: Khalil Mardam BEY/Mohammad Salim FLAYFEL and Ahmad Salim FLAYFEL

note: adopted 1936, restored 1961; between 1958 and 1961, while Syria was a member of the United Arab Republic with Egypt, the country had a different anthem

Economy—overview: Syria’s economy continues to deteriorate amid the ongoing conflict that began in 2011, declining by 62% from 2010 to 2014. The government has struggled to address the effects of International sanctions, widespread infrastructure damage, diminished domestic consumption and production, reduced subsidies, and high inflation, which have caused dwindling foreign exchange reserves, rising budget and trade deficits, a decreasing value of the Syrian pound, and falling household purchasing power. During 2014, the ongoing conflict and continued unrest and economic decline worsened the humanitarian crisis and elicited a greater need for International assistance, as the number of people in need inside Syria increased from 9.3 million to 12.2 million, and the number of Syrian refugees increased from 2.2 million to more than 3.3 million.

Prior to the turmoil, Damascus had begun liberalizing economic policies, including cutting lending interest rates, opening private banks, consolidating multiple exchange rates, raising prices on some subsidized items, and establishing the Damascus Stock Exchange, but the economy remains highly regulated. Long-run economic constraints include foreign trade barriers, declining oil production, high unemployment, rising budget deficits, increasing pressure on water supplies caused by heavy use in Agriculture, rapid population growth, industrial expansion, water pollution, and widespread infrastructure damage.

Telephone system: *general assessment:* fair system currently

undergoing significant improvement and digital upgrades, including fiber-optic technology and expansion of the network to rural areas; the armed insurgency that began in 2011 has led to major disruptions to the network and has caused telephone and internet outages throughout the country

domestic: the number of fixed-line connections has increased markedly since 2000; mobile-cellular service growing with telephone subscribership nearly 60 per 100 persons in 2011

international: country code—963; submarine cable connection to Egypt, Lebanon, and Cyprus; satellite earth stations—1 intelsat (Indian Ocean) and 1 Intersputnik (Atlantic Ocean region); coaxial cable and microwave radio relay to Iraq, Jordan, Lebanon, and Turkey; participant in Medarabtel (2011)

Broadcast media: state-run TV and radio broadcast networks; state operates 2 TV networks and a satellite channel; roughly two-thirds of Syrian homes have a satellite dish providing access to foreign TV broadcasts; 3 state-run radio channels; first private radio station launched in 2005; private radio broadcasters prohibited from transmitting news or political content (2007)

Disputes—International: Golan Heights is Israeli-occupied with the almost 1,000-strong UN Disengagement Observer Force patrolling a buffer zone since 1964; lacking a treaty or other documentation describing the boundary, portions of the Lebanon-Syria boundary are unclear with several sections in dispute; since

2000, Lebanon has claimed Shab'a Farms in the Golan Heights; 2004 Agreement and pending demarcation would settle border dispute with Jordan

Refugees and internally displaced persons: *refugees (country of origin):* 526,744 (Palestinian Refugees) (2014); undetermined (Iraq) (2015)

note: the ongoing civil war has created more than 4.8 million Syrian refugees—dispersed in Egypt, Iraq, Jordan, Lebanon, and Turkey—as of July 2016

IDPs: 6,563,462 (ongoing civil war since 2011) (2015)

stateless persons: 160,000 (2015); *note*—Syria's stateless population consists of Kurds and Palestinians; stateless persons are prevented from voting, owning land, holding certain jobs, receiving food subsidies or public healthcare, enrolling in public schools, or being legally married to Syrian citizens; in 1962, some 120,000 Syrian Kurds were stripped of their Syrian citizenship, rendering them and their descendants stateless; in 2011, the Syrian government granted citizenship to thousands of Syrian Kurds as a means of appeasement; however, resolving the question of statelessness is not a priority given Syria's ongoing civil war

Trafficking in persons: *current situation:* as conditions continue to deteriorate due to Syria's civil war, human trafficking has increased; Syrians remaining in the country and those that are refugees abroad are vulnerable to trafficking; Syria is a source and destination country for men, women and children subjected to forced labor and sex trafficking; Syrian children continue to be forcibly recruited by government forces, pro-regime militias, armed opposition groups, and terrorist organizations to serve as soldiers, human shields, and executioners; ISIL forces Syrian women and girls and Yazidi women and girls taken from Iraq to marry its fighters, where they experience domestic servitude and sexual violence; Syrian refugee women and girls are forced into exploitive marriages or prostitution in neighboring countries, while displaced children are forced into street begging domestically and abroad

tier rating: Tier 3—the government does not fully comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so; in 2014, Syria's violent conditions enabled human trafficking to flourish; the government made no effort to investigate, prosecute, or convict trafficking offenders or complicit government officials, including those who forcibly recruited child soldiers; authorities did not identify victims and failed to ensure victims, including child soldiers, were protected from arrest,

detention, and severe abuse as a result of being trafficked (2015)

Illicit drugs: a transit point for opiates, hashish, and cocaine bound for regional and Western markets; weak anti-money-laundering controls and bank privatization may leave it vulnerable to money laundering

Background: First inhabited by Austronesian people, Taiwan became home to Han immigrants beginning in the late Ming Dynasty (17th century). In 1895, military defeat forced China's Qing Dynasty to cede Taiwan to Japan, which governed Taiwan for 50 years. Taiwan came under Chinese Nationalist control after World War II. In the four years leading to the communist victory on the mainland in 1949, 2 million Nationalists fled to Taiwan and established a government under the 1947 constitution drawn up for all of China. The Nationalist government established authoritarian rule under martial law in 1948. Beginning in the late 1970s, the ruling authorities gradually democratized and incorporated the local population within the governing structure. This process expanded

rapidly in the 1980s, with the founding of the first opposition party (the Democratic Progressive Party or DPP) in 1986 and the lifting of martial law in 1987. Taiwan held its first direct presidential election in 1996. In 2000, Taiwan underwent its first peaceful transfer of power from the Nationalist Party (Kuomintang or KMT) to the DPP. Throughout this period, the island prospered and became one of East Asia's economic "Tigers." The dominant political issues continue to be management of sensitive relations between Taiwan and China—specifically the question of Taiwan's eventual status—as well as domestic priorities for economic reform and growth.

note: adopted 1930; also the song of the Kuomintang Party; it is informally known as "San Min Chu I" or "San Min Zhu Yi" (Three Principles of the People); because of political pressure from China, "Guo Qi Ge" (National Banner Song) is used at international events rather than the official anthem of Taiwan; the "National Banner Song" has gained popularity in Taiwan and is commonly used during flag raisings

Economy—overview: Taiwan has a dynamic capitalist economy with gradually decreasing government guidance on investment and foreign trade. Exports, led by electronics, machinery, and petrochemicals have provided the primary impetus for economic development. This heavy dependence on exports exposes the economy

to fluctuations in world demand. Taiwan's diplomatic isolation, low birth rate, and rapidly aging population are other major long-term challenges.

Free trade agreements have proliferated in East Asia over the past several years. Following the landmark Economic Cooperation Framework Agreement (ECFA) signed with China in June 2010, Taiwan in July 2013 signed a free trade deal with New Zealand—Taipei's first-ever with a country with which it does not maintain diplomatic relations—and, in November, inked a trade pact with Singapore. However, follow-on components of the ECFA, including a signed agreement on trade in services and negotiations on trade in goods and dispute resolution, have stalled. In early 2014, the government bowed to public demand and proposed a new law governing the oversight of cross-Strait agreements, before any additional deals with China are implemented; the legislature has yet to vote on such legislation, leaving the future of ECFA up in the air as of the conclusion of President MA's second and final term in May 2016. MA portrayed ECFA as Taiwan's key to greater participation in East Asia's free trade networks, and has also expressed interest in Taiwan joining the Trans-Pacific Partnership.

Taiwan's total fertility rate of just over one child per woman is among the lowest in the world, raising the prospect of future labor shortages, falling domestic demand, and declining tax revenues. Taiwan's population is aging quickly, with the number of people over 65 expected to account for nearly 20% of the island's total population by 2025.

The island runs a trade surplus, largely because of its surplus with China, and its foreign reserves are the world's fifth largest, behind those of China, Japan, Saudi Arabia, and Switzerland. In 2006 China overtook the US to become Taiwan's second-largest source of imports after Japan. China is also the island's number one destination for foreign direct investment. Taiwan since 2009 has gradually loosened rules governing Chinese investment on the island and has also secured greater market access for its investors in the mainland. In August 2012, the Taiwan Central Bank signed a memorandum of understanding (MOU) on cross-Strait currency settlement with its Chinese counterpart. The MOU allows for the direct settlement of Chinese Renminbi (RMB) and the New Taiwan Dollar across the Strait, which has helped Taiwan develop into a local RMB hub.

Closer economic links with the mainland bring opportunities for Taiwan's economy but also pose challenges as political differences remain unresolved and China's economic growth is slowing. Domestic economic issues loomed large in public debate ahead of the 16 January 2016 presidential and legislative elections, including concerns

about stagnant wages, high housing prices, youth unemployment, job security, and financial security in retirement.

Military branches: Army, Navy (includes Marine Corps), Air Force, Military Police Command, Armed Forces Reserve Command, Coast Guard Administration (2016)

Military service age and obligation: starting with those born in 1994, males 18–36 years of age may volunteer for military service or must complete 4 months of compulsory military training (or substitute civil service in some cases); women may enlist; women in Air Force service are restricted to noncombat roles; for men born before December 1993, compulsory service (military or civil) is 1 year; for 8 years after discharge, men are subject to training recall four times for periods not to exceed 20 days (2016)

Disputes—international: involved in complex dispute with Brunei, China, Malaysia, the Philippines, and Vietnam over the Spratly Islands, and with China and the Philippines over Scarborough Reef; the 2002 “Declaration on the Conduct of Parties in the South China Sea” has eased tensions but falls short of a legally Binding “code of conduct” desired by several of the disputants; Paracel Islands are occupied by China, but claimed by Taiwan and Vietnam; in 2003, China and Taiwan became more vocal in rejecting both Japan’s claims to the uninhabited islands of the Senkaku-shoto (Diaoyu Tai) and Japan’s unilaterally declared exclusive economic zone in the East China Sea where all parties engage in hydrocarbon prospecting

Illicit drugs: regional transit point for heroin, methamphetamine, and precursor chemicals; transshipment point for drugs to Japan; major problem with domestic consumption of methamphetamine and heroin; rising problems with use of ketamine and club drugs

Background: The Tajik people came under Russian rule in the 1860s and 1870s, but Russia's hold on Central Asia weakened following the Revolution of 1917. Bands of indigenous guerrillas (called "basmachi") fiercely contested Bolshevik control of the area, which was not fully reestablished until 1925. Tajikistan was first created as an autonomous republic within Uzbekistan in 1924, but the USSR designated Tajikistana separate republic in 1929 and transferred to it much of present-day Sughd province. Ethnic Uzbeks form a substantial minority in Tajikistan, and ethnic Tajiks an even larger minority in Uzbekistan. Tajikistan became independent in 1991 following the breakup of the Soviet Union, and experienced a civil war between regional factions from 1992 to 1997. Tajikistan has endured several domestic security incidents since 2010, including armed conflict between government forces and local strongmen in the Rasht Valley and between government forces and criminal groups in gorno-Badakhshan autonomous Oblast. The most recent incidents were a series of attacks on security personnel in September 2015 led by a former high-ranking official in the Ministry of Defense. The country remains the poorest in the former Soviet sphere. Tajikistan became a member of the World Trade Organization in March 2013. However, its economy continues to face major challenges, including dependence on remittances from Tajikistanis working in Russia, pervasive corruption, and the major role narco-trafficking plays in the country's informal economy.

Flag description: three horizontal stripes of red (top), a wider stripe of white, and green; a gold crown surmounted by seven gold, five-pointed stars is located in the center of the white stripe; red represents the sun, victory, and the unity of the nation, white stands for purity, cotton, and mountain snows, while green is the color of Islam and the bounty of nature; the crown symbolizes the Tajik people; the seven stars signify the Tajik magic number “seven”—a symbol of perfection and the embodiment of happiness

National symbol(s): crown surmounted by seven, five-pointed stars; National colors: red, white, green

National anthem: *name:* “Surudi milli” (National Anthem)

lyrics/music: Gulnazar KELDI/Sulaimon YUDAKOV

note: adopted 1991; after the fall of the Soviet Union, Tajikistan kept the music of the anthem from its time as a Soviet republic but adopted new lyrics

Economy—overview: Tajikistan is a poor, mountainous country with an economy dominated by minerals extraction, metals processing, agriculture, and reliance on remittances from citizens working abroad. The 1992–97 civil war severely damaged an already weak economic infrastructure and caused a sharp decline in industrial and agricultural production, and today, Tajikistan has one of the

lowest per capita GDPs among the 15 former Soviet republics. Less than 7% of the land area is arable and cotton is the most important crop. Tajikistan imports approximately 60% of its food. Mineral resources include silver, gold, uranium, antimony, and tungsten. Industry consists mainly of small obsolete factories in food processing and light industry, substantial hydropower facilities, and a large aluminum plant—currently operating well below its capacity. Because of a lack of employment opportunities in Tajikistan, more than one million Tajik citizens work abroad—roughly 90% in Russia—supporting families back home through remittances that have been equivalent to nearly 50% of GDP. Some experts estimate the value of narcotics transiting Tajikistan is equivalent to 30–50% of GDP.

Since the end of the devastating, five-year civil war, the country has pursued half-hearted reforms and privatizations, but the poor business climate remains a hurdle to attracting investment. Tajikistan has sought to develop its substantial hydro electricity potential through partnership with Russian and Iranian investors, and is pursuing completion of the Roghun dam—which, if built according to plan, would be the tallest dam in the world. However, the project will take at least 8 to 11 years to construct and faces financing shortfalls and opposition from downstream Uzbekistan.

Recent slowdowns in the Russian and Chinese economies, low commodity prices, and currency fluctuations are hampering economic growth in Tajikistan. By some estimates, the dollar value of remittances from Russia to Tajikistan dropped by more than 65% in 2015. The government faces challenges financing the public debt, which is equivalent to 35% of GDP, and the National Bank of Tajikistan has aggressively spent down reserves to bolster the weakening somoni, leaving little space for fiscal or monetary measures to counter any additional economic shocks.

third worldwide in seizures of opiates (heroin and raw opium); significant consumer of opiates

Background: Shortly after achieving independence from Britain in the early 1960s, Tanganyika and Zanzibar merged to form the United Republic of Tanzania in 1964. One-party rule ended in 1995 with the first democratic elections held in the country since the 1970s. Zanzibar's semi-autonomous status and popular opposition led to two contentious elections since 1995, which the ruling party won despite international observers' claims of voting irregularities. The formation of a government of National unity between Zanzibar's two leading parties succeeded in minimizing electoral tension in 2010.

Economy—overview: Tanzania is one of the world's poorest economies in terms of per capita income, but has achieved high growth rates based on its vast natural resource wealth and tourism. GDP growth in 2009–15 was an impressive 6–7% per year. Dar es Salaam used fiscal stimulus measures and easier monetary policies to lessen the impact of the global recession. Tanzania has largely completed its transition to a market economy, though the government retains a presence in sectors such as telecommunications, banking, energy, and mining.

The economy depends on agriculture, which accounts for more than one-quarter of GDP, provides 85% of exports, and employs about 80% of the work force; agriculture accounts for 7% of government expenditures. All land in Tanzania is owned by the government, which can lease land for up to 99 years. Proposed reforms to allow for land ownership, particularly foreign land ownership, remain unpopular. The financial sector in Tanzania has expanded in recent years and foreign-owned banks account for about 48% of the banking industry's total assets. Competition among foreign commercial banks has resulted in significant improvements in the efficiency and quality of financial services, though interest rates are still relatively high,

reflecting high fraud risk. Recent banking reforms have helped increase private-sector growth and investment.

The World Bank, the IMF, and bilateral donors have provided funds to rehabilitate Tanzania's aging infrastructure, including rail and port, that provide important trade links for inland countries. In 2013, Tanzania completed the world's largest Millennium Challenge Compact grant, worth \$698 million, and, in December 2014, the Millennium Challenge Corporation selected Tanzania for a second Compact. In late 2014, a highly publicized scandal in the energy sector involving senior Tanzanian officials resulted in international donors freezing nearly \$500 million in direct budget support to the government. The Tanzanian shilling weakened in 2015 because of lower gold prices, election-related political risk, and outflows from emerging market currencies generally.

Disputes—international: dispute with Tanzania over the boundary in Lake Nyasa (Lake Malawi) and the meandering Songwe River; Malawi contends that the entire lake up to the Tanzanian shoreline is its territory, while Tanzania claims the border is in the center of the lake; the conflict was reignited in 2012 when Malawi awarded a license to a British company for oil exploration in the lake

Refugees and internally displaced persons: *refugees (country of origin):* 143,138 (Burundi); 61,090 (Democratic Republic of the Congo) (2016)

Trafficking in persons: *current situation:* Tanzania is a source, transit, and destination country for men, women, and children subjected to forced labor and sex trafficking; the exploitation of young girls in domestic servitude continues to be Tanzania's largest human

trafficking problem; Tanzanian boys are subject to forced labor mainly on farms but also in mines and quarries, in the informal commercial sector, in factories, in the sex trade, and possibly on small fishing boats; Tanzanian children and adults are subjected to domestic servitude, other forms of forced labor, and sex trafficking in other African countries, the Middle East, Europe, and the US; internal trafficking is more prevalent than Transnational trafficking and is usually facilitated by friends, family members, or intermediaries with false offers of education or legitimate jobs; trafficking victims from Burundi, Kenya, South Asia, and Yemen are forced to work in Tanzania's agricultural, mining, and domestic service sectors or may be sex trafficked

tier rating: Tier 2 Watch List—Tanzania does not fully comply with the minimum standards for the

elimination of trafficking; however, it is making significant efforts to do so; in 2014, Tanzania was granted a waiver from an otherwise required downgrade to Tier 3 because its government has a written plan that, if implemented, would constitute making significant efforts to bring itself into compliance with the minimum standards for the elimination of trafficking; the government adopted a three-year National action plan and implementing regulations for the 2008 anti-trafficking law; authorities somewhat increased their number of trafficking investigations and prosecutions and convicted one offender, but the penalty was a fine in lieu of prison, which was inadequate given the severity of the crime; the government did not operate any shelters for victims and relied on NGOs to provide protective services (2015)

Illicit drugs: targeted by traffickers moving hashish, Afghan heroin, and South American cocaine transported down the East African coastline, through airports, or overland through Central Africa; Zanzibar likely used by traffickers for drug smuggling; traffickers in the past have recruited Tanzanian couriers to move drugs through Iran into East Asia

Background: A unified Thai kingdom was established in the mid-14th century. Known as Siam until 1939, Thailand is the only Southeast Asian country never to have been colonized by a European power. A bloodless revolution in 1932 led to the establishment of a constitutional monarchy. In alliance with Japan during World War II, Thailand became a US treaty ally in 1954 after sending troops to Korea and later fighting alongside the US in Vietnam. Thailand since 2005 has experienced several rounds of political turmoil including a military coup in 2006 that ousted then Prime Minister THAKSIN Chinnawat, followed by large-scale street protests by competing political factions in 2008, 2009, and 2010. THAKSIN's youngest sister, YINGLAK Chinnawat, in 2011 led the Puea Thai Party to an electoral win and assumed control of the government. A blanket amnesty bill for individuals involved in street protests, altered at the last minute to include all political crimes—including all convictions against THAKSIN—triggered months of large-scale anti-government protests in Bangkok beginning in November 2013. In early May 2014 YINGLAK was removed from office by the Constitutional Court and in late May 2014 the Royal Thai Army staged a coup against the caretaker government. The head of the Royal Thai Army, Gen. PRAYUT Chan-ocha, was appointed prime minister in August 2014. The interim military government created several interim institutions to promote reform and draft a new constitution. Elections are tentatively set for mid-2017. Thailand has also experienced violence associated with the ethno-Nationalist insurgency in its southern Malay-Muslim majority provinces. Since January 2004, thousands have been killed and wounded in the insurgency.

Flag description: five horizontal bands of red (top), white, blue (double width), white, and red; the red color symbolizes the nation and the blood of life; white represents religion and the purity of Buddhism; blue stands for the monarchy

note: similar to the flag of Costa Rica but with the blue and red colors reversed

National symbol(s): garuda (mythical half-man, half-bird figure), elephant; National colors: red, white, blue

National anthem: *name:* “Phleng Chat Thai” (National Anthem of Thailand)

lyrics/music: Luang SARANUPRAPAN/Phra JENDURIYANG

note: music adopted 1932, lyrics adopted 1939; by law, people are required to stand for the National anthem at 0800 and 1800 every day; the anthem is played in schools, offices, theaters, and on television and radio during this time; “Phleng Sansasoen Phra Barami” (A Salute to the Monarch) serves as the royal anthem and is played in the presence of the royal family and during certain state ceremonies

Economy—overview: With a well-developed infrastructure, a free-enterprise economy, and generally pro-investment policies, Thailand historically has had a strong economy, but it experienced slow growth in 2013–15 as a result of domestic political turmoil and sluggish global demand, which curbed Thailand’s traditionally strong Exports—mostly electronics, agricultural commodities, automobiles and parts, and processed foods. Following the May 2014 coup d’etat, tourism decreased 6–7% but is beginning to recover. The Thaibaht depreciated more than 8% during 2015.

Thailand faces labor shortages, and has attracted an estimated 2–4 million migrant workers from neighboring countries. The Thai Government in 2013 implemented a nationwide 300 baht (roughly \$10) per day minimum wage policy and deployed new tax reforms designed to lower rates on middle-income earners. The household debt to GDP ratio is over 80%.

Disputes—international: separatist violence in Thailand's predominantly Malay-Muslim southern provinces prompt border closures and controls with Malaysia to stem insurgent activities; Southeast Asian states have enhanced border surveillance to check the spread of avian flu; talks continue on completion of demarcation with Laos but disputes remain over several islands in the Mekong River; despite continuing border committee talks, Thailand must deal with Karen and other ethnic rebels, refugees, and illegal cross-border activities; Cambodia and Thailand dispute sections of boundary; in 2011 Thailand and Cambodia resorted to arms in the dispute over the location of the boundary on the precipice surmounted by Preah Vihear temple ruins, awarded to Cambodia by ICJ decision in 1962 and part of a planned UN World Heritage site; Thailand is studying the feasibility of jointly constructing the Hatgyi Dam on the Salween river near the border with Burma; in 2004, international environmentalist pressure prompted China to halt construction of 13 dams on the Salween River that flows through China, Burma, and Thailand; 140,000 mostly Karen refugees fleeing civil strife, political upheaval and economic stagnation in Burma live in remote camps in Thailand near the border

Refugees and internally displaced persons: *refugees (country of origin):* 128,863 (Burma) (2014)

IDPs: 35,000 (resurgence in ethno-Nationalist violence in south of country since 2004) (2015) *stateless persons:* 443,862 (2015); note—about half of Thailand's northern hill tribe people do not have citizenship and make up the bulk of Thailand's stateless population; most lack documentation showing they or one of their parents were born in Thailand; children born to Burmese refugees are not eligible for Burmese or Thai citizenship and are stateless; most Chao Lay, maritime nomadic peoples, who travel from island to island in the Andaman Sea west of Thailand are also stateless; stateless Rohingya refugees from Burma are considered illegal migrants by Thai authorities and are detained in inhumane conditions or expelled; stateless persons are denied access to voting, property, education, employment, healthcare, and driving

note: Thai Nationality was granted to more than 18,000 stateless persons in the last 3 years (2015)

Trafficking in persons: *current situation:* Thailand is a source, transit, and destination country for men, women, and children subjected to forced labor and sex trafficking; victims from Burma, Cambodia, Laos, China, Vietnam, Uzbekistan, and India, migrate to Thailand in search of jobs but are forced, coerced, or defrauded into labor in commercial fishing, fishing-related industries, factories,

domestic work, street begging, or the sex trade; some Thai, Burmese, Cambodian, and Indonesian men forced to work on fishing boats are kept at sea for years; sex trafficking of adults and children from Thailand, Laos, Vietnam, and Burma remains a significant problem; Thailand is a transit country for victims from China, Vietnam, Bangladesh, and Burma subjected to sex trafficking and forced labor in Malaysia, Indonesia, Singapore, Russia, South Korea, the US, and countries in Western Europe; Thai victims are also trafficked in North America, Europe, Africa, Asia, and the Middle East

tier rating: Tier 2 Watch List—Thailand does not fully comply with the minimum standards for the elimination of trafficking, and is not making significant efforts to do so; in 2014, authorities investigated, prosecuted, and convicted fewer traffickers and identified fewer victims; some cases of official complicity were investigated and prosecuted, but trafficking-related corruption continues to hinder progress in combatting trafficking; authorities' efforts to screen for victims among vulnerable populations remained inadequate due to a poor understanding of trafficking indicators, a failure to recognize non-physical forms of coercion, and a shortage of language interpreters; the government passed new labor laws increasing the minimum age in the fishing industry to 18 years old, guaranteeing the minimum wage, and requiring work contracts, but weak law enforcement and poor coordination among regulatory agencies enabled exploitive labor practices to continue; the government increased efforts to raise public awareness to the dangers of human trafficking and to deny entry to foreign sex tourists (2015)

Illicit drugs: a minor producer of opium, heroin, and marijuana; transit point for illicit heroin en route to the international drug market from Burma and Laos; eradication efforts have reduced the area of cannabis cultivation and shifted some production to neighboring countries; opium poppy cultivation has been reduced by eradication efforts; also a drug money-laundering center; minor role in methamphetamine production for regional consumption; major consumer of methamphetamine since the 1990s despite a series of government crackdowns

Background: The Portuguese began to trade with the island of Timor in the early 16th century and colonized it in mid-century. Skirmishing with the Dutch in the region eventually resulted in an 1859 treaty in which Portugal ceded the western portion of the island. Imperial Japan occupied Portuguese Timor from 1942 to 1945, but Portugal resumed colonial authority after the Japanese defeat in World War II. East Timor declared itself independent from Portugal on 28 November 1975 and was invaded and occupied by Indonesian forces nine days later. It was incorporated into Indonesia in July 1976 as the province of Timor Timur (East Timor). An unsuccessful campaign of pacification followed over the next two decades, during which an estimated 100,000 to 250,000 people died. In an August

1999 UN-supervised popular referendum, an overwhelming majority of the people of Timor-Leste voted for independence from Indonesia. However, in the next three weeks, anti-independence Timorese militias—organized and supported by the Indonesian military—commenced a large-scale, scorched-earth campaign of retribution. The militias killed approximately 1,400 Timorese and forced 300,000 people into western Timor as refugees. Most of the country's infrastructure, including homes, irrigation systems, water supply systems, and schools, and nearly all of the country's electrical grid were destroyed. On 20 September 1999, Australian-led peacekeeping troops deployed to the country and brought the violence to an end. On 20 May 2002, Timor-Leste was Internationally recognized as an independent state.

In 2006, internal tensions threatened the new nation's security when a military strike led to violence and a breakdown of law and order. At Dili's request, aNAustralian-led international Stabilization Force (ISF) deployed to Timor-Leste, and the UN Security Council established the UN Integrated Mission in Timor-Leste (UNMIT), which included aNAuthorized police presence of over 1,600 personnel. The ISF and UNM It restored stability, allowing for presidential and parliamentary elections in 2007 in a largely peaceful atmosphere. In February 2008, a rebel group staged an unsuccessful attack against the president and prime minister. The ringleader was killed in the attack, and most of the rebels surrendered in April 2008. Since the attack, the government has enjoyed one of its longest periods of post-independence stability, including successful 2012 elections for both the parliament and president and a successful transition of power in February 2015. In late 2012, the UN Security Council ended its peacekeeping mission in Timor-Leste and both the ISF and UNMIT departed the country.

National anthem: *name:* "Patria" (Fatherland)

lyrics/music: Fransisco Borja DA COSTA/Afonso DE ARAUJO

note: adopted 2002; the song was first used as an anthem when Timor-Leste declared its independence from Portugal in 1975; the lyricist, Fransisco Borja DA COSTA, was killed in the Indonesian invasion just days after independence was declared

Economy—overview: Since gaining independence in 1999, Timor-Leste has faced great challenges in rebuilding its infrastructure, strengthening the civil administration, and generating jobs for young people entering the work force. The development of offshore oil and gas resources has greatly supplemented government revenues. This technology-intensive industry, however, has done little to create jobs in part because there are no production facilities in Timor-Leste. Gas is currently piped to Australia for processing, but Timor-Leste has expressed interest in developing a domestic processing capacity.

In June 2005, the National Parliament unanimously approved the creation of the Timor-Leste Petroleum Fund to serve as a repository for all petroleum revenues and to preserve the value of Timor-Leste's petroleum wealth for future generations. The Fund held assets of \$16.5 billion, as of December 2014. Oil accounts for 90% of government revenues, and the drop in the price of oil in 2014 has led to concerns about the long-term sustainability of government spending. The Ministry of Finance maintains that the Petroleum Fund is sufficient to sustain government operations for the foreseeable future.

Annual government budget expenditures increased markedly between 2009 and 2012 but dropped significantly in 2013–15. Historically, the government failed to spend as much as its budget allowed. The government has focused significant resources on basic infrastructure, including electricity and roads. Limited experience in procurement and infrastructure building has hampered these projects. The

underlying economic policy challenge the country faces remains how best to use oil-and-gas wealth to lift the non-oil economy onto a higher growth path and to reduce poverty.

Disputes—international: three stretches of land borders with Timor-Leste have yet to be delimited, two of which are in the Oecussi exclave area, and no maritime or Economic Exclusion Zone boundaries have been established between the countries; maritime boundaries with Indonesia remain unresolved; in 2007, Australia and Timor-Leste signed a 50-year development zone and revenue sharing agreement in lieu of a maritime boundary

Trafficking in persons: *current situation:* Timor Leste is a source and destination country for men, women, and children

subjected to forced labor and sex trafficking; Timorese women and girls from rural areas are lured to the capital with promises of legitimate jobs or education prospects and are then forced into prostitution or domestic servitude, and other women and girls may be sent to Indonesia for domestic servitude; Timorese family members force children into bonded domestic or agricultural labor to repay debts; foreign migrant women are vulnerable to sex trafficking in Timor Leste, while men and boys from Burma, Cambodia, and Thailand are forced to work on fishing boats in Timorese waters under inhumane conditions

tier rating: Tier 2 Watch List—Timor Leste does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; in 2014, legislation was drafted but not finalized or implemented that outlines procedures for screening potential trafficking victims; law enforcement made modest progress, including one conviction for sex trafficking, but efforts are hindered by prosecutors' and judges' lack of expertise in applying anti-trafficking laws effectively; the government rescued two child victims with support from an NGO but did not provide protective services (2015)

Illicit drugs: NA

Background: French Togoland became Togo in 1960. Gen. Gnassingbe EYADEMA, installed as military ruler in 1967, ruled Togo with a heavy hand for almost four decades. Despite the facade of multi-party elections instituted in the early 1990s, the government was largely dominated by President EYADEMA, whose Rally of the Togolese People (RPT) party has been in power almost continually since 1967 and its successor, the Union for the Republic, maintains a majority of seats in today's legislature. Upon EYADEMA's death in February 2005, the military installed the president's son, Faure GNASSINGBE, and then engineered his formal election two months later. Democratic gains since then allowed Togo to hold its first relatively free and fair legislative elections in October 2007. After years of political unrest and condemnation from international organizations for human rights abuses, Togo is finally being re-welcomed into the international community.

Economy—overview: This small, sub-Saharan economy depends heavily on both commercial and subsistence agriculture, which provides employment for a significant share of the labor force. Some basic foodstuffs must still be imported. Cocoa, coffee, and cotton generate about 40% of export earnings with cotton being the most important cash crop. Togo is among the world’s largest producers of phosphate and seeks to develop its carbon ate phosphate reserves.

The government’s decade-long effort, supported by the World Bank and the IMF, to implement economic reform measures, encourage

foreign investment, and bring revenues in line with expenditures has moved slowly. Togo completed its IMF Extended Credit Facility in 2011 and reached a Heavily Indebted Poor Country debt relief completion point in 2010 at which 95% of the country's debt was forgiven. Togo continues to work with the IMF on structural reforms. Progress depends on follow through on privatization, increased openness in government financial operations, progress toward legislative elections, and continued support from foreign donors.

Togo's 2015 economic growth remained steady at 5.4%, largely driven by infusions of foreign aid, infrastructure investment in the port and mineral sectors, and improvements in the business climate. Foreign direct investment inflows have slowed in recent years.

Background: Originally settled by Polynesian emigrants from surrounding island groups, the Tokelau Islands were made a British protectorate in 1889. They were transferred to New Zealand administration in 1925. Referenda held in 2006 and 2007 to change the status of the islands from that of a New Zealand territory to one of free association with New Zealand did not meet the needed threshold for approval.

Flag description: a yellow stylized Tokelauan canoe on a dark blue field sails toward the manu—the Southern Cross constellation of four, white, five-pointed stars at the hoist side; the Southern Cross represents the role of Christianity in Tokelauan culture and, in conjunction with the canoe, symbolizes the country navigating into the future; the color yellow indicates happiness and peace, and the blue field represents the ocean on which the community relies

National symbol(s): tuluma (fishing tackle box); National colors: blue, yellow, white

National anthem: *name:* “Te Atua” (For the Almighty)

lyrics/music: unknown/Falani KALOLO

note: adopted 2008; in preparation for eventual self governance, Tokelau held a National contest to choose an anthem; as a territory of New Zealand, “God Defend New Zealand” and “God Save the Queen” are official (see New Zealand)

Economy—overview: Tokelau’s small size (three villages), isolation, and lack of resources greatly restrain economic development and confine agriculture to the subsistence level. The principal sources of revenue come from sales of copra, postage stamps, souvenir coins, and handicrafts. Money is also remitted to families from relatives in New Zealand. The people rely heavily on aid from New Zealand—about \$15 million annually in FY12/13 and FY13/14—to maintain public services. New Zealand’s support amounts to 80% of Tokelau’s recurrent government budget. An international trust fund, currently worth nearly \$32 million, was established in 2004 by New Zealand to provide Tokelau an independent source of revenue.

Economy—overview: Tonga has a small, open, island economy and is the last constitutional monarchy among the Pacific Island countries. It has a narrow export base in agricultural goods. Squash, vanilla beans, and yams are the main crops. Agricultural exports, including fish, make up two-thirds of total exports. Tourism is the second-largest source of hard currency earnings following remittances. Tonga had 45,000 visitors in 2013. The country must import a high proportion of its food, mainly from New Zealand. The

country remains dependent on external aid and remittances from overseas Tongans to offset its trade deficit. The government is emphasizing the development of the private sector, encouraging investment, and is committing increased funds for healthcare and education. Tonga's English-speaking and educated workforce offer a viable labor market, and the tropical climate provides fertile soil. Renewable energy and deep sea mining also offer opportunities for investment.

Tonga has a reasonably sound basic infrastructure and well developed social services. The government faces high unemployment among the young, moderate inflation, pressures for democratic reform, and rising civil service expenditures.

Background: First colonized by the Spanish, the islands came under British control in the early 19th century. The islands' sugar industry was hurt by the emancipation of the slaves in 1834. Manpower was replaced with the importation of contract laborers from India between 1845 and 1917, which boosted sugar production as well as the cocoa industry. The discovery of oil on Trinidad in 1910 added another important export. Independence was attained in 1962. The country is one of the most prosperous in the Caribbean thanks largely to petroleum and Natural gas production and processing. Tourism, mostly in Tobago, is targeted for expansion and is growing. The government is coping with a rise in violent crime.

Economy—overview: Trinidad and Tobago attracts considerable foreign direct investment, particularly in energy, and has one of the highest per capita incomes in Latin America and the Caribbean. Trinidad and Tobago is the leading Caribbean producer of oil and gas, and its economy is heavily dependent upon these resources. It also supplies manufactured goods, notably food products and beverages, as well as cement to the Caribbean region. Oil and gas account for about 40% of GDP and 80% of exports but only 5% of employment. Growth has been fueled by investments in liquefied Natural gas, petrochemicals, and steel with additional upstream and downstream investment planned. Oil production has declined over the last decade as the country focused the majority of its efforts on Natural gas. Economic growth between 2000 and 2007 averaged slightly over 8% per year, significantly above the regional average of about 3.7% for that same period; however, GDP slowed down since then and contracted during 2009–12 due to depressed Natural gas prices and changing markets. The current administration has been working to arrest this decline by opening bid rounds and providing fiscal incentives for investments in onshore and deep water acreage to boost oil reserves and production. The government keeps a close watch on the changing global gas markets and has shown flexibility in diversifying Natural gas export destinations. The economy benefits from a growing trade surplus with the US, Trinidad and Tobago's leading trade partner.

Although Trinidad and Tobago enjoys cheap electricity from Natural gas, the renewable energy sector has recently garnered increased interest. The country is also a regional financial center with a well-regulated and stable financial system. Other sectors the Government of Trinidad and Tobago has targeted for increased investment and

projected growth include tourism, agriculture, information and communications technology, and shipping.

The previous MANNING administration benefited from fiscal surpluses fueled by the dynamic export sector; however, declines in oil and gas prices have reduced government revenues, challenging the current government's commitment to maintaining high levels of public investment. Crime and bureaucratic hurdles continue to be the biggest deterrents for attracting more foreign direct investment and business.

Disputes—international: Barbados and Trinidad and Tobago abide by the April 2006 Permanent Court of Arbitration decision delimiting a maritime boundary and limiting catches of flying fish in Trinidad and Tobago's EEZ; in 2005, Barbados and Trinidad and Tobago agreed to compulsory international arbitration under UN Convention on the Law of the Sea challenging whether the northern limit of Trinidad and Tobago's and Venezuela's maritime boundary extends into Barbadian waters; Guyana has expressed its intention to include itself in the arbitration, as the Trinidad and Tobago-Venezuela maritime boundary may also extend into its waters

Trafficking in persons: *current situation:* Trinidad and Tobago is a destination, transit, and possible source country for adults and children subjected to sex trafficking and forced labor; women and girls from Venezuela, the Dominican Republic, Guyana, and Colombia have been subjected to sex trafficking in Trinidad and Tobago's brothels and clubs; some economic migrants from the Caribbean region and Asia are vulnerable to forced labor in domestic service and the retail sector; the steady flow of vessels transiting Trinidad and Tobago's territorial waters may also increase opportunities for forced labor for fishing; international crime organizations are increasingly involved in trafficking, and boys are coerced to sell drugs and guns; corruption among police and immigration officials impedes anti-trafficking efforts

tier rating: Tier 2 Watch List—Trinidad and Tobago does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; anti-trafficking law enforcement efforts decreased from the initiation of 12 prosecutions in 2013 to 1 in 2014; the government has yet to convict anyone under its 2011 anti-trafficking law, and all prosecutions from previous years remain pending; the government sustained efforts to identify victims and to refer them for care at NGO facilities, which it provided with funding; the government failed to draft a National action plan as mandated under the 2011 anti-trafficking law and did not launch a sufficiently robust awareness campaign to educate the public and officials (2015)

Illicit drugs: transshipment point for South American drugs destined for the US and Europe; producer of cannabis

Background: Rivalry between French and Italian interests in

Tunisia culminated in a French invasion in 1881 and the creation of a protectorate. Agitation for independence in the decades following World War I was finally successful in convincing the French to recognize Tunisia as an independent state in 1956. The country's first president, Habib BOURGUIBA, established a strict one-party state. He dominated the country for 31 years, repressing Islamic fundamentalism and establishing rights for women unmatched by any other Arab nation. In November 1987, BOURGUIBA was removed from office and replaced by Zine el Abidine BENALI in a bloodless coup. Street protests that began in Tunis in December 2010 over high unemployment, corruption, widespread poverty, and high food prices escalated in January 2011, culminating in rioting that led to hundreds of deaths. On 14 January 2011, the same day BENALI dismissed the government, he fled the country, and by late January 2011, a "National unity government" was formed. Elections for the new Constituent Assembly were held in late October 2011, and in December, it elected human rights activist Moncef MARZOUKI as interim president. The Assembly began drafting a new constitution in February 2012 and, after several iterations and a months-long political crisis that stalled the transition, ratified the document in January 2014. Parliamentary and presidential elections for a permanent government were held at the end of 2014. Beji CAID ESSEBSI was elected as the first president under the country's new constitution.

Economy—overview: Tunisia's diverse, market-oriented economy has long been cited as a success story in Africa and the Middle East, but it faces an array of challenges following the 2011 Arab Spring revolution. Following an ill-fated experiment with socialist economic policies in the 1960s, Tunisia embarked on a successful strategy focused on bolstering exports, foreign investment, and tourism, all of which have become central to the country's economy. Key exports now include textiles and apparel, food products, petroleum Products, chemicals, and phosphates, with about 80% of exports bound for Tunisia's main economic partner, the EU. Tunisia's liberal strategy, coupled with investments in education and infrastructure, fueled decades of 4–5% annual GDP growth and improving living standards. Former President Zine el Abidine BENALI

(1987–2011) continued these policies, but as his reign wore on cronyism and corruption stymied economic performance and unemployment rose among the country's growing ranks of university graduates. These grievances contributed to the January 2011 overthrow of BENALI, sending Tunisia's economy into a tailspin as tourism and investment declined sharply.

Since its establishment in late 2014, Tunisia's new government has faced challenges reassuring businesses and investors, bringing budget and current account deficits under control, shoring up the country's financial system, lowering high unemployment, and reducing economic disparities between the more developed coastal region and the impoverished interior. In 2015, successive terrorist attacks against the tourism sector and worker strikes in the phosphate sector, which combined account for nearly 15% of GDP, slowed growth to less than 1% of GDP.

Trafficking in persons: *current situation:* Tunisia is a source, destination, and possible transit country for men, women, and children subjected to forced labor and sex trafficking; Tunisia's increased number of street children, rural children working to support their families, and migrants who have fled unrest in neighboring

countries are vulnerable to human trafficking; organized gangs force street children to serve as thieves, beggars, and drug transporters; Tunisian women have been forced into prostitution domestically and elsewhere in the region under false promises of legitimate work; East and West African women may be subjected to forced labor as domestic workers

tier rating: Tier 2 Watch List—Tunisia does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; in 2014, Tunisia was granted a waiver from an otherwise required downgrade to Tier 3 because its government has a written plan that, if implemented would constitute making significant efforts to bring itself into compliance with the minimum standards for the elimination of trafficking; in early 2015, the government drafted a National anti-trafficking action plan outlining proposals to raise awareness and enact draft anti-trafficking legislation; authorities did not provide data on the prosecution and conviction of offenders but reportedly identified 24 victims, as opposed to none in 2013, and operated facilities specifically dedicated to trafficking victims, regardless of Nationality and gender; the government did not fully implement its National victim referral mechanism; some unidentified victims were not protected from punishment for unlawful acts directly resulting from being trafficked (2015)

Background: Modern Turkey was founded in 1923 from the

Anatolian remnants of the defeated Ottoman Empire by National hero Mustafa KEMAL, who was later honored with the title Atatürk or “Father of the Turks.” Under his leadership, the country adopted wide-ranging social, legal, and political reforms. After a period of one-party rule, an experiment with multi-party politics led to the 1950 election victory of the opposition Democratic Party and the peaceful transfer of power. Since then, Turkish political parties have multiplied, but democracy has been fractured by periods of instability and intermittent military coups (1960, 1971, 1980), which in each case eventually resulted in a return of political power to civilians. In 1997, the military again helped engineer the ouster—popularly dubbed a “post-modern coup”—of the then Islamic-oriented government. Turkey intervened militarily on Cyprus in 1974 to prevent a Greek takeover of the island and has since acted as patron state to the “Turkish Republic of Northern Cyprus,” which only Turkey recognizes. A separatist insurgency begun in 1984 by the Kurdistan Workers’ Party (PKK)—now known as the Kurdistan People’s Congress or Kongra-Gel (KGK)—dominated the Turkish military’s attention and claimed more than 30,000 lives. After the capture of the group’s leader in 1999, the insurgents largely withdrew from Turkey mainly to northern Iraq. In 2013, the PKK and the Turkish Government agreed to a cease-fire, but fighting resumed in 2015. Turkey joined the UN in 1945 and in 1952 it became a member of NATO. In 1963, Turkey became an associate member of the European Community; it began accession membership talks with the EU in 2005. Over the past decade, economic reforms have contributed to a quickly growing economy.

Economy—overview: Turkey’s largely free-market economy is increasingly driven by its industry and service sectors, although its traditional agriculture sector still accounts for about 25% of employment. ANAgressive privatization program has reduced state involvement in basic industry, banking, transport, and communication. An emerging cadre of middle-class entrepreneurs is adding dynamism to the economy and expanding production beyond the traditional textiles and clothing sectors. The automotive, petrochemical, and electronics industries are rising in importance and have surpassed textiles within Turkey’s export mix. Oil began to flow through the Baku-Tbilisi-Ceyhan pipeline in May 2006, marking a major milestone that has brought up to 1 million barrels per day from the Caspian region to market. The joint Turkish-Azeri Trans Anatolian Natural Gas Pipeline (TANAP) is moving forward to help transport Caspian gas to Europe through Turkey, helping to address Turkey’s dependence on imported gas, which currently meets 98% of its energy needs.

After Turkey experienced a severe financial crisis in 2001, Ankara adopted financial and fiscal reforms as part of an IMF program. The reforms strengthened the country’s economic fundamentals and ushered in an era of strong growth averaging more than 6% annually until 2008. Global economic conditions and tighter fiscal policy

caused GDP to contract in 2009, but Turkey's well-regulated financial markets and banking system helped the country weather the global financial crisis, and GDP rebounded strongly to around 9% in 2010–11, as exports returned to normal levels following the crisis. Two rating agencies upgraded Turkey's debt to investment grade in 2012 and 2013, and Turkey's public sector debt to GDP ratio fell to 33% in 2014.

The stock value of Foreign Direct Investment reached nearly \$195 billion at year end 2014. Despite these positive trends, GDP growth dropped to 4.4% in 2013 and 2.9% in 2014. Growth slowed considerably in the last quarter of 2014, largely due to lackluster consumer demand both domestically and in Europe, Turkey's most important export market. High interest rates have also contributed to the slowdown in growth, as Turkey sharply increased interest rates in January 2014 in order to strengthen the country's currency and reduce inflation. Turkey then cut rates in February 2015 in a bid to spur economic growth.

The Turkish economy retains significant weaknesses. Specifically, Turkey's relatively high current account deficit, uncertain commitment to structural reform, and turmoil within Turkey's neighborhood leave the economy vulnerable to destabilizing shifts in investor confidence. Turkey also remains overly dependent on often volatile, short-term investment to finance its large current account deficit.

Military—note: the ruling Justice and Development Party (AKP) has actively pursued the goal of asserting civilian control over the military since first taking power in 2002; the Turkish Armed Forces (TSK) role in internal security has been significantly reduced; the TSK leadership continues to be an influential institution within Turkey, but plays a much smaller role in politics; the Turkish military remains focused on the threats emanating from the Syrian civil war, Russia's actions in Ukraine, and the PKK insurgency; primary domestic threats are listed as fundamentalism (with the definition in some dispute with

the civilian government), separatism (Kurdish discontent), and the extreme left wing; Ankara strongly opposed establishment of an Autonomous Kurdish region in Iraq; an overhaul of the Turkish Land Forces Command (TLFC) taking place under the “Force 2014” program is to produce 20–30% smaller, more highly trained forces characterized by greater mobility and firepower and capable of joint and combined operations; the TLFC has taken on increasing international peacekeeping responsibilities including in Afghanistan; the Turkish Navy is a regional Naval power that wants to develop the capability to project power beyond Turkey’s coastal waters; the Navy is heavily involved in NATO, multinational, and UN operations; its roles include control of territorial waters and security for sea lines of communications; the Turkish Air Force adopted an “Aerospace and Missile Defense Concept” in 2002 and has initiated project work on an integrated missile defense system; Air Force priorities include attaining a modern deployable, survivable, and sustainable force structure, and establishing a sustainable command and control system; Turkey is a NATO ally and hosts NATO’s Land Forces Command in Izmir, as well as the AN/TPY-2 radar as part of NATO Missile Defense (2014)

Disputes—international: complex maritime, air, and territorial disputes with Greece in the Aegean Sea; status of north Cyprus question remains; Syria and Iraq protest Turkish hydrological projects to control upper Euphrates waters; Turkey has expressed concern over the status of Kurds in Iraq; in 2009, Swiss mediators facilitated an accord reestablishing diplomatic ties between Armenia and Turkey, but neither side has ratified the agreement and the rapprochement effort has faltered; Turkish authorities have complained that blasting from quarries in Armenia might be damaging the medieval ruins of Ani, on the other side of the Arpacay valley

Refugees and internally displaced persons: *refugees (country of origin):* at least 103,000 (Iraq) (2014); 2,733,044 (Syria) (2016)

IDPs: 954,000 (displaced from 1984–2005 because of fighting between the Kurdish PKK and Turkish military; most IDPs are Kurds from eastern and southeastern provinces; no information available on persons displaced by development projects) (2015)

stateless persons: 780 (2015)

Illicit drugs: key transit route for Southwest Asian heroin to Western Europe and, to a lesser extent, the US—via air, land, and sea routes; major Turkish and other international trafficking organizations

operate out of Istanbul; laboratories to convert imported morphine base into heroin exist in remote regions of Turkey and near Istanbul; government maintains strict controls over areas of legal opium poppy cultivation and over output of poppy straw concentrate; lax enforcement of money-laundering controls

Background: Present-day Turkmenistan covers territory that has been at the crossroads of civilizations for centuries. The area was ruled in antiquity by various Persian empires, and was conquered by Alexander the Great, Muslim armies, the Mongols, Turkic warriors, and eventually the Russians. In medieval times, Merv (located in present-day Mary province) was one of the great cities of the Islamic world and an important stop on the Silk Road. Annexed by Russia in

the late 1800s, Turkmenistan later figured prominently in the anti-Bolshevik movement in Central Asia. In 1924, Turkmenistan became a Soviet republic; it achieved independence upon the dissolution of the USSR in 1991. Extensive hydrocarbon/Natural gas reserves, which have yet to be fully exploited, have begun to transform the country. The Government of Turkmenistan is moving to expand its extraction and delivery projects and has attempted to diversify its gas export routes beyond Russia's pipeline network. In 2010, new gas export pipelines that carry Turkmen gas to China and to northern Iran began operating, effectively ending the Russian monopoly on Turkmen gas exports. Subsequently, decreased Russian purchases, as well as limited purchases by Iran, have made China the dominant buyer of Turkmen gas. President for Life Saparmurat NYYAZOW died in December 2006, and Turkmenistan held its first multi-candidate presidential election in February 2007. Gurbanguly BERDIMUHAMEDOW, a deputy cabinet chairman under NYYAZOW, emerged as the country's new president; he was reelected in February 2012 with 97% of the vote, in an election widely regarded as "a democratic sham."

Flag description: green field with a vertical red stripe near the hoist side, containing five tribal guls (designs used in producing carpets) stacked above two crossed olive branches; five white stars and a white crescent moon appear in the upper corner of the field just to the fly side of the red stripe; the green color and crescent moon represent Islam; the five stars symbolize the regions or welayats of Turkmenistan; the guls reflect the National identity of Turkmenistan where carpet-making has long been a part of traditional nomadic life

note: the flag of Turkmenistan is the most intricate of all National flags

National symbol(s): Akhal-Teke horse; National colors: green, white

National anthem: *name:* “Garassyz, Bitarap Turkmenistanyň” (Independent, Neutral, Turkmenistan State Anthem)

lyrics/music: collective/Veli MUKHATOV

note: adopted 1997, lyrics revised 2008; following the death of President Saparmurat NYYAZOW, the lyrics were altered to eliminate references to him

Economy—overview: Turkmenistan is largely a desert country with intensive agriculture in irrigated oases and significant Natural gas and oil resources. The two largest crops are cotton, most of which is produced for export, and wheat, which is domestically consumed. Although agriculture accounts for roughly 14% of GDP, it continues to employ nearly half of the country’s workforce. Hydrocarbon exports (mainly Natural gas) make up 31% of Turkmenistan’s GDP, with 60% of gas exports going to China and the remainder to Russia and Iran. Ashgabat has explored two initiatives to bring gas to new markets: a trans-Caspian pipeline that would carry gas to Europe and the Turkmenistan-Afghanistan-Pakistan-India gas pipeline. Both face major financing and security hurdles and are unlikely to be completed soon.

Turkmenistan's autocratic governments under presidents NIYAZOW (1991–2006) and BERDIMUHAMEDOW (since 2007) have made little progress improving the business climate, privatizing state-owned industries, and combatting corruption, limiting economic development outside the energy sector. High energy prices in the mid-2000s allowed the government to undertake extensive development and social spending, including providing heavy utility subsidies.

Low energy prices since mid-2014 are hampering Turkmenistan's economic growth and reducing government revenues. The government has cut subsidies in several areas, and wage arrears have increased. In January 2014, the Central Bank of Turkmenistan devalued the manat by 19%, and downward pressure on the currency continues. Turkmenistan continues to report GDP growth of nearly 10% per year and claims substantial foreign currency reserves, but non-transparent data limit international institutions' ability to verify this information.

Telephone system: *general assessment:* telecommunications network remains underdeveloped and progress toward improvement is slow; strict government control and censorship inhibits liberalization and modernization

domestic: Turkmentelekom, in cooperation with foreign partners, has installed high-speed fiber-optic lines and has upgraded most of the country's telephone exchanges and switching centers with new digital technology; combined fixed-line and mobile teledensity is about 80 per 100 persons; Russia's Mobile Telesystems, the only foreign mobile-cellular service provider in Turkmenistan, had its operating license suspended in December 2010 but was able to resume operations in September 2012; Turkmenistan's first telecommunication satellite was launched in 2015; it is expected to greatly improve connectivity in the country

international: country code—993; linked by fiber-optic cable and microwave radio relay to other CIS republics and to other countries by leased connections to the Moscow international gateway switch; an exchange in Ashgabat switches international traffic through Turkey via Intelsat; satellite earth stations—1 Orbita and 1 Intelsat (2012)

Broadcast media: broadcast media is government controlled and censored; 7 state-owned TV and 4 state-owned radio networks; satellite dishes and programming provide an alternative to the state-run media; officials sometimes limit access to satellite TV by removing satellite dishes (2007)

Disputes—international: cotton monoculture in Uzbekistan and Turkmenistan creates water-sharing difficulties for Amu Darya river states; field demarcation of the boundaries with Kazakhstan commenced in 2005, but Caspian seabed delimitation remains stalled with Azerbaijan, Iran, and Kazakhstan due to Turkmenistan's indecision over how to allocate the sea's waters and seabed; bilateral talks continue with Azerbaijan on dividing the seabed and contested oilfields in the middle of the Caspian

Refugees and internally displaced persons: *stateless persons:* 7,125 (2015)

Trafficking in persons: *current situation:* Turkmenistan is a source country for men, women, and children subjected to forced labor and sex trafficking; Turkmen who migrate abroad are forced to work in the textile, agriculture, construction, and domestic service industries, while women and girls may also be sex trafficked; in 2014, men surpassed women as victims; Turkey and Russia are primary trafficking destinations, followed by the Middle East, South and Central Asia, and other parts of Europe; Turkmen also experience forced labor domestically in the informal construction industry; participation in the cotton harvest is still mandatory for some public sector employees

tier rating: Tier 2 Watch List—Turkmenistan does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; in 2014, Turkmenistan was granted a waiver from an otherwise required downgrade to Tier 3 because its government has a written plan that, if implemented, would constitute making significant efforts to bring itself into compliance with the minimum standards for the elimination of trafficking; the government made some progress in its law enforcement efforts in 2014, convicting more offenders than in 2013; authorities did not make adequate efforts to identify and protect victims and did not fund international organizations or NGOs that offered protective services; some victims were punished for crimes as a result of being trafficked (2015)

Illicit drugs: transit country for Afghan narcotics bound for Russian and Western European markets; transit point for heroin precursor chemicals bound for Afghanistan

Background: The islands were part of the UK's Jamaican colony until 1962, when they assumed the status of a separate crown colony upon Jamaica's independence. The governor of The Bahamas oversaw affairs from 1965 to 1973. With Bahamian independence, the islands received a separate governor in 1973. Although independence was agreed upon for 1982, the policy was reversed and the islands remain a British overseas territory.

Background: In 1974, ethnic differences within the British colony of the Gilbert and Ellice Islands caused the Polynesians of the Ellice Islands to vote for separation from the Micronesians of the Gilbert Islands. The following year, the Ellice Islands became the separate British colony of Tuvalu. Independence was granted in 1978. In 2000, Tuvalu negotiated a contract leasing its Internet domain name “.tv” for \$50 million in royalties over a 12-year period. The agreement was subsequently renegotiated but details were not disclosed.

Environment—current issues: since there are no streams or rivers and groundwater is not potable, most water needs must be met by catchment systems with storage facilities; beachhead erosion because of the use of sand for building materials; excessive clearance of forest undergrowth for use as fuel; damage to coral reefs from increasing ocean temperatures and acidification; Tuvalu is concerned about global increases in greenhouse gas emissions and their effect on rising sea levels, which threaten the country's underground water table; in 2000, the government appealed to Australia and New Zealand to take in Tuvaluans if rising sea levels should make evacuation necessary

Economy—overview: Tuvalu consists of a densely populated, scattered group of nine coral atolls with poor soil. Only eight of the atolls are inhabited. It is one of the smallest countries in the world, with its highest point at 4.6 meters above sea level.

The country is isolated, almost entirely dependent on imports, particularly of food and fuel, and vulnerable to climate change and rising sea levels, which pose significant challenges to development. The public sector dominates economic activity. Tuvalu has few Natural resources, except for its fisheries. Earnings from fish exports and fishing licenses for Tuvalu's territorial waters are a significant source of government revenue. In 2013, revenue from fishing licenses doubled and totaled more than 45% of GDP. Official aid from foreign development partners has also increased. Tuvalu has substantial assets abroad. The Tuvalu Trust Fund, an international trust fund established in 1987 by development partners, has grown to \$141 million in 2013 and is an important cushion for meeting shortfalls in the government's budget. While remittances are another substantial source of income, the value of remittances has declined since the 2008–2009 global financial crisis. Growing income inequality is one of many concerns for the nation.

Background: The colonial boundaries created by Britain to delimit Uganda grouped together a wide range of Ethnic groups with different political systems and cultures. These differences complicated the establishment of a working political community after independence was achieved in 1962. The dictatorial regime of Idi AMIN (1971–79) was responsible for the deaths of some 300,000 opponents; guerrilla war and human rights abuses under Milton OBOTE (1980–85) claimed at least another 100,000 lives. The rule of Yoweri MUSEVENI since 1986 has brought relative stability and economic growth to Uganda. A constitutional referendum in 2005 cancelled a 19-year ban on multi-party politics and lifted presidential term limits.

Economy—overview: Uganda has substantial Natural resources, including fertile soils, regular rainfall, small deposits of copper, gold, and other minerals, and recently discovered oil. Agriculture is the most important sector of the economy, employing one third of the work force. Coffee accounts for the bulk of export revenues. Uganda's economy remains predominantly agricultural with a small industrial sector that is dependent on imported inputs like oil and equipment. Overall productivity is hampered by a number of supply-side constraints, including underinvestment in an agricultural sector that continues to rely on rudimentary technology. Industrial growth is impeded by high-costs due to poor infrastructure, low levels of private investment, and the depreciation of the Ugandan shilling.

Since 1986, the government—with the support of foreign countries and international agencies—has acted to rehabilitate and stabilize the economy by undertaking currency reform, raising producer prices on export crops, increasing prices of petroleum Products, and improving civil service wages. The policy changes are especially aimed at dampening inflation while encouraging foreign investment to boost production and export earnings. Since 1990 economic reforms ushered in an era of solid economic growth based on continued investment in infrastructure, improved incentives for production and exports, lower inflation, better domestic security, and the return of exiled Indian-Ugandan entrepreneurs. The global economic downturn in 2008 hurt Uganda's exports; however, Uganda's GDP growth has largely recovered due to past reforms and a rapidly growing urban consumer population. Oil revenues and taxes are expected to become a larger source of government funding as production starts in the next five to 10 years. However, lower oil prices since 2014 and protracted negotiations and legal disputes between the Ugandan government and oil companies may prove a stumbling block to further exploration and development.

Uganda faces many challenges. Instability in South Sudan has led to a sharp increase in Sudanese refugees and is disrupting Uganda's main export market. High energy costs, inadequate transportation and energy infrastructure, insufficient budgetary discipline, and corruption inhibit economic development and investor confidence. During 2015 the Uganda shilling depreciated 22% against the dollar, and inflation rose from 3% to 9%, which led to the Bank of Uganda hiking interest rates from 11% to 17%. As a result, inflation remained below double digits; however, trade and capital-intensive industries were negatively impacted.

The budget for FY2015/16 is dominated by energy and road

infrastructure spending, while relying on donor support for long-term economic drivers of growth, including agriculture, health, and education. The largest infrastructure projects are externally financed through low-interest concessional loans. As a result, debt servicing for these loans is expected to rise in 2016/2017 by 22% and consume 15% the domestic budget.

Background: Ukraine was the center of the first eastern Slavic state, Kyivan Rus, which during the 10th and 11th centuries was the largest and most powerful state in Europe. Weakened by internecine quarrels and Mongol invasions, Kyivan Rus was incorporated into the Grand Duchy of Lithuania and eventually into the Polish-Lithuanian Commonwealth. The cultural and religious legacy of Kyivan Rus laid the foundation for Ukrainian Nationalism through subsequent centuries. A new Ukrainian state, the Cossack Hetmanate, was established during the mid-17th century after an uprising against the Poles. Despite continuous Muscovite pressure, the Hetmanate managed to remain autonomous for well over 100 years. During the latter part of the 18th century, most Ukrainian ethnographic territory was absorbed by the Russian Empire. Following the collapse of czarist Russia in 1917, Ukraine achieved a short-lived period of independence (1917–20), but was reconquered and endured a brutal Soviet rule that engineered two forced famines (1921–22 and 1932–33) in which over 8 million died. In World War II, German and Soviet armies were responsible for 7 to 8 million more deaths. Although Ukraine achieved final independence in 1991 with the dissolution of the USSR, democracy and prosperity remained elusive as the legacy of state control and endemic corruption stalled efforts at economic reform, privatization, and civil liberties.

A peaceful mass protest referred to as the “Orange Revolution” in the closing months of 2004 forced the authorities to overturn a rigged presidential election and to allow a new Internationally monitored vote that swept into power a reformist slate under Viktor YUSHCHENKO. Subsequent internal squabbles in the YUSHCHENKO camp allowed his rival Viktor YANUKOVYCH to stage a comeback in parliamentary (Rada) elections, become prime minister in August 2006, and be elected president in February 2010. In October 2012,

Ukraine held Rada elections, widely criticized by Western observers as flawed due to use of government resources to favor ruling party candidates, interference with media access, and harassment of opposition candidates. President YANUKOVYCH's backtracking on a trade and cooperation agreement with the EU in November 2013—in favor of closer economic ties with Russia—and subsequent use of force against civil society activists in favor of the agreement led to a three-month protest occupation of Kyiv's central square. The government's use of violence to break up the protest camp in February 2014 led to all out pitched battles, scores of deaths, international condemnation, and the president's abrupt departure to Russia. New elections in the spring allowed pro-West president Petro POROSHENKO to assume office on 7 June 2014.

Shortly after YANUKOVYCH's departure in late February 2014, Russian President PUTIN ordered the invasion of Ukraine's Crimean Peninsula claiming the action was to protect ethnic Russians living there. Two weeks later, a "referendum" was held regarding the integration of Crimea into the Russian Federation. The "referendum" was condemned as illegitimate by the Ukrainian Government, the EU, the US, and the UN General Assembly (UNGA). Although Russia illegally annexed Crimea after the "referendum," the Ukrainian government, backed by UNGA resolution 68/262, asserts that Crimea remains part of Ukraine and fully under Ukrainian sovereignty. Russia also continues to supply separatists in two of Ukraine's eastern provinces with manpower, funding, and materiel resulting in an armed conflict with the Ukrainian Government. Representatives from Ukraine, Russia, and the unrecognized separatist republics signed a ceasefire agreement in September 2014. However, this ceasefire failed to stop the fighting. In a renewed attempt to alleviate ongoing clashes, leaders of Ukraine, Russia, France, and Germany negotiated a follow-on peace deal in February 2015 known as the Minsk Agreements. Representatives from Ukraine, Russia, and the Organization for Security and Cooperation in Europe also meet regularly to facilitate implementation of the peace deal. Scattered fighting between Ukrainian and Russian-backed separatist forces is still ongoing in eastern Ukraine.

Economy—overview: After Russia, the Ukrainian republic was the most important economic component of the former Soviet Union, producing about four times the output of the next-ranking republic. Its fertile black soil generated more than one-fourth of Soviet agricultural output, and its farms provided substantial quantities of meat, milk,

grain, and vegetables to other republics. Likewise, its diversified heavy industry supplied unique equipment, such as, large diameter pipes and vertical drilling apparatus, and raw materials to industrial and mining sites in other regions of the former USSR.

Shortly after independence in August 1991, the Ukrainian Government liberalized most prices and erected a legal framework for privatization, but widespread resistance to reform within the government and the legislature soon stalled reform efforts and led to some backtracking. Output by 1999 had fallen to less than 40% of the 1991 level. Outside institutions—particularly the IMF—encouraged Ukraine to quicken the pace and scope of reforms to foster economic growth. Ukrainian Government officials eliminated most tax and customs privileges in a March 2005 budget law, bringing more economic activity out of Ukraine's large shadow economy. But more improvements are needed, including fighting corruption, developing capital markets, and improving the legislative framework. From 2000 until mid-2008, Ukraine's economy was buoyant despite political turmoil between the prime minister and president.

Ukraine's dependence on Russia for energy supplies and the lack of significant structural reform have made the Ukrainian economy vulnerable to external shocks. Ukraine depends on imports to meet about three-fourths of its annual oil and Natural gas requirements and 100% of its nuclear fuel needs. In January 2009, after a two-week dispute that saw gas supplies cut off to Europe, Ukraine agreed to 10-year gas supply and transit contracts with Russia that brought gas prices to "world" levels. The strict terms of the contracts further hobbled Ukraine's cash-strapped state gas company, Naftohaz. The economy contracted nearly 15% in 2009, among the worst economic performances in the world. In April 2010, Ukraine negotiated a price discount on Russian gas imports in exchange for extending Russia's lease on its Naval base in Crimea.

Ukraine's oligarch-dominated economy grew slowly from 2010 to 2014. After former President YANUKOVYCH fled the country during the Revolution of Dignity, the international community began efforts to stabilize the Ukrainian economy, including a March 2014 IMF assistance package of \$14–18 billion. Ukraine has made significant progress on reforms designed to make the country a prosperous, democratic, and transparent country.

Russia's occupation of Crimea in March 2014 and on-going aggression in eastern Ukraine have hurt economic growth. With the loss of a major portion of Ukraine's heavy industry in Donbas and ongoing violence, Ukraine's economy contracted by 6.8% in 2014 and by an estimated 10.5% in 2015. Ukraine and Russia have engaged in a trade war with sharply reduced trade between the countries by the end of

2015. The EU-Ukraine Deep and Comprehensive Free Trade Area finally started up on 1 January 2016, and is expected to help Ukraine integrate its economy with Europe by opening up markets and harmonizing regulations.

Telephone system: *general assessment:* Ukraine's telecommunication development plan emphasizes improving domestic trunk lines, international connections, and the mobile-cellular system
domestic: at independence in December 1991, Ukraine inherited a telephone system that was antiquated, inefficient, and in disrepair; more than 3.5 million applications for telephones could not be satisfied; telephone density is rising and the domestic trunk system is being improved; about one-third of Ukraine's networks are digital, and a majority of regional centers now have digital switching stations; improvements in local networks and local exchanges continue to lag; the mobile-cellular telephone system's expansion has slowed, largely

due to saturation of the market which has reached 125 mobile phones per 100 people

International: country code—380; 2 new domestic trunk lines are a part of the fiber-optic Trans-Asia-Europe (TAE) system and 3 Ukrainian links have been installed in the fiber-optic Trans-European Lines (TEL) project that connects 18 countries; additional international service is provided by the Italy-Turkey-Ukraine-Russia (ITUR) fiber-optic submarine cable and by an unknown number of earth stations in the Intelsat, Inmarsat, and Intersputnik satellite systems (2010)

Broadcast media: state-controlled nationwide TV broadcast channel (UT1) and a number of privately owned TV networks provide basic TV coverage; multi-channel cable and satellite TV services are available; Russian television broadcasts have a small audience nationwide, but larger audiences in the eastern and southern regions; the radio broadcast market, a mix of independent and state-owned networks, is comprised of some 300 stations (2007)

Disputes—international: 1997 boundary delimitation treaty with Belarus remains unratified due to unresolved financial claims, stalling demarcation and reducing border security; delimitation of land boundary with Russia is complete and demarcation began in 2012; the dispute over the boundary between Russia and Ukraine through the Kerch Strait and Sea of Azov is suspended due to the occupation of Crimea by Russia; Ukraine and Moldova signed an agreement officially delimiting their border in 1999, but the border has not been demarcated due to Moldova's difficulties with the break-away region of Transnistria; Moldova and Ukraine operate joint customs posts to monitor transit of people and commodities through Moldova's Transnistria Region, which remains under the auspices of an Organization for Security and Cooperation in Europe-mandated peacekeeping mission comprised of Moldovan, Transnistrian, Russian, and Ukrainian troops; the ICJ ruled largely in favor of Romania in its dispute submitted in 2004 over Ukrainian-administered Zmiyinyy/Serpilor (Snake) Island and Black Sea maritime boundary delimitation; Romania opposes Ukraine's reopening of a navigation canal from the Danube border through Ukraine to the Black Sea

Refugees and internally displaced persons: *IDPs:* 800,000 (Russian-sponsored separatist violence in Crimea and eastern Ukraine) (2015); note -revised figure reflects updates to UN's IDP verification and registration processes

stateless persons: 35,228 (2015); note—citizens of the former USSR who were permanently resident in Ukraine were granted citizenship upon Ukraine's independence in 1991, but some missed this window of opportunity; people arriving after 1991, Crimean Tatars, ethnic Koreans, people with expired Soviet passports, and people with no documents have difficulty acquiring Ukrainian citizenship; following the fall of the Soviet Union in 1989, thousands of Crimean Tatars and their descendants deported from Ukraine under the STALIN regime returned to their homeland, some being stateless and others holding the citizenship of Uzbekistan or other former Soviet republics; a 1998 bilateral agreement between Ukraine and Uzbekistan simplified the process of renouncing Uzbek citizenship and obtaining Ukrainian citizenship

Trafficking in persons: *current situation:* Ukraine is a source, transit, and destination country for men, women, and children subjected to forced labor and sex trafficking; Ukrainian victims are sex trafficked within Ukraine as well as in Russia, Poland, Iraq, Spain, Turkey, Cyprus, Greece, Seychelles, Portugal, the Czech Republic, Israel, Italy, South Korea, Moldova, China, the United Arab Emirates,

Montenegro, UK, Kazakhstan, Tunisia, and other countries; small numbers of foreigners from Moldova, Russia, Vietnam, Uzbekistan, Pakistan, Cameroon, and Azerbaijan were victims of labor trafficking in Ukraine; Ukrainian recruiters most often target Ukrainians from rural areas with limited job prospects using fraud, coercion, and debt bondage

tierrating: Tier 2 Watch List—Ukraine does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; the government's focus on its security situation constrained its anti-trafficking capabilities; law enforcement efforts to pursue trafficking cases weakened in 2014, continuing a multi-year decline, and no investigations, prosecutions, or convictions of government officials were made, despite reports of official complicity in the sex and labor trafficking of children living in state-run institutions; fewer victims were identified and referred to NGOs, which continued to provide and to fund the majority of victims' services (2015)

Illicit drugs: limited cultivation of cannabis and opium poppy, mostly for CIS consumption; some synthetic drug production for export to the West; limited government eradication program; used as transshipment point for opiates and other illicit drugs from Africa, Latin America, and Turkey to Europe and Russia; Ukraine has improved anti-money-laundering controls, resulting in its removal from the Financial Action Task Force's (FATF 's) Noncooperative Countries and Territories List in February 2004; Ukraine's anti-money-laundering regime continues to be monitored by FATF

Background: The Trucial States of the Persian Gulf coast granted the UK control of their defense and Foreign Affairs in 19th century treaties. In 1971, six of these states—Abu Dhabi, ‘Ajman, Al Fujayrah, Ash Shariqah, Dubayy, and Umm al Qaywayn—merged to form the United Arab Emirates (UAE). They were joined in 1972 by Ra’s al Khaymah. The UAE’s per capita GDP is on par with those of leading West European nations. Its high oil revenues and its moderate foreign policy stance have allowed the UAE to play a vital role in the affairs of the region. For more than three decades, oil and global finance drove the UAE’s economy. However, in 2008–09, the confluence of falling oil prices, collapsing real estate prices, and the international banking crisis hit the UAE especially hard. The UAE has essentially avoided the “Arab Spring” unrest seen elsewhere in the Middle East, though in March 2011, political activists and intellectuals signed a petition calling for greater public participation in governance that was widely circulated on the Internet. In an effort to stem potential further unrest, the government announced a multi-year, \$ 1.6-billion infrastructure investment plan for the poorer northern emirates and aggressively pursued advocates of political reform.

Economy—overview: The UAE has an open economy with a high per capita income and a sizable annual trade surplus. Successful efforts at economic diversification have reduced the portion of GDP based on oil and gas output to 25%.

Since the discovery of oil in the UAE more than 30 years ago, the country has undergone a profound transformation from an impoverished region of small desert principalities to a modern state with a high standard of living. The government has increased spending on job creation and infrastructure expansion and is opening up utilities to greater private sector involvement. The country’s free trade zones—offering 100% foreign ownership and zero taxes—are helping to attract foreign investors.

The global financial crisis of 2008–09, tight international credit, and deflated asset prices constricted the economy in 2009. UAE authorities tried to blunt the crisis by increasing spending and boosting liquidity in the banking sector. The crisis hit Dubai hardest, as it was heavily exposed to depressed real estate prices. Dubai lacked sufficient cash to meet its debt obligations, prompting global concern about its solvency and ultimately a \$20 billion bailout from the UAE Central Bank and Abu Dhabi Government that was refinanced in March 2014.

Dependence on oil, a large expatriate workforce, and growing inflation pressures are significant long-term challenges. Low oil prices have prompted the UAE to take steps to reduce its social spending, including eliminating fuel subsidies in August 2015, but the UAE has sufficient assets to cover its deficits with money from its sovereign investment funds. The UAE's strategic plan for the next few years focuses on economic diversification and creating more job opportunities for Nationals through improved education and increased private sector employment.

Disputes—international: boundary agreement was signed and ratified with Oman in 2003 for entire border, including Oman's Musandam Peninsula and Al Madhah enclaves, but contents of the agreement and detailed maps showing the alignment have not been published; Iran and UAE dispute Tunb Islands and Abu Musa Island, which Iran occupies

Illicit drugs: the UAE is a drug transshipment point for traffickers given its proximity to Southwest Asian drug-producing countries; the UAE's position as a major financial center makes it vulnerable to money laundering; anti-money-laundering controls improving, but informal banking remains unregulated

The island of Rockall
is not shown.

Background: The United Kingdom has historically played a leading role in developing parliamentary democracy and in advancing literature and science. At its zenith in the 19th century, the British Empire stretched over one-fourth of the earth's surface. The first half of the 20th century saw the UK's strength seriously depleted in two world wars and the Irish Republic's withdrawal from the union. The second half witnessed the dismantling of the Empire and the UK rebuilding itself into a modern and prosperous European nation. As one of five permanent members of the UN Security Council and a founding member of NATO and the Commonwealth, the UK pursues a global approach to foreign policy. The Scottish Parliament, the National Assembly for Wales, and the Northern Ireland Assembly were established in 1999. The latter was suspended until May 2007 due to wrangling over the peace process, but devolution was fully completed in March 2010.

The UK was an active member of the EU from 1973 to 2016, although it chose to remain outside the Economic and Monetary Union. However, frustrated by a remote bureaucracy in Brussels and massive migration into the country, UK citizens on 23 June 2016 narrowly voted to leave the EU. The so-called "Brexit" will take years to carry out but could be the signal for referenda in other EU countries where skepticism of EU membership benefits is strong.

Country name: *conventional long form:* United Kingdom of Great Britain and Northern Ireland; note—the island of Great Britain includes England, Scotland, and Wales

conventional short form: United Kingdom abbreviation: UK

etymology: self-descriptive country name; the designation “Great Britain,” in the sense of “Larger Britain,” dates back to medieval times and was used to distinguish the island from “Little Britain,” or Brittany in modern France; the name Ireland derives from the Gaelic “Eriu,” the matron goddess of Ireland (goddess of the land)

Government type: parliamentary constitutional monarchy; a Commonwealth realm

Capital: *name:* London

Geographic coordinates: 51 30 N, 0 05 W

National anthem: *name:* “God Save the Queen”

lyrics/music: unknown

note: in use since 1745; by tradition, the song serves as both the National and royal anthem of the UK; it is known as either “God Save the Queen” or “God Save the King,” depending on the gender of the reigning monarch; it also serves as the royal anthem of many Commonwealth nations

Economy—overview: The UK, a leading trading power and financial center, is the third largest economy in Europe after Germany and France. Agriculture is intensive, highly mechanized, and efficient by European standards, producing about 60% of food needs with less than 2% of the labor force. The UK has large coal, Natural gas, and oil resources, but its oil and Natural gas reserves are declining; the UK has been a net importer of energy since 2005. Services, particularly banking, insurance, and business services, are key drivers of British GDP growth. Manufacturing, meanwhile, has declined in importance but still accounts for about 10% of economic output.

In 2008, the global financial crisis hit the economy particularly hard, due to the importance of its financial sector. Falling home prices, high consumer debt, and the global economic slowdown compounded Britain's economic problems, pushing the economy into recession in the latter half of 2008 and prompting the then BROWN (Labour) government to implement a number of measures to stimulate the economy and stabilize the financial markets. Facing burgeoning public deficits and debt levels, in 2010 the CAMERON-led coalition government (between Conservatives and Liberal Democrats) initiated an austerity program, which has continued under the new Conservative majority government. However, the deficit still remains one of the highest in the G-7, standing at 5.1% of GDP as of mid-2015. London intends to eliminate its deficit by 2020, primarily through additional cuts to public spending and welfare benefits. It has also pledged to lower its corporation tax from 20% to 18% by 2020.

In 2012, weak consumer spending and subdued business investment weighed on the economy, however, GDP grew 1.7% in 2013 and 2.8% in 2014, accelerating because of greater consumer spending and a recovering housing market. As of late 2015, the Bank of England is examining when to begin raising interest rates from historically low levels while being cautious not to damage economic growth. While the UK is one of the fastest growing economies in the G-7, economists are concerned about the potential negative impact if the UK votes to leave the EU. The UK has an extensive trade relationship with other EU members through its access to the single market and economic observers have warned an exit could jeopardize its position as the central location for European financial services.

Background: All of the following US Pacific island territories except Midway Atoll constitute the Pacific Remote Islands National Wildlife Refuge (NWR) Complex and as such are managed by the Fish and Wildlife Service of the US Department of the Interior. Midway Atoll NWR has been included in a Refuge Complex with the Hawaiian Islands NWR and also designated as part of Papahānaumokuākea Marine National Monument. These remote refuges are the most widespread collection of marine- and terrestrial-life protected areas on the planet under a single country's jurisdiction. They sustain many endemic species including corals, fish, shellfish, marine mammals, seabirds, water birds, land birds, insects, and vegetation not found elsewhere.

Baker Island: The US took possession of the island in 1857. Its guano deposits were mined by US and British companies during the second half of the 19th century. In 1935, a short-lived attempt at colonization began on this island but was disrupted by World War II and thereafter abandoned. The island was established as a NWR in 1974.

Howland Island: Discovered by the US early in the 19th century, the uninhabited atoll was officially claimed by the US in 1857. Both US and British companies mined for guano deposits until about 1890. In 1935, a short-lived attempt at colonization began on this island, similar to the effort on nearby Baker Island, but was disrupted by World War II and thereafter abandoned. The famed American aviatrix Amelia EARHART disappeared while seeking out Howland Island as a refueling stop during her 1937 round-the-world flight; Earhart Light, a day beacon near the middle of the west coast, was named in her memory. The island was established as an WR in 1974.

Jarvis Island: First discovered by the British in 1821, the uninhabited island was annexed by the US in 1858 but abandoned in 1879 after tons of guano had been removed. The UK annexed the island in 1889 but never carried out plans for further exploitation. The US occupied and reclaimed the island in 1935. It was abandoned in 1942 during World War II. The island was established as an WR in 1974.

Johnston atoll: Both the US and the Kingdom of Hawaii annexed Johnston atoll in 1858, but it was the US that mined the guano deposits until the late 1880s. Johnston and Sand Islands were designated wildlife refuges in 1926. The US Navy took over the atoll in 1934. Subsequently, the US Air Force assumed control in 1948. The site was used for high-altitude nuclear tests in the 1950s and 1960s. Until late in 2000 the atoll was maintained as a storage and disposal site for chemical weapons. Munitions destruction, cleanup, and closure of the facility were completed by May 2005. The Fish and Wildlife Service and the US Air Force are currently discussing future management options; in the interim, Johnston atoll and the three-mile Naval Defensive Sea around it remain under the jurisdiction and administrative control of the US Air Force.

Kingman Reef: The US annexed the reef in 1922. Its sheltered lagoon served as a way station for flying boats on Hawaii-to-American Samoa flights during the late 1930s. There are no terrestrial plants on the reef, which is frequently awash, but it does support abundant and diverse marine fauna and flora. In 2001, the waters surrounding the reef out to 12 nm were designated an WR.

Midway Islands: The US took formal possession of the islands in 1867. The laying of the transpacific cable, which passed through the islands, brought the first residents in 1903. Between 1935 and 1947, Midway

was used as a refueling stop for transpacific flights. The US Naval victory over a Japanese fleet off Midway in 1942 was one of the turning points of World War II. The islands continued to serve as a Naval station until closed in 1993. Today the islands are an WR and are the site of the world's largest Laysan Albatross colony.

Palmyra Atoll: The Kingdom of Hawaii claimed the atoll in 1862, and the US included it among the Hawaiian Islands when it annexed the archipelago in 1898. The Hawaii Statehood Act of 1959 did not include Palmyra Atoll, which is now partly privately owned by the Nature Conservancy with the rest owned by the Federal government and managed by the US Fish and Wildlife Service. These organizations are managing the atoll as a wildlife refuge. The lagoons and surrounding waters within the 12-nm US territorial seas were transferred to the US Fish and Wildlife Service and designated an WR in January 2001.

Background: Britain's American colonies broke with the mother country in 1776 and were recognized as the new nation of the United States of America following the Treaty of Paris in 1783. During the 19th and 20th centuries, 37 new states were added to the original 13 as the nation expanded across the North American continent and acquired a number of overseas possessions. The two most traumatic experiences in the nation's history were the Civil War (1861–65), in which a northern Union of states defeated a secessionist Confederacy of 11 southern slave states, and the Great Depression of the 1930s, an economic downturn during which about a quarter of the labor force lost its jobs. Buoyed by victories in World Wars I and II and the end of the Cold War in 1991, the US remains the world's most powerful nation state. Since the end of World War II, the economy has achieved relatively steady growth, low unemployment and inflation, and rapid advances in technology.

Flag description: 13 equal horizontal stripes of red (top and bottom) alternating with white; there is a blue rectangle in the upper hoist-side corner bearing 50 small, white, five-pointed stars arranged in nine offset horizontal rows of six stars (top and bottom) alternating with rows of five stars; the 50 stars represent the 50 states, the 13 stripes represent the 13 original colonies; the blue stands for loyalty, devotion, truth, justice, and friendship; red symbolizes courage, zeal, and fervency, while white denotes purity and rectitude of conduct; commonly referred to by its nickname of Old Glory

note: the design and colors have been the basis for a number of other flags, including Chile, Liberia, Malaysia, and Puer to Rico

National symbol(s): bald eagle; National colors: red, white, blue

National anthem: *name:* “The Star-Spangled Banner”

lyrics/music: Francis Scott KEY/John Stafford SMITH

note: adopted 1931; during the War of 1812, after witnessing the successful American defense of Fort McHenry in Baltimore following British Naval bombardment, Francis Scott KEY wrote the lyrics to what would become the National anthem; the lyrics were set to the tune of “The Anacreontic Song”; only the first verse is sung

Economy—overview: The US has the most technologically powerful economy in the world, with a per capita GDP of \$54,800. US firms are at or near the forefront in technological advances, especially in computers, pharmaceuticals, and medical, aerospace, and military equipment; however, their advantage has narrowed since the end of World War II. Based on a comparison of GDP measured at Purchasing Power Parity conversion rates, the US economy in 2014, having stood as the largest in the world for more than a century, slipped into second place behind China, which has more than tripled the US growth rate for each year of the past four decades.

In the US, private individuals and business firms make most of the decisions, and the federal and state governments buy needed goods and services predominantly in the private marketplace. US business

firms enjoy greater flexibility than their counterparts in Western Europe and Japan in decisions to expand capital plant, to lay off surplus workers, and to develop new products. At the same time, businesses face higher barriers to enter their rivals' home markets than foreign firms face entering US markets.

Long-term problems for the US include stagnation of wages for lower-income families, inadequate investment in deteriorating infrastructure, rapidly rising medical and pension costs of an aging population, energy shortages, and sizable current account and budget deficits.

The onrush of technology has been a driving factor in the gradual development of a "two-tier" labor market in which those at the bottom lack the education and the professional/technical skills of those at the top and, more and more, fail to get comparable pay raises, health insurance coverage, and other benefits. But the globalization of trade, and especially the rise of low-wage producers such as China, has put additional downward pressure on wages and upward pressure on the return to capital. Since 1975, practically all the gains in household income have gone to the top 20% of households. Since 1996, dividends and capital gains have grown faster than wages or any other category of after-tax income.

Imported oil accounts for nearly 55% of US consumption and oil has a major impact on the overall health of the economy. Crude oil prices doubled between 2001 and 2006, the year home prices peaked; higher gasoline prices ate into consumers' budgets and many individuals fell behind in their mortgage payments. Oil prices climbed another 50% between 2006 and 2008, and bank foreclosures more than doubled in the same period. Besides dampening the housing market, soaring oil prices caused a drop in the value of the dollar and a deterioration in the US merchandise trade deficit, which peaked at \$840 billion in 2008. Because the US economy is energy-intensive, falling oil prices since 2013 have alleviated many of the problems the earlier increases had created.

The sub-prime mortgage crisis, falling home prices, investment bank failures, tight credit, and the global economic downturn pushed the US into a recession by mid-2008. GDP contracted until the third quarter of 2009, making this the deepest and longest downturn since the Great Depression. To help stabilize financial markets, the US Congress established a \$700 billion Troubled Asset Relief Program (TARP) in October 2008. The government used some of these funds to purchase equity in US banks and industrial corporations, much of which had been returned to the government by early 2011. In January 2009, Congress passed and President Barack OBAMA signed a bill providing an additional \$787 billion fiscal stimulus to be used over 10

years—two-thirds on additional spending and one-third on tax cuts—to create jobs and to help the economy recover. In 2010 and 2011, the federal budget deficit reached nearly 9% of GDP. In 2012, the Federal Government reduced the growth of spending and the deficit shrank to 7.6% of GDP. US revenues from taxes and other sources are lower, as a percentage of GDP, than those of most other countries.

Wars in Iraq and Afghanistan required major shifts in National resources from civilian to military purposes and contributed to the growth of the budget deficit and public debt. Through 2014, the direct costs of the wars totaled more than \$1.5 trillion, according to US Government figures.

In March 2010, President OBAMA signed into law the Patient Protection and Affordable Care Act, a health insurance reform that was designed to extend coverage to an additional 32 million americans by 2016, through private health insurance for the general population and Medicaid for the impoverished. Total spending on healthcare—public plus private—rose from 9.0% of GDP in 1980 to 17.9% in 2010. In July 2010, the president signed the DODD-FRANK Wall Street Reform and Consumer Protection act, a law designed to promote financial stability by protecting consumers from financial abuses, ending taxpayer bailouts of financial firms, dealing with troubled banks that are “too big to fail, “ and improving accountability and transparency in the financial system—in particular, by requiring certain financial derivatives to be traded in markets that are subject to government regulation and oversight.

In December 2012, the Federal Reserve Board (Fed) announced plans to purchase \$85 billion per month of mortgage-backed and Treasury securities in an effort to hold down long-term interest rates, and to keep short term rates near zero until unemployment dropped below 6.5% or inflation rose above 2.5%. in late 2013, the Fed announced that it would begin scaling back long-term bond purchases to \$75 billion per month in January 2014 and further reduce them as conditions warranted; the Fed ended the purchases during the summer of 2014. in 2014, the unemployment rate dropped to 6.2%, and continued to fall to 5.5% by mid-2015, the lowest rate of joblessness since before the global recession began; inflation stood at 1.7%, and public debt as a share of GDP continued to decline, following several years of increases.

Background: Montevideo, founded by the Spanish in 1726 as a military stronghold, soon took advantage of its Natural harbor to become an important commercial center. Claimed by Argentina but annexed by Brazil in 1821, Uruguay declared its independence four years later and secured its freedom in 1828 after a three-year struggle. The administrations of President Jose BATLLE in the early 20th century launched widespread political, social, and economic reforms that established a statist tradition. A violent Marxist urban guerrilla movement named the Tupamaros, launched in the late 1960s, led Uruguay's president to cede control of the government to the military in 1973. By yearend, the rebels had been crushed, but the military continued to expand its hold over the government. Civilian rule was not restored until 1985. In 2004, the left-of-center Frente Amplio Coalition won National elections that effectively ended 170 years of political control previously held by the Colorado and Blanco parties. Uruguay's political and labor conditions are among the freest on the continent.

Demographic profile: Uruguay rates high for most development indicators and is known for its secularism, liberal social laws, and well-developed social security, health, and educational systems. It is one of the few countries in Latin America and the Caribbean where the entire population has access to clean water. Uruguay's provision of free primary through university education has contributed to the country's high levels of literacy and educational attainment. However, the emigration of human capital has diminished the state's return on its investment in education. Remittances from the roughly 18% of Uruguayans abroad amount to less than 1 percent of National

GDP. The emigration of young adults and a low birth rate are causing Uruguay's population to age rapidly.

In the 1960s, Uruguayans for the first time emigrated en masse—primarily to Argentina and Brazil—because of economic decline and the onset of more than a decade of Military dictatorship. Economic crises in the early 1980s and 2002 also triggered waves of emigration, but since 2002 more than 70% of Uruguayan emigrants have selected the US and Spain as destinations because of better job prospects. Uruguay had a tiny population upon its independence in 1828 and welcomed thousands of predominantly Italian and Spanish immigrants, but the country has not experienced large influxes of new arrivals since the aftermath of World War II. More recent immigrants include Peruvians and Arabs.

Flag description: nine equal horizontal stripes of white (top and bottom) alternating with blue; a white square in the upper hoist-side corner with a yellow sun bearing a human face known as the Sun of May with 16 rays that alternate between triangular and wavy; the stripes represent the nine original departments of Uruguay; the sun symbol evokes the legend of the sun breaking through the clouds on 25 May 1810 as independence was first declared from Spain (Uruguay subsequently won its independence from Brazil); the sun features are said to represent those of Inti, the Inca god of the sun

note: the banner was inspired by the National colors of Argentina and by the design of the US flag

National symbol(s): Sun of May (a sun-with-face symbol); National colors: blue, white, yellow

National anthem: *name:* “Himno Nacion al” (National Anthem of Uruguay)

lyrics/music: Francisco Esteban ACUNA de Figueroa/Francisco Jose DEBALI

note: adopted 1848; the anthem is also known as “Orientales, la Patria o la tumba!” (“Uruguayans, the Fatherland or Death!”); it is the world’s longest National anthem in terms of music (105 bars; almost five minutes); generally only the first verse and chorus are sung

Economy—overview: Uruguay has a free market economy characterized by an export-oriented agricultural sector, a well-educated workforce, and high levels of social spending. Uruguay has sought to expand trade within the Common Market of the South

(Mercosur) and with non-Mercosur members, and President VAZQUEZ has maintained his predecessor's mix of pro-market policies and a strong social safety net. Following financial difficulties in the late 1990s and early 2000s, Uruguay's economic growth averaged 8% annually during the period 2004–08. The 2008–09 global financial crisis put a brake on Uruguay's vigorous growth, which decelerated to 2.6% in 2009. Nevertheless, the country managed to avoid a recession and keep positive growth rates, mainly through higher public expenditure and investment; GDP growth reached 8.9% in 2010 but slowed in 2012–13 as a result of a renewed slowdown in the global economy and in Uruguay's main trade partners and Mercosur counterparts, Argentina and Brazil.

Disputes—international: in 2010, the ICJ ruled in favor of Uruguay's operation of two paper mills on the Uruguay River, which forms the border with Argentina; the two countries formed a joint pollution monitoring regime; uncontested boundary dispute between Brazil and Uruguay over Braziliera/Brasilierra Island in the Quarai/Cuareim River leaves the tripoint with Argentina in question; smuggling of firearms and narcotics continues to be an issue along the Uruguay-Brazil border

Illicit drugs: small-scale transit country for drugs mainly bound for Europe, often through sea-borne containers; law enforcement

corruption; money laundering because of strict banking secrecy laws; weak border control along Brazilian frontier; increasing consumption of cocaine base and synthetic drugs

Background: Russia conquered the territory of present-day Uzbekistan in the late 19th century. Stiff resistance to the Red Army after the Bolshevik Revolution was eventually suppressed and a socialist republic established in 1924. During the Soviet era, intensive production of “white gold” (cotton) and grain led to overuse of agrochemicals and the depletion of water supplies, which have left the land degraded and the Aral Sea and certain rivers half dry. Independent since 1991, the country has gradually lessened its dependence on the cotton monoculture by diversifying agricultural production while developing its mineral and petroleum export capacity and increasing its manufacturing base. However, long-serving septuagenarian President Islam KARIMOV, who rose through the ranks of the Soviet-era State Planning Committee (Gosplan), remains wedded to the concepts of a command economy, creating a challenging environment for foreign investment. Current concerns include post-KARIMOV succession, economic stagnation, pervasive corruption, declining quality of social services, persistent inability to adequately meet the country’s energy needs outside of Tashkent, the curtailment of human rights, and the lack of democratization.

Economy—overview: Uzbekistan is a landlocked country with more than 60% of the population living in densely populated rural communities. Since its independence in September 1991, the government maintained its Soviet-style command economy with subsidies and tight controls on production and prices. Despite ongoing efforts to diversify crops, Uzbekistani agriculture remains largely

centered on cotton; Uzbekistan is the world's fifth largest cotton exporter and sixth largest producer. Uzbekistan's growth has been driven primarily by state-led investments, and export of Natural gas, gold, and cotton provides a significant share of foreign exchange earnings. In 2015, Russia's Gazprom announced it would reduce its Natural gas imports from Uzbekistan but Tashkent continues to export Natural gas to China and Chinese investments in the country have substantially increased.

While aware of the need to improve the investment climate, the government continues to intervene in the business sector and has not addressed the impediments to foreign investment in the country. In the past, Uzbekistani authorities have accused US and other foreign companies operating in Uzbekistan of violating Uzbekistani laws and have frozen and seized their assets. At the same time, the Uzbekistani Government has actively courted several major US and international corporations, offering financing and tax advantages.

In 2003, the government accepted Article VIII obligations under the IMF, providing for full currency convertibility. However, strict currency controls and tightening of borders have lessened the effects of convertibility and have also led to some shortages that have further stifled economic activity. Recently, lower global commodity prices and economic slowdown in neighboring Russia and China have been hurting Uzbekistan's trade and investment and worsening its problem of currency shortage.

Telephone system: *general assessment:* digital exchanges in large cities and in rural areas

domestic: the state-owned telecommunications company, Uzbektelecom, owner of the fixed-line telecommunications system, has used loans from the Japanese government and the China Development Bank to upgrade fixed-line services including conversion to digital exchanges; mobile-cellular services are provided by 3 private and 1 state-owned operator with a total subscriber base of 19 million as of January 2014

International: country code—998; linked by fiber-optic cable or microwave radio relay with CIS member states and to other countries by leased connection via the Moscow international gateway switch; the country also has a link to the Trans-Asia-Europe (TAE) fiber-optic cable; Uzbekistan has supported the National fiber optic backbone project of Afghanistan since 2008 (2009)

Broadcast media: government controls media; 14 state-owned broadcasters—10 TV and 4 radio—provide service to virtually the entire country; about 20 privately owned TV stations, overseen by local officials, broadcast to local markets; privately owned TV stations are required to lease transmitters from the government-owned Republic TV and Radio Industry Corporation; in 2013, the government closed TV and radio broadcasters affiliated with the National Association of Electronic Mass Media of Uzbekistan, a government-sponsored NGO for private broadcast media

Radio broadcast stations: AM 20, FM 24, shortwave 3 (2008)

Television broadcast stations: 28 (includes 1 cable rebroadcaster in Tashkent and approximately 20 stations in regional capitals) (2006)

Ports and terminals: *river port(s):* Termiz (Amu Darya)

Military branches: Uzbek Armed Forces: Army, Air and Air Defense Forces (2013)

Military service age and obligation: 18 years of age for compulsory military service; 1-month or 1-year conscript service obligation for males; moving toward a professional military, but conscription in some form will continue; the military cannot accommodate everyone who wishes to enlist, and competition for entrance into the military is similar to the competition for admission to universities (2013)

Disputes—international: prolonged drought and cotton monoculture in Uzbekistan and Turkmenistan created water-sharing difficulties for Amu Darya river states; field demarcation of the boundaries with Kazakhstan commenced in 2004; border delimitation of 130 km of border with Kyrgyzstan is hampered by serious disputes around enclaves and other areas

Refugees and internally displaced persons: *stateless persons:* 86,703 (2015)

Trafficking in persons: *current situation:* Uzbekistan is a source country for men, women, and children subjected to forced labor and women and children subjected to sex trafficking; government-compelled forced labor of adults remained endemic during the 2014 cotton harvest; despite a decree banning the use of persons under 18, children were mobilized to harvest cotton by local officials in some districts; in some regions, local officials forced teachers, students, private business employees, and others to work in construction, agriculture, and cleaning parks; Uzbekistani women and children are

victims of sex trafficking domestically and in the Middle East, Eurasia, and Asia; Uzbekistani men and, to a lesser extent, women are subjected to forced labor in Kazakhstan, Russia, and Ukraine in the construction, oil, agriculture, retail, and food sectors

tier rating: Tier 2 Watch List—Uzbekistan does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; law enforcement efforts in 2014 were mixed; the government made efforts to combat sex and Transnational labor trafficking, but government-compelled forced labor of adults in the cotton harvest went unaddressed, and the decree prohibiting forced child labor was not applied universally; official complicity in human trafficking in the cotton harvest remained prevalent; authorities made efforts to identify and protect sex and Transnational labor victims, although a systematic process is still lacking; minimal efforts were made to assist victims of forced labor in the cotton harvest, as the government does not openly acknowledge the existence of this forced labor; the ILO did not have permission or funding to monitor the 2014 harvest, but the government authorized the UN's International Labour Organization to conduct a survey on recruitment practices and working conditions in agriculture, particularly the cotton sector, and to monitor the 2015–17 cotton harvests for child and forced labor in project areas (2015)

Illicit drugs: transit country for Afghan narcotics bound for Russian and, to a lesser extent, Western European markets; limited illicit cultivation of cannabis and small amounts of opium Poppy for domestic consumption; poppy cultivation almost wiped out by government crop eradication program; transit point for heroin precursor chemicals bound for Afghanistan

Background: Multiple waves of colonizers, each speaking a distinct language, migrated to the New Hebrides in the millennia preceding European exploration in the 18th century. This settlement pattern accounts for the complex linguistic diversity found on the archipelago to this day. The British and French, who settled the New Hebrides in the 19th century, agreed in 1906 to an Anglo-French Condominium, which administered the islands until independence in 1980, when the new name of Vanuatu was adopted.

Economy—overview: This South Pacific island economy is based primarily on small-scale agriculture, which provides a living for about two-thirds of the population. Fishing, offshore financial services, and tourism, with nearly 197,000 visitors in 2008, are other mainstays of the economy. Australia and New Zealand are the main source of tourists and foreign aid. A small light industry sector caters to the local market. Tax revenues come mainly from import duties. Mineral deposits are negligible; the country has no known petroleum deposits. Economic development is hindered by dependence on relatively few commodity exports, vulnerability to Natural disasters, and long distances from main markets and between constituent islands. In response to foreign concerns, the government has promised to tighten regulation of its offshore financial center. Since 2002, the government has stepped up efforts to boost tourism through improved air

connections, resort development, and cruise ship facilities. Agriculture, especially livestock farming, is a second target for growth.

Background: Venezuela was one of three countries that emerged from the collapse of Gran Colombia in 1830 (the others being Ecuador and New Granada, which became Colombia). For most of the first half of the 20th century, Venezuela was ruled by generally benevolent military strongmen, who promoted the oil industry and allowed for some social reforms. Democratically elected governments have held sway since 1959. Under Hugo CHAVEZ, president from 1999 to 2013, and his hand-picked successor, President Nicolas MADURO, the executive branch has exercised increasingly authoritarian control over other branches of government. At the same time, democratic institutions have deteriorated, threats to freedom of expression have increased, and political polarization has grown. The ruling party's economic policies have expanded the state's role in the economy through expropriations of major enterprises, strict currency exchange and price controls that discourage private sector investment and production, and overdependence on the petroleum industry for revenues, among others. Current concerns include: an increasingly politicized military, rampant violent crime, high inflation, and widespread shortages of basic consumer goods, medicine, and medical supplies. Venezuela assumed a nonpermanent seat on the UN Security Council for the 2015–16 term.

Demographic profile: Social investment in Venezuela during the CHAVEZ administration reduced poverty from nearly 50% in 1999 to about 27% in 2011, increased school enrollment, substantially decreased infant and child mortality, and improved access to potable water and sanitation through social investment. "Missions" dedicated to education, nutrition, healthcare, and sanitation were funded through petroleum revenues. The sustainability of this progress remains question able, however, as the continuation of these social programs depends on the prosperity of Venezuela's oil industry. In the long-term, education and health care spending may increase economic growth and reduce income inequality, but rising costs and the staffing of new health care jobs with foreigners are slowing development.

While CHAVEZ was in power, more than one million predominantly middle- and upper-class Venezuelans are estimated to have emigrated. The brain drain is attributed to a repressive political system, lack of economic opportunities, steep inflation, a high crime rate, and corruption. Thousands of oil engineers emigrated to Canada, Colombia, and the United States following CHAVEZ's firing of over 20,000 employees of the state-owned petroleum company during a 2002–03 oil strike. Addition ally, thousands of Venezuelans of European descent have taken up residence in their ancestral homelands. Nevertheless, Venezuela continues to attract immigrants from South America and southern Europe because of its lenient migration policy and the availability of education and health care. Venezuela also has been a fairly accommodating host to more than 200,000 Colombian refugees.

Flag description: three equal horizontal bands of yellow (top), blue, and red with the coat of arms on the hoist side of the yellow

band and an arc of eight white five-pointed stars centered in the blue band; the flag retains the three equal horizontal bands and three main colors of the banner of Gran Colombia, the South American republic that broke up in 1830; yellow is interpreted as standing for the riches of the land, blue for the courage of its people, and red for the blood shed in attaining independence; the seven stars on the original flag represented the seven provinces in Venezuela that united in the war of independence; in 2006, then President Hugo CHAVEZ ordered an eighth star added to the star arc—a decision that sparked much controversy—to conform with the flag proclaimed by Simon Bolivar in 1827 and to represent the historic province of Guyana

National symbol(s): troupial (bird); National colors: yellow, blue, red

National anthem: *name:* “Gloria al bravo pueblo” (Glory to the Brave People)

lyrics/music: Vicente SALIAS/Juan Jose LANDAETA

note: adopted 1881; lyrics written in 1810, the music some years later; both SALIAS and LANDAETA were executed in 1814 during Venezuela’s struggle for independence

Economy—overview: Venezuela remains highly dependent on oil revenues, which account for almost all export earnings and nearly half of the government’s revenue. The country ended 2015 with an estimated 10% contraction in its GDP, 275% inflation, widespread shortages of consumer goods, and declining central bank international reserves. The IMF forecasts that the GDP will shrink another 8% in 2016 and inflation may reach 720%. Falling oil prices since 2014 have aggravated Venezuela’s economic crisis. Insufficient access to dollars, price controls, and rigid labor regulations have led some US and multiNational firms to reduce or shut down their Venezuelan operations. Market uncertainty and state oil company PDVSA’s poor cash flow have slowed investment in the petroleum sector, resulting in a decline in oil production.

Under President Nicolas MADURO, the Venezuelan Government’s response to the economic crisis has been to increase state control over the economy and blame the private sector for the shortages. The Venezuelan Government has maintained strict currency controls since 2003. On 17 February 2016, the Venezuelan Government announced a change from three official currency exchange mechanisms to only two official rates for the sale of dollars to private sector firms and individuals, with rates based on the government’s import priorities. The official exchange rate used for food and medicine imports was

devalued to 10 bolivars per dollar from 6.3 bolivars per dollar. The second rate moved to a managed float. These currency controls present significant obstacles to trade with Venezuela because importers cannot obtain sufficient dollars to purchase goods needed to maintain their operations. MADURO has used decree powers to enact legislation to deepen the state's role as the primary buyer and distributor of imports, further tighten currency controls, cap business profits, and extend price controls.

Transportation—note: the international Maritime Bureau continues to report the territorial and offshore waters in the Caribbean Sea as at risk for piracy and armed robbery against ships; numerous vessels, including commercial shipping and pleasure craft, have been attacked and hijacked both at anchor and while underway; crews have been robbed and stores or cargoes stolen

Disputes—international: claims all of the area west of the Essequibo River in Guyana, preventing any discussion of a maritime boundary; Guyana has expressed its intention to join Barbados in asserting claims before the UN Convention on the Law of the Sea that Trinidad and Tobago's maritime boundary with Venezuela extends into their waters; dispute with Colombia over maritime boundary and Venezuelan administered Los Monjes islands near the Gulf of Venezuela; Colombian organized illegal narcotics and paramilitary activities penetrate Venezuela's shared border region; US, France, and the Netherlands recognize Venezuela's granting full effect to Aves Island, thereby claiming a Venezuelan Economic Exclusion Zone/continental shelf extending over a large portion of the eastern Caribbean Sea; Dominica, Saint Kitts and Nevis, Saint Lucia, and Saint Vincent and the Grenadines protest Venezuela's full effect claim

Refugees and internally displaced persons: *refugees (country of origin):* 173,519 (Colombia) (2014)

Trafficking in persons: *current situation:* Venezuela is a source and destination country for men, women, and children subjected to sex trafficking and forced labor; Venezuelan women and girls, sometimes lured from poor interior regions to urban and tourist areas, are trafficked for sexual exploitation within the country, as well as in the Caribbean; Venezuelan children are exploited, frequently by their families, in domestic servitude; people from South America, the Caribbean, Asia, and Africa are sex and labor trafficking victims in Venezuela; thousands of Cuban citizens, particularly doctors, who work in Venezuela on government social programs in exchange for the provision of resources to the Cuban Government experience conditions of forced labor

tier rating: Tier 3—Venezuela does not fully comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so; in 2014, the government appeared to increase efforts to hold traffickers criminally accountable, but a lack of government data made anti-trafficking law enforcement efforts difficult to assess; publically available information indicated many cases pursued under anti-trafficking law involved illegal adoption

rather than sex and labor trafficking; authorities identified a small number of trafficking victims, and victim referrals to limited government services were made on an ad hoc basis; because no specialized facilities are available for trafficking victims, women and child victims accessed centers for victims of domestic violence or at-risk youth, and services for men were virtually nonexistent; NGOs provided some services to sex and labor trafficking victims; Venezuela has no permanent anti-trafficking interagency body, no National anti-trafficking plan, and still has not passed anti-trafficking legislation drafted in 2010 (2015)

Illicit drugs: small-scale illicit producer of opium and coca for the processing of opiates and coca derivatives; however, large quantities of cocaine, heroin, and marijuana transit the country from Colombia bound for US and Europe; significant narcotics-related money-laundering activity, especially along the border with Colombia and on Margarita Island; active eradication program primarily targeting opium; increasing signs of drug-related activities by Colombian insurgents on border

Background: The conquest of Vietnam by France began in 1858 and was completed by 1884. It became part of French Indochina in 1887. Vietnam declared independence after World War II, but France continued to rule until its 1954 defeat by communist forces under Ho Chi MINH. Under the Geneva Accords of 1954, Vietnam was divided into the communist North and anti-communist South. US economic and military aid to South Vietnam grew through the 1960s in an attempt to bolster the government, but US armed forces were withdrawn following a cease-fire agreement in 1973. Two years later, North Vietnamese forces overran the South reuniting the country under communist rule. Despite the return of peace, for over a decade the country experienced little economic growth because of conservative leadership policies, the persecution and mass exodus of individuals—many of them successful South Vietnamese merchants—and growing international isolation. However, since the enactment of Vietnam’s “doi moi” (renovation) policy in 1986, Vietnamese authorities have committed to increased economic liberalization and enacted structural reforms needed to modernize the economy and to produce more competitive, export-driven industries. The communist leaders maintain tight control on political expression but have demonstrated some modest steps toward better protection of human rights. The country continues to experience small-scale protests, the vast majority connected to either land-use issues, calls for increased political space, or the lack of equitable mechanisms for resolving disputes. The small-scale protests in the urban Areas are often organized by human rights activists, but many occur in rural areas and involve various ethnic minorities such as the Montagnards of the Central Highlands, H’mong in the Northwest Highlands, and the Khmer Krom in the southern delta region.

Economy—overview: Vietnam is a densely populated developing country that has been transitioning from the rigidities of a centrally-planned economy since 1986. Agriculture’s share of economic output has shrunk from about 25% in 2000 to 18% in 2014, while industry’s share increased from 36% to 38% in the same period. State-owned enterprises now account for only about 40% of GDP.

Vietnamese authorities have reaffirmed their commitment to economic modernization and a more open economy. Vietnam joined the WTO in January 2007, which has promoted more competitive, export-driven industries. Vietnam was one of 12-nations that concluded the Trans-Pacific Partnership free trade agreement negotiations in 2015.

Hanoi has oscillated between promoting growth and emphasizing macroeconomic stability in recent years. During 2015, Vietnam’s

managed currency, the dong, depreciated about 5%. Poverty has declined significantly, and Vietnam is working to create jobs to meet the challenge of a labor force that is growing by more than one million people every year.

Vietnam is trying to reform its economy by restructuring public investment, state-owned enterprises, and the banking sector, although Hanoi's progress in meeting its goals is lagging behind the proposed schedule. Vietnam's economy continues to face challenges from an undercapitalized banking sector and Nonperforming loans.

Telephone system: *general assessment:* Vietnam is putting considerable effort into modernization and expansion of its telecommunication system

domestic: all provincial exchanges are digitalized and connected to Hanoi, Da NAng, and Ho Chi Minh City by fiber-optic cable or microwave radio relay networks; main lines have been increased, and the use of mobile telephones is growing rapidly

International: country code—84; a landing point for the SEA-ME-WE-3, the C2C, and Thailand-Vietnam-Hong Kong submarine cable systems; the Asia-America Gateway submarine cable system, completed in 2009, provided new access links to Asia and the US; satellite earth stations—2 Intersputnik (Indian Ocean region) (2011)

Broadcast media: government controls all broadcast media exercising oversight through the Ministry of Information and Communication (MIC); government-controlled National TV provider, Vietnam Television (VTV), operates a network of 9 channels with several regional broadcasting centers; programming is relayed nationwide via a network of provincial and municipal TV stations; law limits access to satellite TV but many households are able to access foreign programming via home satellite equipment; government-controlled Voice of Vietnam, the National radio broadcaster, broadcasts on 6 channels and is repeated on AM, FM, and shortwave stations throughout Vietnam (2008)

Disputes—international: southeast Asian states have enhanced border surveillance to check the spread of avian flu; Cambodia and Laos protest Vietnamese squatters and armed encroachments along border; Cambodia accuses Vietnam of a wide variety of illicit cross-border activities; progress on a joint development area with Cambodia is hampered by an unresolved dispute over sovereignty of offshore islands; an estimated 300,000 Vietnamese refugees reside in China; establishment of a maritime boundary with Cambodia is hampered by unresolved dispute over the sovereignty of offshore islands; the decade-long demarcation of the China-Vietnam land boundary was completed in 2009; China occupies the Paracel Islands also claimed by Vietnam and Taiwan; Brunei claims a maritime boundary extending beyond as far as a median with Vietnam, thus asserting an implicit claim to Lousia Reef; the 2002 “Declaration on the Conduct of Parties in the South China Sea” has eased tensions but falls short of a legally Binding “code of conduct” desired by several of the disputants; Vietnam continues to expand construction of facilities in the Spratly Islands; in March 2005, the National oil companies of China, the Philippines, and Vietnam signed a joint accord to conduct marine seismic activities in the Spratly Islands; Economic Exclusion Zone negotiations with Indonesia are ongoing, and the two countries in Fall 2011 agreed to work together to reduce illegal fishing along their maritime boundary

Refugees and internally displaced persons: *stateless persons:* 11,000 (2015); note—Vietnam’s stateless ethnic Chinese Cambodian population dates to the 1970s when thousands of Cambodians fled to Vietnam to escape the Khmer Rouge and were no longer recognized as Cambodian citizens; Vietnamese women who gave up their citizenship to marry foreign men have found themselves stateless after divorcing and returning home to Vietnam; the government addressed this problem in 2009, and Vietnamese women are beginning to reclaim their citizenship

Illicit drugs: minor producer of opiUMPoppy; probable minor transit point for Southeast Asian heroin; government continues to face domestic opium/heroin/methamphetamine addiction problems despite longstanding crackdowns; enforces the death penalty for drug trafficking

Background: The Danes secured control over the southern Virgin Islands of Saint Thomas, Saint John, and Saint Croix during the 17th and early 18th centuries. Sugarcane, produced by African slave labor, drove the islands' economy during the 18th and early 19th centuries. In 1917, the US purchased the Danish holdings, which had been in economic decline since the abolition of slavery in 1848.

Flag description: white field with a modified US coat of arms in the center between the large blue initials V and I; the coat of arms shows a yellow eagle holding an olive branch in its right talon and three arrows in the left with a superimposed shield of seven red and six white vertical stripes below a blue panel; white is a symbol of purity, the letters stand for the Virgin Islands

National anthem: *name:* "Virgin Islands March"

lyrics/music: multiple/Alton augustus ADAMS, Sr.

note: adopted 1963; serves as a local anthem; as a territory of the US, "The Star-Spangled Banner" is official (see United States)

Economy—overview: Tourism, trade, and other services are the primary economic activities, accounting for nearly 60% of the Virgin Island's GDP and about half of total civilian employment. The islands host nearly 3 million tourists per year, mostly from visiting cruise ships. The islands are vulnerable to damage from storms. The agriculture sector is small, with most food being imported. Industry and government each account for about one-fifth of GDP. The manufacturing sector consists of rum distilling, electronics, pharmaceuticals, and watch assembly. A refinery on St. Croix, one of

the world's largest, processed 350,000 barrels of crude oil a day until it was shut down in February 2012, after operating for 45 years.

Federal programs and grants, totaling \$241.4 million in 2013, contributed 19.7% of the territory's total revenues. The economy declined in 2013, due to decreases in exports resulting from the loss of refined oil products. Nevertheless, the economy remains relatively diversified. Along with a vibrant tourism industry, rum exports, trade, and services will be major income sources in future years.

Background: The US annexed Wake Island in 1899 for a cable station. An important air and Naval base was constructed in 1940–41. In December 1941, the island was captured by the Japanese and held until the end of World War II. In subsequent years, Wake became a stopover and refueling site for military and commercial aircraft transiting the Pacific. Since 1974, the island's airstrip has been used by the US military, as well as for emergency landings. Operations on the island were temporarily suspended and all personnel evacuated in 2006 with the approach of super typhoon IOKE (category 5), but resultant damage was comparatively minor. A US Air Force repair team restored full capability to the airfield and facilities, and the island remains a vital strategic link in the Pacific region.

Disputes—international: claimed by Marshall Islands

Background: The Futuna island group was discovered by the Dutch in 1616 and Wallis by the British in 1767, but it was the French who declared a protectorate over the islands in 1842, and took official control of them between 1886 and 1888. Notably, Wallis and Futuna was the only French colony to side with the Vichy regime during World War II, a phase that ended in May of 1942 with the arrival of 2,000 American troops. In 1959, the inhabitants of the islands voted to become a French overseas territory and officially assumed this status in July 1961.

Economy—overview: The economy is limited to traditional subsistence agriculture, with 80% of labor force earnings coming from agriculture (coconuts and vegetables), livestock (mostly pigs), and fishing. However, roughly 70% of the labor force is employed in the

public sector, although only about 20% of the population is in salaried employment.

Revenues come from French Government subsidies, licensing of fishing rights to Japan and South Korea, import taxes, and remittances from expatriate workers in New Caledonia. France directly finances the public sector and healthcare and education services. It also provides funding for key development projects in a range of areas, including infrastructure, economic development, environmental management, and healthcare facilities. A key concern for Wallis and Futuna is an aging population with consequent economic development issues. Very few people aged 18–30 live on the islands due to the limited formal employment opportunities. Improving job creation is a current priority for the territorial government.

Background: From the early 16th century through 1917, the area now known as the West Bank fell under Ottoman rule. Following World War I, the Allied powers (France, UK, Russia) allocated the area to the British Mandate of Palestine. After World War II, the UN passed a resolution to establish two states within the Mandate, and designated a territory including what is now known as the West Bank as part of the proposed Arab state. Following the 1948 Arab-Israeli War, the area was captured by Transjordan (later renamed Jordan). Jordan annexed the West Bank in 1950. In June 1967, Israel captured the West Bank and East Jerusalem during the 1967 Six-Day War. With the exception of East Jerusalem, roughly 60% of the West Bank remains under Israeli military control. Israel transferred security and civilian responsibility for a number of Palestinian-populated areas of the West Bank and Gaza Strip to the Palestinian Authority (PA) under a series of agreements signed between 1994 and 1999, the so-called “Oslo Accords.” Negotiations to determine the permanent status of the West Bank and Gaza Strip stalled after the outbreak of an intifada in mid-2000. In early 2003, the “Quartet” of the US, EU, UN, and Russia, presented a roadmap to a final peace settlement by 2005, calling for two states—Israel and a democratic Palestine.

Following Palestinian leader Yassir ARAFAT’s death in late 2004 and the subsequent election of Mahmoud ABBAS (head of the Fatah political faction) as PA president, Israel and the Palestinians agreed to move the peace process forward. Israel in late 2005 unilaterally withdrew all of its settlers and soldiers and dismantled its military facilities in the Gaza Strip and redeployed its military from several West Bank settlements but continues to control maritime, airspace, and other access. In early 2006, the Islamic Resistance Movement, HAMAS, won the Palestinian Legislative Council election and took control of the PA government. Attempts to form a unity government failed, and violent clashes between Fatah and HAMAS supporters ensued, culminating in HAMAS’s violent seizure of all military and governmental institutions in the Gaza Strip. Fatah and HAMAS have made several attempts at reconciliation, but the factions have been unable to implement details on governance and security. In an attempt to reenergize peace talks between the Israelis and Palestinians, France in June 2016 hosted a ministerial meeting that included participants from 29 countries, although not Israel or the Palestinians, to lay the groundwork for an envisioned “multilateral peace conference” later in the year.

etymology: name refers to the location of the region—occupied and administered by Jordan after 1948 that fell on the far side (west bank) of the Jordan River in relation to Jordan proper; the designation was retained following the 1967 Six-Day War and the subsequent changes in government

Economy—overview: Israeli-Palestinian violence in 2015 exacerbated challenges to economic growth in the West Bank—the larger of the two areas comprising the Palestinian Territories. Increased security restrictions and political instability slowed economic activity, and Israel's four-month withholding of taxes and other fees it collects on the Palestinian authority's (PA) behalf caused the PA to delay salary payments to its employees, which in turn had broader effects on business activity and consumer demand.

Longstanding Israeli closure policies continue to disrupt labor and trade flows and the territory's industrial capacity, limit imports and exports, and constrain private sector development. The PA for the foreseeable future will continue to rely heavily on donor aid for its budgetary needs and economic activity.

Background: Western Sahara is a disputed territory on the northwest coast of Africa bordered by Morocco, Mauritania, and Algeria. After Spain withdrew from its former colony of Spanish Sahara in 1976, Morocco annexed the northern two-thirds of Western

Sahara and claimed the rest of the territory in 1979, following Mauritania's withdrawal. A guerrilla war with the Polisario Front contesting Morocco's sovereignty ended in a 1991 cease-fire and the establishment of a UN peacekeeping operation. As part of this effort, the UN sought to offer a choice to the peoples of the Western Sahara between independence (favored by the Polisario Front) or integration into Morocco. A proposed referendum never took place due to lack of agreement on voter eligibility. The 2,700 km- (1,700 mi-) long defensive sand berm, built by the Moroccans from 1980 to 1987 and running the length of the territory, continues to separate the opposing forces with Morocco controlling the roughly 80 percent of the territory west of the berm. Local demonstrations criticizing the Moroccan Authorities occur regularly, and there are periodic ethnic tensions between the native Sahrawi population and Moroccan immigrants. Morocco maintains a heavy security presence in the territory.

Economy—overview: Western Sahara has a small market-based economy whose main industries are fishing, phosphate mining, and pastoral nomadism. The territory's arid desert climate makes sedentary agriculture difficult, and Western Sahara imports much of its food. The Moroccan Government administers Western Sahara's economy and is a key source of employment, infrastructure development, and social spending in the territory. Western Sahara's unresolved legal status makes the exploitation of its Natural resources a contentious issue between Morocco and the Polisario. Morocco and the EU in December 2013 finalized a four-year agreement allowing European vessels to fish off the coast of Morocco, including disputed waters off the coast of Western Sahara. Oil has never been found in Western Sahara in commercially significant quantities, but Morocco and the Polisario have quarreled over who has the right to authorize and benefit from oil exploration in the territory. Western Sahara's main long-term economic challenge is the development of a more diverse set of industries capable of providing greater employment and income to the territory. However, following King MOHAMMED VI's November 2015 visit to Western Sahara, the Government of Morocco announced a series of investments aimed at spurring economic activity in the region, while the General Confederation of Moroccan Enterprises announced a \$609 million investment initiative in the region in March 2015.

Disputes—international: many neighboring states reject Moroccan administration of Western Sahara; several states have extended diplomatic relations to the “Sahrawi Arab Democratic Republic” represented by the Polisario Front in exile in Algeria, while others recognize Moroccan sovereignty over Western Sahara; approximately 90,000 Sahrawi refugees continue to be sheltered in camps in Tindouf, Algeria, which has hosted Sahrawi refugees since the 1980s

Background: Globally, the 20th century was marked by: (a) two devastating world wars; (b) the Great Depression of the 1930s; (c) the end of vast colonial empires; (d) rapid advances in science and technology, from the first airplane flight at Kitty Hawk, North Carolina (US) to the landing on the moon; (e) the Cold War between the Western alliance and the Warsaw Pact nations; (f) a sharp rise in living standards in North America, Europe, and Japan; (g) increased concerns about environmental degradation including deforestation, energy and water shortages, declining biological diversity, and air pollution; (h) the onset of the AIDS epidemic; and (i) the ultimate emergence of the US as the only world superpower. The planet's population continues to explode: from 1 billion in 1820 to 2 billion in 1930, 3 billion in 1960, 4 billion in 1974, 5 billion in 1987, 6 billion in 1999, and 7 billion in 2012. For the 21st century, the continued exponential growth in science and technology raises both hopes (e. g., advances in medicine and agriculture) and fears (e. g., development of even more lethal weapons of war).

Geographic overview: The surface of the earth is approximately 70.9% water and 29.1% land. The former portion is divided into large water bodies termed oceans. The World Factbook recognizes and describes five oceans, which are in decreasing order of size: the Pacific Ocean, Atlantic Ocean, Indian Ocean, Southern Ocean, and Arctic Ocean. The land portion is generally divided into several, large, discrete landmasses termed continents. Depending on the convention used, the number of continents can vary from five to seven. The most common classification recognizes seven, which are (from largest to smallest): Asia, Africa, North America, South America, Antarctica, Europe, and Australia. Asia and Europe are sometimes lumped together into a Eurasian continent resulting in six continents. Alternatively, North and South America are sometimes grouped as simply the Americas, resulting in a continent total of six (or five, if the Eurasia designation is used).

North America is commonly understood to include the island of Greenland, the isles of the Caribbean, and to extend south all the way to the Isthmus of Panama. The easternmost extent of Europe is generally defined as being the Ural Mountains and the Ural River; on the southeast the Caspian Sea; and on the south the Caucasus Mountains, the Black Sea, and the Mediterranean. Portions of Azerbaijan, Georgia, Kazakhstan, Russia, and Turkey fall within both Europe and Asia, but in every instance the larger section is in Asia.

These countries are considered part of both continents. Armenia and Cyprus, which lie completely in Western Asia, are geopolitically European countries.

Asia usually incorporates all the islands of the Philippines, Malaysia, and Indonesia. The islands of the Pacific are often lumped with Australia into a "land mass" termed Oceania or Australasia. Africa's northeast extremity is frequently delimited at the Isthmus of Suez, but for geopolitical purposes, the Egyptian Sinai Peninsula is often included as part of Africa.

Although the above groupings are the most common, different continental dispositions are recognized or taught in certain parts of the world, with some arrangements more heavily based on cultural spheres rather than physical geographic considerations.

Based on the seven-continent model, and grouping islands with adjacent continents, Africa has the most countries with 54. Europe contains 49 countries and Asia 48, but these two continents share five countries: Azerbaijan, Georgia, Kazakhstan, Russia, and Turkey. North America consists of 23 sovereign states, Oceania has 14, and South America 12.

Maritime claims: a variety of situations exist, but in general, most countries make the following claims measured from the mean low-tide baseline as described in the 1982 UN Convention on the Law of the Sea: territorial sea—12 nm, contiguous zone—24 nm, and exclusive economic zone—200 nm; additional zones provide for exploitation of continental shelf resources and an exclusive fishing zone; boundary situations with neighboring states prevent many countries from extending their fishing or economic zones to a full 200 nm

Climate: a wide equatorial band of hot and humid tropical climates, bordered north and south by subtropical temperate zones that separate two large areas of cold and dry polar climates

Terrain: the greatest ocean depth is the Mariana Trench at -10,924 m in the Pacific Ocean

Elevation: *mean elevation:* 840 m

elevation extremes: *lowest point:* Bentley Subglacial Trench (Antarctica) -2,555 m (in the oceanic realm, Challenger Deep in the Mariana Trench is the lowest point, lying -10,924 m below the surface of the Pacific Ocean)

highest point: Mount Everest 8,850 m

top ten highest mountains (measured from sea level): Mount Everest (China-Nepal) 8,850 m; K2 (Pakistan) 8,611 m; Kanchenjunga (India-Nepal) 8,598 m; Lhotse (Nepal) 8,516 m; Makalu (China-Nepal) 8,463 m; Cho Oyu (China-Nepal) 8,201 m; Dhaulagiri (Nepal) 8,167 m; Manaslu (Nepal) 8,163 m; Nanga Parbat (Pakistan) 8,125 m; Anapurna (Nepal) 8,091 m

note: Mauna Kea (United States) is the world's tallest mountain as measured from base to summit; the peak of this volcanic colossus lies on the island of Hawaii, but its base begins more than 70 km offshore and at a depth of about 6,000 m; total height estimates range from 9,966 m to 10,203 m

highest point on each continent: Asia—Mount Everest (China-Nepal) 8,850 m; South America—Cerro Aconcagua (Argentina) 6,960 m; North America—Denali (Mount McKinley) (United States) 6,190 m; Africa—Kilimanjaro (Tanzania) 5,895 m; Europe—El'brus (Russia) 5,633 m; Antarctica—Vinson Massif 4,897 m; Australia—Mount Kosciuszko 2,229 m

Natural resources: the rapid depletion of nonrenewable mineral resources, the depletion of forest areas and wetlands, the extinction of animal and plant species, and the deterioration in air and water quality (especially in some countries of Eastern Europe, the former USSR, and China) pose serious long-term problems that governments and peoples are only beginning to address

Irrigated land: 3,242,917 sq km (2012 est.)

Total renewable water resources: 53,789.29 cu km (2011)

Natural hazards: large areas subject to severe weather (tropical cyclones); Natural disasters (earthquakes, landslides, tsunamis, volcanic eruptions)

volcanism: volcanism is a fundamental driver and consequence of plate tectonics, the physical process reshaping the Earth's lithosphere; the world is home to more than 1,500 potentially active volcanoes, with over 500 of these having erupted in historical times; an estimated 500 million people live near these volcanoes; associated dangers include lava flows, lahars (mudflows), pyroclastic flows, ash clouds, ash fall, ballistic projectiles, gas emissions, landslides, earthquakes, and tsunamis; in the 1990s, the International Association of Volcanology and Chemistry of the Earth's Interior, created a list of 16 Decade Volcanoes worthy of special study because of their great potential for destruction: Avachinsky-Koryaksky (Russia), Colima (Mexico), Etna (Italy), Galeras (Colombia), Mauna Loa (United States), Merapi (Indonesia), Nyiragongo (Democratic Republic of the Congo), Rainier (United States), Sakurajima (Japan), Santa Maria (Guatemala), Santorini (Greece), Taal (Philippines), Teide (Spain), Ulawun (Papua New Guinea), Unzen (Japan), Vesuvius (Italy)

Environment—current issues: large areas subject to overpopulation, industrial disasters, pollution (air, water, acid rain, toxic substances), loss of vegetation (overgrazing, deforestation, desertification), loss of wildlife, soil degradation, soil depletion, erosion; global warming becoming a greater concern

Geography—note: the world is now thought to be about 4.55 billion years old, just about one-third of the 13.8-billion-year age estimated for the universe

Languages: Mandarin Chinese 11.82%, Spanish 5.77%, English 4.67%, Hindi 3.62%, Arabic 3.3%, Portuguese 2.83%, Bengali 2.69%, Russian 2.33%, Japanese 1.7%, Javanese 1.15%, Standard German 1.09% (2014 est.)

note 1: percents are for “first language” speakers only; the six UN languages—Arabic, Chinese (Mandarin), English, French, Russian, and Spanish (Castilian)—are the mother tongue or second language of about half of the world’s population, and are the official languages in more than half the states in the world; some 150 to 200 languages have more than a million speakers

note 2: all told, there are an estimated 7,100 languages spoken in the world; approximately 80% of these languages are spoken by less than 100,000 people; about 140 languages are spoken by less than 10 people; communities that are isolated from each other in mountainous regions often develop multiple languages; Papua New Guinea, for example, boasts about 839 separate languages

note 3: approximately 2,300 languages are spoken in Asia, 2,140, in Africa, 1,310 in the Pacific, 1,060 in the Americas, and 290 in Europe (2016)

Administrative divisions: 195 countries, 72 dependent areas and other entities

Legal system: the legal systems of nearly all countries are generally modeled upon elements of five main types: civil law (including French law, the Napoleonic Code, Roman law, Roman-Dutch law, and Spanish law); common law (including English and US law); customary law; mixed or pluralistic law; and religious law (including Islamic law); an additional type of legal system—International law—governs the conduct of independent nations in their relationships with one another

international law organization participation: all members of the UN are parties to the statute that established the International Court of Justice (ICJ) or World Court; 61 countries have accepted jurisdiction of the ICJ as compulsory with reservations and 11 countries have accepted ICJ jurisdiction as compulsory without reservations; states parties to the Rome Statute of the International Criminal Court (ICCt) are those countries that have ratified or acceded to the Rome Statute, the treaty that established the Court; a total of 123 (effective 2 January 2015) countries have accepted jurisdiction of the ICCt (see Appendix B for a clarification on the differing mandates of the ICJ and ICCt)

Economy—overview: The international financial crisis of 2008–09 led to the first downturn in global output since 1946 and presented the world with a major new challenge: determining what mix of fiscal and monetary policies to follow to restore growth and jobs, while keeping inflation and debt under control. Financial stabilization and stimulus programs that started in 2009–11, combined with lower tax revenues in 2009–10, required most countries to run large budget deficits. Treasuries issued new public debt—totaling \$9.1 trillion since 2008—to pay for the additional expenditures. To keep interest rates low, most central banks monetized that debt, injecting large sums of money into their

economies—between December 2008 and December 2013 the global money supply increased by more than 35%. Governments are now faced with the difficult task of spurring current growth and employment without saddling their economies with so much debt that they sacrifice long-term growth and financial stability. When economic activity picks up, central banks will confront the difficult task of containing inflation without raising interest rates so high they snuff out further growth.

Fiscal and monetary data for 2013 are currently available for 180 countries, which together account for 98.5% of world GDP. Of the 180 countries, 82 pursued unequivocally expansionary policies, boosting government spending while also expanding their money supply relatively rapidly—faster than the world average of 3.1%; 28 followed restrictive fiscal and monetary policies, reducing government spending and holding money growth to less than the 3.1% average; and the remaining 70 followed a mix of counterbalancing fiscal and monetary policies, either reducing government spending while accelerating money growth, or boosting spending while curtailing money growth. (For more information, see attached spreadsheet, Fiscal and Monetary Data, 2008–2012.) In 2013, for many countries the drive for fiscal austerity that began in 2011 abated. While 5 out of 6 countries slowed spending in 2012, only 1 in 2 countries slowed spending in 2013. About 1 in 3 countries actually lowered the level of their expenditures. The global growth rate for government expenditures increased from 1.6% in 2012 to 5.1% in 2013, after falling from a 10.1% growth rate in 2011. On the other hand, nearly 2 out of 3 central banks tightened monetary policy in 2013, decelerating the rate of growth of their money supply, compared with only 1 out of 3 in 2012. Roughly 1 of 4 central banks actually withdrew money from circulation, an increase from 1 out of 7 in 2012. Growth of the global money supply, as measured by the narrowly defined M1, slowed from 8.7% in 2009 and 10.4% in 2010 to 5.2% in 2011, 4.6% in 2012, and 3.1% in 2013. Several notable shifts occurred in 2013. By cutting government expenditures and expanding money supplies, the US and Canada moved against the trend in the rest of the world. France reversed course completely. Rather than reducing expenditures and money as it had in 2012, it expanded both. Germany reversed its fiscal policy, sharply expanding federal spending, while continuing to grow the money supply. South Korea shifted monetary policy into high gear, while maintaining a strongly expansionary fiscal policy. Japan, however, continued to pursue austere fiscal and monetary policies. Austere economic policies have significantly affected economic performance. The global budget deficit narrowed to roughly \$2.7 trillion in 2012 and \$2.1 trillion in 2013, or 3.8% and 2.5% of World

GDP, respectively. But growth of the world economy slipped from 5.1% in 2010 and 3.7% in 2011, to just 3.1% in 2012, and 2.9% in 2013.

Countries with expansionary fiscal and monetary policies achieved significantly higher rates of growth, higher growth of tax revenues, and greater success reducing the public debt burden than those countries that chose contractionary policies. In 2013, the 82 countries that followed a pro-growth approach achieved a median GDP growth rate of 4.7%, compared to 1.7% for the 28 countries with restrictive fiscal and monetary policies, a difference of 3 percentage points. Among the 82, China grew 7.7%, Philippines 6.8%, Malaysia 4.7%, Pakistan and Saudi Arabia 3.6%, Argentina 3.5%, South Korea 2.8%, and Russia 1.3%, while among the 28, Brazil grew 2.3%, Japan 2.0%, South Africa 2.0%, Netherlands -0.8%, Croatia -1.0%, Iran -1.5%, Portugal -1.8%, Greece -3.8%, and Cyprus -8.7%.

Faster GDP growth and lower unemployment rates translated into increased tax revenues and a less cumbersome debt burden. Revenues for the 82 expansionary countries grew at a median rate of 10.7%, whereas tax revenues fell at a median rate of 6.8% for the 28 countries that chose austere economic policies. Budget balances improved for about three-quarters of the 28, but, for most, debt grew faster than GDP, and the median level of their public debt as a share of GDP increased 9.1 percentage points, to 59.2%. On the other hand, budget balances deteriorated for most of the 82 pro-growth countries, but GDP growth outpaced increases in debt, and the median level of public debt as a share of GDP increased just 1.9%, to 39.8%.

The world recession has suppressed inflation rates—world inflation declined 1.0 percentage point in 2012 to about 4.1% and 0.2 percentage point to 3.9% in 2013. In 2013 the median inflation rate for the 82 pro-growth countries was 1.3 percentage points higher than that for the countries that followed more austere fiscal and monetary policies. Overall, the latter countries also improved their current account balances by shedding imports; as a result, current account balances deteriorated for most of the countries that pursued pro-growth policies. Slow growth of world income continued to hold import demand in check and crude oil prices fell. Consequently, the dollar value of world trade grew just 1.3% in 2013.

Beyond the current global slowdown, the world faces several long standing economic challenges. The addition of 80 million people each year to an already overcrowded globe is exacerbating the problems of pollution, waste-disposal, epidemics, water-shortages, famine, over-fishing of oceans, deforestation, desertification, and depletion of non-renewable resources. The nation-state, as a bedrock economic-political institution, is steadily losing control over international flows of

people, goods, services, funds, and technology. The introduction of the euro as the common currency of much of Western Europe in January 1999, while paving the way for an integrated economic powerhouse, has created economic risks because the participating nations have varying income levels and growth rates, and hence, require a different mix of monetary and fiscal policies. Governments, especially in Western Europe, face the difficult political problem of channeling resources away from welfare programs in order to increase investment and strengthen incentives to seek employment. Because of their own internal problems and priorities, the industrialized countries are unable to devote sufficient resources to deal effectively with the poorer areas of the world, which, at least from an economic point of view, are becoming further marginalized. The terrorist attacks on the US on 11 September 2001 accentuated a growing risk to global prosperity—the diversion of resources away from capital investments to counter-terrorism programs.

Despite these vexing problems, the world economy also shows great promise. Technology has made possible further advances in a wide range of fields, from agriculture, to medicine, alternative energy, metallurgy, and transportation. Improved global communications have greatly reduced the costs of international trade, helping the world gain from the international division of labor, raise living standards, and reduce income disparities among nations. Much of the resilience of the world economy in the aftermath of the financial crisis resulted from government and central bank leaders around the globe working in concert to stem the financial onslaught, knowing well the lessons of past economic failures.

Transportation—note: the international Maritime Bureau (IMB) reports that 2014 saw a continued decrease in global pirate activities declining 7% over 2013; in 2014, pirates attacked a total of

245 ships world-wide including hijacking 21 ships, capturing 442 seafarers, and killing 4; the Horn of Africa continued to see a drop in pirate activities with only 11 incidents in 2014 compared with 15 in 2013 and 236 in 2011; the decrease in successful pirate attacks off the Horn of Africa is due, in part, to more aggressive anti-piracy operations by international Naval forces, the hardening of vessels, and the increased use of armed security teams aboard merchant ships; despite these preventative measures, the assessed risk remains high; attacks in the Straits of Malacca and South China Sea accounted for 55% of ships attacked in 2014; West African piracy is a growing threat accounting for 16% of all attacks in 2014; Nigerian pirates are very aggressive, operating as far as 200 nm offshore and linked with at least four hijackings that occurred in this area; attacks in South Asian waters remain at low levels although incidents have increased each year since 2010 reaching 34 in 2014; as of October 2015, there were 190 attacks worldwide with 15 hijackings in the Straits of Malacca/South China Sea region and West African waters

Disputes—international: stretching over 250,000 km, the world's 325 international land boundaries separate 195 independent states and 71 dependencies, areas of special sovereignty, and other miscellaneous entities; ethnicity, culture, race, religion, and language have divided states into separate political entities as much as history, physical terrain, political fiat, or conquest, resulting in sometimes arbitrary and imposed boundaries; most maritime states have claimed limits that include territorial seas and exclusive economic zones; overlapping limits due to adjacent or opposite coasts create the potential for 430 bilateral maritime boundaries of which 209 have agreements that include contiguous and non-contiguous segments; boundary, borderland/resource, and territorial disputes vary in intensity from managed or dormant to violent or militarized; undemarcated, indefinite, porous, and unmanaged boundaries tend to encourage illegal cross-border activities, uncontrolled migration, and confrontation; territorial disputes may evolve from historical and/or cultural claims, or they may be brought on by resource competition; ethnic and cultural clashes continue to be responsible for much of the territorial fragmentation and internal displacement of the estimated

20.8 million people and cross-border displacements of approximately 12.1 million refugees and asylum seekers around the world as of mid-2013; over half a million refugees were repatriated during 2012; other sources of contention include access to water and mineral (especially hydrocarbon) resources, fisheries, and arable land; armed conflict prevails not so much between the uniformed armed forces of independent states as between stateless armed entities that detract from the sustenance and welfare of local populations, leaving the community of nations to cope with resultant refugees, hunger, disease, impoverishment, and environmental degradation

Refugees and internally displaced persons: the UN High Commissioner for Refugees (UNHCR) estimated that as of the end of 2015 there were 65.3 million people forcibly displaced worldwide, the highest level ever recorded; this includes 21.3 million refugees, 3.2 million asylum seekers, and 40.8 million conflict

IDPs: the UNHCR estimates there are currently at least 10 million stateless persons (2016)

Trafficking in persons: *current situation:* the Inter National Labour Organization conservatively estimated that 20.9 million people in 2012 were victims of forced labor, representing the full range of human trafficking (also referred to as “modern-day slavery”) for labor and sexual exploitation; about one-third of reported cases involved crossing international borders, which is often associated with sexual exploitation; trafficking in persons is most prevalent in southeastern Europe, Eurasia, and Africa and least frequent in EU member states, Canada, the US, and other developed countries (2012)

Tier 2 Watch List: countries that do not fully comply with the minimum standards for the elimination of trafficking but are making significant efforts to do so; (44 countries) Antigua and Barbuda, Bolivia, Botswana, Bulgaria, Burkina Faso, Burma, Cambodia, China, Democratic Republic of the Congo, Republic of the Congo, Costa Rica, Cuba, Djibouti, Egypt, Gabon, Ghana, Guinea, Guyana, Haiti, Jamaica, Laos, Lebanon, Lesotho, Malaysia, Maldives, Mali, Mauritius, Namibia, Pakistan, Papua New Guinea, Qatar, Saudi Arabia, Saint Vincent and the Grenadines, Solomon Islands, Sri Lanka, Sudan, Suriname, Tanzania, Timor-Leste, Trinidad and Tobago, Tunisia, Turkmenistan, Ukraine, Uzbekistan

Tier 3: countries that neither satisfy the minimum standards for the elimination of trafficking nor demonstrate a significant effort to do so; (23 countries) Algeria, Belarus, Belize, Burundi, Central African Republic, Comoros, Equatorial Guinea, Eritrea, The Gambia, Guinea-Bissau, Iran, North Korea, Kuwait, Libya, Marshall Islands, Mauritania, Russia, South Sudan, Syria, Thailand, Venezuela, Yemen, Zimbabwe

(2015)

Illicit drugs: cocaine: worldwide coca leaf cultivation in 2013 likely amounted to 165,000 hectares, assuming a stable crop in Bolivia; Colombia produced slightly less than half of the worldwide crop, followed by Peru and Bolivia; potential pure cocaine production increased 7% to 640 metric tons in 2013; Colombia conducts an aggressive coca eradication campaign, Peru has increased its eradication efforts, but remains hesitant to eradicate coca in key growing areas

opiates: worldwide illicit opium poppy cultivation increased in 2013, with potential opium Production reaching 6,800 metric tons; Afghanistan is world's primary opium Producer, accounting for 82% of the global supply; Southeast Asia was responsible for 12% of global opium; Pakistan produced 3% of global opium; Latin america produced 4% of global opium, and most was refined into heroin destined for the US market (2015)

Background: North Yemen became independent from the Ottoman Empire in 1918. The British, who had set up a protectorate area around the southern port of Aden in the 19th century, withdrew in 1967 from what became South Yemen. Three years later, the southern Government adopted a Marxist orientation. The massive exodus of hundreds of thousands of Yemenis from the south to the north contributed to two decades of hostility between the states. The two countries were formally unified as the Republic of Yemen in 1990. A southern secessionist movement and brief civil war in 1994 was quickly subdued. In 2000, Saudi Arabia and Yemen agreed to delineate their border. Fighting in the northwest between the government and the Huthis, a Zaydi Shia Muslim minority, began in

2004 and has since resulted in six rounds of fighting that ended in early 2010 with a cease-fire. The southern secessionist movement was revitalized in 2008. Public rallies in Sana'a against then President SALIH—inspired by similar demonstrations in Tunisia and Egypt—slowly built momentum starting in late January 2011 fueled by complaints over high unemployment, poor economic conditions, and corruption. By the following month, some protests had resulted in violence, and the demonstrations had spread to other major cities. By March the opposition had hardened its demands and was unifying behind calls for SALIH's immediate ouster. In April 2011, the Gulf Cooperation Council (GCC), in an attempt to mediate the crisis in Yemen, proposed the GCC Initiative, an agreement in which the president would step down in exchange for immunity from prosecution. SALIH's refusal to sign an agreement led to further violence. The UN Security Council passed Resolution 2014 in October 2011 calling for an end to the violence and completing a power transfer deal. In November 2011, SALIH signed the GCC Initiative to step down and to transfer some of his powers to Vice President Abd Rabbuh Mansur HADI. Following HADI's election victory in February 2012, SALIH formally transferred his powers. In accordance with the GCC initiative, Yemen launched a National Dialogue Conference (NDC) in March 2013 to discuss key constitutional, political, and social issues. HADI concluded the NDC in January 2014. Subsequent steps in the transition process include constitutional drafting, a constitutional referendum, and National elections. Since the Arab Awakening in 2011, the Huthis have expanded their influence, culminating in a major offensive against military units and tribes affiliated with their Yemeni rivals and enabling their forces to overrun the capital, Sana'a, in September 2014. In January 2015, the Huthis attacked the presidential palace and President HADI's residence and surrounded key government facilities, prompting HADI and the cabinet to submit their resignations. HADI fled to Aden, and in February 2015 rescinded his resignation. He subsequently escaped to Saudi Arabia and asked the GCC to intervene militarily in Yemen to protect the legitimate government from the Huthis. In March, the Kingdom of Saudi Arabia launched Operation Decisive Storm, a series of airstrikes against Huthi and Huthi-affiliated forces. In April 2015, the Saudi Government announced completion of the operation and initiated Operation Restoring Hope, which focuses on humanitarian aid and a return to political dialogue. However, fighting continued through the remainder of 2015 and into early 2016. In April, the UN brokered a "cessation of hostilities" among the warring parties and initiated peace talks in Kuwait, but by early June the talks had stalled.

Economy—overview: Yemen is a low-income country that faces difficult long-term challenges to stabilizing and growing its economy, and the current conflict has only exacerbated those issues. The ongoing war has halted Yemen's exports, pressured the currency's exchange rate, accelerated inflation, severely limited food and fuel imports, and caused widespread damage to infrastructure. At least 82% of the population is in need of humanitarian assistance. Prior to the start of the conflict in 2014, Yemen was highly dependent on declining oil resources for revenue. Oil and gas earnings accounted for roughly 25% of GDP and 65% of government revenue. The Yemeni Government regularly faced annual budget shortfalls and has tried to diversify the Yemeni economy through a reform program designed to bolster non-oil sectors of the economy and foreign investment. As part of these reform efforts, Yemen exported its first liquefied Natural gas in October 2009. The international community supported Yemen's efforts toward economic and political reform in part by establishing the Friends of Yemen group. In 2012, the Friends of Yemen pledged nearly \$7 billion in assistance to Yemen. In July 2014, the government continued reform efforts by eliminating some fuel subsidies and in August 2014, the IMF approved a three-year, \$570 million Extended Credit Facility for Yemen.

However, the conflict that began in 2014 stalled these reform efforts. Rebel Huthi groups have interfered with Ministry of Finance and Central Bank operations and diverted funds for their own use. Yemen's Central Bank reserves, which stood at \$5.2 billion prior to the conflict, currently stand at \$1.5 billion. The Central Bank is exposed to

approximately \$7 billion in overdraft, more than three times the legal limit, directly linked to the Houthis withdrawing \$116 million on a monthly basis. The private sector is hemorrhaging, with almost all businesses making substantial layoffs. The Port of Hudaydah, which handles 60% of Yemen's commercial traffic, was damaged in August 2015 as a result of the conflict and is only operating at 50% capacity. Access to food and other critical commodities such as medical equipment is limited across the country due to security issues on the ground. The Social Welfare Fund, a cash transfer program for Yemen's neediest, is no longer operational and has not made any disbursements since late 2014.

Yemen will require significant international assistance during and after the protracted conflict to stabilize its economy. Long-term challenges include a high population growth rate, high unemployment, declining water resources, and severe food scarcity.

IDPs: 2,053,093 (conflict in Sa'ada Governorate; clashes between al-Qa'ida in the Arabian Peninsula and government forces) (2016)

Trafficking in persons: current situation: Yemen is a source and, to a lesser extent, transit and destination country for men, women, and children subjected to forced labor and women and children subjected to sex trafficking; trafficking activities grew in Yemen in 2014, as the country's security situation deteriorated and poverty worsened; armed groups increased their recruitment of Yemeni children as combatants or checkpoint guards, and the Yemeni military and security forces continue to use child soldiers; some other Yemeni children, mostly boys, migrate to Yemeni cities or Saudi Arabia and, less frequently Oman, where they end up as beggars, drug smugglers, prostitutes, or forced laborers in domestic service or small shops; Yemeni children increasingly are also subjected to sex trafficking in country and in Saudi Arabia; tens of thousands of Yemeni migrant workers deported from Saudi Arabia and thousands of Syrian refugees are vulnerable to trafficking; addition ally, Yemen is a

destination and transit country for women and children from the Horn of Africa who are looking for work or receive fraudulent job offers in the Gulf states but are subjected to sexual exploitation or forced labor upon arrival; reports indicate that adults and children are still sold or inherited as slaves in Yemen

tier rating: *Tier 3*—Yemen does not fully comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so; weak government institutions, corruption, economic problems, security threats, and poor law enforcement capabilities impeded the government's ability to combat human trafficking; not all forms of trafficking are criminalized, and officials continue to conflate trafficking and smuggling; the status of an anti-trafficking law drafted with assistance from an international organization remains unknown following the dissolution of the government in January 2015; the government did not report efforts to investigate, prosecute, or convict anyone of trafficking or slavery offenses, including complicit officials, despite reports of officials willfully ignoring trafficking crimes and using child soldiers in the government's armed forces; the government acknowledged the use of child soldiers and signed a UN action plan to end the practice in 2014 but made no efforts to release child soldiers from the military and provide them with rehabilitative services; authorities failed to identify victims and refer them to protective services; the status of a draft National anti-trafficking strategy remains unknown (2015)

Background: The territory of Northern Rhodesia was administered by the former British South Africa Company from 1891 until it was taken over by the UK in 1923. During the 1920s and 1930s, advances in mining spurred development and immigration. The name was changed to Zambia upon independence in 1964. In the 1980s and 1990s, declining copper prices, economic mismanagement, and a prolonged drought hurt the economy. Elections in 1991 brought an end to one-party rule and propelled the Movement for Multiparty Democracy (MMD) to government. The subsequent vote in 1996, however, saw increasing harassment of opposition parties and abuse of state media and other resources. The election in 2001 was marked by administrative problems, with three parties filing a legal petition

challenging the election of ruling party candidate Levy MWANAWASA. MWANAWASA was reelected in 2006 in an election that was deemed free and fair. Upon his death in August 2008, he was succeeded by his vice president, Rupiah BANDA, who won a special presidential byelection later that year. The MMD and BANDA lost to the Patriotic Front (PF) and Michael SATA in the 2011 general elections. SATA, however, presided over a period of haphazard economic management and attempted to silence opposition to PF policies. SATA died in October 2014 and was succeeded by his vice president, Guy SCOTT, who served as interim president until special elections were held in January 2015. Edgar LUNGU won the presidential by election and will complete SATA's term, which expires in August 2016 when new presidential, as well as parliamentary and local elections, will be held.

Economy—overview: Zambia has had one of the world’s fastest growing economies for the past ten years, with real GDP growth averaging roughly 6.7% per annum, though growth slowed in 2015 to just over 3%, due to falling copper prices, reduced power generation, and depreciation of the kwacha. Zambia’s lack of economic diversification and dependency on copper as its sole major export makes it vulnerable to fluctuations in the world commodities market and prices turned downward in 2015 due to declining demand from China; Zambia was overtaken by the Democratic Republic of Congo as Africa’s largest copper producer. Despite recent strong economic growth and its status as a lower middle-income country, widespread and extreme rural poverty and high unemployment levels remain significant problems, made worse by a high birth rate, a relatively high HIV/AIDS burden, and by market-distorting agricultural and energy policies. Economic policy inconsistency and poor budget execution in recent years has hindered the economy and contributed to weakness in the kwacha, which was Africa’s worst performing currency during 2015. Zambia has raised \$7 billion from international investors by issuing separate sovereign bonds in September 2012, April 2014, and July 2015, significantly increasing the country’s public debt as a share of GDP.

Poor management of water resources has also contributed to a power generation shortage, which has hampered industrial productivity and contributed to an increase in year-on-year inflation to 23% by March 2016. Zambia’s currency, the kwacha, also depreciated sharply against the dollar through 2015, before the central bank restricted lending.

Background: The UK annexed Southern Rhodesia from the former British South Africa Company in 1923. A 1961 constitution was formulated that favored whites in power. In 1965 the government unilaterally declared its independence, but the UK did not recognize the act and demanded more complete voting rights for the black African majority in the country (then called Rhodesia). UN sanctions and a guerrilla uprising finally led to free elections in 1979 and

independence (as Zimbabwe) in 1980. Robert MUGABE, the nation's first prime minister, has been the country's only ruler (as president since 1987) and has dominated the country's political system since independence. His chaotic land redistribution campaign, which began in 1997 and intensified after 2000, caused an exodus of white farmers, crippled the economy, and ushered in widespread shortages of basic commodities. Ignoring international condemnation, MUGABE rigged the 2002 presidential election to ensure his reelection.

In April 2005, the capital city of Harare embarked on Operation Restore Order, ostensibly an urban ration alization program, which resulted in the destruction of the homes or businesses of 700,000 mostly poor supporters of the opposition. MUGABE in June 2007 instituted price controls on all basic commodities causing panic buying and leaving store shelves empty for months. General elections held in March 2008 contained irregularities but still amounted to a censure of the ZANU-PF-led government with the opposition winning a majority of seats in parliament. Movement for Democratic Change—Tsvangirai opposition leader Morgan TSVANGIRAI won the most votes in the presidential poll, but not enough to win outright. In the lead up to a run-off election in June 2008, considerable violence against opposition party members led to the withdrawal of TSVANGIRAI from the ballot. Extensive evidence of violence and intimidation resulted in international condemnation of the process. Difficult negotiations over a power-sharing “government of National unity,” in which MUGABE remained president and TSVANGIRAI became prime minister, were finally settled in February 2009, although the leaders failed to agree upon many key outstanding governmental issues. MUGABE was reelected president in June 2013 in balloting that was severely flawed and Internationally condemned. As a prerequisite to holding the election, Zimbabwe enacted a new constitution by referendum, although many provisions in the new constitution have yet to be codified in law.

Economy—overview: Zimbabwe's economy depends heavily on its mining and agriculture sectors. Following a decade of contraction from 1998 to 2008, the economy recorded real growth of more than 10% per year in the period 2010–13, before slowing to roughly 3% in 2014 due to poor harvests, low diamond revenues, and decreased investment. Lower mineral prices, infrastructure and regulatory deficiencies, a poor investment climate, a large public and external debt burden, and extremely high government wage expenses impede the country's economic performance.

Until early 2009, the Reserve Bank of Zimbabwe (RBZ) routinely printed money to fund the budget deficit, causing hyperinflation. Dollarization in early 2009—which allowed currencies such as the Botswana pula, the South Africa rand, and the US dollar to be used locally—ended hyperinflation and reduced inflation below 10% per year. The RBZ introduced bond coins denominated in 1, 5, 10, and 25 cent increments on a par with the US dollar in December 2014, more than five years after the Zimbabwe dollar was taken out of circulation. In January 2015, as part of the government's effort to boost trade and attract foreign investment, the RBZ announced that the Chinese renminbi, Indian rupee, Australian dollar, and Japanese yen would be accepted as legal tender in Zimbabwe.

Zimbabwe's government entered a second Staff Monitored Program with the IMF in 2014 and undertook other measures to reengage with international financial institutions. Foreign and domestic investment continues to be hindered by the lack of clarity regarding the government's Indigenization and Economic Empowerment Act. In 2015 the depreciation of the South African rand against the US dollar has led to deflation in Zimbabwe as prices for South African imports decline while the costs of domestic production in US dollars remains stable.

Telephone system: *general assessment:* privatization and competition have driven rapid expansion of telecommunications, particularly cellular voice and mobile broadband, in recent years; continued economic instability and infrastructure limitations, such as reliable power, hinder progress

domestic: consists of microwave radio relay links, open-wire lines, radiotelephone communication stations, fixed wireless local loop installations, fiber optic cable, VSAT terminals, and a substantial mobile-cellular network; Internet connection is most readily available in Harare and major towns; 1 government owned and 3 private cellular providers; 3G and VoIP services are widely available with 4G/LTE service being deployed

International: country code—263; satellite earth stations—2 Intelsat; 5 international digital gateway exchanges; fiber optic connections to neighboring states provide access to international networks via undersea cable (2015)

Broadcast media: government owns all local radio and TV stations; foreign shortwave broadcasts and satellite TV are available to those who can afford antennas and receivers; in rural areas, access to TV broadcasts is extremely limited (2007)

Radio broadcast stations: AM 7, FM 20 (plus 17 repeater stations), shortwave 1 (1998)

Television broadcast stations: 16 (1997)

Waterways: (some navigation possible on Lake Kariba) (2011)

Ports and terminals: *river port(s):* Binga, Kariba (Zambezi)

Military branches: Zimbabwe Defense Forces (ZDF); Zimbabwe National Army (ZNA), Air Force of Zimbabwe (AFZ) (2012)

Military service age and obligation: 18–24 years of age for voluntary military service; no conscription; women are eligible to serve (2012)

Military expenditures: 2.79% of GDP (2014)

2.64% of GDP (2013)

2.94% of GDP (2012)

2.05% of GDP (2011)

2.94% of GDP (2010)

country comparison to the world: 22

Disputes—international: Namibia has supported, and in 2004 Zimbabwe dropped objections to, plans between Botswana and Zambia to build a bridge over the Zambezi River, thereby de facto recognizing a short, but not clearly delimited, Botswana-Zambia boundary in the river; South Africa has placed military units to assist police operations along the border of Lesotho, Zimbabwe, and

Mozambique to control smuggling, poaching, and illegal migration

Refugees and internally displaced persons: *IDPs:* undetermined (political violence, violence in Association with the 2008 election, human rights violations, land reform, and economic collapse) (2015)

stateless persons: 300,000 (2015)

Trafficking in persons: *current situation:* Zimbabwe is a source, transit, and destination country for men, women, and children subjected to forced labor and sex trafficking; Zimbabwean women and girls from towns bordering South Africa, Mozambique, and Zambia are subjected to forced labor, including domestic servitude, and prostitution catering to long-distance truck drivers; Zimbabwean men, women, and children experience forced labor in agriculture and domestic servitude in rural areas; family members may recruit children and other relatives from rural areas with promises of work or education in cities and towns where they end up in domestic servitude and sex trafficking; Zimbabwean women and men are lured into exploitative labor situations in South Africa and other neighboring countries

tierrating: Tier 3—Zimbabwe does not fully comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so; the government passed an anti-trafficking law in 2014 defining trafficking in persons as a crime of transportation and failing to capture the key element of the international definition of human trafficking—the purpose of exploitation—which prevents the law from being comprehensive or consistent with the 2000 UN TIP Protocol that Zimbabwe acceded to in 2013; the government did not report on anti-trafficking law enforcement efforts during 2014, and corruption in law enforcement and the judiciary remain a concern; authorities made minimal efforts to identify and protect trafficking victims, relying on NGOs to identify and assist victims; Zimbabwe's 2014 anti-trafficking law required the opening of 10 centers for trafficking victims, but none were established during the year; five existing shelters for vulnerable children and orphans may have accommodated child victims; in January 2015, an inter-ministerial anti-trafficking committee was established, but it is unclear if the committee ever met or initiated any activities (2015)

International Tropical Timber Agreement, 1983

note—abbreviated as Tropical Timber 83

opened for signature—18 November 1983

entered into force—1 April 1985; this agreement was superseded by the International Tropical Timber Agreement, 1994

objective—to provide an effective framework for cooperation between tropical timber producers and consumers and to encourage the development of national policies aimed at sustainable utilization and conservation of tropical forests and their genetic resources

parties—(59) Australia, Austria, Belgium, Bolivia, Brazil, Burma, Cambodia, Cameroon, Canada, Central African Republic, China, Colombia, Democratic Republic of the Congo, Republic of the Congo, Cote d'Ivoire, Denmark, Ecuador, Egypt, EU, Fiji, Finland, France, Gabon, Germany, Ghana, Greece, Guatemala, Guyana, Honduras, India, Indonesia, Ireland, Italy, Japan, South Korea, Liberia, Luxembourg, Malaysia, Mexico, Nepal, Netherlands, NZ, Nigeria, Norway, Panama, Papua New Guinea, Peru, Philippines, Portugal, Russia, Spain, Suriname, Sweden, Switzerland, Thailand, Togo, Trinidad and Tobago, UK, US, Vanuatu, Venezuela

International Tropical Timber Agreement, 1994

note—abbreviated as Tropical Timber 94

opened for signature—1 April 1994

entered into force—1 January 1997 (provisional application)

objective—to provide a framework for international cooperation on conservation and sustainable development of tropical timber and enhance the capacity of members to implement a strategy for achieving exports of tropical timber and timber products from sustainably managed sources by the year 2000; to establish a fund to assist tropical timber producers in obtaining the resources necessary to reach this objective

parties—(61) Australia, Austria, Belgium, Bolivia, Brazil, Burma, Cambodia, Cameroon, Canada, Central African Republic, China, Colombia, Democratic Republic of the Congo, Republic of the Congo, Cote d'Ivoire, Denmark, Ecuador, Egypt, EU, Fiji, Finland, France, Gabon, Germany, Ghana, Greece, Guatemala, Guyana, Honduras, India, Indonesia, Ireland, Italy, Japan, South Korea, Liberia, Luxembourg, Malaysia, Mexico, Nepal, Netherlands, NZ, Nigeria, Norway, Panama, Papua New Guinea, Peru, Philippines, Poland, Portugal, Spain, Suriname, Sweden, Switzerland, Thailand, Togo, Trinidad and Tobago, UK, US, Vanuatu, Venezuela

Kyoto Protocol to the United Nations Framework Convention on Climate Change

note—abbreviated as Climate Change-Kyoto Protocol

opened for signature—16 March 1998

entered into force—23 February 2005

objective—to further reduce greenhouse gas emissions by enhancing the national programs of developed countries aimed at this goal and by establishing percentage reduction targets for the developed countries

parties—(192) Albania, Algeria, Angola, Antigua and Barbuda, Argentina, Armenia, Australia, Austria, Azerbaijan, The Bahamas, Bahrain, Bangladesh, Barbados, Belarus, Belgium, Belize, Benin, Bhutan, Bolivia, Bosnia and Herzegovina, Botswana, Brazil, Brunei, Bulgaria, Burkina Faso, Burma, Burundi, Cambodia, Cameroon, Cape Verde, Central African Republic, Chad, Chile, China, Colombia, Comoros, Democratic Republic of the Congo, Republic of the Congo, Cook Island, Costa Rica, Cote d'Ivoire, Croatia, Cuba, Cyprus, Czech Republic, Denmark, Djibouti, Dominica, Dominican Republic, Ecuador, Egypt, El Salvador, Equatorial Guinea, Eritrea, Estonia, Ethiopia, EU, Fiji, Finland, France, Gabon, The Gambia, Georgia, Germany, Ghana, Greece, Grenada, Guatemala, Guinea, Guinea-Bissau, Guyana, Haiti, Honduras, Hungary, Iceland, India, Indonesia, Iran, Iraq, Ireland, Israel, Italy, Jamaica, Japan, Jordan, Kazakhstan, Kenya, Kiribati, North Korea, South Korea, Kuwait, Kyrgyzstan, Laos, Latvia, Lebanon, Lesotho, Liberia, Libya, Liechtenstein, Lithuania, Luxembourg, Macedonia, Madagascar, Malawi, Malaysia, Maldives, Mali, Malta, Marshall Islands, Mauritania, Mauritius, Mexico, Federated States of Micronesia, Moldova, Monaco, Mongolia, Montenegro, Morocco, Mozambique, Namibia, Nauru, Nepal, Netherlands, NZ, Nicaragua, Niger, Nigeria, Niue, Norway, Oman, Pakistan, Palau, Panama, Papua New Guinea, Paraguay, Peru, Philippines, Poland, Portugal, Qatar, Romania, Russia, Rwanda, Saint

APPENDIX D

GEOPOLITICAL ENTITIES and CODES (formerly FIPS PUB 10-4): FIPS PUB 10-4 was withdrawn by the National Institute of Standards and Technology on September 2, 2008 based on Public Law 104-113 (codified OMB Circular A-119 and the National Technology Transfer and Advancement Act of 1995). The National Geospatial-Intelligence Agency (NGA), as the maintenance authority for FIPS PUB 10-4, has continued to maintain and provide regular updates to its content in a document known as Geopolitical Entities and Codes (GEC) (Formerly FIPS 1PUB 10-4).

ISO 3166: Codes for the Representation of Names of Countries (ISO 3166) is prepared by the International Organization for Standardization. ISO 3166 includes two- and three-character alphabetic codes and three-digit numeric codes that may be needed for activities involving exchange of data with international organizations that have adopted that standard. Except for the numeric codes, ISO 3166 codes have been adopted in the US as FIPS 104-1: American National Standard Codes for the Representation of Names of Countries, Dependencies, and Areas of Special Sovereignty for Information Interchange.

STANAG 1059: Letter Codes for Geographical Entities (8th edition, 2004) is a Standardization Agreement (STANAG) established and maintained by the North Atlantic Treaty Organization (NATO/OTAN) for the purpose of providing a common set of geo-spatial identifiers for countries, territories, and possessions. The 8th edition established trigraph codes for each country based upon the ISO 3166-1 alpha-3 character sets. These codes are used throughout NATO.

Internet: The Internet country code is the two-letter digraph maintained by the International Organization for Standardization (ISO) in the ISO 3166 Alpha-2 list and used by the Internet Assigned Numbers Authority (IANA) to establish country-coded top-level domains (ccTLDs).

APPENDIX E

IHO 23-4th: *Limits of Oceans and Seas*, Special Publication 23, Draft 4th Edition 1986, published by the International Hydrographic Bureau of the International Hydrographic Organization.

IHO 23-3rd: *Limits of Oceans and Seas*, Special Publication 23, 3rd Edition 1953, published by the International Hydrographic Organization.

ACIC M 49-1: *Chart of Limits of Seas and Oceans*, revised January 1958, published by the Aeronautical Chart and Information Center (ACIC), United States Air Force.

DIAM 65-18: *Geopolitical Data Elements and Related Features*, Data Standard No. 4, Defense Intelligence Agency Manual 65-18, December 1994, published by the Defense Intelligence Agency. The US Government has not yet adopted a standard for hydrographic codes similar to the Federal Information Processing Standards (FIPS) 10-4 country codes. The names and limits of the following oceans and seas are not always directly comparable because of differences in the customers, needs, and requirements of the individual organizations. Even the number of principal water bodies varies from organization to organization. *Factbook* users, for example, find the Atlantic Ocean and Pacific Ocean entries useful, but none of the following standards include those oceans in their entirety. Nor is there any provision for combining codes or overcodes to aggregate water bodies. The recently delimited Southern Ocean is not included.

APPENDIX G

Note: At this time, only three countries—Burma, Liberia, and the US—have not adopted the International System of Units (SI, or metric system) as their official system of weights and measures. Although use of the metric system has been sanctioned by law in the US since 1866, it has been slow in displacing the American adaptation of the British Imperial System known as the US Customary System. The US is the only industrialized nation that does not mainly use the metric system in its commercial and standards activities, but there is increasing acceptance in science, medicine, government, and many sectors of industry.

Mathematical Notation	Name
Mathematical Power	
10^{18} or 1,000,000,000,000,000,000	one quintillion
10^{15} or 1,000,000,000,000,000	one quadrillion
10^{12} or 1,000,000,000,000	one trillion
10^9 or 1,000,000,000	one billion
10^6 or 1,000,000	one million
10^3 or 1,000	one thousand
10^2 or 100	one hundred
10^1 or 10	ten
10^0 or 1	one
10^{-1} or 0.1	one-tenth
10^{-2} or 0.01	one-hundredth
10^{-3} or 0.001	one-thousandth
10^{-6} or 0.000 001	one-millionth
10^{-9} or 0.000 000 001	one-billionth
10^{-12} or 0.000 000 000 001	one-trillionth
10^{-15} or 0.000 000 000 000 001	one-quadrillionth
10^{-18} or 0.000 000 000 000 000 001	one-quintillionth
